(Purpose: To add funds to procure four additional KC-10A tanker/cargo aircraft in fiscal 1982)

The PRESIDING OFFICER. The pending question is the amendment of the Senator from Michigan.

TIME LIMITATION REQUEST

Mr. BAKER. Mr. President, I inquire of the Senator from Michigan and the distinguished manager of the bill on the majority side if they will be agreeable to a unanimous-consent order that the debate on this measure will occur as they may prefer but that the vote will occur at 2 p.m.?

Mr. LEVIN. I appreciate that.

Mr. BAKER. I thank the Senator.

I intend to ask that the Senate stand in recess from 12 o'clock until 2 p.m. I can adjust that time, but there are caucuses on both sides of the aisle that such a recess would facilitate.

Will 20 minutes provide enough time for debate?

Mr. LEVIN. I shall try to end it in 20 or 25 minutes, but it may take a few minutes more than 20 depending on the other side. May I have a few additional minutes?

ORDER FOR RECESS FROM 12:15 P.M. UNTIL 2 P.M. TODAY

Mr. BAKER. Let me put the request this way: I ask unanimous consent that

at the conclusion of the debate on the Levin amendment but in no event later than 12:15 p.m. the Senate stand in recess until the hour of 2 p.m.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I further ask unanimous consent that the vote on this amendment, the rollcall, if a rollcall is ordered, occur at 2 p.m. when the Senate reconvenes.

The PRESIDING OFFICER. It is the understanding of the Chair that the rollcall has been ordered.

Mr. BAKER. I thank the Chair.

Mr. President, I ask unanimous consent that that vote occur at 2 p.m. on the reconvening of the Senate after the recess.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. BAKER. Mr. President, I thank the Chair.

Mr. LEVIN. Mr. President, the amendment was introduced last night. It was introduced on behalf of myself, Senators HOLLINGS, NUNN, and PRYOR.

This amendment would restore $220 million to purchase four KC–10A refueling tanker airplanes. I say restore because the Senate had these planes in its authorization bill; the House had the planes in its authorization bill; the planes were in the President's March budget proposal. But then the President sent over some cuts in readiness and operations in October, and a number of those cuts were adopted in conference, including a cut in the number of KC–10 tankers from eight to four. That leaves us below the authorization bills which the Senate and the House had previously adopted.

Even though the conference reports accepted the President's level of four tankers, it was only because, in my opinion, there was no practical way of amending the conference report.

The decision was made certainly by me at that time and, I think, by others, that we would support on the appropriations bill an increase in the level to restore the number of tankers purchased this year from four to eight, as originally intended in March by the President, as clearly intended through the authorization bills by the Senate and by the House.

There has been some question raised as to what is the relationship between this amendment and another amendment that a "Dear Colleague" letter has been sent around on, a "Dear Colleague" letter signed by Senator HOLLINGS and myself, which indicated that we would be offering an amendment to strike the B–1 bomber and to spend the money on readiness items and on the Stealth bomber.

We pointed out in that letter there had been serious cuts in readiness from the levels adopted by the House and the Senate in their authorization bills and the levels established by the President in March, in his March budget, and that we felt the B–1 bomber, because of the inadequacies of it compared with Stealth, was something that should be cut and the money spent instead on readiness, operation, and maintenance and on Stealth.

We decided because of the great interest in the number of items we would have funded with that money to try to add in those items first to the appropriation bill. There was so much support for additional funding for some of these operations, including people who did not want to cut the B–1 program in order to fund them, that we have decided to offer a number of amendments which will make these readiness restorations so that the Senate will have an opportunity to vote on individual amendments doing things such as restoring the Indian Ocean presence and readiness. We have cut that by 25 percent, unbelievable, a 25-percent reduction in Indian Ocean and Persian Gulf readiness.

We have reduced the size of the Army, we have eliminated the B–52 program—part of that has been restored by the Appropriations Committee—but the early retirement has not been totally rescinded because insufficient funds have been placed in this appropriation bill to eliminate that early retirement and to go back to our planned B–52 program.

Other reductions in our readiness which have been outlined in that "Dear Colleague" letter are now going to be made the subject of individual amendments.

Then, at the end, later on in this debate, we will be offering the B–1 cut itself.

Some of us may want to fund some of these add-ons through the B–1 elimination. Others may want to fund the add-ons which will be proposed in a series of amendments by different Senators in many ways. There are some Senators who may want to simply increase the size of the appropriation bill in order to fund these critical readiness items and the Stealth item. But, in any event, a number of individual Senators will be offering individual amendments on these add-on items, and only at the end, when that process is through, will we be offering the B–1 elimination amendment.

Mr. President, I ask unanimous consent that the "Dear Colleague" letter, which summarizes these additional funding items, these readiness and Stealth items, that has been signed by Senator HOLLINGS and myself be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
Washington, D.C., November 25, 1981.

DEAR COLLEAGUE: The Federal Government is currently experiencing fierce competition for increasingly scarce resources. No where is this more prevalent than in our defense budget. And yet, in spite of this fact, we are embarking on a program to procure three new major strategic systems; the B–1, the ATB, and the M–X missile system. These three systems over the next ten years will require tens of billions of dollars. If we, in fact, pursue this course of action, we will do so at the expense of readiness and force modernization and we will be weaker, rather than stronger, militarily in both strategic and conventional capabilities.

Therefore, we the undersigned intend to offer to the Department of Defense Appropriation Bill for FY 1982, an amendment to delete funding for the B–1B Bomber and allocate these savings to certain Defense modernization and readiness priorities.

Our amendment would reallocate a portion of the B–1B funding for the following items:

(A) Additional funding for restoration of full amount of requested Navy steaming hour program, $73 million;

(B) Additional funding for restoration of reductions in Air Force and Army active end strengths, $77 million;

(C) Additional funds for acceleration of advanced technology bomber, $300 million;

(D) Additional funding for a classified program, $350 million;

(E) Additional funding for procurement of ammunition for the Army, $148 million;

(F) Additional funding for one attack submarine, $518 million;

(G) Additional funding for B–52D modifications/spares, $82 million;

(H) Additional funding for B–52D flight simulator development, $5 million;

(I) Additional funding for Navy fleet modernization program, $80 million;

(J) Additional funding to retain nine ships in the Navy active and reserve fleet, $15 million;

(K) Additional funding to support the Trident submarine program, $20 million;

(L) Additional funding for Army force modernization, $60 million;

(M) Additional funding for procurement of thirty M88A1 recovery vehicles for the Army, $29 million;

(N) Additional funding for procurement of four KC–10A (ATCA) aircraft for the Air Force, $220 million;

(O) Additional funding for procurement of 100 AGM–84A Harpoon missiles for the Navy, $50 million.

We have reached the juncture in defense budgeting where the Congress must exercise its responsibilities and begin to make hard choices. We must begin to choose between competing weapon systems designed for a similar mission and between competing priorities within the overall defense posture.

You will find attached a reprint of Fritz's speech made to the Senate on Monday detailing a rationale for the amendment. If you are interested in co-sponsoring this amendment, please contact Mike Joy at 4–0850 or Peter Lennon at 4–9104.

Sincerely,

CARL LEVIN.
ERNEST F. HOLLINGS.

[From the CONGRESSIONAL RECORD, Nov. 23, 1981]

DEFENSE AND THE B–1 BOMBER

Mr. HOLLINGS. Mr. President, to understand the controversy over the B–1 bomber, a person must appreciate: First, the nature of modern weapons; second, the limits of our economic resources; and third, the limits to the usefulness of a manned penetration bomber.

THE NATURE OF MODERN WEAPONS

The strategy for American survival is premised on the superiority of technology. We do not and cannot compete against the Russians or Chinese militarily on a man-for-man basis. We do not and cannot compete against the Soviets one tank versus one tank.

We have 11,000 tanks while the Soviets have 50,000. How do we hope to fight and win given this ratio? The answer is in a superior tank with a superior tank operator.

We intentionally include on our tanks sophisticated fire control systems advanced suspension systems, laminated armor, and other state-of-the-art gear because we know it is not going to be one-for-one situation. Our one tank must be capable of knocking out 5 or 10 of theirs in order to prevail.

We are constantly hearing today that America's weaponry is too sophisticated, that it contains too much expensive technological gear, and that we cannot find the

skilled personnel to operate and maintain the weaponry. Some argue that all we need is a cheap, "tough" tank—like the Soviets build—to survive better in battlefield conditions.

We could easily produce that kind of tank, if we are ready, willing, and able to produce and man 50,000 of them. This we cannot do. For one thing, we do not intend to have that large a standing Army, so we go for the superior tank, making sure the advanced technology is designed for the needs of the battlefield. This has always been our military approach.

It applies to the shoes the soldier wears as well as to the bombers we send aloft. The constant task facing Congress is to insure that we keep ahead with technology. We want our troops to have the best equipment in every aspect. Of course, we must also be able to afford it.

THE LIMITS OF OUR ECONOMIC RESOURCES

When we fought World War II, an M–1 rifle cost $41.20. A Sherman tank went for $40,000. And a B–17 manned penetration bomber cost $97,000. Right now it appears that the projected cost for each B–1 bomber would be $400 million.

Everyone knows that today we are operating with limited economic resources. In a world reeling under inflation and high interest rates, every program is being cut. While we are trying to increase our defenses, that is not to say we are trying to increase our costs. We must look at each proposed military expenditure from every angle—not only how much it costs, but how much it costs to repair; not only how much one of them costs, but how much do 100 cost and what is the effect on the budget and the economy.

We must make economical buys, and when it comes to bombers they must last. We are not looking at the cost of just long-range bombers, but the cost of medium bombers, the cost of fighter bombers, the cost of fighters, of helicopters, and observation planes all the way down to the Piper Cub. And we must figure the cost of the manned Shuttle because it too has military applications.

These costs must be seen within the larger context of the overall defense budget—the cost of equipping the infantry, the cost of building aircraft carriers and Trident submarines at $2 billion apiece, and the cost of ammunition from the rifle bullet to one piece of ammunition fired from a plane—the Phoenix missle costing over $1 million a copy. Over and above hardware come personnel costs which exceed $100 billion a year.

All these defense costs must be considered against the backdrop of other Government endeavors—like law enforcement, highways, health costs, social security, price supports for agriculture, and aid for small business. Somewhere there is a limit—and we have been exceeding the limit. We have been borrowing from the next generation in order to pay for all this Government. The results—busted budgets, tax cuts written in red ink, and high interest rates.

At $400 million each, the 100 B–1 bombers being asked for will cost us $40 billion; $40 billion over the next 5 years is about what we had hoped to increase the entire defense budget.

For $40 billion, we can buy a lot of sorely needed infantry-fighting vehicles, submarines, tanks, helicopters, destroyers, pre-positioning ships, landing gear for the Marines, and ammunition for everybody.

So before we commit to $40 billion and 5 years on a single weapon, we must stop, look, and listen. We must understand that our conventional forces are in a sorry state of readiness—the principal trouble being that we have denied them the equipment, the flying hours, the steaming hours, and the vehicles necessary for training, mobility, and readiness.

We are 60,000 trucks short in the Army right this minute. Look at our inability to defend against gas or chemical warfare. The next war will not be fought by one soldier just shooting at another man. The field of battle for conventional forces may very well be gassed by our adversary. The Russians have already used gas in Laos, Cambodia, and Afghanistan.

Their infantry wears protective clothing developed for this kind of warfare. In another advance, Soviet troops travel in modern infantry-fighting vehicles. They have 76,000 of these—the United States has none. It is tough to tell the Commandant of the Marine Corps that we cannot give him the gear he needs because the B–1 has just gobbled up all the money. I just did that this week.

We are not prepared to fight a conventional war. Clausewitz said, "History shows that a nation fights the war that it is prepared to fight."

We are not prepared to fight in the Indian Ocean, so we will not. We are not prepared to fight a conventional war in NATO, so we will not. We are only prepared to fight a nuclear war—so we will if one comes. The best way to avoid the nuclear holocaust is to be prepared to fight the conventional battle. But the B–1 is a nuclear carrier. Underprepared for conventional war, the B–1 overprepares us for nuclear.

The Soviets did not march on Angola or Afghanistan with a nuclear attack. They went with conventional forces. For 10 years now, we have been "détenting" and dillying and disarming while the Soviets have been beefing up and outspending us militarily by $500 billion.

We cannot repair this difference in a year. It will take several years. So we must set priorities. Is the primary need another Trident submarine, or is it an aircraft carrier? Is the first order "X" number of tanks, or helicopters? A manned bomber, or more and better equipment for our conventional forces?

I believe the first priority is manpower. I have written about the draft in a previous newsletter. I believe that the one best move to build our military and show our commitment is the universal draft. It would get a cross-section of our society participating in America's defense. It would give us the skills. It would cost less, and it would evidence our will power as well as our military power.

My second priority would be readiness. That includes money for ammunition, money for fuel, money for operations and maintenance of the equipment, and money for adequate flying, steaming, and training hours.

Rather than $40 billion for a single weapon—a manned penetration bomber—I would rather spend that same amount over the next 5 years on fleshing out the Rapid Deployment Force in the Indian Ocean, equipping the Marines, equipping our National Guard and Reserves, refitting nine Navy ships, buying some attack submarines, tanks, helicopters and fighters, and speeding up development of the next generation of manned, penetration bombers—the Stealth.

THE LIMITS TO THE USEFULNESS OF A MANNED PENETRATION BOMBER

So you will understand where I am coming from, I am a strong believer in the military and a strong supporter of the Air Force. At this moment, we have many bombers. We have long-range penetration bombers, such as 345 B–52's and 63 FB–111's. We have many medium- and short-range bombers such as the F–15's, remember the Saudis were asking for bomb racks for their F–15's; hundreds of F–16's, remember this is the plane that Israel used to bomb Baghdad. We soon will have the superior F–18 fighter-bomber by the hundreds. We have A–6's, A–7's, and VSTOL fighter-bombers. I touch on this to emphasize the difference between medium-range bombers and the long-range bombers needed to penetrate Soviet defenses. We are continuing to build and capitalize on America's technology. But as concerns the B–1, there are limits to its ability to penetrate. Generally, there are limits on the manned bomber which makes it necessary for us to put our egg in more than one basket.

Everyone agrees that the B–1 bomber can no longer be depended upon as a penetration weapon after 1990. We know that the B–52, old as it is, can carry us that far. And we know that we cannot get the first squadron of B–1's flying until 1987 at the earliest.

The bottom line then, if everything proceeds on schedule is a $40 billion program to provide penetration for the 3 years between 1987 and 1990. After that the state of Soviet defenses will make it impossible for either the B–52 or the B–1 to get through.

The B–1 has simply become too expensive for its primary mission. Surely it can be used after 1990 as a stand-off cruise missile carrier but paying $400 million a copy for this role is unthinkable. The $400 million cost has been disputed.

But special studies by the General Accounting Office and the Congressional Budget Office confirm this cost.

Finally as a maneuver with the Congress, the Air Force has been citing inflated costs to keep the B–52's going until the 1980's inferring that rather than paying the expense to keep the B–52's in the air, you could use the same money to buy the new B–1.

Whether you go for the B–1 or go for the Stealth or go for both or go for neither, every plan shows that the B–52 must be kept current and flying until 1993. And so those costs will have to be paid.

Then when they are phased out in 1993, the question is: shall they be replaced totally by the Stealths that can penetrate or by the B–1 that cannot or by both—if we had the money.

The B–1 is a superb plane and I wish we had 200 B–1's on the line today. Five years ago, I implored President Carter to move forward with the B–1. Instead we wasted 5 years and $5 billion and the opportunity to have them flying over the kind of reasonable lifetime that such a huge investment requires.

Carter made his decision, the factory has closed down, and the cost has soared from $100 million apiece to $400 million. There is a time for every weapon, and the B–1's is passing.

On November 5, Secretary of Defense Caspar Weinberger testified:

"I think there is no question whatever that we will not be able to use the B–1 as a penetrator after 1990."

Earlier, Secretary Weinberger had emphasized the limits of the B–1 after 1990 by stating:

"If you do the B–1 only you spend a lot of money—again I am trying to guess at the extent of development of the Soviet air defenses, so if I use a couple of years, give me leeway 1989, 1990, probably 1988 to 1989—you lose the ability to penetrate unless someone wants to direct suicide missions and that is not anything I am going to do."

This only confirms a similar statement by Fred C. Ikle, Under Secretary of Defense for Policy before the Armed Services Committee on October 27, 1981.

Recently, the United States has been developing a Stealth or advanced technology bomber. This plane is designed to confuse the enemy radar and fire control system so that it can penetrate successfully and reach targets well within the land mass of the Soviet Union. Some would argue that the technology is unproved, too "chancey" to count on and will not be ready by 1990.

However, the technology has been proved and as former Assistant Secretary of Defense for Policy Perry has stated, it can be developed by 1989.

Wanting both the B–1 and the Stealth, the Air Force is dragging its feet on the Stealth to make it seem that both planes will be necessary.

Accordingly, the administration has re-

quested both the B–1 and the Stealth. Given the limited usefulness of the B–1, given our other defense needs, and given the general state of the budget and the economy, I do not believe we can afford to proceed with both.

It would be far more cost effective, and far better for the overall strength of the military, if we speeded up the Stealth bomber and tried to get it on line a year or two earlier than presently projected.

To understand the limits on manned bombers generally—and to appreciate why proceeding with two new systems is outlandish—we need to remember that America's strategic defense consists of a triad: First, the intercontinental ballistic missile, or ICBM; second, the Poseidon or Trident submarine; and third, the manned bomber.

These provide the options for penetrating the defenses of the Soviet Union over a long distance. If the military need ever comes to penetrate all the way to Moscow, the best way is with a ballistic missile launched from either land or sea.

An almost equally good way is with a cruise missile, whether it is land launched from Europe, submarine launched from the sea, or launched from a B–52 standing off outside the borders of Russia. The most inefficient way is by manned bomber, given Soviet defenses and the vulnerability of the weapon.

So, in recent years, the long-range manned bomber role is being more and more taken over by the small, difficult-to-detect cruise missile. It is relatively cheap, accurate, and better able than a bomber to get through to its target.

Some of our armchair experts argue for the superiority of the bomber over the missile by saying that once the missile is launched, there is no calling it back. My answer is that we better not have a plane with a nuclear bomb wandering around Moscow while we are still wondering if we have given the right order.

In fact, I cannot imagine an American Commander in Chief ordering a manned bomber to attack Moscow unless we are already into a nuclear holocaust.

When that point in warfare has been reached, it seems pretty clear that we would be going with our ICBM's, intermediate ballistic missiles, and cruise missiles.

This is not to say that the role for the manned bomber is finished. But it is to say that it does not have the commanding role it once had. It is now part of a larger weapons inventory that includes faster and more accurate systems.

Some, like the cruise missile, are far cheaper. We can and should retain the ability to penetrate Soviet airspace with a manned bomber. We have that capability with the B–52 which has served us long and well and which can be used to fly those 3 additional years beyond 1987.

After 1987, neither the B–52 nor the B–1 will be able to penetrate Soviet air defcnse. After that, only the Stealth will be able to get through.

So is it not the wisest policy to accelerate Stealth? It will be able to penetrate from the 1990's on, and it can be delivered as early as 1989. By taking this course, we can save the $40 billion and expend it on readiness and in all those other areas of preparedness that we have been short changing for the past decade.

I know this disappoints my friends in the Air Force. Secretary of Defense McNamara back in 1964 canceled the B–70, and in 1977 President Carter canceled the B–1. I am sure by now that if someone could give a guarantee that the Stealth would be built as a replacement for the B–52, the Air Force would abandon its drive for the B–1.

They have been worried for years about a replacement for the B–52 and now they have a President, finally, willing to go along—even though it is economic nonsense.

As a result of this paranoia, the Air Force has requested a $400 million conventional bomber and a $300 million Stealth strategic bomber. For a conventional bomber, we could easily and far more economically beef up our FB–111's at $64 million a copy rather than $400 million as recommended by Gen. Richard H. Ellis, former Commander in Chief of the Strategic Air Command. But we cannot afford the B–1 and the Stealth.

We need to strengthen our Triad with the Stealth. We need to strengthen our overall readiness in defense. The task is to allocate limited resurces. On this basis, I oppose the B–1, favor expediting the Stealth, and favor immediately allocating this $40 billion to readiness.

Mr. LEVIN. I thank the Chair.

Mr. President, less than a month after this body went through a bruising fight on the AWACS and F–15 enhancement package, a package which the administration argued was necessary to protect our interests in the Persian Gulf region, the administration slashed a critical program designed to improve our capabilities to rapidly deploy forces to the Persian Gulf and to Europe and to defend our vital interests, and that program is the Air Force's KC–10A advanced tanker cargo aircraft procurement program.

As a matter of fact, the cut in this program from the March budget level of the President, from the Senate-authorized and House-authorized level, the cut was part of a number of cuts in airlift and in sealift, and shockingly enough—and I say shockingly advisedly, because as a member of the Armed Services Committee which has reviewed our airlift and sealift needs so closely, we have actually made over $1 billion in cuts from March to October in airlift and in sealift while, at the same time, talking about how critical it is that we be able to rapidly deploy our forces to the Persian Gulf and to Europe to defend those vital interests.

This KC–10A program, this program which originally was intended to purchase eight of these refueling tanker airplanes, but in the present bill are only four, is a way of restoring and achieving some of this critical airlift that is so essential if we are going to be able to rapidly deploy our forces.

We have short-changed our airlift and our sealift. General Davis, the head of SAC, testified as follows in front of the Armed Services Committee on October 28. He said that:

> Modernization of SAC's tanker force is one of the Air Force's highest priorities. As you correctly noted, the air refueling shortfall has been of deep concern for several years. . . .
>
> In addition, tanker support for general purpose airlift and fighter requirements will also increase over time. DOD planned enhancements to U.S. force projection capabilities cannot be fully attained without commensurate increases in aerial refueling capabilities. Of particular concern is the requirement to responsively deploy and employ our Rapid Deployment Joint Task Force, a formidable mission under the best of circumstances. Suffice it to say that the Air Force will continue to operate through this decade with a shortfall . . . unless aggressive steps are taken to modernize the tanker force.

Let me underscore one of those sentences that General Davis stated:

> DOD planned enhancements to U.S. force projection capabilities cannot be fully attained without commensurate increases in aerial refueling capabilities.

That means quite literally, Mr. President, that we cannot get there from here. Our tactical fighter aircraft will find it extremely difficult to ferry nonstop to the Persian Gulf or Europe, and critical delays could occur in our efforts to reinforce those areas.

We need aggressive steps to modernize the tanker force. Instead we took a critical step backward between March and October when we cut over $1 billion in airlift and sealift from the first budget and from the first bill on which we had a chance to vote here in the Senate with the authorization bill for the DOD.

General Davis said:

> The KC–10 is being procured specifically to support general purpose users. This unique cargo-tanker aircraft provides an outstanding opportunity to increase both airlift and aerial refueling while incurring minimal RDT&E risk and expense.

This is an ongoing program, Mr. President. This is not a risky program. This is an ongoing program which has fallen desperately short of what everybody concedes is needed.

As a matter of fact, we originally were going to buy eight in March, and whereas this Senate, and the House in their authorization bills before the conference took place said eight, we had a recommendation from the administration that it be zero, that we buy zero, that is what they said in October. The armed services authorization bill, the bill which the Armed Services Committees of both Houses referred to this body, and to the other body in conference restored four of those eight. This amendment will restore the other four.

We would add back sufficient funding to restore in fiscal year 1982 these four tankers that were so inadvisedly cut in that authorization conference that we previously voted.

Mr. President, the Senate and the House Armed Services Committees and the Senate and House themselves have been on record as supporting this full tanker program. For instance, the House Armed Services Committee wrote the following in the report which they submitted to the full House. They said:

> The budget request contained $437 million for the procurement of eight KC–10A aircraft in fiscal year 1982.

They pointed out the KC–10A is a modified DC–10 aircraft capable of providing air refueling capability for airlift support. They said:

> The air refueling capability of the KC–10 will permit deployment and reinforcement of U.S. military forces without reliance on uncertain intermediate foreign basing rights. Tactical fighter forces and their support equipment may be deployed simultaneously. In addition, the KC–10 aircraft will significantly expand U.S. strategic airlift capacity, especially with respect to long-range movement of oversize cargo.

Mr. President, the JCS, the Joint Chiefs of Staff, in their 1982 posture statement wrote:

> The KC–10 provides increased fuel offload capability over a greater operating range, thereby reducing dependence on staging bases in other countries. It also carries cargo

to facilitate more rapid worldwide deployment of general purpose and airlift forces.

The Reagan administration was correct to add eight KC–10's to the fiscal year 1982 DOD budget in March. The Senate and the House were right when we authorized the eight. It was wrong for the administration to reduce that eight to zero in its October budget. It was wrong for the conference of the House and the Senate on the authorization bill simply to reduce four.

We could not correct that in any practical way at the time of the vote on the conference report because it was not amendable. We can correct that today. We can restore the additional four KC–10 tankers which were originally supported both by the Reagan administration in March and again by the Senate and House in their original actions on the authorization bill.

Mr. President, at this time I would be happy to yield the floor. I see my colleague from Georgia is here. I know he did have a few words on it, but I do not know whether the manager of the bill wants at this point to speak or to allow the Senator from Georgia to speak.

Mr. NUNN. Mr. President, I support this amendment and I congratulate the Senator from Michigan for sponsoring the amendment.

One of the most critical deficiencies is aerial refueling capability to support strategic and conventional missions, and that would be enhanced if this amendment is adopted.

We must look at the overall tanker requirements, and we must look at the KC–135's and the KC–10's, and that is what the amendment focuses on.

Gen. Bennie Davis, the new commander of the Strategic Air Command, testified that modernization of SAC's tanker force is one of the Air Force's highest priorities.

Currently the KC–135 tankers are integral to the SIOP and a very significant percentage of the bomber force is limited in its effectiveness due to inadequate air refueling availability. The KC–135 enhancement program is necessary to provide additional capability.

The KC–10 is being procured specifically to support general purpose users. It is unique cargo-tanker which increases both airlift and aerial refueling with minimal R. & D.

It is essential to the rapid deployment force; it is essential to many of our other contingency missions.

I urge that the amendment of the Senator from Michigan be adopted. I hope the committee will accept it, but I will certainly urge the Senate to adopt it.

Mr. STEVENS. Mr. President, I am pleased to see this amendment presented because I think the Senate ought to realize that this is the beginning now of the battle on the B–1. The letter that the Senator from Michigan has placed in the RECORD, comes from the distinguished Senator from Michigan and the distinguished Senator from South Carolina. It adds some $2.27 billion to the budget that the Appropriations Committee adopted. The strategy by my good friends, is to delete the funding in the bill for the B–1 bomber, while attempting to make the case that these items are needed more than is the B–1.

The KC–10 is not needed to fuel in flight the B–52's. The KC–135's do that. The KC–10 is related to the generation of the B–1 bomber and the ATB.

The decision was made to go ahead with both the B–1 and the development of new technologies. In doing so, it was necessary to reduce some of the items that will be needed later. The Senator is correct; and our committee has observed the authorization bill. We have funded the full amount of the authorization bill, which was signed into law today by the President. The DOD authorization bill provides for four KC–10's. As a matter of fact, that is in addition to the President's September mark with respect to the budget request.

I find it very interesting that the committee has been criticized for having such a large budget; yet this is the first of a series of amendments designed to add over $2 billion to the bill. The impact here seems to be that there is great support for financing our efforts to modernize our defense forces, but as long as we keep the numbers in, it makes no difference for what the money is spent.

Our committee has worked long and hard trying to allocate the funds we feel are absolutely necessary to meet the strategic priorities of our defense forces. I must say parenthetically here that I am a little bit disturbed that there is always some group in every one of the services that is willing to gather around any Senator who wants to add more money to their particular service. The time will come when we will find some way to have the services follow the lead of the Commander in Chief in deeds rather than merely in words. These amendments are wrong, and I intend to make a motion to table each one of them as they are offered.

I hope the Senate will recognize them for what they are. They are good tactics. I hold no malice for my good friend from Michigan. I think it is one of the most delightful and strategic tactics I have seen on the floor in a long time.

He is going to put me in the position of voting against the KC–10's, and I do favor, ultimately, the construction of all eight KC–10's. There are other items in this list. Just so the Senate will know what we are going to face, there is going to be an amendment, I assume, to restore the money for the Navy steaming hour program, $73 million. I will discuss these as they come up.

I anticipate amendments to restore the reductions of the Air Force and Army active end strengths; to accelerate the advance technology bomber; and to provide additional funds for a classified program, although I hope this amendment is not offered on the floor. There is no way this Senator can control the information.

We have everything from an additional attack submarine at $518 million to the pending amendment which proposes additional funding for the four KC–10 attack aircraft.

This amendment adds $220 million, Mr. President. We have been criticized, as I said, for going over the President's budget, and we are over the budget. We are over the budget in some areas that are critical in terms of the relationship of this body and its negotiations with the other body over what the final version of this bill will be. We are over the budget because of two major items: One is the $4.8 billion associated with the pay raise, and the other is the necessary $1.6 billion to fund a level of inflation with regard to the procurement item. This funding level is more realistic and compares more accurately to our actual experience.

Mr. President, the difficulty that I have with this amendment is again, the level of funding. I hope the Senate will understand the problem that we would have in getting this bill through conference. Currently we have a bill which is conferenceable. There is enough difference in this bill as compared to the House version for both the House and the Senate to want to come to an agreement, to get a bill before the Christmas recess. Actually, it is in everyone's best interest to get a bill. It is in the best interest of the Department of Defense, because they will know what they can spend. They will not be forced to sit there and see themselves affected by the tactics of having to absorb something like the pay increase or other items, while living under a continuing resolution.

Because the B–1 and MX are in the House version of the bill, the impact of that bill is such that if we do not get a final version of the bill the major weapons systems will be funded. But the minor weapons systems are where we have the major disagreement. Mr. President, that is where the current jobs are. That is where people are working now, in the smaller procurement items. We really do not have the massive procurement going on yet in terms of B–1 and MX. So if you are interested in the employment picture of this country, you want to build. If you are interested in getting the best possible defense for the least amount of money, you want to build this year.

We want to build. The amendment before us is one of the amendments that, if it is adopted, will lessen the necessity for a conference.

We have conferenceable items that exist between the House and the Senate repeated throughout this bill. Many of the items listed on the "Dear Colleague" letter sent by the distinguished Senators from South Carolina and Michigan, as I said, are substitutes for our items. The Senators have chosen the areas where we have actually reduced the House bill or changed the House bill so that we know there is a reason to get together and reach a final version of the bill.

I am hopeful that the Senate will realize that this is not an item that is of immediate priority. It is a high priority item, there is no question about that. But the outlay of money in this fiscal year for that item is of low priority. We believe that the $220 million that we are already over the budget to acquire four KC–10's is enough for this year.

Mr. President, I intend to offer a motion to table the Senator's amendment, but I ask unanimous consent that it be in order to make that motion when we reconvene at 2 o'clock. As I under-

stand it, there is still time for debate here and I do not want to make that motion now to cut off debate.

The PRESIDING OFFICER. (Mr. D'AMATO). Is there objection?

Mr. LEVIN. Reserving the right to object, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. BRADLEY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BRADLEY. Mr. President, I ask unanimous consent that the Senate proceed to an amendment which I will offer on the defense appropriations bill immediately after the disposition of the amendment that is presently pending, offered by the Senator from Michigan.

Mr. STEVENS. Reserving the right to object, it is just my understanding that the Senator wants the privilege of being recognized after the disposition of the Levin amendment. I do not have any objection, if that is what he seeks.

Mr. BRADLEY. That is correct.

The PRESIDING OFFICER. Without objection, it is so ordered.

Is there objection?

Mr. LEVIN. Mr. President, I do object.

The PRESIDING OFFICER. Objection is heard.

Mr. LEVIN. I understand that the request of the Senator from New Jersey has been granted.

The PRESIDING OFFICER. That is correct. Does the Senator still lodge an objection?

Mr. LEVIN. Yes; I do object. I understand we had a prior unanimous-consent agreement that there would be a rollcall vote on my amendment at 2 o'clock, so I object to the unanimous-consent request being granted.

Mr. STEVENS. I ask that the clerk get the record. It was my understanding that the majority leader made the request that the rollcall vote take place at 2 o'clock. I have not made a motion to table yet. I intend to make a motion to table unless foreclosed. I ask that the clerk get the record and read it, to see if a vote is ordered to take place at 2 o'clock.

The PRESIDING OFFICER. The Official Reporter will be asked to read back the record.

Mr. STENNIS. Mr. President, I ask unanimous consent that the proceedings for looking up the record be suspended for the time being. I want to use about 5 minutes, Mr. President, on the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered. The Senator from Mississippi is recognized.

Mr. STENNIS. Mr. President, I certainly have no objection to these KC–10 tanker planes by their nature. The authorization bill has four of them in it. But, Mr. President, an overall judgment has been made here of the relative importance of these items, and the request itself has been moved back and forth and changed twice this year. I respectfully submit that to get four now in view of the large, increased amounts that are admitted to be necessary in a year when we are trying to make reductions overall, that that is enough.

Let me say this about the offered amendment. The Senator is a member of our committee and we do not have a more valuable member. He has a fine capacity. He is a hard worker. He is determined but open to reason always. He is making himself felt. I am proud of his record. I do not want to flatter him. However, I had something to do with him having a chance, as the newest member of that committee, to dig in, and to ask him to take work. He would take the tough ones, the hard ones, and would do a good job. But I cannot support him in this position.

Mr. President, let me generally observe that this bill is the largest we have ever had. This does not qualify me to know what is best, but for at least 15 years, every year, I have been in the debate about this appropriations bill. For a good number of those years, it was my privilege to handle the bill on the floor, back in the Johnson administration during the war in Vietnam, then the Nixon administration and the war in Vietnam; the effort to withdraw troops from NATO, from Europe, to put conditions on appropriations bills which would weaken NATO, all of those things.

That is an experience. Through all these innovations, though, we have never gone in in a big way for the cargo plane, I mean on a broad scale. This item has been knocking on the door of the Senate Committee on Armed Services for authorization for the last few years along with the MX, the B–1, and other modern weapons. It has run second best. It has not gotten authorized in a big way by our committees.

There is reason for it, the plausibilities are there, but you just cannot do everything. When the chips are down, the choices that have to be made are not in favor of a new cargo plane. There is reason for that.

So, as these extra planes in this amendment go along with the cargo concept on a larger scale, I think that is highly relevant. This is something that we can leave off and we ought to leave it off the bill, this time; and when there is an advancement in the cargo plane generally, these tankers will really have their part to play. Right now, they are not in the center part of the advanced stage but they are having to wait their time. I shall oppose the amendment for those reasons, Mr. President.

I yield the floor.

Mr. LEVIN. Mr. President, let me make a couple of points clear. First, this amendment is totally delinked from a subsequent amendment relative to the B–1. There is so much evidence supporting this amendment and other amendments that they were delinked from the B–1 and have nothing to do with the B–1. As a matter of fact, many supporters of the B–1 program assured me they would be voting for this amendment and other amendments.

Second, the list of items that are part of the letter referred to by Senator HOLLINGS and myself are examples of possible amendments. They do not constitute necessarily all the possible amendments, nor is there any assurance that all of these itemized items will be made part of separate amendments. It was my statement, which is accurate, that many of these on the list relative to readiness and Stealth improvements, fleet modernization and the restoring of the size of the Army, I do expect will be made part of individual amendments. But this has nothing to do with a B–1 program.

(By unanimous consent the name of Mr. DECONCINI was added as a cosponsor of the amendment.)

RECESS UNTIL 2 P.M. TODAY

Mr. STEVENS. Mr. President, I ask unanimous consent that we recess in accordance with the previous order.

There being no objection, the Senate, at 12:14 p.m., recessed until 2 p.m.; whereupon, the Senate reassembled when called to order by the Presiding Officer (Mr. MATTINGLY).

Mr. BAKER. Mr. President, is there an order for a vote to occur at 2 p.m.?

The PRESIDING OFFICER. Yes, there is.

Mr. BAKER. Have the yeas and nays been ordered?

The PRESIDING OFFICER. The yeas and nays have been ordered.

Mr. BAKER. I thank the Chair.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Michigan. The yeas and nays have been ordered and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Arizona (Mr. GOLDWATER), the Senator from Oregon (Mr. HATFIELD) and the Senator from Maryland (Mr. MATHIAS) are necessarily absent.

I further announce that, if present and voting, the Senator from Oregon (Mr. HATFIELD) would vote "nay."

Mr. CRANSTON. I announce that the Senator from Louisiana (Mr. LONG), the Senator from Mississippi (Mr. STENNIS), the Senator from Massachusetts (Mr. TSONGAS) and the Senator from Nebraska (Mr. ZORINSKY) are necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 38, nays 55, as follows:

[Rollcall Vote No. 430 Leg.]

YEAS—38

Baucus	Eagleton	Matsunaga
Bentsen	Exon	Melcher
Biden	Ford	Metzenbaum
Boren	Hart	Mitchell
Bradley	Heflin	Moynihan
Bumpers	Hollings	Nunn
Byrd, Robert C.	Huddleston	Pryor
Cannon	Inouye	Randolph
Chiles	Jackson	Riegle
Cranston	Johnston	Sarbanes
DeConcini	Kennedy	Sasser
Dixon	Leahy	Williams
Dodd	Levin	

NAYS—55

Abdnor	Glenn	Pell
Andrews	Gorton	Percy
Armstrong	Grassley	Pressler
Baker	Hatch	Proxmire
Boschwitz	Hawkins	Quayle
Burdick	Hayakawa	Roth
Byrd, Harry F., Jr.	Heinz	Rudman
Chafee	Helms	Schmitt
Cochran	Humphrey	Simpson
Cohen	Jepsen	Specter
D'Amato	Kassebaum	Stafford
Danforth	Kasten	Stevens
Denton	Laxalt	Symms
Dole	Lugar	Thurmond
Domenici	Mattingly	Tower
Durenberger	McClure	Wallop
East	Murkowski	Warner
Garn	Nickles	Weicker
	Packwood	

NOT VOTING—7

Goldwater	Mathias	Zorinsky
Hatfield	Stennis	
Long	Tsongas	

So Mr. LEVIN's amendment (No. 638) was rejected.

Mr. TOWER. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. HELMS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. Under the previous order, the Senator from New Jersey is recognized.

Mr. ROBERT C. BYRD. Mr. President, under the order previously entered, Mr. BRADLEY is to be recognized to call up an amendment at this time. I should like to call up an amendment at this time. I have discussed this with Mr. BRADLEY and I have alerted the distinguished floor manager on the other side of the aisle. I ask unanimous consent that I may be recognized to call up an amendment at this time without prejudice to the order for the recognition of Mr. BRADLEY to call up his amendment following my amendment.

Mr. STEVENS. Reserving the right to object, Mr. President, and I shall not object because the distinguished minority leader has discussed this question with us, I will object to putting aside the Bradley amendment any longer. He asked for priority and his amendment will be the next amendment.

I shall also object to any attempt to set aside an amendment once it is brought up until we can get it to a vote. It seems to me, Mr. President, that we have to find some way to handle this bill. I hear now that we have a lot of votes, we are going to be here a long time today. So, with due respect to my good friend from West Virginia, I do not object, but I will object to any subsequent attempt to put aside the Bradley amendment.

The PRESIDING OFFICER. The Senator from West Virginia is recognized.

UP AMENDMENT NO. 723

Mr. ROBERT C. BYRD. Mr. President, I send an amendment to the desk and ask that it be stated by the clerk.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from West Virginia (Mr. ROBERT C. BYRD), for himself, Mr. NUNN, and Mr. LEVIN, proposes an unprinted amendment numbered 723.

On page 28, line 18, strike "$9,076,906,000" and insert in lieu thereof "$9,326,960,000."

Mr. ROBERT C. BYRD. Mr. President, I yield to the distinguished Senator from Georgia (Mr. NUNN).

Mr. NUNN. Mr. President, I ask the Senator from West Virginia, how much time does he have on this amendment? It is my understanding that the bill will be set aside at 3 o'clock. I do not want to take an undue amount of time, but my remarks relate to the B–52 and the costing of that, the B–1, and also the Stealth. I do not want to take up too much of the Senator's time.

Mr. ROBERT C. BYRD. Mr. President, there is no time limit on this amendment. I wish the distinguished Senator would take whatever time he desires. I think it will be helpful for the Senate to hear what he has to say.

Mr. NUNN. I thank the Senator.

Mr. President, unfortunately, the major strategic issues facing us were not debated thoroughly during the military authorization process because the administration did not submit its strategic program until the authorization bill was already in conference. At a later point——

The PRESIDING OFFICER. The Senate will please come to order. Those desiring to speak, please go to the cloakroom.

The Senator from Georgia.

Mr. NUNN. I thank the Chair.

Mr. President, at a later point in the debate on this appropriation bill, I intend to have a more thorough statement on the President's overall strategic package because of the long-term and far-reaching consequences of that package for our national security. At this point, however, with the amendment of the Senator from West Virginia pending to add money to a very important program called the Stealth program, I want to focus on just one problem area. That is the issue of affordability, particularly as it relates to the strategic bomber program.

Mr. President, I believe that our Nation must allocate sufficient resources to our overall security to assure our freedom and to provide every incentive for peace. It is naive, however, to assume that the defense budget is openended. If we allocate so much of our defense budget to strategic programs that we allow our conventional posture to suffer, we will inadvertently decrease our options in protecting our vital interests without resorting to the use of nuclear weapons.

We have seen much focus on the $180 billion price tag for the President's strategic program.

Few people in the news media and few people in Congress at this point seem to realize that this $180 billion figure is only the 6-year cost measured in constant 1982 dollars. The $180 billion figure does not include inflation. Neither does it include most of the cost of the Stealth bomber, the procurement of the Trident II(D–5) missile, or the permanent basing mode for the MX. Those are not exactly what you call small ticket items. Given this budget situation, it is no wonder that the Army and Navy as well as the Marine Corps and some in the Air Force are concerned about the allocation of resources for conventional programs, when this overall strategic package comes to fruition.

There are two critical questions on the B–1. The reason why I bring this up at this time is that I have to make a rational, informed judgment on the amendment of the Senator from West Virginia, which is, to accelerate the Stealth. I think we need to discuss the B–1 in that capacity, and that is the reason why I make this argument at this time.

There are two critical questions on the B–1.

No. 1, will the B–1 penetrate Soviet air defenses for a period of time sufficient to justify its expense as a penetrating bomber? For this answer, I submit that it is a matter of picking your expert.

Dr. Richard DeLauer, Under Secretary of Defense for Research and Development, testified:

I am confident that the low radar cross section of the B–1B (which is less than one-one hundredth that of the B–52) and its state of the art electronics will allow it to penetrate to needed targets well into the 1990s.

Dr. William Perry, who held the same job in the Carter administration, testified:

I have no idea how anyone could make that kind of projection if the penetration depended on ECM (electronic countermeasures). . . . I can't think of any field in which there is more dynamics and in which there is see-saw back and forth between measures, countermeasures and counter-countermeasures.

So we are not going to resolve that decision in this debate. Experts who hold sincere views have profoundly different views on this subject.

I may also say that the former head of the Strategic Air Command, General Ellis, has a fundamentally different view on this subject from that of his successor, Gen. Benny Davis.

The question of penetration of the B–1, again, is a matter of choosing your expert, so far as I am concerned. I do not have the answer to it, and I am not sure that anyone can have the answer here on the floor. It is a matter of judgment.

The second question on the B–1 is a question of economics, as I see it. I believe that the economic consequences of the B–1, over a period of time, may well exceed the military effect of the B–1 on the balance of power. The question is, can we afford to spend $400 million per unit for a plane that even in the best penetrating case—in other words, if you take the best case for penetration—will be limited to being a conventional bomber or a cruise missile carrier for most of its useful life? Not for all its useful life, but for most of its useful life. That is the economic question.

Based on the Air Force's extensive research and development of the B–1, and Rockwell International's excellent reputation, I have confidence that the B–1 will be a sound airplane. The issue is, how much should we spend for this plane as compared to extending the B–52's and accelerating the Stealth bomber program, which is exactly what the Senator from West Virginia proposes we do here.

Much attention has been given a recent DOD cost analysis as provided to

Congress by Dr. Richard DeLauer during critical decisions by the Senate Appropriations Committee.

Over and over again, I have heard members of the Appropriations Committee say that this was the main part of their decisionmaking progress—that is, a comparison of cost for the B–1 and the ATB or Stealth bomber, compared to the B–52 extension with the Stealth bomber added on.

For the purposes of analysis, these two estimates are $93 billion for the current B–52 force extended and $114 billion for the B–1B Stealth program. These figures are about the same as estimates previously provided by the Air Force and contained in the Air Force Secretary's recommendations to Secretary Weinberger which has now officially been provided to the committee. The point is obvious. For $21 billion more, if these figures are accurate, a new two-bomber program is indeed an attractive bargain and an attractive option.

These figures, however, must be subjected to detailed scrutiny, since there is considerable disagreement over what is actually required in modification costs for the current B–52's.

In July of 1981—and at that time I did know about these figures; I had no idea about the figures—I asked Gen. Richard Ellis, then SAC Commander, to provide an analysis of what modifications of the B–52's would be necessary if this Nation opted to produce only the Stealth and to extend the B–52 force as needed. SAC's analysis was provided in writing and did not include a significant number of the B–52 modifications and costs which Dr. DeLauer now includes in his list. I will give a few examples.

For example, Dr. DeLauer included $6.3 billion for reengining the B–52 G's and H's. General Ellis did not. Is this $6.3 billion modification necessary or not? There is no testimony supporting this requirement for the B–52 extension.

Dr. DeLauer includes a $4.3 billion requirement for modifications for the B–52D's. General Ellis did not. What is the justification for spending $4.3 billion on the B–52's which, I think everyone agrees will be useless as a penetrator in the mid-80s and which will not be modified to carry cruise missiles? These planes were supposed to be phased out in 1986, even before the B–1 was revived. So we are talking about a $4.3 billion requirement for modification included in the DeLauer list for the B–52D models which are going out in 1986. There is no testimony to support this level of modification.

Dr. DeLauer includes $5.7 billion in operating and support costs for the B–52's beyond 1986. General Ellis does not. What is the basis for this cost estimate? There is no testimony I know of supporting this position.

Dr. DeLauer includes $4.9 billion for electromagnetic pulse hardening work. General Ellis did not. General Ellis agreed with the January 1982 budget justification data as submitted by the Air Force in which the total costs of this program was stated to be $465 million. This estimate was based on the only actual nuclear trestle test and supported by the nuclear labs. Where is the testimony to support a tenfold increase in this program from January 81 to November 81? $465 million is a long way from $4.9 billion. Even in the history of cost overruns, I do not know of any 1,000 percent program increase that has occurred in this timespan.

The total in question in the DeLauer submission, as I will call it, at this point adds up to over $21 billion.

To summarize, that $21 billion would include $6.3 billion for re-engining the B–52G's and H's; $4.3 billion for modifications of the B–52's; $5.7 billion in operating cost for the B–52 after 1986; and $4.9 billion for electromagnetic pulse hardening work.

Both the Strategic Air Command and the Air Force conducted a considerable amount of detailed analysis as to what was needed to extend the B–52 force after former President Carter canceled the B–1 in 1977. I think everyone should keep in mind that this work was done by the U.S. Air Force after the B–1 was canceled, when there was no B–1 or Stealth on the horizon and the B–52's actually were being extended. Even when the Stealth was the only follow-on bomber option, these modifications to the B–52's were not included. None of Dr. DeLauer's questionable $21 billion add ons appeared until the promotional program began for the B–1.

It is interesting to note in a letter I just received—and other colleagues received it—from Senator GARN, for whom I have a great deal of respect in this area, and other Senators supporting the two-bomber approach that they state—

The B–52 and is not sufficiently hardened to withstand nuclear blast effects and it cannot be modified to do so.

I believe that these Senators would be interested in learning that in the projection that Dr. DeLauer submitted to the Appropriations Committee showing the comparison of B–52 extended versus B–1 and Stealth combined, I think they would be interested in recognizing that Dr. DeLauer included in that list $4.9 billion in his current fourth projection for the hardening of the B–52, even though I would certainly agree with the signers of that letter that that program does not make sense, but that is a part of the comparison of cost that is officially before the Appropriations Committee and that they made a great deal of their decision on.

The letter from our colleagues also cites this very analysis by Dr. DeLauer on extending the B–52's as a major reason to support the B–1 and Stealth package. In other words, the letter, first of all, says you should not harden and cannot harden the B–52's and then it goes further to include the B–52 hardening by implication when it includes the DeLauer letter that has that $4.9 billion electromagnetic pulse hardening work.

So it is clear, Mr. President, that this package of costs for extending the B–52, at least it is clear to me, was engineered to convince the Senate that it is cheaper to procure and operate two new bombers than produce only the so-called Stealth or ATB and maintain the B–52 as needed.

Where are the facts—I ask again where are the facts and where is the testimony supporting Dr. DeLauer's analysis? How did it change so much from the SAC analysis that was submitted back in early summer? These are very, very large differences.

If this $21 billion in questionable costs for the B–52's is removed, then the total differential between extending the current force and procuring the planned two-bomber program is significantly larger than the figures given to the Senate Appropriations Committee. The difference, if these $21 billion in costs are eliminated, the difference is $43 billion and the $21 billion unsupported add-on costs is coincidentally, I am sure, about the same as the constant dollar estimates for the procurement of the B–1.

Mr. President, until I receive further evidence, and perhaps there is further evidence on this, but until I do I would at this stage conclude that this analysis by Dr. DeLauer and the Air Force is clearly designed to make the B–1 option look like a bargain. In my mind, however, it raises more questions than it answers.

The issue of affordability also applies to the number of B–1's being procured. A great deal has been focused on the total costs of the B–1—from the $20.5 billion that Secretary Weinberger supports to the $25.2 billion GAO estimates. If DOD makes good on its promise to hold the costs to $20.5 billion, will they also make good on their promise to procure 100 B–1's for that amount? If the costs increase as much as commonsense and history indicate, will then the sacrifice occur with reduction in numbers of the B–1's? What number of planes, then, is affordable as the unit costs increase and the numbers decrease? What number makes sense in terms of force size?

What number of planes will be cut out of the overall program?

These are questions that I think probably cannot be answered now but certainly are important ones in considering both this amendment and the overall bomber program.

The final issue on what I call affordability or economic analysis relating to the strategic bomber relates not to our budget in this country but rather to the budget of the Soviet Union.

Although it is difficult to quantify and assess precisely, the Soviets have already expended a significant amount of resources to counter and defend against low-altitude penetrators such as the B–52, the air-launched cruise missile, and B–1. Experts estimate these costs in excess of $100 billion. Determining the gap between expenditures to counter the B–1 and additional expenditures to counter the Stealth is very, very difficult to make.

And certainly my remarks should be understood with that background.

Testimony indicates that our own technical wizards have great difficulty in projecting a defense against the Stealth. This means the Soviets will probably have an even greater problem. It is reasonable to assume from the Soviet's historical emphasis on strategic defense that they will expend significant sums over a long period to deal with Stealth and if and when we develop it and they will have to largely redo their current $100

billion defense system if and when we develop the Stealth.

The critical economic question then must be asked. Would Stealth cause the Soviets to divert and expend resources for defenses at far greater levels than currently planned?

My answer to that without any equivocation is, yes, it would.

Although no defense experts are willing to speculate on the record as to the costs for Soviet defense of the B–1 versus Stealth, off-the-record, reliable defense sources—and I hate to use that term but I must in this case——

Mr. STEVENS. Mr. President, will the Senator yield?

Mr. NUNN. I am glad to yield for a question.

Mr. STEVENS. I have great respect for the Senator. But I have sat here listening to things I have read only in classified documents and I am concerned that this may not be unclassified.

Mr. NUNN. The Senator is incorrect. There is nothing here that is classified. Every bit of this has been in unclassified sources.

The Senator is in a position, and I did not intend to bring this up at this time, of having done damage to some of the classified programs in this budget and then every time anyone brings it up in committee or in the Chamber or in conversation, the Senator says any discussion is classified.

Now the Senator is not going to put me in that position because I know that what I am talking about is not classified. If the Senator wants to have someone on his staff check it out I will be delighted.

Mr. STEVENS. Mr. President, I am going to be happy to do that.

I want to tell the Senator I have not done what he says. He knows better than that. I have been in this body almost as long as many of the people in the Chamber right now, and I never remember a Senator making the suggestion that the Senator has made before to me here dealing with a highly classified category and in effect saying that it is political.

Mr. NUNN. I am not saying that.

Mr. STEVENS. We have to get this straightened out somewhere. If we have to go into a classified session of the Senate, then we are going to do it. Even the very word "Stealth" was classified as far as technology until barely a year ago.

Mr. NUNN. Does that mean I cannot use the word?

Mr. STEVENS. No, not now. It has been divulged now.

The things the Senator is talking about put together add up to classification and he knows they do. He knows they do when he talks about the amount of money it is going to take the Russians to overcome certain strategies. Those conclusions become classified in terms of our analysis of their strategies vis-a-vis ours.

Mr. President, I am serious. I have not stayed in this Senate for the 13 years I have been here to be the manager of the defense bill and see the classification system that protects our security weakened in the Chamber, and I hope the Senator understands that. I have great respect for the Senator.

Mr. NUNN. I yielded for a question.

Mr. STEVENS. It is going too far to suggest that I have damaged the classification system by virtue of responding to a request which we have discussed with the Senator at length.

Mr. NUNN. We had about a 15-minute discussion and during that discussion we were not even permitted to go into detail there because the Senator felt that the classification was too high.

Mr. STEVENS. It is too high to be discussed in the Chamber or in the room we were in. I offered to go into the classification room in this building and to invite members of the Armed Services Committees of both the House of Representatives and the Senate, the Appropriations Committees of both the House of Representatives and the Senate, and discuss the matter with the Senator, without any rancor and without any politics.

Mr. NUNN. I would say to the Senator the Senator is talking about a different amendment and a different program that I have not even decided to bring up yet. We are talking about Senator BYRD's amendment to the Stealth bomber. I submit the Senator from Alaska may not have seen the transcript before the Armed Services Committee and what has been unclassified. This has been very thoroughly researched. I have been informed by the staff of the Armed Services Committee that it is unclassified, and I would like to see anywhere that this is not unclassified, and so I am very carefully avoiding that.

But I would say to the Senator, as I have said privately, when you start having very significant cuts in black box programs the Senator invites discourse on the subject, and I am going to avoid that if at all possible. But when you do that in the appropriations bill then you are inviting the kind of discussion that you say you fear, and which I will avoid.

I will assure the Senator I will avoid that. But the Senator puts everyone who is concerned about these programs in a virtually untenable position regarding classification after making very serious cuts in the program, and I find that to be disconcerting.

I do not think anyone in the Senate has more respect for the security of our classified secrets than I do, and if the Senator implies otherwise, then I would issue him a challenge to find anyplace in this statement that I in any way used anything other than unclassified sources. If he cannot find that, then I would expect at some appropriate time for him to correct the RECORD at this point.

Mr. STEVENS. Mr. President, I will be happy to look at the RECORD. I have not yet said what I would like to say in terms of that black box reference, and the time will come when I will do it. We will just have to wait and see whether the Senator wishes to raise that question on the floor or not. If he does, we will have a closed session and we will discuss it.

The amendment before the Senate now, the amendment of Senator BYRD, does not say anything other than to delete an item, strike an item, and add another. It amounts to an increase, and it adds the same amount that the Senator addressed before.

Mr. NUNN. The Senator is mistaken. I have not even discussed this program with the Senator.

Mr. STEVENS. Will the Senator tell us what program he is discussing?

Mr. NUNN. I am discussing the advanced technical bomber program which is the subject of the amendment.

Mr. STEVENS. Maybe I am wrong, is that not Stealth?

Mr. NUNN. That is right. But the Senator and I were not discussing this program the other day.

I am now talking about the ATB program. That is the one the Senator from West Virginia is now amending.

The PRESIDING OFFICER. May I advise both Senators to address all questions to the Chair.

Mr. GLENN. Mr. President, will the Senator yield for a question?

Mr. NUNN. Yes.

Mr. GLENN. This brings up something—I will not belabor this discussion which has been going on here—but I was in discussion with the majority leader yesterday just very briefly and the Senator from Alaska addressing the same thing as well as the Senator from Georgia. How do we get effectively the word across on some of these very complex and secret programs to 100 Senators so that they can vote intelligently without risking giving away some of our secrets, and that is a problem here.

I have wrestled with this for the last 3 days, thinking about it as to whether I would ask for a closed session of the Senate to go into these very matters that are being kicked around here right now.

There are matters pertaining to the whole Stealth technology, very highly classified, but which we cannot—which every Senator needs to know to vote intelligently, and yet if we close the doors and brief 100 Senators on the technical aspects that some of us have gone into privately, I can imagine about how secret it would be. Yet how can we vote intelligently on these things without having that kind of information?

The same thing applies to the MX basing and some of the other things we are faced with here.

But the issue under discussion here of Stealth technology is one that I am very vitally involved with, and it is one of the key elements in whether Members here will vote for the B–1, whether we will vote straight for Stealth, whether they will vote for a B–52 add-on of some kind here that is a modification program, and I do not know how we do this. I do not think this body is well set up to handle it.

Mr. ROBERT C. BYRD. Mr. President, will the Senator yield?

Mr. GLENN. In just a second.

We supposedly have a room set up here—I personally set up two different meetings in which I had all the Pentagon experts over so I could put forward with other Senators some of the reservations I had about some of these technologies that have been touted to the skies and I do not believe are that good.

Nevertheless, we had those meetings, and we got about 10 or a dozen Senators at each one of those meetings, which is not bad. Some of those were repeats, so we actually have only briefed on the real

technologies involved here on the questionable aspects of them, we have only briefed, I would say probably not more than 15 Senators or maybe 20 Senators here who have gone into all these real details, and yet we are expecting to come out here and vote.

I am still debating whether we should have a closed session, and I hope Members could be impressed with the fact that this is something that each Senator should treat as the most highly classified information and keep it to himself, not even to his staff. But it is a lack that this body seems to have to deal with classified material, and we are getting more into this all the time.

I hope that everybody listening in their offices or anyplace else is thinking about this so maybe we can have some sort of a closed session here tomorrow or the next day before this bill is off the floor so that we really can go into some of these details, because we cannot intelligently, without knowing them—and yet we risk putting these things out in public to somebody through inadvertent slips of the lips, if they do not treat this with the most confidentiality.

I yield.

Mr. ROBERT C. BYRD. Mr. President, the distinguished Senator raises an important question. Arrangements have been made for the program director to converse with Senators about this matter. This is in room 407, which is a secure room, and I would hope any Senator who wishes to have such a discussion would go to that room and raise any questions they have or may have.

Mr. GLENN. Mr. President, if the Senator will yield, that is the same room that is cleared and in which I set up two previous meetings. We got about a dozen Senators there for each one. But every Senator here should know this information to vote intelligently, and yet we are not going to. We will have about 25 or 30 Senators who will really be informed, and the others will come running in asking, "Which side of the aisle am I on and how am I voting because I am on this side of the aisle," and we are talking about a 25- or 30-year program. I think I can imagine how many people are going up to that room this afternoon to get briefed with all the other pressing things, committee meetings, and so forth, and we are just not set up to deal with this, and I would like to have some more discussion with the majority leader on this.

I do not know how we handle this, but we cannot require Senators to go up there and get briefed nor can I sit up there for 2 days bringing up my doubts for people as to what they should be looking into and get answers to. So we are going to vote as an ill-informed body, as I see it, when we vote on this Thursday or Friday.

Mr. EXON. Mr. President, will the Senator yield for a question?

Mr. NUNN. I will be glad to yield.

Mr. EXON. Mr. President, I would like to ask a question, trying to figure this out. I have been listening to the debate. I am on the Armed Services Committee, and I know about most of these things. I am simply confused now myself, and I hope the body is not as confused as I am. But it seems to me in listening to the amendment offered by the Senator from West Virginia, and having listened quite carefully to the statements thereon by my colleague from Georgia, it seems to me that all this amendment has to do with is the advanced technology bomber, sometimes known as the Stealth bomber, and there is not anything classified about those words, nor have I heard the Senator from Georgia make any classified statements.

The question is simply this: To my friend from Georgia, does not the amendment offered by the Senator from West Virginia, which you have been talking to, have only to do with adding additional money to the advanced technology bomber, sometimes known as the Stealth bomber, nothing more and nothing less, with the idea of moving that along faster than the administration wants to do?

Mr. NUNN. That is right. The Senator from Nebraska is absolutely correct.

The Senator's amendment is aimed at that. It is clear on the record it is aimed at that. There is nothing classified about those words.

Just to save members of the news media time if they look through my remarks very carefully, which I normally encourage, they will not find any new information whatsoever except the matter of opinion on these programs, and they would certainly find nothing that has not already been declassified completely. That was done very carefully before we even started this.

It seems that the Senator from Alaska had in mind a different program, and that different program is one that we have discussed and that different program has been cut, and that it is not classified, that itself is not classified. Beyond that I do not say any more. But at this point in time I have not chosen to bring up an amendment on that. I keep my options open on that, and I will be glad to discuss it in a specific way with the Senator from Alaska if we can find a way to deal with that subject.

But the Senator from Nebraska is entirely correct. The point I was about to close with in supporting the amendment of the Senator from West Virginia is simply this one: On the question of economics and the question of the B–1 versus the Stealth B–52 combination, one of the most critical elements is one that most defense experts do not have any answer to as a matter of judgment, a matter of speculation, and I have not seen any defense expert go on the record on this not because of classification but because it is highly speculative. That is the judgment of about how much the Soviet Union is going to have to spend to defend against the Stealth as opposed to how much they have to spend to defend against the B–1.

If the Senator from Alaska is concerned about that being classified I would alleviate his worries because these figures do not even exist. They are not on the record, classified or otherwise. It is a matter of judgment.

I think one of the judgments that people need to make in considering this overall area is the question of what it does to Soviet resources in trying to defend and also the question of what happens if they decide that they cannot make adequate defense in these areas and decide at that stage that the penetration capability of the Stealth will not be interfered with in their air defense.

Those are crucial questions and will affect the balance of power.

Now with all our saying on that subject, there is nothing in it even in any way remotely concerning classification. I do close by saying that the Senator from West Virginia has a good amendment, it is an important amendment, and I would hope that it would pass. I would hope that it would pass overwhelmingly.

Mr. ROBERT C. BYRD. Mr. President, I apologize. If the distinguished majority leader wanted someone to yield to him, I will be glad to yield.

Mr. GLENN. Will the Senator yield for a question?

Mr. ROBERT C. BYRD. Yes.

Mr. GLENN. Mr. President, I do not know whether this is classified or not. I will preface my question with that. Can the Senator tell us how much money is already provided for?

Mr. ROBERT C. BYRD. I think that would be a highly classified figure.

Mr. NUNN. The increments are not classified. The total program is.

Mr. GLENN. The increments are not but the total is. Is that figure available to us privately?

Mr. ROBERT C. BYRD. I beg the Senator's pardon.

Mr. GLENN. Is that figure available?

Mr. ROBERT C. BYRD. Is what figure available?

Mr. GLENN. Is the total figure being spent available? I do not mean here, but can that be made available to Members who request it?

Mr. ROBERT C. BYRD. It can be available to any Senator who goes to room 407.

(Mrs. HAWKINS assumed the Chair.)

Mr. GLENN. The total cost?

Mr. ROBERT C. BYRD. That is my understanding.

Madam President, I thank the distinguished Senator from Georgia (Mr. NUNN) for his meaningful and forceful supporting statement. May I say for the benefit of the Senate that I have cleared every word that I am about to say with the appropriate people in the program as to classified material because I certainly would not want to say anything on the floor or anywhere else with respect to unclassified material if it would endanger the program in any way or endanger this Nation's security.

This amendment, in which I propose $250 million of additional funding to the advanced technology bomber, or Stealth bomber program, would assure the delivery of an operational aircraft at the earliest feasible date.

I have been concerned, as have many of my colleagues, that the initiative on the B–1 program will delay important classified programs, including the ATB or Stealth bomber. Many in the Senate have expressed concern that the initial operational capability—or IOC, which is defined as a 15-plane operational squadron—of Stealth not be allowed to slip. I believe most of my colleagues agree it is desirous to have the earliest possible deployment of Stealth technology.

It is my understanding that the administration has assured the Senate that it is committed to the fastest track possible and the earliest IOC feasible tak-

ing into consideration the various uncertainties which must be resolved.

Yet, Madam President, I do not know to what IOC the administration has in fact committed itself. Obviously, we cannot pin a date certain down with absolute assurance, because we have not yet finished answering all the questions. Nor can anyone say with complete certainty the exact amount of funding which would bring us to the earliest possible IOC. But I am very concerned that, because the administration has also opted for the B–1 bomber, funding for Stealth will be inadequate. The Congressional Budget Office is now estimating the B–1 could well end up costing us $400 million per copy over the next 5 years. In light of the almost certain competition for funds between the B–1 and Stealth, I am satisfied that the evidence shows this appropriations bill does not contain enough resources to launch a vigorous program. I am concerned the IOC will be delayed as a result—perhaps substantially—if this practice continues. The net result could well be one in which by the early 1990's we will not have a manned bomber in place which can penetrate Soviet air defenses with assurance.

Why am I so concerned that the program offered by this bill does not meet the urgent national need in this area? First, I have relied upon the testimony of our strategic air commanders on the question. Second, the action of the other Chamber on this bill which increased funding for the Stealth program. Third, my own knowledge of the program. And fourth, a pattern that seems to be emerging which is one of delaying the necessary hard decisions to correct the strategic imbalance with the Soviet Union.

Both past and present commanders of the Strategic Air Command have testified that the enormous cost of the B–1 will require a stretching out of the Stealth program. They have also stated that the uncertainties of B–1 penetration capability after 1990 make an early Stealth IOC a matter of urgent national security.

General Ellis, the highly respected, recently retired, SAC commander stated in Senate testimony that:

> The B–1's would have questionable capability in terms of sucecssful penetration to the degree that would be acceptable in warplanning in the early 1990's.

Although he stated that a case could be made that developments in electronic-countermeasures, or ECM, might allow our SAC forces to stretch that date beyond 1990, it is a "weak crutch and it is one that could be protected by early development of the ATB," or Stealth. The unique characteristics of the ATB, he further stated, are such that the airplane would cause the Soviets "great difficulty through the 1990's and into the next century."

There are many unknowns in this game, so the decisions we make are calculated risks. How fast will Soviet air defenses be upgraded? How quickly can technological uncertainties in Stealth be solved? But, as General Ellis again stated, if there are many unknowns in the 1980's, there are a "lot more unknowns in the 1990's." Given these uncertainties and what is known about Stealth capabilities, he concludes that it would be better to "take the risk in the 1980's than in the 1990's. The earlier we get the ATB the less risk we have in the 1990's."

General Davis, the present SAC Commander, admitted in open testimony that going with the B–1 would delay Stealth. He said that "we couldn't afford to proceed at the same pace with ATB if you went with the B–1."

As has been stated in this debate before, Senators should not delude themselves as to the serious question of whether or not the B–1 can penetrate Soviet airspace after 1990. I remind my colleagues that the Secretary of Defense was quoted on November 5, 1981, less than a month ago, that sending our boys into Soviet air space in a B–1 after 1990 would be tantamount to directing "suicide missions and that is not anything I am going to do." The Secretary reiterated this statement several times. Since that time, he has restated his position, and other officials have had to revamp their arguments. Now we are told the B–1 is judged able to penetrate Soviet airspace "well into the 1990's." This changed analysis disturbs me. It reduces my confidence that this bomber decision is being made on the merits, on the basis of cold technological fact, and with the best risk calculation we can develop.

Let us be clear about this scenario. If the B–1 could penetrate only until 1990 or thereabouts, it might make sense to still build the airplane as a cruise-missile carrier or conventional bomber. But it only makes sense to do this after we have funded Stealth fully. In other words, if penetration is our top priority, and I think it should be, we must develop Stealth first. Then we should look at the B–1 as something we might evaluate as a successor to the B–52 in a conventional sense.

General Davis was asked his view of these dates. He was asked whether or not he would recommend procurement of the B–1 if we knew it could not penetrate Soviet airspace in the "early 1990's." He answered that he could not make such a recommendation. Yet, that is precisely what is happening.

We must ask about what could be characterized a "window of nonpenetrability" between the time when our B–52's lose their penetration ability and when the Stealth comes on board. I submit that an accelerated Stealth program, which gave us an IOC in the very early 1990's, would assure us that a penetration gap would not occur. To support this contention, I point to General Davis' statement that the B–52H, the latest model of which we have about 90 in our inventory, could penetrate to "1989 or so." Indeed, according to public reports the Central Intelligence Agency, in testimony before the Appropriations Defense Subcommittee, testified that the B–52 force could indeed penetrate Soviet air defense with acceptable degree of risk throughout the remainder of this decade.

Madam President, it may be argued that the B–1 would be a more effective penetrator than the B–52, but the point is that both aircraft could do the job. Soviet air defense could be likened to a hitter in baseball, and our bombers as a pitcher on the mound. If the batter can only hit baseballs traveling at 80 miles per hour, it really does not matter if a pitcher can throw a ball at 85 miles an hour or a second pitcher can throw it at 90 miles per hour. Both pitchers will be able to strike out the batter. In other words, both the B–52H and B–1 can do the job.

But if the next batter can hit any ball under 100 miles per hour, then we had better be getting a new pitcher ready in the bullpen. Because the betting is that only our Stealth pitcher will be able to win inning after inning, and game after game, as the decade of the nineties opens up.

I want to be sure that it is the technology, and not the funding level, which limits the pace of the Stealth program.

The second point I want to make is that the House of Representatives has funded the Stealth program at the level I am proposing in my amendment. It should be noted also that the House version of this bill is some $11 to $12 billion below the level of the Senate bill. I pose the question, then: Are we to assume that the House is being overly extravagant with this vital program at the same time it is so far below the Senate appropriations bill in our overall defense spending effort? I do not believe this to be the case. The House also sees the desirability of avoiding a "window of nonpenetrability" in our strategic bomber systems.

Third, I have consulted other Senators who have studied the details of the Stealth program. It should be pointed out that these Senators are well briefed and up to date on the status of the program. I am confident that the present funding level in the bill, as opposed to the full funding I propose, will lead to an IOC that will be measurably delayed—at least a year, but more probably longer if the B–1 funding eats up more and more of the budget in the out-years.

The important thing is not the $250 million additional for Stealth development in fiscal year 1982. The important thing is the initiation of a practice of seriously underfunding the development of a technology which, in its many uses, may very well have a major impact on the Soviet-American strategic balance through the end of this century. It could very well negate a Soviet air defense infrastructure into which the Russians have invested well over $100 billion thus far.

The administration has argued that it will be more successful in conducting negotiations with the Soviets on strategic weaponry only if it goes into those negotiations from a renewed position of strength. Yet, there is a growing feeling that the recent mix of strategic decisions announced by the administration, in reality, only reduces our strategic capabilities. In sum, we intend to retire B–52 bombers earlier than previously scheduled and retire Titan missiles earlier than previously scheduled. There is nothing to take their place until after 1985. The hardening of our current silos,

be they Titan or Minuteman, from what I understand, will not add to our missile survivability.

Therefore, it is probably a waste of money for the lack of a workable program. In the meantime, we are delaying a decision on the possibility of a mobil MX basing mode until 1984—a 3-year delay. On top of that, Stealth would be delayed if Congress agrees to the administration's funding request contained in this bill. Furthermore, we shall be reducing our procurement of cruise missiles very significantly, from about 5,000 if we kept the B–52 in service, down to only 3,000 if we opt for the B–1.

In sum, Madam President, this defense appropriations bill does not look like a commitment to strengthen our strategic posture. Indeed, General Davis admitted in open testimony that we "lose capability" with the program funded by this appropriations bill. This is extraordinary. The head of our Strategic Air Command has testified that the strategic program announced by the administration, and funded by this bill, will be providing us with a gradual reduction in our capability over the next 5 years.

In my estimation, there are serious flaws in this program which weaken our entire strategic posture. The Senate has a responsibility to correct these flaws to the extent it is possible. The Stealth issue is merely a part of the problem, but a very important part.

It is possible that the Senate will endorse the administration's decision on the B–1. But this administration's policy is purportedly one of pursuing an aggressive Stealth program which will not be sacrificed at the alter of the B–1. I do not have confidence that there are sufficient funds in this bill to carry out the administration's policy on both the B–1 and Stealth, and that is the purpose of my amendment. The Senate should agree here and now that we fund the Stealth technology at the maximum level until the aircraft are all delivered.

To those who argue that the technology is not developed enough and that we would only be throwing money at it, I would agree there are risks. But if one goes to the major corporations involved in the development of Stealth, they will tell one that the risks are no greater than they take with any major new commercial development. Further, it is hard to address risks by conducting only paper research. We have to start spending money to build the equipment in order to find out the potential problems of any premise.

To say that since all our programs slip, so must this one, is simply throwing in the towel. It is the same criticism that this administration leveled at the previous administration's defense program, Madam President.

Our leverage with the Soviets rests upon exploiting our technology to the fullest and Stealth represents the most advanced technology we have the capability of developing in a critical strategic program. If we fail to provide adequate resources for the Stealth program, it would be a tragic mistake.

Madam President, my amendment would fulfill a commitment made by the administration that the Stealth program would be funded at the fastest prudent pace. I share that commitment. My amendment is putting the resources behind the administration's commitment.

I urge the adoption of the amendment, Madam President.

Mr. STEVENS. Madam President, my good friend from West Virginia makes an interesting presentation to the Senate. It is a complicated one. I can say at the outset that, as he may recall and other Members of the Senate will recall, when I first started digging into the overall question of the manned bomber and the ATB and the program for the future, I had some question whether we could afford the course that we are on. As a consequence, we have had hearings. We have had a series of hearings in our subcommittee examining into the question of the options that we have.

The first option is obvious, to maintain the B–52 force, the present force. The second would be to go to the B–1. The third would be to go to the combined B–1/ATB, and the third one would be to put all our eggs in the ATB as quickly as possible.

As I examined that and the members of our committee examined it, it became apparent that the first option was unworkable. The B–52's, which originated in the generation of Harry Truman as President, have served the country well. To maintain them into the future involves a substantial cost and does not present a change in technology that is necessary to deal with the ever-increasing threat that we face. The cost of maintaining them through the year 2000 is substantial and, should we decide to do that, maintain them into the 1990's, when we reach whatever deadline we set, we would have no more manned bomber. We would have no asset value left in our main vehicle as far as manned bomber force is concerned.

The B–1B is a different breed of cat than the B–1 and we are presenting here in the committee bill the approach which is basically the combined B–1B/ATB option. That option is cost effective. It means that we can, in fact, go into an interim vehicle, the B–1B, which will meet all our program objectives, have a life span beyond the year 2000, and, at the same time, be able to concentrate as much of our defense funds as possible in the area of ATB.

Following the appearance of representatives of the Department of Defense in a classified session of our subcommittee—and we did receive a classified statement at that time—I asked for an unclassified explanation of the position of the administration on the bomber modernization portion of the President's strategic modernization program. It is, I think, a very enlightening document. It is one that I hope Members of the Senate will study, because it contains enough information, in my judgment, to reach an opinion on the bill before us without any classified information. As a matter of fact, if Members of the Senate wish to compare the two, I would be happy to let them read the classified document and the unclassified document. It becomes apparent what is classified in this process. But that classification is not, in my judgment, a determining criterion as far as the issue before us is concerned.

Madam President, there have been many things mentioned about the Secretary's testimony and Secretary Weinberger has testified before several committees, including ours, that the B–1B will penetrate with competence well into the 1990's. In a letter of November 9 to the chairmen of the Appropriations and the Armed Services Committees, Secretary Weinberger and the CIA Director, Mr. Casey, maintained the B–1B would have the capability to penetrate anticipated Soviet air defenses well into the 1990's in a multitude of employment modes and perform effectively as a cruise missile carrier and a bomber into the next century.

It was that judgment that led us to decide to recommend to the Senate the combined program.

We do not have an ATB option only. We are not abandoning the B–52's. There is money in the B–52's to keep them operational until the B–1B's are delivered and operational ready for combat.

However, we are looking for the ability to deal with the projected changes in Soviet air defenses, and the program we present to the Senate gives us that ability.

I quote from Dr. DeLauer's letter, which was declassified. He states:

> The combined prog:am offers both near and far term modernization that will force the Soviets to improve their air defense program starting now, and continuing throughout the rest of the century. The heavy investment this will require will provide the U.S. with significant leverage and restrict the Soviet's ability to upgrade their offensive forces. In contrast to this, an ATB only program allows the Soviets to delay the improvements to their air defenses and gives them many years to work exclusively on ways to counter ATB technology. Finally, the combined program allows us the option of deciding to buy more or less of either the B–1B or ATB at mid-decade depending on the progress made and the cost of each program. This competitive posture is extremely important in controlling costs and exists only in the combined program.

Madam President, Dr. DeLauer goes on to say:

> Air defense in today's world is done in depth and consists of varying degrees of defense depending on the importance of the target and timing of the attack.

Madam President, I ask unanimous consent that the unclassified letter from the Under Secretary of Defense, together with the statistics which are attached, be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

THE UNDER SECRETARY OF DEFENSE,
Washington, D.C., November 17, 1981.

Hon. TED STEVENS,
Chairman, Subcommittee on Defense, Washington, D.C.

DEAR MR. CHAIRMAN: Yesterday I sent to you a classified explanation of the Bomber modernization portion of the President's strategic modernization program. At that time you and other members of the committee expressed a desire for an unclassified explanation. This letter is in response to your request.

The President's recommendations for a two bomber force have their genesis in the joint, Office of the Secretary of Defense, Air Force, Bomber Alternatives Study, which was mandated by the FY 81 Department of Defense Authorization Act, As you know the Authorization Act directed our study to focus on a multirole bomber that would be operational prior to 1987 and be able to perform the missions of a nuclear weapons delivery paltform, cruise missile carrier, and a conventional bomber. This study and other analyses have convinced the Air Force and the Administration that the aging B–52 must be replaced as soon as possible.

As you know, to be an effective deterrent a manned bomber must be able to accomplish three basic parts of the manned bomber mission; take off and base escape prior to being struck, with particular concern toward a surprise attack; navigate and fly safely the long range to its targets; and, penetrate any defenses required to reach its targets.

As the Soviets deploy increasing numbers of warheads (which can be used for barrage attack), and develop more effective forward air defenses, the B–52's ability to accomplish all three parts of its mission in sufficient numbers to be an effective and credible deterrent becomes increasingly questionable in the last half of the 1980's. In addition, the cost of the B–52's operation and maintenance is rising dramatically as its age increases. In contrast to this, the B–1B and the ATB can accomplish all three parts of the bomber mission effectively and will be able to do so for many years to come.

As I mentioned to you during your hearing, we were able to narrow our bomber alternatives to four basic options: (1) modifying and modernizing the present force of B–52's and FB–111's, and (2) an all B–1B force, (3) an all ATB force, and (4) a mixed force of B–1B's and ATB's.

When these alternatives were examined in detail, we found that the cost of operating the persent force until the year 2000 would range between approximately 85 and 100 billion (FY 81$) including tanker costs, cruise missiles, and other costs needed to keep the force operational and depending on the modification and retirement schedule for the B–52.

The cost for an equivalent force of B–1B's turned out to range between approximately 86 and 106 billion (FY 81$) given an IOC for the B–1B of 1986 and depending on the retirement schedule for the B–52. The cost of the ATB only option is, of course, classified but I can say that the cost is not significantly different from the cost of the combined B–1/ATB program recommended by the President. The combined program, however, is much more effective in maintaining the deterrence of the manned bomber force. It also provides significant added capabilities in this decade which the ATB only program does not. An unclassified cost comparison of these programs is attached for your information.

The combined program offers both near and far term modernization that will force the Soviets to improve their air defense program starting now, and continuing throughout the rest of the century. The heavy investment this will require will provide the U.S. with significant leverage and restrict the Soviet's ability to upgrade their offensive forces. In contrast to this, an ATB only program allows the Soviets to delay the improvements to their air defenses and gives them many years to work exclusively on ways to counter ATB technology. Finally, the combined program allows us the option of deciding to buy more or less of either the B–1B or ATB at mid-decade depending on the progress made and the cost of each program. This competitive posture is extremely important in controlling costs and exists only in the combined program.

In closing, I would like to briefly mention the controversy over the issue of the ability of manned bombers to penetrate Soviet air defenses. On 10 November 1981, Secretary Weinberger and Mr. Casey, the Director of the CIA, sent a joint letter to you which discussed this subject in detail. I can only add that people uninformed with the facts and technical details of air defense often imagine air defense as a wall or barrier that is or is not broken at any given point in time. This conception is misleading. Air defense in today's world is done in depth and consists of varying degrees of defense depending on the importance of the target and timing of the attack.

Thus, there is no magic moment when a given type of bomber cannot "penetrate." What occurs is that the probability of air defenses being effective over a range of desired targets gradually increases over time as defenses are improved. These improvements, however, can be offset through the introduction of new equipment and tactics in the attacking force. I am confident that the low radar cross section of the B–1B (which is less than one one hundredth that of the B–52) and its state-of the-art electronics will allow it to penetrate to needed targets well into the 1990s. The improvements that the ATB will offer in these areas promises to allow similar effectiveness to be maintained well into the next century. By combining these two programs, we maintain the important deterrent capability of manned bombers, that is, reliability, survivability, recallability, endurance, and ability to hit mobile targets, well into the future for essentially the same cost we would incur if we continued to operate our older obsolete systems.

Attached per your request are unclassified point papers which elaborate further on our bomber modernization program. I trust you will find them helpful. Please feel free to contact me at any time if you desire additional information.

Sincerely,

DICK DELAUER.

B–1B/B–52 COMPARISONS

	B–1B	B–52 G/H
Physical characteristics:		
Length (feet)	147	159
Wing span (feet)	78/137	185
Wing sweep (degrees)	67.5/15	
Takeoff gross weight (pounds)	477,000	488,000
Maximum inflight gross weight (pounds)	477,000	488,000
Performance data:		
Power plant/number of engines	F/101–GE–102/4	J—57/TF—33/8
Takeoff distance (feet)	8,300	10,500/9,500
Speeds (mach number)		
Maximum high altitude	1.20	0.90
High altitude cruise	0.70	0.77
Low altitude penetration	0.85	0.53–0.55

	B–1B internal	B–1B internal and external	B–52 internal	B–52 internal and external
Weapon carriage capacities:				
Nuclear gravity:				
B–28	12	20	4	16
B–43	12	26	4	16
B–61	24	38	4	16
B–83	24	38	4	16
Nuclear guided:				
AGM–69 (SRAM)	24	38	8	20
AGM–86B (ALCM)	8	22	8	20
Conventional gravity:				
MK–82	84	128	27	51
MK–84	24	38	8	18

	B–52	B–1A
Historical perspective:		
B–52 aircraft requirement established	January 1946	June 1970.[1]
1st flight	April 1952	December 1974.
B–52D delivered to SAC	June 1956–December 1957	
B–52G delivered to SAC	February 1959–February 1961.	
B–52H delivered to SAC	May 1961–October 1962	
B–1A DSARC III		December 1976.

[1] DSARC II (full-scale development).

Planned programs:

B–52G IOC for ALCM/OAS, (one squadron), 1982.

B–52H with ALCM carriage, 1986.

B–1B IOC (15 aircraft to SAC), 1986.

B–1B FOC (100 aircraft to SAC), 1988.

Operational inventory:

B–52D, 78.

B–52G, 127.

B–52H, 96.

B–1A, 4 in non-flyable storage at Edwards AFB, CA.

Components for survival:

Base escape characteristics:

Distance from incoming weapon detonation.

Altitude from incoming weapon detonation.

Aircraft hardness from multiple nuclear effects.

Base location relative to Soviet SSBNs.

Range: Increased SIOP range allows for more flexibility in timing, circumnavigation of threat areas, target coverings, etc.

Penetration characteristics B–1B vice B–52:

Reduced radar cross-section (B–52 RCS is 100 times that of the B–1B):

Reduces engagement opportunities.

Provides more ECM choices.

Speed and altitude.

Dilution effects of ALCM.

COST SUMMARY

[In billions of 1981 constant dollars]

	Present force extended	All B–1B 1986 (IOC)
R. & D	0–1	2–3
Procurement	4–6	35–36
Existing force modifications required.	28–33	7–12
Operation and support	53–60	42–55
Total [1]	[2] 85–100	86–106
(Fiscal year 1982–2000)	[2] (105–125)	

[1] The ranges reflect different force structure decisions that might be made over the next 20 yrs, especially the precise retirement profile for the B–52's as cruise missile carriers.
[2] It should be noted that around the year 2000 the B–52 will exhaust its structural life and have to be replaced at a cost of approximately $20 to $25 billion in fiscal year 1981 dollars. Thus, these costs should be included.

Note: ATB costs are classified. Further breakdown of these figures is available to cleared personnel only.

A COMPARISON OF B–52/B–1 BOMBER FORCES [1]

[Costs shown in billions of fiscal year 1981 dollars]

	Present force extended (376 PAA)	B–1B only (200 PAA)
Bomber:		
O. & S.:		
B–52	30.3	9.6
FB–111	3.2	1.2
B–1	0	15.2
Missile (CM/SRAM)	3.9	3.8
Mods:		
B–52	27.4	6.3
FB–111	1.2	.5
Tanker (KC–135) O. & S./Mods	20.1	15.3
Procurement (aircraft and missiles):		
R. & D	.7	3.4
Production	6.6	36.6
Total	93.4	91.9

[1] Hypothetical force structure for comparison purposes only (fiscal year 1982 through year 2000).

B–52/B–1 COST COMPARISONS

Unclassified comparisons of the cost of extending the present force of B–52s versus the President's combined B–1/ATB program are not possible due to the classified nature of the ATB program.

A comparison of the B–1B portion of that package and the B–52 can be done on an incremental basis.

The operation and maintenance (O&M) costs through the year 2000 of the President's program is over 6 billion (FY 81$) less than the O&M cost of extending the present force of B–52s and FB–111s. O&M comparisons are:

Present Force (O&M): 60 Billion.

President's Program (O&M): 54 Billion.

Since the President's program replaces the aging B–52 with modern state-of-the-art equipment, many aircraft modifications are avoided. The President's program avoids approximately 20 billion dollars (FY 81$) of these modifications. This 20 billion cost avoidance is approximately equal to the cost of acquiring the B–1B force planned by the President. Modification comparisons are as follows:

Present Force (Mods): 28 Billion (FY 81$).

President's Program (Mods): 8 Billion (FY 81$).

RATIONALE FOR A B–1B/ATB PROGRAM

B–52 effectiveness rapidly declining:

Poor base escape characteristics: Increasingly vulnerable to SLBM threat. Incentive for Soviet first strike.

Vulnerability to nuclear effects.

Vulnerability to forward defenses: Long range fighters and SuAWACS.

Age (structural life ends approx. year 2000).

B–1B operational in 1986:

Near term response to redress strategic imbalance.

Provides survivable, enduring, recallable, strategic force.

Provides effective means to penetrate defenses well into the 1990s.

Provides Cruise Missile carriage well into the next century.

Improve conventional air power: Range/payload exceeds B–52. Greatly improved penetration. Near term capability.

ATB available in early 1990s:

Allows development to proceed at fastest prudent pace.

Available before B–1B penetration capability is at risk.

Provides highly effective approach to penetrate into the next century.

Bomber Force Costs:

Modernization of the B–52 will range between 85B and 100B (FY81$) thru the year 2000 depending on the modernization and retirement schedule of the B–52. New plane needed in approx 2000 at cost of 20–25 billion (not included in above range).

"B–1B only" force would range between 86B and 106B (FY81$) thru year 2000 depending on the retirement schedule of the B–52. Advantage of ATB lost. Allows early retirement of costly B–52 force.

"ATB only" force would cost essentially the same as a combined B–1/ATB program depending on IOC thru the year 2000. Cost of waiting for ATB pays for the B–1B.

Combined B–1B/ATB program. Provides cost competition between the B–1B and ATB. Allows early retirement of costly B–52 force.

Impact on Soviet Defense Expenditures:

B–1B plus ATB place maximum stress on defenses:

B–1B will stimulate massive Soviet investment:

Soviets will spend several times the cost of our bomber program for air defense in this decade.

Defenses optimized for low altitude.

ECCM retrofits.

B–1B and ALCM will be extremely difficult to defend against despite massive investment in defenses.

When ATB is available:

Soviets must maintain defenses against B–1B.

Limits resources available to develop new systems against.

Combination of B–1B, ALCM and ATB will drive Soviets to massive investment in defenses, diverting resources from other forces.

Despite enormous investment, defenses not likely to be successful.

Risk:

B–1B plus ATB minimizes risk of program execution;

ATB provides incentive to control B–1B performance, cost.

B–1B provides incentive to achieve ATB performance, cost.

ATB only program yields potentially unacceptable risks:

Leaves US dependent on B–52 for more than ten additional years.

Possibility of ATB development problems:

Known risk areas of unconventional design.

Unknown risk areas.

Impact on reactive defenses;

Without B–1B, Soviets focus on ATB.

Possibility of dramatic breakthrough.

Summary: B–1B plus ATB Program:

Provides effective military forces into 21st century.

Produces near term response to redress strategic balance.

Provides near term conventional force projection capability and improved support for conventional missions.

Costs the same as B–52 plus ATB force (within estimating uncertainty).

Allows needed time to design and develop an operationally effective ATB.

Avoids risk of depending on aging B–52 force until an effective ATB is developed, produced and available in significant numbers.

Mr. STEVENS. Madam President, let me emphasize, in terms of costs, what we are doing. We are providing a cost-effective program. It is not possible for us to put in the RECORD a comparison of the total costs because of the classified nature of the ATB program. But a comparison of the B–1B portion and the B–52 can be done and has been given to us by Dr. DeLauer.

The President's program avoids the modification costs on the B–52. The President's program avoids the heavy cost of continued maintenance of the B–52's beyond 1990, in terms of their need as a penetrating bomber. I believe that if we compare the President's program costs, the rationale of the B–1B, and the ATB program, with the maintenance of the B–52's until the B–1B's have been delivered for the penetrating bomber, the Senate will find that we have the most cost-effective program.

The effect of the Senator's amendment is to put into the bill additional money for the ATB.

Mr. NUNN. Madam President, will the Senator yield for a brief question on that point?

Because of our disclosure, I hope the Senator will emphasize and clarify that point, that this amendment is directed at the advanced technical bomber, the so-called Stealth bomber.

Mr. STEVENS. This amendment, as I understand it, is directed at Stealth technologies, and it is my understanding that the sponsor of the amendment intends it to be directed toward the ATB.

Does that answer the Senator's question?

Mr. NUNN. That does, and that is exactly the point I was trying to make a little while ago.

Mr. STEVENS. Madam President, there are other items in the Stealth technologies in the same category that this money is being added to, and that is the difficulty of dealing with it.

I have a letter which is not classified but which has not been released for distribution, so I do not feel right in reading it.

Let me make the same point, and that is the point that there is no intention whatsoever, from the point of view of the Appropriations Committee, to allow the ATB technologies to slip.

On the contrary, they present some of the greatest opportunities for us to show the ingenuity of the American system and our ability to deal with innovation and to adapt it to our needs of anything this Senator has come across.

We are dedicating the maximum amount of money possible for the ATB technologies, consistent with the decision that we must maintain the B–52's until we get the B–1B's delivered as penetrating bombers; and we must be able to utilize, to the maximum extent possible, any of the developing technologies that would enhance the B–1B as it is delivered.

I have said it before—perhaps I am a dreamer—but I am one who believes that

we will see the B–1B, as it goes into subsequent generations, incorporate the product of this fantastic research that is going on in our country. It is research that every American can be proud of, because it is full-scale engineering capability to deal with wholly new concepts.

I am now informed that I can quote from this letter. It is a letter that I believe the Senator from Georgia, the Senator from Texas, and the Senator from Virginia sent in November to the Secretary of Defense, concerning the ATB and whether or not the IOC—that is, initial operational capability—of the advanced technology bomber would be allowed to slip and what steps they were prepared to take to provide the earliest production schedule for the program which was reduced.

Secretary Weinberger wrote back to the three Senators as follows:

Regarding your concerns pertaining to the bomber program, let me assure you that I do not intend to permit the Advanced Technology Bomber Program (ATB) (Stealth) to slip. As I stated in my letter of 10 November 1981, the ATB will serve as an essential element of a mixed force of penetrating bombers and cruise missiles through the 1990s and well into the next century. In accordance with the importance attached to the ATB, we have identified the technical risk areas and have adequately funded them. As soon as technical progress allows, we will move into full-scale development. Funds have been set aside in our out-year planning to fund this program fully and to cover the earliest start of full-scale engineering development that we now forecast to be prudent. We are, in sum, committed to proceed at the fastest prudent pace based on demonstrated technical progress. We intend to hold periodic technical reviews under the sponsorship of the EXCOM to reassess progress and future schedules.

The Secretary goes on to discuss other aspects of the Stealth technology.

However, my point in regard to this amendment is that we have more than enough money in this budget to cover the ATB, the Stealth technologies, the B–1B, and the B–52. As other people have pointed out, this is the largest budget in peacetime, so far as weapons procurement is concerned, that has been presented to the Senate.

I hope the Senate will recognize that this issue has been explored thoroughly. After having started from a position different from that of the authorization committee, we have come back to the point where our committee believes the program that was presented and authorized is the correct one, and that is what is funded here, so far as the bill before the Senate is concerned.

Mr. GARN. Madam President, I support the distinguished Senator from Alaska, the chairman of the Senate Appropriations Subcommittee on Defense.

Senator STEVENS has done an excellent job, in my opinion, in putting this package together to insure that we can have the best possible spread of weapons systems with money properly allocated.

I certainly do not intend to take much time now debating the whole issue of B–1, B–52, and Stealth. As a matter of fact, it becomes rather difficult in the Chamber to be able to talk about the so-called ATB because of the highly classified nature of it.

In my opinion, there has been far too much talk in public over the last year or two in any event. Still as unfortunate as it is, it is not a secret program, and we have been talking about it so much.

But I do wish to speak briefly about points that Senator STEVENS has made about the options available and specifically one at this point and only one, and I will have more to say when we get to the B–1 amendments.

We are constantly told by some that the B–52 is a viable option well into the 1990's, that the airframe will still be good in the 1990's.

I have no doubt that the airframe will fly in the 1990's. The DC–3 was built in the middle to late 1930's and the airframes are still flying by the hundreds all over the world.

But we have to ask the question about capability. There are lots of old automobiles that still travel the roads of this country but their capability I do not think would be considered in a number of areas equal to the newer models that are out.

But a B–52, as Senator STEVENS pointed out, is a very old airplane. The comment that has been made over and over again is true, that many of the crews who are flying that aircraft were not born when it became operational.

I had not yet gone through flight training when the B–52 became operational. I have had the opportunity to fly the B–52's, and 15 to 20 years ago it was a very fine airplane. It was the best we could produce. But it simply is not anymore. It is not a penetrator in 1981.

At the very best, the B–52 might get a few into the Soviet Union. I doubt if anyone would come out, with the air defenses they have and the tremendously large radar cross sections where the B–52 will simply appear big on the radarscope to our enemy.

And something else is true about all our planes, whether it is the B–52 or whatever it is, and possibly a lot of the old planes I used to fly as an Air Force pilot. The older they get the more expensive they are to maintain.

So when we first of all look at the capabilities of the B–52 and what it will do if it is still around in the 1990's this Senator will not vote for any funds under any circumstances to waste a lot of money on an old airframe that is not capable of doing the job in 1981 that it was designed to do 25 years ago, and to suggest that we should spend billions and billions of dollars to try and make it continue to do that job into the 1990's, is the most foolish military expenditures we could possibly make.

The second point is as to these estimates about how much it will cost to retrofit, upgrade it, and try and put new black boxes on it to make it do that job. I do not care how much money we spend on the B–52 we cannot turn it into a B–1. We can reskin it. We can restring the wings. We can put new engines on it. We can do all sorts of things, but it is still a B–52. We are on the H model now and as much as I am an advocate of increased military strength to spend more money into the 1990's for an old, old airplane does not make any sense.

Mr. NUNN. Madam President, will the Senator yield for a brief question?

Mr. GARN. I am happy to yield to the distinguished Senator from Georgia.

Mr. NUNN. I have a great deal of respect for the Senator's opinion on this subject. We have talked about it many times.

The Senator signed a letter with several other Senators today, and in the letter the Senator says the B–52 is not sufficiently hardened to withstand nuclear blast effects and cannot be modified to do so.

The Senator goes on to refer to the cost comparison of the B–52 taking all the way to the year 2000 versus the B–1/ATB.

I agree with the Senator. I think that that would be a foolish expenditure to try to have B–52's with electromagnetic pulse hardening work.

Does the Senator realize in the cost comparison we received from Dr. DeLauer on the B–52 he includes $4.9 billion for just that expenditure, and that was not part of the program that anyone had advocated and so in effect it is a strawman simply jacking up the cost of the B–52? Does the Senator realize that?

Mr. GARN. May I say to my colleague from Georgia that I am aware of that and what I was just about to say is that the cost estimates well in the 7 years I have been in the Senate and served on the Senate Armed Services Committee, with the Senator from Georgia, I have yet to see anyone's cost estimates on anything be correct.

Mr. NUNN. I agree with that.

Mr. GARN. That is in 7 consecutive years. So, when we have figures out here in constant this year dollars and inflation rates and all of that I kind of smile that anyone's estimates of being close. Maybe some estimates we get in the ball park.

So my reply is simply I do not doubt that. Everyone tries to make his best case. Those who are opposed to the B–1 will inflate it as far out as they can show the most huge cost overruns and increases they possibly think they can get away with. Those on the other side will try and inflate or deflate the figures as necessary to show the best possible case.

I am not here to argue dollar figures one way or another.

Mr. NUNN. The Senator would agree, then, to spend $4.9 billion for electromagnetic pulse hardening work on the B–52 would be a foolish expenditure, would he not?

Mr. GARN. I think my statement about not wishing to spend any additional money on the B–52 to make it try to do something in the 1990's certainly covers that particular point rather well so I agree with the Senator.

But again we are looking, I am looking at the total package and not an individual item. But I am willing to bet that even those figures increased to show the best possible case, I am willing to bet anyone in this Chamber or out of this Chamber that we will find that the cost

of maintaining that B–52 through those years if we decided to do that would be more than those estimates, even though we may agree they are sort of padded now, simply from history, my hindsight does tell me when I have seen most everything cost considerably more, whether it is in the social field or military field constantly running on and on and on, that they probably are low. I do not think there is much doubt about that. But I say that from a practical experience standpoint of the cost of maintaining older airplanes I have seen it happen over and over again. The Senator from Georgia remembers the C–124 which I spent a large number of years flying back and forth across the Pacific. We were hand-making parts the last 3 or 4 years of operation of that because they were not in production anymore. The C–124 is about the same vintage as the B–52, not too much difference, the old Boeing Stratocruiser, the old fighters, and so on, and the cost when we have no production facilities remaining but we continue them far beyond their original intended service life they become very costly.

So I think on just from the standpoint of the maintenance figures by any hindsight we want to apply we want to keep that B–52 going through the year 2000 I think the costs are going to be far, far beyond what DOD is saying today even if we want to subtract out the $4.9 billion. That is one of the reasons I am so opposed to attempting to do than on the basis of cost alone, even if I thought it would do some of these functions in the 1990's, but I repeat again we simply cannot turn a B–52 into a B–1 or have the capabilities that it has.

The other point I wish to make, without getting into any classified or technical information, is that Senator STEVENS in this budget has tried to present a very truthful budget by increasing the inflation rate that is shown and by also on the B–1 including a 3-percent cost overrun per year, which from his study showed that that was the average cost overrun in a large number of aircraft purchased over the last several decades.

I think that is a fair thing to do to try and present realistic figures. But, on the other hand, if it is fair to do that for those who propose to go directly to the Stealth and ignore the B–1(D) at this time and say that it will be flying in 1991 or even spend additional money to make it fly faster, I think that is one of those cases where the difficulties of the technology involved to expect to speed that up before 1991 are ridiculous. It is simply not possible. We pour all sorts of money and reach a point of diminishing returns where the money will not produce any faster results.

But again I will be willing to make most anyone a bet that we are not going to have that aircraft until 1995 at the earliest because again if it is fair to apply an average cost overrun it is also fair to apply an average time overrun. It is almost impossible to find a major weapons system that has not had months and years of time overrun from when they were originally supposed to be operational. The Trident first boat in the water was 2 years after they originally said it would be and they hope to accelerate that program.

I will not take the time of the Senate to go through all of the examples, but I cannot find examples of major weapons systems where they were completed prior to the original time. They have all been late by a factor of years in many cases.

Forgetting what Stealth can do, we are dealing with from a pilot standpoint stability, flyability, and all sorts of new technologies. When we get into the actual testing phase, usually it is necessary to redesign this part of it. They change this. "Well, we goofed on that." You have to add a little fuselage here and change the empennage and so on.

I think just again from the practical standpoint we are looking at a situation where it is going to drift into the middle 1990's.

So to those who say let us go with the B–52 we are giving the choice of spending money on an old outmoded aircraft that will probably be much higher than most people estimate or waiting all the way until the mid-1990's and having nothing capable in between.

So I believe the only responsible position we can take, both from a cost standpoint and operational capability, is the B–1B, not really that I want to make a choice like I want a choice between a Model A or a possible future car model that may be out in the 1990's, and I will not do anything in between except continue to try and upgrade the Model T during those years until we get it. We are really betting on the "to come" in my opinion.

So as I think I said, the distinguished Senator from Alaska, the chairman of the subcommittee, has done an excellent job on balancing out these strategic weapons systems and I certainly hope the Senate will support that position.

Mr. LEVIN. Madam President, I rise in support of the amendment of the Senator from West Virginia and I only wish to make a couple points.

First, in response to the Senator from Utah, we will indeed see the IOC of the Stealth bomber drift into the 1990's if we do not fund it adequately.

One of the purposes of this amendment is to fund it adequately.

I might also point out that I do not know anybody who is supporting the B–52 as an alternative. The alternatives which are going to be offered are an all ATB and a mixed force. The question is which new bomber or bombers, not whether we have a new bomber. There is a critical need for this amendment.

In testimony before the Strategic Air Subcommittee earlier this year, General Ellis stated:

> The most pressing requirement is to prepare for the long term, 1990 and beyond. To do this right, we should start now to develop a new technology bomber with the earliest possible initial operational capability (IOC).

That, my colleagues, is the definition of the Stealth bomber.

I would point out also to my colleagues that Secretary Weinberger himself said in public testimony:

> Our vigorous ATB program will lead to that plane's deployment under current plans beginning in 1989.

He said that on October 5. Now the IOC slipped several years between October 5 and October 29. Now we are told the IOC is the early nineties. But I repeat that on October 5 in public session the Secretary of Defense said that:

> Our vigorous ATB program will lead to that plane's deployment under current plans beginning in 1989.

Finally, Madam President, I would, of course, want to avoid any risk of getting into classified information. There has been enough debate about that already this afternoon, although I might say that I was at the same meetings of the Armed Services Committee in public that the Senator from Georgia was at, and the information about which he spoke earlier this afternoon, to my memory, was information which was discussed in public session before the Armed Services Committee. There was nothing that he said, to my recollection, that was not discussed in public session at the Armed Services Committee.

But I do want to say that while the questions and the proofs as to how we can speed up resolution of design uncertainty of ATB and how we can give ourselves the option of accelerating the IOC is classified, how we can do that and how fast we can do it is classified, it is not classified information that we can speed up resolution of design uncertainties of the ATB and give ourselves the option of accelerating the IOC. That is not classified information. That is the purpose of the amendment of the Senator from West Virginia, the amendment which is before us.

It is the most critical thing which we are about in the entire strategic program of this country, to have a Stealth bomber earlier rather than later. It is the most advanced technology bomber known to mankind. It makes use of American technology, and I hope we will adopt the amendment of the Senator from West Virginia.

Mr. EXON addressed the Chair.

The PRESIDING OFFICER. The Senator from Nebraska.

Mr. EXON. I thank the Chair.

I rise, Madam President, to support the amendment proposed by the Senator from West Virginia. I have listened to most of the debate on this and I fully recognize and realize there are two legitimate sides to this question.

Those of us who are supporting this amendment are simply saying we are convinced that with the addition of $250 million provided for in this amendment we will indeed, not necessarily have assurance, but the high likelihood we can, move up the IOC on the advanced technology bomber. There are those who do not agree.

But I believe if you would talk to those who are in charge of this program they would likely be with the Senator from West Virginia in simply stating the only thing we could do by not approving this amendment is to make sure that the advanced technology bomber would not come on line sooner than the administration is presently projecting.

It seems to me, Madam President, that with the extensive funding we are going to assure ourselves of the best possible defense, and that we would be wise indeed to take the chance of the $250 million provided for in this amendment, which will indeed allow us to move ahead months, if not a year or more, faster on the IOC for the Stealth advanced technology bomber.

I yield the floor.

Mr. STEVENS. Madam President, if the committee thought additional funds could be used for the research that is involved, we would have added them. We have not been at all reticent about moving to increase the funds available for the Department of Defense at this critical time.

The plain and simple fact of the matter is there must be continued research. I think my friend from New Hampshire probably has spent as much time as any member of our committee on this, and perhaps he wishes to make a comment about it. But he makes the point to me quite often that there is just a limit to the number of people who can be employed in technology research such as this.

The impacts of those limits have been measured. The money we have in this bill now to deal with these technologies is more than sufficient. There is no question that our committee is dedicated, and that the administration is dedicated, to the concept of pursuing the ATB and related technologies at the fastest prudent pace.

I call the attention of the Senate respectfully to the fact that this is another one of the items that was listed on the "Dear Colleague" letter of the Senator from Michigan and the Senator from South Carolina, "additional funds for acceleration of the advanced technology bomber."

Maybe I am not understanding the situation, but I seem to remember so much rhetoric from people who say we are spending too much for defense, that we brought out a bill that is too big.

Now I think we are going to face a series of amendments, as I have said to the Members of the Senate, to add to the largest bill in history in peacetime. Who is kidding whom? No one is kidding me. If there is some indication that people think they can attempt to make the whole concept of defense into sort of a through-the-looking-glass type of proposition, that somehow or other this bill is not big enough, then I think we need a better explanation.

This money is not needed. The money that is needed is in the bill. There is a sufficient amount of money, as a matter of fact, in the R. & D. account to reprogram funds, and they could come back and get additional approval forthwith in this regard.

I know of no Member of the U.S. Senate who would deny the Department of Defense the moneys that were requested to pursue the concept of the ATB and the technologies related thereto.

I yield to my friend from New Hampshire.

Mr. RUDMAN. Madam President, I rise to oppose the amendment offered by the distinguished Senator from Georgia and the minority leader.

After listening with some interest to the rather spirited exchange between the chairman of our subcommittee and my friend from Georgia, I rise with some trepidation because unquestionably we are all debating this issue, Madam President, with our hands tied behind our backs.

It is impossible to address the real issues that underlie this amendment without disclosing data which cannot be divulged in open session.

Having said that, let me try to address the salient points of this discussion: First, although the chairman of our subcommittee, the Senator from Alaska, is unable to announce on the floor and to the American people the level of funding in the program this year, let no one think for 1 minute that it is a small, minuscule sum.

It is an enormous sum of money.

Second, although I am sure the Senator from Nebraska is correct when he says that the people involved in this program would like more, I have yet to find anybody from the Defense Department, either civilian, military, or contractor, who did not want more for the particular program that was before the Senate.

Third, I would like one scrap of evidence presented to this Senate today from any responsible contractor who, in fact, is involved in this program to indicate that any additional money, beyond that which is authorized and which will be appropriated in this bill, will contribute 1 minute of increased efficiency toward reaching an early IOC.

Without going into classified material, let me simply say that the broad technical problems facing the Stealth program are far from solved. They challenge technology, they challenge the state of the art, and they challenge the companies that, in fact, are working on them. We best move slowly and carefully lest we find we have in 1990 a boondoggle that costs billions of dollars and will not fulfill the mission.

This debate at this moment has nothing to do with the B–1 or the B–52. It has to do with whether or not what we are spending is enough.

Further, for those of my colleagues who are on the floor and those who are listening in their offices, the greatest service they can do for their constituents would be to partake of the briefings that are available to us on the Stealth program. When they listen to those briefings and ask the right questions, they will come to some conclusions the nature of which cannot be disclosed in an open session of this type.

So I hope that the $206 billion or $209 billion, or whatever the figure will finally amount to when this bill is passed today or tomorrow, is enough. There is an enormous amount of money in this appropriation for the Stealth technology and we do not need a dime more. I hope we can defeat the amendment.

Mr. STEVENS. Madam President, I move to table the amendment and I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. ROBERT C. BYRD. Madam President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. STEVENS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. ABDNOR). Without objection, it is so ordered.

The question is on agreeing to the motion to lay on the table the amendment of the Senator from West Virginia. The yeas and nays have been ordered and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. HARRY F. BYRD, JR. (after having voted in the affirmative). Mr. President, on this vote, I have a pair with the Senator from Tennessee (Mr. SASSER). If he were present and voting, he would vote "nay." I have already voted "yea." Therefore, I withdraw my vote.

Mr. STEVENS. I announce that the Senator from Arizona (Mr. GOLDWATER), the Senator from Oregon (Mr. HATFIELD), and the Senator from Maryland (Mr. MATHIAS) are necessarily absent.

I further announce that, if present and voting, the Senator from Oregon (Mr. HATFIELD) would vote "yea."

Mr. CRANSTON. I announce that the Senator from Louisiana (Mr. LONG), the Senator from Tennessee (Mr. SASSER), the Senator from Mississippi (Mr. STENNIS), the Senator from Massachusetts (Mr. TSONGAS), and the Senator from Nebraska (Mr. ZORINSKY) are necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 51, nays 40, as follows:

[Rollcall Vote No. 431 Leg.]

Long	Stennis	

So the motion to lay on the table Mr. ROBERT C. BYRD's amendment (UP No. 723) was agreed to.

Mr. STEVENS. Mr. President, I move to consider the vote by which the motion was agreed to.

Mr. BAKER. I move to lay that motion on the table.

Mr. STEVENS. Mr. President, it is my understanding that the Senator from New Jersey has an amendment.

The PRESIDING OFFICER. Under the previous order, the Senator from New Jersey is recognized.

UP AMENDMENT NO. 724

(Purpose: To require the President to submit certain reports to Congress)

Mr. BRADLEY. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The bill clerk read as follows:

The Senator from New Jersey (Mr. BRADLEY) proposes an unprinted amendment numbered 724.

Mr. BRADLEY. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate place and the following new section:

"SEC. . (a) The national security requires a sustained enhancement of our military capability during the 1980s and 1990s. An adequate base of domestic economic power and enduring public acceptance of the cost are essential to a sustained improvement in our military readiness.

(b) The Administration's original forecast of economic and productivity growth, had it proven correct, would have substantially ensured that we could have satisfied these requirements. However that forecast presumed a radical improvement in our economic performance compared with the actual experience of the past several years. Moreover, our most recent experience, as well as the Administration's revised projections, confirm that we will not achieve the high growth levels on which the 1982–86 defense budget was premised. Furthermore, the economy is now in a recession of uncertain magnitude and duration. Because output has fallen, the burden of defense spending on American taxpayers has risen. If this burden grows, it could erode both the economic and the political base for a sustained increase in defense spending. To anticipate this threat and provide a comprehensive framework for Congress to evaluate the Administration's 1982 Posture Statement and 1963 Budget Request, the President shall prepare a report to Congress by January 31, 1982 describing:

(1) How the combination of a three-year tax cut and the projected defense spending increases for the period fiscal year 1982 through fiscal year 1986 will affect inflation, interest rates, and unemployment given low (under 2 percent), medium (2 to 4 percent), and high (over 4 percent) real economic growth rates.

(2) What alternative tax and expenditure policies the Administration will propose and what specific adjustments to our military strategy and programs will be required for the near, medium, and long term if economic and productivity growth continue to fall far below originally projected levels.

(3) The specific adjustments to our military strategy, requirements, and programs that would be needed if inflation in the defense sector is significantly higher than in the economy at large.

(c) A sustained enhancement of our military capability also requires a strategy that efficiently serves our most important national security and foreign policy objectives. This requires recognition that the U.S. no longer has the resources to defend independently all Western interests that will be threatened by Soviet power in the late 1980s and 1890s. We must therefore concentrate improvements in our military capability either on helping allies deter Soviet attacks in Western Europe and Northeast Asia or on defending friends and assets in the Near East. We must also foster progressive redistributions of the burdens and responsibilities for the defense of Western Europe, Northeast Asia, and the Near East. Accordingly, by January 31, 1982, the President shall prepare a report that answers the following questions:

(1) To what extent and in what ways does the Administration intend to allocate additional resources to securing vital allied interests in the Near East?

(2) What are the relative, long-term costs of defending the Persian Gulf region with and without at least one nearby base complex or set of facilities that could support major air defense and maritime operations as well as training, command, control, communication, intelligence, and logistics functions?

(3) How do the requirements for defending the Near East differ from those of Western Europe and how does the Administration plan to design more effective and efficient forces for this region's climate, terrain, and logistical environment to minimize the costs of developing and deploying such forces?

(4) What plans does the Administration have to increase our forward deployment capability by home-porting more ships in foreign bases, by pre-positioning equipment and material, or by building greater logistical facilities near the Persian Gulf?

(5) How does the Administration's long-range defense planning take account of economic competition between America and its allies and the decline in U.S. productivity relative to Japan and Western Europe?

(6) What assumptions does the Administration's budget make about the long-term redistribution of roles and responsibilities between the U.S. and its allies in defending Western Europe, Northeast Asia, the Near East, and their adjacent seas or ocean areas?

Mr. BRADLEY. Mr. President, before I begin my statement on this amendment, which will be lengthy, I yield to the Senator from Arizona for a unanimous-consent request.

Mr. DECONCINI. I thank the Senator from New Jersey.

Mr. President, due to circumstances beyond my control, it will be difficult for me to offer tomorrow an amendment I have, and I have notified the Policy Committee. I have talked with the manager of the bill, the majority leader, and the minority leader, and I ask unanimous consent that following the conclusion of the amendment offered by the Senator from New Jersey, my amendment be the next pending amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BRADLEY. Mr. President, the amendment I am offering today is substantially the same one I offered last May when we were debating the first concurrent budget resolution.

I argued then that our national security requires a sustained enhancement of our military capabilities.

I further argued that sustaining a large increase in defense spending requires a sound economy and good prospects for future economic growth.

I suggested that the administration's economic forecasts on which their original defense budget was based would prove excessively optimistic, and I suggested that the tax and expenditure policies premised on those forecasts would lead to high interest rates and rising unemployment.

Finally, I argued that the administration's exclusive reliance on tight money to control inflation would choke off any potential we might have for rapid economic growth in America.

Mr. President, I did not then, nor do I now, share the administration's faith that a supply-side miracle will cause productivity and economic growth rates to surge. I was concerned about how to preserve a consensus for a sustained defense buildup in the face of a recession of unknown magnitude and duration.

One reason for my concern is that rising unemployment means lower output. This, in turn, increases the burden the defense spending imposes on American taxpayers. I feared that this additional burden, at a time when our economic future is uncertain at best, would erode support for defense before our buildup had even begun.

To help us avoid this outcome, I proposed an amendment that would have required the President to do four things: to anticipate, first of all, the implications of both low economic growth and high inflation for the administration's defense policies; second, to consider what alternative economic strategies the administration might pursue should their original forecasts prove incorrect; third, to identify the adjustments to our defense strategy programs and requirements that might be needed, given high inflation and low economic growth; finally, to report these findings to Congress by October 1981.

Mr. President, had this amendment been adopted, it is my belief that Congress would be in a much better position today to manage the appropriation and budget processes. It was not adopted, and I offer it again in the same bipartisan spirit that I offered it last May.

Let me repeat the purpose of the amendment. It is to underscore the importance to our Nation of a sustained enhancement of our military capability. This is necessary both to deter conflict and, should deterrence fail, to win that conflict.

Mr. President, in a democracy as robust and open as ours, sustaining a big defense buildup in the face of strong competition from civilian programs requires several things.

First and foremost, it requires a healthy economy and good prospects for continued economic growth.

If a lot of people are out of work, or if there is a pervasive fear of high inflation, the consensus for allocating the growing share of our resources to defense will rapidly erode.

Experience bears this out. In the past our defense spending has undergone cycles of boom and bust. This pattern has done a number of things.

It has increased cost. It has undermined our defense industrial base. It has impaired the readiness of our general purpose forces. It has interfered with the efficient evolution of our strategic programs, and it has caused friend and foe alike to question the reliability and credibility of our security guarantees.

If we are serious about avoiding past errors and improving our military capability over the long haul, we must act now to foster the vigorous economic growth on which those improvements in defense depend.

Had the administration's economic forecasts been correct, there would probably be no need for this amendment.

But instead of high growth and low unemployment we have a recession. Instead of growth in fiscal 1982 of 5.2 percent, as the administration projected, we are now more likely to have 1.5 percent or 2 percent max. Instead of unemployment at 7.3 percent, as the administration projected, we are more likely in fiscal 1982 to have unemployment at 9 percent. Maybe the tax cuts we have enacted will keep that recession short and shallow. Right now, though, a lot of analysts are betting it will be long and deep.

Let us say it is short and shallow because the tax cuts are coming online in July. What does that signal? It signals the possibility of renewed inflationary pressures.

When the President's budget is fully implemented in 1986, he will have cut taxes by over $750 billion, raised military spending by over $180 billion and cut civilian programs by no more than $130 to $140 billion.

Even if the President gets all his civilian cuts, most of which are still unspecified, they still are not large enough to do the job.

Were the administration wholeheartedly committed to a sustained improvement in our defense programs the President would have been calling for tax increases not tax cuts. Why did he not? Presumably because he believed in the supply side miracle, that that would produce sufficient revenues for the military buildup and in fact at one point he said that the increased revenues from the tax cuts would provide the revenues to finance the military buildup.

As one of a handful of Senators who voted against the multiyear tax cuts but for the spending cuts, I can say unequivocally that I do not believe in the supply side miracle.

I do not think that we can count on it to finance our buildup in national defense.

Guns, butter, and a balanced budget cannot all be delivered by 1984. Yet so far the administration has shown reluctance to trim its ideology to economic reality, and here I put in evidence, the latest budget resolution coming out of the Budget Committee where the administration refuses to take a position on economic prospects.

The amendment I offer will assist them to do so.

If the budget deficit is to be contained, even at levels previously held unthinkable, either defense will have to be cut or more revenue will have to be raised. Those are our choices.

As I pointed out earlier, cutting nondefense will not give us the numbers. If this amendment is adopted, it will increase the likelihood that our economic policies can accommodate the level of military spending our leaders demonstrate we need.

We should not have to formulate defense policies in terms of what we can afford. The notion that we cannot afford the defense effort our security requires is a dangerous illusion.

We are fortunate that with proper economic policies we can sustain the level of defense spending our military and foreign policy objectives deserve and require. The key phrase though is "with proper economic policies."

I remain skeptical, as I said, that the present combination of tight money and highly stimulative fiscal policy is well designed to promote noninflationary growth. On the contrary, it is likely to lead to a possibly protracted recession followed by increasing inflation. This outcome quite simply will not permit us to maintain the level of defense spending the President and the Senate Armed Services and Appropriations Committees say we need.

My distinguished colleagues on these committees have already voiced fears similar to those I have expressed today. In fact, in the report of the Senate Armed Services Committee to accompany the 1982 defense authorization bill, S. 815, the members stated:

> The Committee is convinced that a sustained and increased defense effort is required. Moreover, it is the commitment to defense programs—not to a defense funding level—that is essential.
>
> In this regard, the committee is concerned about the potential impact of underestimates in inflation on the execution of defense programs. The President has embarked on an ambitious economic recovery program intended to curb the increase in inflation. There is substantial disagreement, however, between the inflation projected by CBO and that of the President. Based on the CBO estimates of inflation, additional spending will be required to execute the President's planned defense programs.

And I emphasize that.

The report says:

> Based on the CBO estimates of inflation, additional spending will be required to execute the President's planned defense programs.

The report goes on:

> The committee found no basis for accepting the CBO estimates of inflation instead of the President's estimates.

That report was issued last May. Since then, it has become clear that the President's estimates were wrong. This fact is acknowledged by the distinguished members of the Senate Appropriations Committee in their November report to S. 1857 which states:

> The Committee has carefully analyzed inflationary trends in the national economy, particularly as they apply to defense activities and purchases. Two points become vividly clear: the rate of inflation is not slowing to the degree projected in the President's budget, and inflation in defense activities and purchases continues to exceed by a substantial margin the national average.
>
> Although the budget anticipated an inflation rate of 8.7 percent for fiscal year 1981, the final composite figure was actually 13.3 percent. And there is no evidence yet that this rate has slowed markedly.
>
> These developments make it painfully apparent that the optimistic 8.4 percent inflation rate projection contained in the President's September budget is not attainable.
>
> The impact of badly underestimating inflation is severe. It will cut back FY81 program levels by more than $2 billion and the impact in FY82 will be much the same if steps are not taken now to finance a more realistic rate. . . .
>
> Based on its analysis the Committee is recommending an increase above the President's budget and above the authorization level for FY82 totalling $1.6 billion, which is the amount needed to finance a 10 percent inflation rate. Even this projection is considered moderate, but it at least presents a more realistic approach to the economic realities confronting the Nation.

What I have to say about the Appropriations Committee's report expressing grave reservations about these economic forecasts is that I commend my colleagues for their realism and their candor in bringing these important considerations to the Senate's attention. But I submit that it is unlikely we will have the votes to expand defense spending to accommodate rising inflation. Rather, we will more likely have to absorb inflation within existing budget levels. It is therefore essential that, as the administration prepares their 1983 budget request and 1982 Defense posture statement, they start thinking about how to bring defense and economic policies in line with reality. This amendment will assist them in that effort.

Unless we face up to the facts now, we are all too likely to gloss over the gap between the programs we say we need and the actual cost of those programs. Nor will we make the tough decision to live within our means by cutting out certain programs and closing down production lines. Instead, we will tacitly acquiesce in a defense budget we know to be underfunded. And we will doubtless cope with this situation the way we have in the past—by shortchanging the readiness of our general purpose forces.

This outcome must be avoided. There already is a serious question about our forces' capacity for a timely, effective and sustainable response to the most likely military threats. The reason is that we have historically underfunded essentials like spare parts, major overhauls, and operation and maintenance activities. And we have subordinated readiness, mobility, and sustainability to weapons procurement. This trend must be reversed, for without readiness, deterrence is a sham.

At the same time, calculated underfunding of defense in the past is no excuse for overfunding in the future. To strike the right balance we must search systematically for the defense policy and programs that are appropriate for the United States at a time when there is

fierce internal competition for resources and fierce economic competition from abroad.

This amendment will assist that search. It requires the administration to anticipate the implications for military spending of low or zero economic growth. And it calls on them to articulate a strategy for defense, premised on a sharply focused analysis of the tough choices we must make if we are to sustain our military commitments over the long haul. What are these tough choices?

First, these choices are forced upon us because the economic and military fat that used to give the United States a protective layer has virtually disappeared. It is a fact of life that the division of responsibility among the NATO allies was predicated on quite different political and economic circumstances than exist today or for the foreseeable future.

When the alliance was formed, America did not need allies; they needed America. At the end of World War II, the United States had a virtual monopoly of the world's productive capacity and monetary reserves. Whereas the rest of the world, including Soviet Russia, appeared hopelessly devastated by the war, the United States emerged from it immensely strengthened. By the end of the Vietnam war, the situation had radically and fundamentally changed.

This fundamental change in the relative economic strength of the United States, Western Europe, and Japan makes it imperative that we reassess our roles in, and responsibilities for, the defense of Western Europe, Northeast Asia, and the Near East. This reassessment should take place before we become committed to a particular set of defense programs. And the conclusions of that reassessment should guide our defense strategy and our military requirements.

In addition to shifts in the economic balance among the allies, our defense strategy must also reflect a recently and belatedly discovered priority, namely the need to secure a sustained flow of oil from the Persian Gulf region to the industrialized democracies. Our economic circumstances mean that we will be hard pressed to independently defend all Western interests that will be threatened by Soviet expansion or local wars in the 1980's and 1990's.

Thus, we will need a strategy that concentrates improvements in our military capability either on helping allies deter Soviet attacks in Western Europe and Northeast Asia or on defending friends and assets in the Near East. In making this choice, we need to recognize where our comparative advantage lies and where we have a unique role in defending our collective security interests.

Implementing the choice requires a long term strategy based on agreement with our allies for a redistribution of responsibilities for the defense of Western Europe, Northeast Asia and the Near East.

But before we can decide on the optimal allocation of our defense resources, we need to know how the problem of, and requirements for, an adequate defense of the Near East differ from those of Western Europe and Northeast Asia. We also need to know what the alternative costs are of defending this area with and without at least one nearby base complex or set of facilities.

This issue is fundamental to our strategic choices. The region's remoteness from the United States and major allies, and its relative proximity to the U.S.S.R., may make it impossible to compete with the Soviet Union in the Near East at an affordable cost unless we secure facilities to support major air defense and maritime operations in the area.

These are the kinds of questions my amendment poses to the administration. There will be some in this body who will argue that the amendment is out of place or redundant. When I offered it last May, the distinguished chairman of the Armed Services Committee assured me if I would just read the report accompanying the 1982 DOD authorization bill all my questions would be answered. I did read that report. But it did not talk about fiscal and monetary policy. Nor did it plan for the contingency that our economy would be in recession this year and perhaps much longer. And the programs, that legislation authorized, were based on inflation estimates that the Appropriations Committee now recognizes are invalid. So I believe this amendment is appropriate and useful in focusing the administration on the real problems we face in sustaining a sound defense buildup.

Others will argue that the amendment is redundant because we are already getting information on allied and Japanese contributions to our common defense. But I am not talking merely about how much each of us spends relative to the others. I am talking about the development of an American strategy premised on U.S. leadership and on a frank appraisal of where we have a unique advantage in defending common interests of our allies and ourselves. This is essential if we are to be perceived as strong and credible by our friends and by our adversaries.

Some in this body may say "no, do not offer the amendment at the outset of TNF negotiations with the Soviet Union." These critics will tell me I am undercutting the President. On the contrary, by facing up to reality we will be strengthening the President's hand. Whether the TNF talks succeed or fail, Europe must play a larger role in determining her own defense. And America must do more to defend those areas beyond Europe's reach.

What have we done so far to secure vital allied interests in the Persian Gulf? Not much. We have agreed to sell AWACS and F–15's to Saudi Arabia and we have created the rapid deployment joint task force—at least on paper. But we still do not have a strategy for allocating additional resources to this region. The Appropriations Committee recognizes this. The report states once more:

> To date, the joint task force nature of the present RDJTF has failed to create both plans and organization necessary to meet the threats which the United States may face in Third World areas throughout the 1980s.

If my amendment is adopted, the administration will be forced to address these questions before we are locked into programs and procurement contracts that do not most efficiently promote our main security objectives.

Mr. President, in closing, let me just add America is virtually unique among Western democracies in that most other countries the elected representatives debate the underlying concepts of their defense budgets and programs. They deal with foreign policy and with broad issues of military resource allocation. The technical decisions as to which weapons systems will most efficiently implement the policies are left to the experts.

In the United States, however, particularly in Congress, debates focus on weapons systems. No one seems willing to debate the underlying concepts. My amendment, I hope, will be the first step in redressing this dangerous imbalance.

Finally, it is worth repeating that the defense budget cannot be isolated from the economy as a whole. How much we spend for defense and the way we allocate our defense dollars have large economic implications. If, for example, we divert the bulk of the Nation's R. & D. to defense while the Japanese are free to commercialize the results, our competitiveness will deteriorate rapidly. In the long run, both countries will suffer and the world will be much less stable.

So far, we have resisted putting our defense programs in context. This amendment is a small but important step in remedying that situation. I would hope that my colleagues would support it and I hope the chairman of the committee will see its merit and that we might engage in further discussion after he has had a chance to study this proposal.

(Mr. CHAFEE assumed the Chair.)

Mr. STEVENS. Mr. President——

Mr. BRADLEY. If the Senator will yield, I wonder if he would respond to the No. 1 question, which is what happens to our defense programs if inflation is higher than expected, and how will he in the Appropriations Committee and we in the Senate begin to make the choices that are going to be necessary to fully fund the levels we have approved but the programs we have approved? Further, what kind of strategy backs that up?

Mr. STEVENS. Mr. President, I have high regard for the Senator from New Jersey, but to answer his question would be to assume the capability of speaking for the Armed Services Committee, the Budget Committee, the Finance Committee, the Governmental Affairs Committee, the Joint Economic Committee, and that I would be prepared to amend the Constitution of the United States with a rider on the defense appropriations bill.

The Senator's amendment would require the President of the United States, by January 31, 1982, to prepare a report that answers a series of questions: What additional resources we are going to allocate to the Near East; what the long-term costs of defending the Persian Gulf are; what we plan for a more effective and efficient force in the region of the Near East; what plans the administration has to increase deployment capa-

bility by home porting of more ships in foreign bases; how the administration's long-range defense planning takes into account economic competition of America; and what assumptions the administration's budget makes about the long-term redistribution roles and responsibilities as far as Western Europe, East Asia, the Near East, and the adjacent seas or ocean areas.

Very frankly, Mr. President, I am prepared to debate the provisions of the appropriations bill that is before us. This amendment, in my opinion, is not an appropriations amendment. It is legislation on an appropriations bill. If the Senator wishes to debate the concept, perhaps he would want to have a separate joint resolution.

With as much comity as I would like to be known for in the body, I have to tell my friend there is no alternative but to ask that the amendment be tabled, and I do move to table the amendment.

The PRESIDING OFFICER. The question is on agreeing to the motion to table.

Mr. STEVENS. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The question is on agreeing to the motion to lay on the table the amendment of the Senator from New Jersey. The yeas and nays have been ordered and the clerk will call the roll.

The legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Arizona (Mr. GOLDWATER) and the Senator from Maryland (Mr. MATHIAS) are necessarily absent.

Mr. CRANSTON. I announce that the Senator from Nevada (Mr. CANNON), the Senator from Louisiana (Mr. LONG), the Senator from Tennessee (Mr. SASSER), the Senator from Mississippi (Mr. STENNIS), the Senator from Masachusetts (Mr. TSONGAS) and the Senator from Nebraska (Mr. ZORINSKY) are necessarily absent.

I further announce that, if present and voting, the Senator from Tennessee (Mr. SASSER) would vote "nay."

The PRESIDING OFFICER. Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 56, nays 36, as follows:

[Rollcall Vote No. 432 Leg.]

NOT VOTING—8

Cannon	Mathias	Tsongas
Goldwater	Sasser	Zorinsky
Long	Stennis	

So the motion to lay on the table Mr. BRADLEY's amendment (UP No. 724) was agreed to.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the motion to table was agreed to.

Mr. WALLOP. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. STEVENS. Mr. President, I know that the Senator from Arizona is to be recognized and that he has an amendment. Are there other Senators with amendments they would like to get in line here, so to speak, following the amendment of the Senator from Arizona?

UP AMENDMENT NO. 725

(Purpose: To express the sense of the Senate that the MX missile system should not be based in or near areas with high population density)

Mr. DECONCINI. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Arizona (Mr. DECONCINI) proposes an unprinted amendment numbered 725.

On page 28, line 19, insert the following:

The purpose of the MX missile system is to provide the United States with a survivable counterforce strategic weapons system to counter the growing technological and numerical advantages of the Soviet Union's strategic arsenal;

It is the sense of the Senate that basing the MX missiles in or near areas of high population density is inimical to the counterforce goals and other purposes of the MX missile system and unnecessarily exposes civilian populations to risk; and,

The Senate urges the Department of Defense to avoid high population density areas either for interim basing sites for the MX missile or in its selection of a permanent basing mode.

Mr. DECONCINI. Mr. President, there have been years of discussion and study over the proper and most effective method of basing the MX missile. The legislation before us today provides moneys to carry forth that study and evaluation process. President Reagan recently announced that his administration would move forward with a limited MX deployment while a final decision on the ultimate basing mode was made.

I must confess a certain disappointment that the new administration did not feel yet able to make a final basing decision. However, I also believe that it is critically important to the security of the Nation to deploy MX as rapidly as possible. If that means making do with an interim basing mode, then we should move ahead quickly.

However, I am greatly disturbed by some preliminary indications emanating from the Department of Defense that the interim basing of MX might involve using existing Titan sites located adjacent to densely populated areas. This seems to me, Mr. President, to be totally counterproductive.

The MX missile represents a new phase in American strategic thinking; a departure from the concept of mutual assured destruction which relied almost solely on a countercity or countervalue strategy to deter Soviet aggression. In the years since MAD first came into prominence, we have discovered that the Soviet Union not only believes that a limited nuclear war is possible, but has constructed a nuclear arsenal based upon that assumption.

Because the Soviets are building a strategic force capable of waging a counterforce nuclear war—that is, an attack limited to military targets which specifically exempts civilian populations centers—the United States is forced to deal with that possibility. Not to do so would subject our Nation to nuclear blackmail. The MX missile, thus, serves two interrelated purposes.

First, its great accuracy and payload make it an ideal weapon to target against hardened Soviet military targets.

Second, its basing mode should make it either capable of withstanding a first-strike or so costly in terms of an expenditure of Soviet missiles to eliminate it that it is effectively survivable.

Logic dictates that in basing the MX we should not sacrifice either of these capabilities. Unfortunately, if the MX is based adjacent to urban areas, its effectiveness in bringing the United States into a new strategic era will be almost entirely undermined. By basing it—even on an interim basis—next to cities, we insure that a counterforce exchange is automatically escalated into a countervalue or countercity exchange. And while no one wants to contemplate such awful scenarios, it must be done.

If the MX is to be housed on an interim basis in renovated existing silos, they should be located as much as possible in remote areas. It serves absolutely no purpose to locate them next to urban areas. Simultaneously, of course, it also exposes the inhabitants of those areas to potentially greater danger. In the event that a catastrophe should occur, we must be mindful to take steps in our planning to minimize the total number of casualties.

My amendment which is structured as a sense of the Senate resolution is simple. It merely urges the Department of Defense to take this important factor into account and to develop basing modes for the MX—interim and long term—which are as removed as practicable from high density population areas. It is not binding, but it does provide some guidance from Congress to the Pentagon planners. Clearly, if overwhelming technical considerations dictate that the MX must be based near urban areas, then my amendment would not prevent this from being done.

Mr. President, I hope the managers of the bill will accept this amendment,

because I do not believe it is anything to which anyone can violently object.

The area of some of the Titan missile silos has grown very rapidly, and we find them in very densely populated areas. There are alternatives for the basing of these missiles, and this sense-of-the-Senate resolution would instruct the Pentagon planners to give this careful consideration.

In the case of the Titans, they are to be removed, as indicated, by the Department of Defense and the Secretary of Defense; and if other missiles are to be placed there, it seems to me that the consideration of the population density should be paramount in any such decision.

I yield to the Senator from Alaska.

Mr. STEVENS. Mr. President, my good friend from Arizona does have an interesting amendment; but if the same rationale applies to strategic systems, I do not know what any President, as Commander in Chief, could do to deploy our systems and to maintain the options that are necessary.

Not only do we have the Titan silos under study, but also, we have the whole question of the MX.

I understand the Senator's interest, from a geological point of view and a geographical point of view, as he well knows, because of my own personal knowledge of the area in which he lives; but there is no way we could agree to take this amendment to conference. It would yield, I am afraid, to additional restrictions upon the Commander in Chief in terms of deployment of our strategic arsenals.

I hope the Senator will not press the amendment. It is a sense-of-the-Senate amendment. This is really not a proper place for the amendment. If we want to have a debate on a sense-of-the-Senate resolution dealing with the whole question of counterforce and strategy concepts, I think we should do it another time. It is not technically legislation on an appropriation bill. It is just a sense-of-the-Senate amendment.

Mr. DECONCINI. Mr. President, will the Senator yield?

Mr. STEVENS. I yield.

Mr. DECONCINI. I say to the distinguished Senator that when the Titan missiles were deployed, it was 19 or 20 years ago, and at that time it was the policy of the Pentagon obviously not to place them near populated areas. With the growth of many of these areas, we see a change—not in the decisions of the Defense Department but in a population decision, in a geographic location. The statistics have altered what now exists—our populated centers with these missiles nearby.

And my amendment is not a mandate. I am not trying to step into the decision process that that requires and I thought about that because many people in the State that this Senator represents feel very strongly that they want to be strong and supportive of national defense and a new missile system, but they also have some real concerns when there are alternatives and there are many alternatives that are yet to be formally decided by the Defense Department for the deployment of the MX.

In the case of southern Arizona we are talking about an immediate population area of over 500,000 people. Some of these Titan missile bases now border on the city limits. They are surrounded by subdivisions and schools and there are areas that these MX missiles could be placed in in either the Minuteman II silos or perhaps Titan silos that are not near populated areas. All the ones in Arizona are in fact, with the exception of three, very near populated areas and those that are not are within 10 or 15 miles.

I just cannot quite agree with the distinguished Senator from Alaska that this is an area that we should be involved in unless we are going to have a big debate about counterforces and what have you.

So I am prepared to vote on the amendment, and I ask for the yeas and nays on the amendment.

The PRESIDING OFFICER. Is there a sufficient second on the request for the yeas and nays on the amendment?

There is a sufficient second.

The yeas and nays were ordered.

Mr. STEVENS. Mr. President, I move to table the amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion to lay on the table the amendment of the Senator from Arizona.

On this motion the yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Arizona (Mr. GOLDWATER) and the Senator from Maryland (Mr. MATHIAS) are necessarily absent.

Mr. CRANSTON. I announce that the Senator from Nevada (Mr. CANNON), the Senator from Louisiana (Mr. LONG), the Senator from Tennessee (Mr. SASSER), the Senator from Mississippi (Mr. STENNIS), the Senator from Massachusetts (Mr. TSONGAS), and the Senator from Nebraska (Mr. ZORINSKY) are necessarily absent.

I further announce that, if present and voting, the Senator from Tennessee (Mr. SASSER) would vote "nay."

The PRESIDING OFFICER (Mr. HAYAKAWA). Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 57, nays 35, as follows:

[Rollcall Vote No. 433 Leg.]

YEAS—57

Abdnor	Glenn	Nunn
Andrews	Gorton	Packwood

NOT VOTING—8

Cannon	Mathias	Tsongas
Goldwater	Sasser	Zorinsky
Long	Stennis	

So the motion to lay on the table Mr. DECONCINI's amendment (UP No. 725) was agreed to.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the motion to lay on the table was agreed to.

Mr. BAKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. SCHMITT addressed the Chair.

The PRESIDING OFFICER. The Senator from New Mexico.

VIPER

Mr. SCHMITT. Mr. President, the committee in its report has addressed the concerns which have been expressed over the time about the Viper program. I want to mention the outstanding efforts of Senator RUDMAN in this matter.

This program has encountered problems, major cost increases and delays in schedule. In the past, the committee has refused to allow the Army to proceed with production due to these problems.

On July 8, 1981, six members of the Appropriations Committee wrote to General Meyer urging the Army to conduct a competitive analysis of comparable systems which are currently available or could be available in the very near term. To date the Army has not conducted such analysis to the satisfaction of the committee. I ask unanimous consent that the letter to General Meyer be printed in the RECORD.

The letter has been signed by Senators STEVENS, RUDMAN, PROXMIRE, D'AMATO, ANDREWS, and myself.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
COMMITTEE ON APPROPRIATIONS,
Washington, D.C., July 8, 1981.

Gen. E. C. MEYER,
Chief of Staff, U. S. Army, The Pentagon, Washington, D.C.

DEAR GENERAL MEYER: The preponderant advantage in battlefield armor enjoyed by Soviet and Warsaw Pact forces unquestionably represents a significant challenge to Western security objectives in Central Europe. Efforts to modernize U.S. and allied armored capabilities and upgrade those systems designed to counter or neutralize this threat have met with varying degrees of success. In the area of light anti-armor capabilities, however, concern has been raised about the adequacy of our modernization programs, particularly with respect to the cost-effectiveness of systems under development and their ability to meet or exceed the performance criteria originally established.

In this regard, we wish to express our deep concern over the developmental problems experienced by the Army's Viper anti-tank rocket system. Testimony before the Defense Appropriations Subcommitee has led to dis-

turbing questions about Viper's recurring technical defects and unbridled cost escalation, problems which compound the substantial slippage in its IOC date even as the Soviet threat expands. Doubts about Viper's suitability as a replacement for the LAW system (initially fielded in 1962) have grown accordingly.

With respect to cost, the Army testified last year before the House Defense Appropriations Subcommittee that each Viper round could be purchased for $308. The per-round cost estimated cited this year is $619, and some cost projections hover in the $800–$1000 range, if and when Viper enters the production stage. Total program costs are now anticipated to be approximately four times greater than originally predicted.

Reflecting this concern, House-Senate conferees on the FY 1981 Supplemental Appropriations bill agreed to add report language which placed stringent restrictions on the Army, requiring prior Congressional approval from both the House and Senate Appropriations Committees before a production contract on Viper could be signed. This measure underscored the conferees' fear that the Army would make a "premature and unjustified" decision to field Viper before all mechanical deficiencies had been satisfactorily resolved and program costs brought under control.

We understand that the Viper anti-tank rocket is designed to be the infantryman's weapon of last resort against the battlefield armor threat. As such, we were distressed by the findings of the General Officer In-Process Review of December 1980, which highlighted Viper's shortcomings and fueled additional skepticism about the system's adequacy to perform the light anti-armor role. More recently (March 1981), a Viper round exploded on its gunner and all testing was temporarily suspended.

The significant improvements which Viper was touted to incorporate over the LAW system are still highly problematical. Indeed, test results since 1975 support the conclusion that Viper will be unable to achieve its original battlefield mandate. For example, it is our understanding that, contrary to initial performance specifications, a Viper system deployed today would have virtually no chance of penetrating the frontal armor of a Soviet T–72 tank sufficiently to ensure a "kill." Moreover, the anticipated vast reduction in the firing signature (i.e. noise, flash, smoke, overpressure, etc.) which would disclose a gunner's position to adversary forces has failed to materialize. It has been reported to us that Viper's signature even exceeds that of the LAW system. Yet even with this performance record and an apparent relaxation of the requirements which would qualify Viper for preliminary production, we understand that overall Viper costs will be approximately five times greater than those of the system it would ostensibly replace.

At the same time that the Army has experienced ongoing difficulties with the Viper development program, several of our allies have made substantial progress with their own anti-tank weapons. For example, systems such as West Germany's Armbrust, which has been in production since 1978, may offer a potentially more cost-effective alternative for light anti-armor missions according to the operational requirements which the Army has itself defined. We understand that efforts have consistently been made over the past three years to generate interest within the Army to test this system pursuant to determining its adequacy for this critical role.

In view of the significant advances achieved by some of our allies in the field of light anti-armor weaponry, we strongly urge you to conduct a competitive analysis of systems such as Armbrust which might respond more effectively to the threat confronting our forces. Although it is essential that the Army and other military services be permitted sufficient latitude to develop new weapon systems, we likewise believe that sound procurement policies and a prudent sensitivity to cost growth warrant the testing of alternative foreign systems whose operational capabilities for a given mission may surpass those of U.S. prototypes.

The Army's paramount obligation is to provide our combat troops with the most reliable and technically proficient systems at affordable prices. We sincerely hope the Army will take due account of this verity throughout the remainder of the Viper development program.

We would appreciate receiving a full report from you on all issues affecting this program. Thank you for your attention to our concerns.

Sincerely,

TED STEVENS,
HARRISON SCHMITT,
ALFONSE M. D'AMATO,
WARREN B. RUDMAN,
WILLIAM PROXMIRE,
MARK ANDREWS,
U.S. Senate.

Mr. SCHMITT. Recognizing the need for a new, light antiarmor weapon for the Army at this time, the committee has provided production funds for Viper in this bill. It has also included language approving the use of fiscal year 1981 funds for production of Viper. This approval, however, does not indicate that the committee is no longer concerned about the problems encountered in this program, nor has the committee's desire for a full competitive analysis of alternate systems diminished.

The report language specifically directs the Army to commence testing of all available light antiarmor systems, foreign and domestic beginning within 90 days of contractor notification of availability. The results of such tests shall be reported to the Appropriations Committees of the House and Senate within 60 days following completion of the tests. This language provides for initial production of Viper and, at the same time, it meets the concerns of the committee in finding the best available light, antiarmor weapon at the best cost.

This Senator, however, did have a concern whether the Army would, in fact, comply with the report language since the Army has refused in the past to conduct a shoot-off of any competing systems of Viper. As a result of this concern, I was in contact with the Army and expressed these concerns to them. The Army has assured me that they intend to comply with the report language. In a letter dated November 30, 1981, Assistant Secretary of the Army J. R. Sculley assured me of the position of the Army on this matter. I ask unanimous consent that Secretary Sculley's letter be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

DEPARTMENT OF THE ARMY,
OFFICE OF THE ASSISTANT SECRETARY,
Washington, D.C., November 30, 1981.

Hon. HARRISON H. SCHMITT,
Committee on Appropriations, U.S. Senate, Washington, D.C.

DEAR SENATOR SCHMITT: The United States Senate Committee on Appropriations Report No. 97–000, Department of Defense Appropriation Bill 1982, expresses concern over the VIPER program and provides specific language for the Army to commence testing all available light anti-armor systems, foreign and domestic, beginning within 90 days of contractor notification of availability and expression of desire to test and that the results of all such tests shall be reported to the Appropriations Committee of the House and Senate within 60 days following completion of the individual tests.

The Army shares the Committee's interests and concerns that the most cost effective system must be selected to provide a quality weapon for our soldiers. The Army is prepared to implement the Committee language.

The conduct of a comprehensive test and evaluation program involves the selection of candidate system, development of test standards and plans, appropriate and equitable contractual arrangements with the foreign/domestic participants, and actual testing and analysis. Currently, the Army is only in the initial stages of developing plans and procedures for the envisioned program. Funding requirements have not yet been budgeted but will be developed after the program is structured.

Subsequent to determination of the final Conference report language, the Army will proceed to develop an estimate of the test effort, as well as the associated funding required. We will keep you informed of our progress and funding requirements and would seek your assistance in resolving the funding associated with the test program.

Sincerely,

J. R. SCULLEY,
Assistant Secretary of the Army (Research, Development and Acquisition).

Mr. SCHMITT. It is this Senator's understanding that the Army shall develop plans and procedures for the competitive analysis and report to the Committee these plans as well as any costs involved for the analysis. It is also this Senator's understanding that the Army will not attempt to change the committee's language during the House-Senate conference on this bill.

Again I want to recognize the outstanding efforts of the Senator from New Hampshire on this issue. It is extremely important. It is particularly related to the general philosophy of trying to match Soviet armor tank for tank or personnel carrier for personnel carrier; we will make those systems as obsolete as we possibly can through the use of modern antitank and antiarmor weapons.

Mr. RUDMAN. Mr. President, I want to say briefly that I thank the Senator from New Mexico for adding what I think is a very constructive addition to the language that we had already worked with in our report. I think it is vital that the Army proceed with these tests and not spend enormous amounts of money for weaponry that may be obsolete in the near future. I am delighted that this is now part of the record. I am sure this will mean that the Army will have a better weapon when these competitive tests are completed.

Mr. STEVENS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. HOLLINGS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT NO. 726

(Subsequently numbered amendment No. 643.)

(Purpose: To provide funding for increased Army and Air Force active strength levels)

Mr. HOLLINGS. Mr. President, I send an amendment to the desk and ask that it be stated.

The PRESIDING OFFICER. The amendment will be stated.

The bill clerk read as follows:

The Senator from South Carolina (Mr. HOLLINGS) proposes an unprinted amendment numbeerd 726.

Mr. HOLLINGS. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Beginning on page 2, line 1, strike out through line 12 on page 3, and insert the following:

"TITLE I—MILITARY PERSONNEL

MILITARY PERSONNEL, ARMY

For pay, allowances, individual clothing, subsistence, interest on deposits, gratuities, permanent change of station travel (including all expenses thereof for organizational movements), and expenses of temporary duty travel between permanent duty stations, for members of the Army on active duty (except members of reserve components provided for elsewhere), cadets, and aviation cadets; $14,130,781,000.

MILITARY PERSONNEL, NAVY

For pay, allowances, individual clothing, subsistence, interest on deposits, gratuities, permanent change of station travel (including all expenses thereof for organizational movements), and expenses of temporary duty travel between permanent duty stations, for members of the Navy on active duty (except members of the Reserve provided for elsewhere), midshipmen, and aviation cadets; $10,453,767,000.

MILITARY PERSONNEL, MARINE CORPS

For pay, allowances, individual clothing, subsistence, interest on deposits, gratuities, permanent change of station travel (including all expenses thereof for organizational movements), and expenses of temporary duty travel between permanent duty stations, for members of the Marine Corps on active duty (except members of the Reserve provided for elsewhere); $3,151,526,000.

MILITARY PERSONNEL, AIR FORCE

For pay, allowances, individual clothing, subsistence, interest on deposits, gratuities, permanent change of station travel (including all expenses thereof for organizational movements), and expenses of temporary duty travel between permanent duty stations, for members of the Air Force on active duty (except members of reserve components provided for elsewhere), cadets, and aviation cadets; $11,730,381,000."

Mr. HOLLINGS. Mr. President, I ask unanimous consent that my staff, Mr. Mike Joy and Mr. Bob Sneed, be granted the privilege of the floor during consideration of these two amendments.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HOLLINGS. Mr. President, for the distinguished manager of the bill and others who are interested, this is the bill relative to the Army and Air Force end strengths. I am adding some $77 million to the bill for the purpose of restoring the end strength cuts made in the Army and the Air Force.

The original request, Mr. President, and program called for total manpower levels of 786,000 personnel in the Army and 586,800 in the Air Force. These levels were reduced in an effort to effect so-called defense savings in the fiscal year 1982 budget and represents, Mr. President, part of the much publicized agreement reached in August between Mr. Stockman and Secretary Weinberger.

Right to the point, Mr. President, the President has asked for this particular manpower level in March that I am seeking to restore. And right to the point on this particular manpower level, I say to the Senator from Virginia, who has been a leader in the realm of the manpower and full strength for both the Army and the Air Force, these are the levels attested to by the Secretary of Defense before the Senate Appropriations Subcommittee—stating that we are now trying to flesh out the rapid deployment force and it would take, over a 5-year period, an additional 100,000 personnel.

What they actually represent, these levels—the 780,000 level in the Army, for example—is a reversal of a manpower policy and a defense posture that had been carefully considered as a minimum force necessary to man our Armed Forces and meet our commitments worldwide.

In the spring of the year, Gen. Edward C. (Shy) Meyer, Chief of Staff of the U.S. Army, announced a plan to flesh out what he termed the hollow army. This plan involved adding to the force structure four divisions—two Active and two Reserve. This would have brought our total strength to 18 active divisions—we currently have 16, Mr. President—and 10 Reserve divisions—we currently have 8—for a total of 28 divisions. That is 28 proposed divisions, Mr. President, to meet the threat of the Soviets.

Mr. President, while we were to have the 28 proposed divisions, the Soviet threat currently is one of 173 divisions. Admittedly, of course, our divisions number some 17,000 and their's is a lesser amount of around 12,000. But their 173 divisions total approximately 1,825,000 men. We have now proposed, in the defense appropriation bill, 780,000. In other words, 6,000 were cut in the defense appropriation version that is now before the Senate from the Army and some 6,000 from the Air Force.

Mr. President, when General Meyer unveiled this plan, it was much ballyhooed by those in the administration as providing a signal that we meant business. That signal, however, was short-lived because, by late summer, the four-division increase began to look like a one-division decrease, or a swing of five divisions in 5 months.

What kind of signal was that, Mr. President? What sort of determination does that demonstrate?

For example, the Senator from Ohio (Mr. GLENN) will soon offer an amendment relative to steaming hours in the Indian Ocean. Here we are trying to put on a front. We have strong talk, but rather than following through, as many of us have begged and prayed and hoped for over so many years, that is what is finally going to occur under the leadership of President Reagan, is a setback on readiness and we will have a cutback on the steaming hours in the Indian Ocean. We have withdrawn one aircraft carrier. We have backed down on the equipment. And now on the manpower proposal, at the last minute, even though they are still testifying for it—still testifying for it in November—it is cut back by some five divisions. Why in Heaven's name, one would ask, would you pick that method of cutting the budget?

My answer is in how the defense dollars are spent. Procurement dollars are spent at a rate of about 20 cents a year. Actually, in the first year, you can put in quite a bit of procurement dollars, and they have a minimal effect on the budget—8 cents of the procurement dollar to be expended in the first year. But in order to get a dollar-for-dollar reduction, you really have to go to manpower. In procurement, to get $1 reduction, you must cut five. In operation and maintenance or manpower dollars, they generally spend at a ratio of nearly one to one.

Therefore, the easy way, when you get into the dispute between the budgeteers and the need for national defense and national security—the easy way to effect budget cuts is to cut the programs which not only have the highest spend-out rate but also have little or no constituency.

Let us face it: Operation and maintenance is not manufactured in any State. Readiness, drilling, training, firing the guns, the weaponry, ammunition—those kinds of things do not have a State or district. If the manpower cuts do not result in a base closure, then who's to care? That is exactly the situation we have.

In 1964, pre-Vietnam, our military manpower stood at 2.6 million. In 1964, we had approximately 972,000 Army personnel, as indicated in a table I will have printed in the RECORD. And in 1960, for example, we had 871,348 in the U.S. Army. That is when we even had the missile gap; the end of Eisenhower; the beginning of Kennedy. Everyone was laid back. We were having world peace. There were no problems. I think they found two little islands to fuss about, called Quemoy and Matsu. The Senator will remember those. We had a more powerful Army, and the threats were far less than today.

In fact, in 1962, the Army had an authorized strength and a full complement of about 1,164,000. Now, we are down to the 780,000 level.

As the prophet Paul said in his letter to the Corinthians:

If the sound of trumpet be uncertain then who shall prepare himself to the battle?

This defense budget has been characterized by that uncertain trumpet.

We are legislating here in the absence of a 5-year plan, without a clear sense of direction and with a vacillating force structure.

Senators have been concerned, and we can see the great number of amendments hitting the floor relative to readiness. Our distinguished chairman of the Senate appropriations subcommittee, the Senator from Alaska (Mr.

STEVENS), generally speaking, has done an outstanding job. He tried his best to fill up the particular commitments we had, and we worked closely, but then we never did get a 5-year plan from the Defense Department. They would never come forward with that green book, the procurement annex, so that we could look and find, as appropriators on the Appropriations Committee, exactly where we were headed.

In contrast to that, having given clear signals all during the early part of the year and in the summer about increases in defense, what they then began nibbling away at was readiness and our manpower.

The highly touted fleshing out of the hollow army is now dismissed by the Defense Department with the following two sentences. All you have to do is look at the DOD green book, to get into its lingo. We have a green book entitled "Highlights of Fiscal 1982 Budget Revisions, June of 1981 and September of 1981, with Strategic Program Changes."

I quote from the book:

Activation of new units planned during FY 1982 will be delayed to reflect revised phasing of Army's manpower program. Deactivation of a separate brigade is also planned.

For those of you who have difficulty with Pentagonese, as I do, let me provide a translation. In plain English, what that means—and the distinguished Presiding Officer, the Senator from California (Mr. HAYAKAWA), likes these interpretations, having been a college president—is less capability. That is exactly what that Pentagonese means.

How does the Air Force plan to meet its reduction in planned end strength? I quote from the same document:

In addition, the amended budget anticipated an increase in the standards used to determine manning of specific units. We now plan to phase in the increased standards beginning in FY 1982 with full implementation by 1985.

I say to the Senator from New Hampshire that that requires no translation. That simply means lower standards. That is Pentagonese for delay or lower standards.

So the crux of the issue is that we are asked to reduce end strength, resulting in less capability and lower standards.

Does the majority leader want to obtain a time agreement for voting on this amendment? I have another amendment relative to ammunition, on which I can present the argument this evening, and we can have a rollcall vote tomorrow. Is that the wish of the distinguished majority leader?

Mr. BAKER. I thank the Senator for yielding to me. I think we are on the brink of getting an agreement to stack votes. We are not ready yet.

I express my appreciation to the Senator from South Carolina for his cooperation tonight.

What I am trying to arrange with the minority leader and other Senators is to have three or four amendments debated tonight and stack them tomorrow, with the votes to occur at 10 o'clock in respect to those amendments.

I might say that there will be motions to table, I am sure, against all or part of the amendments. The request I make will be with relation to the amendment rather than voting on the amendment.

Mr. HOLLINGS. The Senator mentions motions to table. I would not show my hand that way.

Mr. BAKER. I find that if I say these things today, I do not have to worry about them tomorrow.

Mr. HOLLINGS. I understand. I will continue.

Mr. BAKER. Will the Senator continue?

Mr. HOLLINGS. Mr. President, I am offering an amendment which I say would add $77 million.

There are further compelling reasons why the amendment to increase active strength level should be supported.

The proposed reductions in active end strength would severely compromise the need to develop the rapid deployment force that is so important in protecting U.S. interests outside the NATO region.

Any cut in the Army and Air Force manning levels can mean only one thing, nonsupport for the rapid deployment force concept or the belief that U.S. interests outside of NATO are of a very low priority.

I wish to recite that phrase just one more time for emphasis because everyone watches the United States. Cutting the Army and Air Force end strengths would mean either the nonsupport for the rapid deployment force concept or the belief that U.S. interests outside of NATO are of very low priority.

We have all kinds of movements of peoples and populations and countries and commitments. And, over in Europe we have seen the recent move relative to the peace movement as a result of our delays actually in engaging in the strategic arms reduction talks. We also could mislead and alarm people unnecessarily by this particular phrase in this particular cut in the Army and Air Force manning levels. If we cut forces, it means nonsupport of the rapid deployment force concept or the belief that the U.S. interests outside of NATO are of very low priority. Let us not go back on our commitments.

We need to build and maintain a credible rapid deployment force. We do not have anything out there now but an aircraft carrier and some very brave sailors and pilots and a few folks manning an AWACS in Saudi Arabia. But other than that, there is really no rapid deployment force and it has not approximated one. We have been cutting back ever since the beginning of this particular administration, although it was my belief that under this administration we were going to finally flesh out our defense hollowness.

Building and maintaining a credible rapid deployment force—I emphasize "credible"—without cutting back on NATO commitments will require an increase of roughly 100,000 troops to the active end strength of our forces.

That can best be done over a 5-year period. But that add-on is for the Air Force and the Army only. At this time we do not have the requirements included in this debate necessary for the Navy and for the Marine Corps, since the DOD has so much trouble getting its act together to define them.

But, here Secretary Weinberger is cutting 12,000, rather than commencing with the RDF. This exercise is almost like the budget process. No one could balance the budget this year. But at least we wanted to aim it in the right direction toward lesser or smaller deficits.

No one can put in the 100,000 troops overnight without a draft. But at least we could put in these nominal increases rather than cutting back the brigade and closing down Fort Ord and other things of that kind like taking a brigade from the readiness disposition over in NATO.

This increase in end strength must be accomplished in order to provide the required active support of the Rapid Deployment Force.

Combat strength of the active forces, if the RDF is constructed in a balanced manner, might have to be increased by at least one air mobile and possibly an additional mechanized division to insure the present NATO force balance once the RDF is committed. Five-year acquisition and personnel costs for this increase could range up to $10.2 billion.

Mr. President, should the size of the RDF increase as Secretary Weinberger proposed in his testimony before Congress in September we might possibly add another two Army divisions, one mechanized and one infantry, with their required support increments. These 5-year costs would be approximately $9.4 billion.

In addition, a minimum of four tactical fighter wings may be required for the Air Force to maintain the current Soviet-to-NATO combat aircraft ratio and still provide tactical fighter air support for the Rapid Deployment Force. The 5-year costs for increased air capability is approximately $5.6 billion.

I should emphasize that these additional forces are for the Air Force and the Army requirements only. As I have stated they do not include the Navy and Marine amphibious requirements. I do not believe anyone has a complete understanding of our amphibious needs at this time.

And it is a sad commentary over the entire Defense Establishment that while we are actually trying to make up an adequate budget to keep our commitments and maintain our national security that we cannot have the information since the Pentagon does not have it. You ask the Pentagon and they will not give it to you. But in this particular case we got a little bit of cooperation out of the Army in a roundabout way and we were totally stonewalled by the Air Force. They acted like I was a Communist or a member of the Soviet Senate or something else trying to increase the Air Force strength to the particular level.

If you want to see a clampdown, not discipline, but lock-jawed government and a lock-step group that headed off not knowing where they were going because they cannot tell you, you ought to

see the Pentagon today and the administration today and my Republican majority, I say most respectfully, today. They have already said, "Go ahead and make your arguments. There will be motions to table," because we do not believe, I guess, in readiness. "We have enough of our readiness and we are not going to consider what you think may be necessary for readiness."

Mr. BAKER. Mr. President, will the Senator yield?

Mr. HOLLINGS. I yield.

Mr. BAKER. With great regard and due respect to the translation of the Senator from South Carolina I respectfully suggest that is not an exact translation of what I said. What I said was, as I recall it, that if we got an agreement to stack these votes the agreement would be in such a form that tabling motions might be made.

Mr. HOLLINGS. Oh, might be made.

Mr. BAKER. They will not be bound to vote on the amendments. Obviously if the weight and burden of the logic stated by the Senator from South Carolina is so irresistible that we find we should vote on the merits I am willing to do so. But I thought it best to advise the Senator from South Carolina at least to the remote prospect that we are going to table it.

Mr. HOLLINGS. I thank the distinguished majority leader. I understood him to say that motions to table would surely be made. But I appreciate that clarification and I will continue with what I hope may be some persuasion because this is taken in all seriousness.

We had to take on our last President. Those interested in manpower will remember how they had the *Nimitz* incident where on Memorial Day we had the Commander in Chief meet there and say we were going to have increased pay. He said how terrible a thing it was that they were only getting paid as much as a cashier at McDonald's—at least I think that was the expression. That was on Sunday and by Tuesday morning with community leaders he said that increases for defense for pay were robbing social programs.

So we are not talking in a partisan fashion, but we continue in the struggle that the distinguished Senator from Georgia, Senator NUNN, and many others have been making over the years to put reality and credibility in our force structure, in our national defense.

Now, Mr. President, the costs for real U.S. commitment to the development and maintenance of a rapid deployment force capability and thus a commitment to its interests around the world will be substantial. At a minimum we may have to spend $20 billion over and above the budget projections of the Department of Defense, and these costs exclude our amphibious needs. The commitment to the rapid deployment force means more and, I say again, more Army and more Air Force personnel, not less.

While I favor getting started right now in enhancing our capability, I realize we cannot add today all the personnel and equipment needed to fully complement the rapid deployment force.

We must have a 5-year program to do so.

Mr. President, this amendment to increase our active strength keeps us on the track for showing our resolve in this matter. To accept the personnel cuts proposed in the bill weakens our credibility significantly.

Mr. President, I refer to one other matter because I understand there will be debate on another amendment, and I do not know that many of my colleagues would join issue to any extent, and I do not want to be cut off. I want to emphasize the particular situation with respect to end strength.

For example, I have already pointed out pre-Vietnam in 1960, for example, 871,000 rather than the 780,000; in 1962 1,064,647 in the Army rather than 780,000. I am going to ask unanimous consent that we include in the RECORD a table which has the Army actual strengths between 1960 and 1982, and the authorized strengths for both the Army and the Air Force for the last 10 years.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

ARMY AND AIR FORCE END STRENGTHS

	Army		
	Actual	Authorized [1]	Air Force [2]
1960	871,348	----------	----------
1961	856,853	----------	----------
1962	1,064,647	----------	----------
1963	974,070	----------	----------
1964	971,384	----------	----------
1965	967,049	----------	----------
1966	1,197,468	----------	----------
1967	1,440,120	----------	----------
1968	1,567,900	----------	----------
1969	1,509,637	----------	----------
1970	1,319,734	1,325,000	----------
1971	1,124,000	1,124,000	----------
1972	811,000	811,000	721,000
1973	801,000	801,000	687,000
1974	783,000	783,000	637,000
1975	784,000	784,000	608,000
1976	779,000	779,000	581,000
1977	782,000	782,000	566,000
1978	771,000	771,000	565,000
1979	758,000	[3] 759,000	555,000
1980	777,000	777,000	554,000
1981	781,000	780,000	566,000
1982	780,000	780,000	580,800

[1] Actual and authorized strengths were identical, 1960–69.
[2] Air Force authorized and actual end strengths are approximately the same.
[3] Original authorized level of 776,000 was revised downward to 759,000.

Mr. HOLLINGS. I thank the distinguished Presiding Officer.

In 1979 we had an end strength authorized at that particular time of 776,000. Now you will see that the Army was some 18,000 shy at 758,000.

If you want to see what they really did just before the 1980 election, trying to balance the budget and cut back savings dollar for dollar, on the one hand, and trying, on the other hand, if you please, Mr. President, to give the unwarranted credibility to the volunteer army by saying that we met the end strength, when it was 776,000. But, they changed the numbers. David Stockman is no innovator. Actually Secretary Clifford Alexander of the Army led the way in putting in different figures into the computer so the actual and authorized strengths were nearly the same—not 18,000 apart.

Now, when David Stockman started in January and it came out with a $40 billion deficit, he said:

I just went to the computer and changed the figures we put in and got what we wanted.

Well, history will show that Secretary Alexander led the way in 1979 with the Army's end strength figures. He put into the computer 759,000 as the revised end strength. This revised it downward.

Then we look at the statement of the distinguished writer regarding military personnel matters, Charles C. Moskos, in his article "The Force Levels of the Volunteer Force," and quoting from him:

The Gates Commission "estimate" was not achieved and, indeed, was a gross economic miscalculation. In 1972, the year preceding the all-volunteer force, the total active-duty strength stood at 2,323,000. The startling trend, the one which has not received much public attention, however, is the gradual but consistent decrease in the year-by-year level of military personnel under the all-volunteer force from an active-duty strength of 2,253,000 in 1973. The force stood at 2,069,000 in 1978 and was scheduled to be further reduced to 2,049,000 in 1979.

In brief, under the all-volunteer concept the active-duty force has been reduced by 204,000 personnel in the period between 1973 and 1979. There is reason to believe that although pressure to reduce force levels will continue, the breaching of the 2 million figure will generate intense political debate. Over the short run, because of lowered manpower goals and the dramatic increases in military pay, the armed forces have been able to "make the volunteer force work." In addition they have been assisted by high levels of youth unemployment and the new emphasis on recruiting and utilizing women.

Of course, there is no disparagement of women here. But we really wanted to take a hollow army and get to the cutting edge. And we were going to have what we talked about as more readiness and less quartermaster and equipment of that kind of support and more force levels. And, if you want to get right down to the particular point, we really have got about 10 percent of the force level structure being female.

So, yes, the All-Volunteer Force is making it with respect to the unemployment; making it with respect to the adequate pay levels initiated by the Nunn-Warner amendment, and making it by supplementing and having what we call our manpower, also our female power, which is outstanding in its own right, but not in the combat nature of a rapid deployment force in the Persian Gulf or the frontline at NATO.

With that having been said, Mr. President, I yield the floor.

Mr. BAKER. Mr. President, I am almost prepared, I think, to offer a unanimous-consent request with one last item to be checked with the minority leader. But it appears at this time there will be no more votes this evening. I am prepared to say there will be no more record votes tonight.

The agreement I will propose, if it is cleared, is that there be 20 minutes of debate on these two amendments, 10 minutes on each amendment to be equally divided to begin at 9:40 in the morning, and the rollcall votes to occur

back to back in relation to the amendments at 10 o'clock tomorrow.

As I say, final clearance, the final clearance process, is being completed at this time, and if it survives that clearance process, I will make the request shortly.

Mr. HOLLINGS. Mr. President, does the distinguished majority leader intend, when he says back to back on the manpower amendment and the ammunition amendment to follow, that we would have 10 minutes on either side commencing at 9:40?

Mr. BAKER. I suppose I would add the first vote be 15 minutes and, as we frequently do, the second back-to-back vote will be 10 minutes.

Mr. HOLLINGS. I could put down the argument, then relative to the ammunition amendment?

Mr. BAKER. If the Senator from South Carolina would be agreeable we can stay in session so that the bulk of that debate can be conducted yet this evening.

Mr. HOLLINGS. Very good.

Mr. RUDMAN. Mr. President, the Senator from South Carolina has made some very compelling points, but I think there are a few that have been overlooked. First, the authorization was set by the Armed Services Committee. The bill came on the floor and no amendment was offered at that time changing end strength. The pay bill came on the floor and no amendment was offered at that time.

The present bill before us increases Air Force strength by 10,500, in accordance with their request. It keeps Army strength static, which also was the Army's request. As a matter of fact, the authorizing committee made those reductions at the request of those services.

Of course, the argument has been made here today and has been made many times before that the end strength of the services has been declining. That is obviously true. But that statement has to be taken in measure with the times at which that end strength was higher.

The fact of the matter is that generally, with increased use of technology by the armed services, the total forces, as we might have experienced in Vietnam, the Korean war and, certainly, in World War II, have been declining and probably will continue to in a number of areas.

The committee feels that $209 billion or $208.8 billion contained in this defense appropriation bill is a rather high state of readiness. One might debate where these funds might go, but the fact is that the Armed Services Committee held hearings, had discussions with the services and, in fact, came out with these strengths.

So, unfortunately, although I often find the Senator from South Carolina and his logic irresistible, I do not find it irresistible on this particular argument.

I understand that we will stack votes tomorrow and thus, Mr. President, I am going to in respect to the vote coming tomorrow move to table this amendment at this time.

Mr. BAKER. Mr. President, if the Senator will withhold that for just a moment.

Mr. RUDMAN. I withhold.

Mr. BAKER. What I would like to do is to make sure we exhaust debate this evening on two amendments and then make the tabling motion, if indeed there is a tabling motion, prior to the hour of 10 o'clock tomorrow. In that way we can still provide limited time for debate in the morning that I mentioned earlier.

Mr. RUDMAN. I withdraw that.

Mr. HOLLINGS. Mr. President, the distinguished Senator from New Hampshire has done an outstanding job and is most experienced in the defense field, and I have the highest regard for him. I would only counter by stating that necessarily—and the staff would point this out—there is no authorizing amount for funds associated with military personnel levels.

You put in the military personnel account dollars and those dollar amounts would include pay and allowances, bands, travel, and everything like that, but the appropriation bill before us funds the military personnel accounts and that is what my amendment changes.

Now I was prepared, Mr. President, to present amendments of this kind in the Appropriations Committee. And our distinguished chairman was under a crunch to finish the bill. He did a magnificent job. I hated to see the abuse given to the appropriations process, when Senator HATFIELD led the way this year in streamlining, if you please, the appropriations process; actually melding together the relations between the Budget Committee and the Appropriations Committee so there were not hours on end of wrangle and disagreement that had been experienced before, because I have been on both the Budget and the Appropriations Committee.

We were ready, willing, and able, in early September, to debate and pass—and the RECORD will show that we were ready, willing, and able to pass—appropriations bills and it was at the request of the administration that we did not pass these appropriations bills.

Now, having responded to their requests, they now beat on the head of the disgraceful Congress. I saw the President on national TV. He said it was disgraceful the way we did business. Well, he is the one who authored the disgrace, I can tell you that, because he asked for it. He asked for it also on the budget, and we will get to that with respect to the budget resolution.

The Senator from Oregon had an MX amendment. I had one with respect to the *Iowa* battleship. I had others with respect to the attack submarine, the end-strength levels, the supply of ammunition and various ones. We all agreed we would take the bill to the floor under the pressure of time and get it to the floor so it could be debated and considered at that time.

So that is why I do not think we ought to look at the needs of our national security on whether or not we were prompt and diligent Senators at the authorizing level or at the appropriations level. The issue is now before the full body. It is one of the most important issues that we will ever confront, and that is readiness.

Everybody gets wound up. I have been asked 15 times about the B–1 amendment. Everybody gets interested. The B–1 encompasses $40 billion—and the B–1 encompasses 135 contractors. And that means the B–1 encompasses 135 constituencies, and there are all kinds of forces and movements around interested in a large amendment of that kind.

But where is there something for readiness? Who is going to argue manpower and strengths to flesh out our forces or who is talking to our posture in NATO when they our allies do have a draft and they do have readiness and they do have a commitment?

On the one hand, all you want to do is talk about nuclear war and how we will nuke them and we can have limited nukes and this and that and everything else. And when you come down and say if you move 1 inch further in the Gulf area that will mean war and get on national TV and then you actually pull the aircraft carriers out, you cut the steaming out, you cut the end strength, you do not flesh out what your own Chief of Staff calls a hollow Army.

Mr. RUDMAN. Will the Senator yield?

Mr. HOLLINGS. Yes, I yield.

Mr. RUDMAN. Did I understand the Senator from South Carolina to say that there was not an authorized end strength presently?

Mr. HOLLINGS. The appropriations bill does not have an authorized end strength. It has a funding amount.

Mr. RUDMAN. I may be incorrect, but I want to point out to my friend from South Carolina that the conference report and our report contains in section 401, 780,300 for the Army; 554,600 for the Navy; 192,100 for the Marine Corps; and 589,800 for the Air Force. It says that those are authorized strengths for active duty personnel as of September 30, 1982. I want to make that observation. I believe that is the law and would be the law if this bill were adopted.

Mr. HOLLINGS. Not necessarily. The authorization bill has an end strength. And that is difference. I had to learn the same thing.

But the bill before the Senate itself does not have an end strength. And the only way to effect that, of course, is the amount itself. And it has been complied with before.

In fact, we had cuts in the end strength and had a similar debate just a couple of years ago relative to a 25,000 manpower cut in the end strength of the Army.

Be that as it may, the substance of the issue before the body is, will we actually put meaning and credibility to the rapid deployment force? Will we flesh out what the Chief of Staff calls a hollow Army, or will we go in the other direction?

We thought, under President Reagan, we would start increasing. I am saddened to see these cuts and decreases, particularly at this time.

Mr. BAKER addressed the Chair.

The PRESIDING OFFICER. The Senator from Tennessee.

Mr. BAKER. Mr. President, I believe the request I am about to make has now been cleared by the minority leader.

Mr. President, I ask unanimous consent that after debate is concluded on the Hollings amendment dealing with manpower, the Senate proceed to the consideration of a second Hollings amendment dealing with armaments and that it be in order at this time, with one show of hands, to order the yeas and nays on both amendments and that the votes on those two amendments be postponed until tomorrow at 10 o'clock, to occur back-to-back, the first to be a 15-minute rollcall and the second to be 10 minutes. There will be votes in relation to these amendments, with the full expectation that there may be a tabling motion; and that, Mr. President, there be 10 minutes of debate, equally divided on each of the two amendments, to occur tomorrow beginning at 9:40 in the morning, and that the control of the time on the amendments under this order will be in the usual form.

I put that request, Mr. President.

Mr. HATFIELD. Mr. President, reserving the right to object.

Mr. GLENN. Mr. President, reserving the right to object.

The PRESIDING OFFICER. The Senator from Oregon.

Mr. GLENN. Mr. President, would the majority leader be willing to put my steaming time amendment in there after those votes?

The PRESIDING OFFICER. The Senator from Oregon has been recognized.

Mr. GLENN. I am sorry. My apologies.

Mr. HATFIELD. Mr. President, reserving the right to object, I would ask that the majority leader not place that request before the Senate at this time and perhaps have a brief quorum call to discuss a few points.

Mr. BAKER. There is an ominous ring to the Senator's voice and a terrible look in his eye, Mr. President. Taking account of that, and the courtesy I owe him, I suggest the absence of a quorum.

Mr. STEVENS. Will the Senator withhold that request?

Mr. BAKER. Mr. President, I withhold the request for the time being.

Mr. STEVENS. Mr. President, in a prior discussion with the Senator from Georgia, I alluded to the problem of classification. We have now studied the record to which the Senator has referred us. I find that I was in error; that the Department of Defense had, in fact, used in open session a reference which the Senator has used. I was in error in indicating that that statement that was made by the Senator from Georgia had gone beyond the scope of classification. I regret that error.

Mr. NUNN. Mr. President, let me thank my friend from Alaska. He has a very difficult job in managing this bill. The classification on some of these programs, of course, is very sensitive. I have been very careful. I know he has been careful and I certainly appreciate him clarifying that for the record.

Mr. HOLLINGS. Mr. President, is it the desire of the managers of the bill, the majority leader or the distinguished Senator from Alaska, that I now commence the second amendment to save a little time?

Mr. BAKER. Mr. President, let me amend one part of my request. I ask unanimous consent that the first Hollings amendment be temporarily laid aside and that the Senate proceed to the second Hollings amendment.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

UP AMENDMENT NO. 727

(Purpose: To provide funds to meet the Army's requirements for ammunition)

Mr. HOLLINGS. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from South Carolina (Mr. HOLLINGS) proposes an unprinted amendment numbered 727.

On page 18, line 4, strike "$2,338,400,000" and insert in lieu thereof the following: "$2,486,400,000."

Mr. HOLLINGS. Mr. President, for the fiscal year 1982, the Army's stated requirement which went to the Department of Defense for ammunition hardware was for $2,138.1 million, but the budget request by the Department of Defense to the Congress for ammunition hardware was $1,976.6 million or the request was under requirements by the amount of $161.5 million.

The House appropriation allowance, Mr. President, for ammunition hardware is $2,088.5 million, whereas the Senate appropriations bill before the body here as reported, allows for an amount of $1,990.4 million. So the Senate appropriations for ammunition is $97.9 million under the House. The Senate appropriations under the requirement requested by the U.S. Army is $147.5 million.

Our amendment is to restore what the Army said it needed in the spring of the year. But, the requirements are geared to a 60-day war reserve requirement and I should emphasize to my colleagues that the Army's mobilization plans call for a 180-day supply. The shortfall in ammo needs are significantly under the 180-day supply.

I ask unanimous consent that there be printed at this point in the RECORD a table not only for the ammunition hardware requirements I have just stated verbally, but also for fiscal year 1982–86, the Army requirement for ammunition hardware in each of those years, plus the 5-year DOD plan, showing, of course, the difference between the plan under the requirements.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

ARMY AMMUNITION HARDWARE REQUIREMENT

	Amount (millions)
Fiscal year 1982	
1. Army stated requirements for ammo hardware	$2,138.1
2. Budget request for ammo hardware	1,976.6
Request under requirements	161.5
3. House appropriation allowance for ammo hardware	2,088.5
4. Senate appropriations allowance as reported	1,990.6
Senate appropriations under House	97.9
Senate appropriations under requirement	147.5

[In billions of dollars]

	Fiscal year—				
	1982	1983	1984	1985	1986
Fiscal year 1982–86					
Army requirements for ammo hardware	2.1	2.5	3.2	4.4	5.5
5-Yr DOD plan	2.0	2.4	3.2	4.0	4.8
Difference—Plan under requirements	−.1	−.1	------	−.4	−.7

1. Cumulative 82–86 shortfall $1.4 billion.
2. The requirements are also geared toward a 60 day war reserve requirement. The Army's mobilization plans call for a 180 day supply. Thus, the shortfall is significantly under the 180 day need.
3. To move to a 90 day reserve supply would add an additional $8.4 billion to ammo hardware requirements.

Mr. HOLLINGS. Mr. President, I know this can be boring to some people, but I am going to get to the real meat of this situation in just a second.

(Mr. BOSCHWITZ assumed the chair.)

Mr. HOLLINGS. Mr. President, the schedule for 1982–86, for the 5-year period, will find the Army requirement under the DOD plan is shortchanged. There is no better expression. It is shortchanged by $100 million in 1982, $100 million plus in 1983, over $400 million in 1985. The request is satisfied in 1984. In 1986 there is a $700 million shortfall. So the cumulative 1982–86 shortfall is $1.4 billion.

The reduction in the Army's ammunition hardware requirements in the Senate bill includes roughly $50 million in training ammunition needs. As a matter of fact, the procurement of training ammo in the fiscal year 1982 budget is nearly $300 million below the Army's real need. The $148 million addition to the Army's ammunition hardware budget will greatly enhance the overall Army training program.

I will give you an idea of what the screaming need for ammunition is. Whenever they need money in the DOD, this is the particular budget they go to.

I will never forget when Mr. Eliot Richardson was Secretary of Defense and he came over with my good friend, Lt. Gen. George Seignious, the adviser to the Joint Chiefs of Staff or the director of the Joint Chiefs of Staff. We were in the Appropriations Committee and they were asking for $500 million for a particular project.

There was a question among the majority. I was supporting the continuation of funding, but I was in the minority. The majority said we were not going to give the money. Just to put it bluntly, the Secretary said, "Well, I will get it anyway." They would just take it out of the ammunition budget.

That is what happened to the ammunition budgets over the many years.

We found at one time intelligence activities in the ammunition budget. We found at other times different commitments made out of the ammunition budget. Now with all the other needs, the ammunition budget is the one which really has been cut back very severely.

I ask unanimous consent that at this particular point in the RECORD there be printed a table of the recommended increases as requested by the Army for ammunition totaling $200.4 million. But, Mr. President, we are only asking for $148 million. We have cut that back. This was their request in the spring of this year.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

	P-1 BLIN	Quantity (thousands)	Amount (millions)
29	Cartridge, 105 mm, TP-T	14	$2.7
30	Cartridge, 105 mm, DS-IP	19	4.4
3	Cartridge, 5.56 mm, blank	41,703	4.9
5	Cartridge, 7.62 mm, all types	16,697	8.9
27	Cartridge, 4.2 in illum	36	4.6
58	Rocket, 2.75 in (HE)	104	16.3
11	Cartridge, 20 mm, all types	664	3.1
61	Signals (smoke pots)	19	4.1
51	Mines, practice, and inert	77	7.0
52	Demolition munitions	1,631	7.0
61	Signals (illum. grnd. W/S. para.)	30	.7
	(Subtotal training items)		(63.7)
31	Cartridge, 105 mm, APFSDS-T	6	5.3
28	Cartridge, 105 mm, HEAT-T	29	13.0
58	Rocket, 2.75 in (smoke)	47	15.3
36	Projectile, 155 mm, ADAM	8	29.7
37	Projectile, 155 mm, RAAMS	16	28.1
16	Cartridge, 25 mm, APDS-T	36	1.9
15	Cartridge, 25 mm, HEIT-T	37	2.0
	(Subtotal $159,000,000) (reduction)		(159.0)
39	Charge, propelling, 155 mm, G.B	494	41.4
	Grand total		200.4

Mr. HOLLINGS. Mr. President, that refers, of course, not only to power support detonators; I could go right on down through tank ammunition and various other matters—M-16 ammunition for the rifle, and what-have-you. We get to the real crux of it, and that is with respect to training. We get into readiness. The training in the Army relates in a sense to crew training and teamwork. In other words, working as a crew.

I noticed a good bit of James Fallows' book, National Defense, had to do with the comity of personnel from the community. The commitments that a man made in battle were not necessarily in his mind patriotically, that he was going to receive the Medal of Honor or that he was really doing something at that particular point for his country no, more than anything else, he was doing something for his comrade—the person he knew, the person he had worked with, the person he had trained with, the person he had learned to depend upon and who, in turn, could depend upon him.

When it comes to ammunition, you engage in crew training and teamwork, and you have a problem with the turnover of personnel. They call it personnel turbulence in the Army. That amounts to a turnover every 5 to 6 months. And you need to fire frequently in order to maintain the crew proficiency as well as the individual performance. Let us go to what happens because of the shortages. And you can see this illustrated by the very dramatic articles—maybe by tomorrow, I will find those by John Fialka—that appeared in the Washington Star, that former great evening newspaper here in Washington, D.C.

He wrote a series of articles last year or previously about the exercises of NATO and the failure of our troops to come up to competition with the other troops in NATO. And the cause is basic. It goes right down to the very abstract of ammunition. It has no constituency; it is a readiness measure. There are no contractors sitting out in the hall. I have never seen one who asked me to put in this type amendment. But the truth of the matter is that the Army has been begging for this. Let me illustrate.

We can go right to the field artillery. After a battery adjustment is made and they prepare to fire for effect, they would like to have, regularly speaking—all six guns fire together. But, Mr. President, as the result of a lack of ammunition, actually, they allow, after going through all of that training in the field artillery, one gun to fire and the other five simulate fire.

Mr. President, this really detracts from crew training. This really detracts from individual performance. If I wanted, as a Senator, to make a logical argument about drugs and the use of drugs in the front at NATO and why we have such an increase there and such a problem there, I could say it goes right to the matter of the lack of ammunition.

How does it occur? There is no man happier than a 19- or 20-year-old when he is firing his weapon. Go in the field and ask the commander. He will say, "Well, the morale is high, but we do have problems."

You ask the individual soldier, and the soldier will say, "Fine, If I can fire my weapon."

He is gung ho. He is not over the hill like some of us here, in the U.S. Senate, who are glad to simulate firing and simulate what the country needs and what the country stands for. That is one big act of simulation. Close down the Government—that is a big simulation we had the Sunday before last.

If you want to tee off a guy and ruin his morale and turn him to drugs from restlessness and the folly of it all deny him the ability to realistically train. He will say, "I was going to come in here and be a fighting man in the Army but when I come into the field to fire my gun, I go over and make believe fire." And the problem continues.

It is similar with tanks, Mr. President. The same turbulence—personnel turnover—there. They fire what they call table 8, which is a realistic firing pattern, where they move, fire and then go into defilade and then continue to fire from different positions. They first fire at a fixed target; the tank crew moves again to another defilade in behind and then on to a moving target. This pattern is called firing table 8. It is necessary, to maintain any kind of crew efficiency. They try to do it two or three times a year. The real requirement is for a minimum of three times a year. But now, as a result of lack of ammunition, they normally can only engage in this once a year.

Sometimes it is actually twice a year from what I can determine but none actually engages in it three times a year. So the table 8 firing practice for tank crews to really perform their duties is limited due to a drastic shortage in ammunition.

Let us review the situation with the TOW, for example, the terminal optical wire-guided missile—which is an antitank missile. Can you imagine having this fine missile? I say it is fine from the standpoint that you have to expose yourself to fine it. And then a little trailing wire follows the missile and you have to stand behind the wire as it continues on to zoom on the target. You do not duck up and fire and duck back down. It is a rather dangerous exercise. So they have training crews that go through a lot of simulation.

Then they have competition and they have it in the east coast and the west coast and down the south of Texas and everywhere else. They come with competitive crews to fire this TOW missile.

You know what, Mr. President? When they go to the competition, the one honor graduate gets to fire one. The rest of them all go through simulation and they never fire a TOW missile.

The reason for only one firing would be, if we had someone discussing this, is that the TOW costs between $5,000 and $9,000 apiece. But people out there who are talking about waste, fraud, and abuse when they come to the floor of the Senate understand what the cost is for national defense. We have to survive. We need ammunition. Let us discuss the Redeye, the antiaircraft heat-seeking missile. All the training for Redeye is simulation. The troops walk through the woods saying, "Bang, bang." That is all they can do. They have competing teams and they train. But only the top training team gets to fire and they fire one Redeye antiaircraft missile. You have to be almost Johnny on the spot to inspect the troops and find them firing. And they talk about readiness.

The Soviets know this. I wish all those people who were anxious about secret weapons would get to the biggest secret of all kept from the American people. And that is what finally, the Chief of Staff, Gen. Shy Meyer, had to call "A hollow Army" because he is embarrassed. He is a fighting man. He knows of these restrictions.

His needs are reviewed by some OMB Director who tinkers around with all the computers. They can find $16 billion for big oil, they can find leasing their losses for Ford to lease to IBM or Occidental, $14 billion, or a $27 billion kitty over a 5-year period. They can find it for oil companies and all. But for the fighting man, when we are trying to keep up his morale and keep the crews together so they can fire the TOW missile, fire the Redeye antiaircraft missile, and give them true readiness, along comes another ammo cut and all of our troops might as well go through a penny arcade. People who cut ammunition ought to buy those things I see advertised on TV for kids by Atari.

Just buy them one set and send them to the officers to put them in the barracks, and let them bam, bam, bam with all these simulating machines. You and

I know better. Simulation is good, but you must have actual practice.

We have mechanized infantry in Grafenwohr, Germany. Last year, members of the budget staff visited there, and watched a crew training. That was in October, at the beginning of the fiscal year. In the first month of the fiscal year they fired 70 percent of their ammunition. They were out of ammunition, for all practical purposes for the rest of the year, and could only sit around. Maybe they found time to travel to the Alps or somewhere else to go, or whatever it was, because all the ammunition was used up. Show them a Senator visiting—anything to have them stand around and look soldiering. They could not actually perform as troops.

So what you have, in essence—and the Fralka articles showed this—is a very low state of readiness.

The commanders in the field cannot come up here and testify and say, as a captain of a company, "My company is no good." They have immediately lost their ability to command. They cannot come up, as a brigade commander or a chief of staff, and say, "We are not ready."

He says, finally, that it is a hollow army—a matter of personnel, ammunition, and everything else. It is all on paper. The Russians know it, and they know it in spades, and they understand it. Yet, we tinkertoy around here and commend ourselves on the biggest defense budget we have had in the history of the country. Well, we have the biggest deficits we ever had in the history of the country. That is bothering me more than anything else.

However, I can show you many, many places to save this money, and we will have an amendment whereby we can allocate savings from just one piece of weaponry over the next 5 years, $40 billion.

So let us not talk about mammoth budgets or the biggest defense budget or that this would bust the budget. That is absolute tommyrot. I will debate the budget with you whenever you are ready. I am for readiness here and now.

Clauswitz said, I say to the Senator from Alaska, that a nation fights the war it is prepared to fight. We are not prepared in the Indian Ocean, so we will not fight in the Indian Ocean. We are not prepared in NATO, so we will not fight a conventional war in NATO. We are prepared with our nuclear submarines, our Minuteman and Titan missiles, our B–52 bombers, all for nuclear war.

In spite of the fact that we have 345 B–52's, 63 FB–111's, and hundreds of F–16's, F–15's, F–18's, A–6's, A–7's, and bombers—bombers, bombers, bombers—the request of the chairman of the subcommittee here is, "Give me one more bomber at $400 million a copy, or $40 billion in 5 years, so I can be"—what? prepared even further for nuclear war.

No one contemplates using a B–1 excepting in nuclear war. I can tell you that if we have a nuclear war the most inefficient way to drop a piece of ordnance on Moscow would be by a manned penetrating bomber. You would already have, of course, your ICBM's SCLM's, ALCM's, cruise missiles—I could go down the list—and after all those, before you put a manned crew on a bomber, in a nuclear exchange. It might become a situation where you have a Piper Cub trying to find civilization.

Yet, overprepared for nuclear war, they would table this amendment and make us unprepared for conventional war.

I say to those who are interested in peace, those who are frightened, as I am, by nuclear holocaust, let us become realistic and get on a talking basis, a credible basis, if you please, with our NATO allies.

If we can get on that basis with them in conventional warfare, we will not have all these peace demonstrations. If we get a draft, not just military power, to demonstrate our willpower, so that when the Commander in Chief commands them we all move forward together, that will cost less rather than more. And, I will go along with it.

I have introduced a bill on the draft, and I have been assured of hearings on December 5, and I hope everyone will attend. We will not get it through this year, but we will have an education session, in many ways, to strengthen the Army, strengthen the United States of America, within the budget and even for less.

We are not here as stark, raving hawks, demanding more for the DOD. On the contrary, we are trying to make a wise allocation, and the wisest allocation after manpower—and I have already talked about that particular amendment—is for readiness itself.

And about the biggest need we have in readiness is the ammunition I have listed here. That is the embarrassment. We can find a billion dollars, if you please, for the All Volunteer Force and run around promising to show them how to travel and see the world.

Well, we have spent over a billion dollars to try to get them into the Volunteer Army. Why do we not just cut that and get a draft started and give me $148 million out of the savings so that soldiers can act like soldiers?

I thank the distinguished manager of the bill.

Mr. STEVENS. Mr. President, I will respond to the Senator's remarks in the morning. It is my understanding that there is an agreement to have divided time in the morning.

The PRESIDING OFFICER. The Senator is correct.

(The following proceedings occurred earlier and are printed at this point, by unanimous consent:)

Mr. BAKER. Mr. President, I believe it may be possible to report on the request I made earlier.

Mr. President I ask unanimous consent that after debate is concluded on the pending Hollings amendment, which is the ammunition amendment, that it be in order with a single show of seconds to ask for the yeas and nays on both amendments. I further ask unanimous consent, Mr. President, that when the debate is concluded on this second amendment today, that the vote on both the Hollings amendments be deferred until the hour of 10 o'clock tomorrow, with a vote to occur first in relation to the first Hollings amendment, that is to say the manpower amendment, where the rollcall will be 15 minutes in length, followed immediately without intervening motion, appeal, or point of order, by the vote in relation to the second Hollings amendment, which is the ammunition amendment, and the rollcall on that amendment will be 10 minutes in length.

I further ask unanimous consent, Mr. President, that at 9:40 tomorrow there be a period for further debate on each of these two Hollings amendments of 10 minutes each to be equally divided and controlled, with the time under this order to be in the usual form, and that in any event the votes occur back to back as contemplated herein beginning at 10 o'clock.

The PRESIDING OFFICER. Is there objection?

Mr. GLENN. Mr. President, would it be possible to——

Mr. BAKER. Mr. President, could I make sure that in each case on each amendment the request was for a vote in relation to the amendment? That is my intention.

Mr. GLENN. Mr. President, reserving the right to object, I wanted to ask the majority leader if he objects to including in his unanimous-consent request the taking of a steaming amendment immediately after those votes he has requested.

Mr. BAKER. Would the Senator be in a position to suggest a time limitation that we might have on the steaming amendment?

Mr. President, let me get this request at this time because we have worked hard to get it. That will help me on the commitment I have made that there will be no more rollcall votes tonight. Then I would respectfully suggest that the Senator from Ohio and any other Senator who is interested confer with us further on how we might sequence this or other amendments after these two rollcalls which will be stacked if this request is granted.

Mr. GLENN. I withdraw my objection.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. BAKER. I thank the Senator from Ohio and all Members who have made it possible for us to arrange for the orderly consideration of this bill beginning in the morning.

ORDER OF PROCEDURE

Mr. STEVENS. Mr. President, has there been a period for the transaction of routine morning business today?

The PRESIDING OFFICER. Yes, there has.

Mr. STEVENS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. STEVENS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

RETIREMENT OF SENATOR HARRY F. BYRD, JR.

Mr. BOREN. Mr. President, yesterday, our colleague HARRY F. BYRD, JR., announced that he would not seek reelection to a fourth term.

I must confess that I have mixed feelings about Senator BYRD's decision. After a lifetime of public service including 18 years in the U.S. Senate, Senator BYRD and his wife, Gretchen, who has been his partner in serving the people of Virginia, have earned the right to have time for themselves. They have given far beyond the call of duty. I wish them both much happiness.

At the same time, the retirement of HARRY BYRD will be a great loss to the Senate and to the country. In an age in which self-gratification has too often been a major motivation, HARRY BYRD has truly sought to serve and to give of himself. I have never known a person in public life who was less self-serving and more sincerely patriotic than HARRY BYRD, JR.

In an age in which pragmatic relativism is the rule, HARRY BYRD is a man of unyielding principle. His integrity is universally respected by political friends and foes alike.

Throughout his career in the Senate, he has warned of the dangers associated with excessive Government spending. He understood far earlier than most that even the U.S. Government could face a liquidity crisis. With interest payments on the national debt running as high as $100 billion per year and Government borrowing bidding up interest rates to levels that bankrupt small farmers and businessmen, all of us would do well to listen more carefully to the warnings sounded by Senator BYRD of Virginia. It is tragic that they were not heeded earlier.

HARRY BYRD, JR., deserves to be known as a gentleman as well as a statesman. How much better our country would be if more people practiced his unfailing courtesy and his demonstrated respect for each person with whom he has contact. His career is proof that a decent and good person who refuses to sacrifice either his principles or his humanity can succeed in Government and public life.

I am grateful that I have had the chance to come to know HARRY BYRD, JR., and to serve with him in the U.S. Senate. His character and high standards are a challenge to me to do my best to be a good public servant. Those who come to the Senate after his retirement will miss the very rewarding experience of serving with him. We can only hope that enough of the spirit of HARRY BYRD, JR., will have rubbed off on each of us, that it will be a continuing part of this institution of Government.

There have been many outstanding men and women in the lines of the Byrd family extending back to the earliest colonial days of Virginia. None has had a clearer sense of public duty or a more unselfish desire to serve than HARRY BYRD, JR.

VOLUNTARY VITAMINS ACT OF 1981

Mr. HAYAKAWA. Mr. President, today, I want to share my thoughts with you about Federal Government regulation of vitamins and minerals. Quite simply, I believe that people should be allowed freedom of choice regarding their dietary needs. Such regulation is an unnecessary intrusion into the lives of our citizens.

Recently, I joined Senator HATCH in sponsoring S. 1277, the Voluntary Vitamins Act of 1981. This landmark legislation would insure the freedom to voluntarily decide whether or not to consume vitamins and mineral supplements.

The enactment of S. 1277 will fundamentally change the regulatory powers of the Food and Drug Administration (FDA) over vitamins, minerals, and other nutrients sold for dietary purposes. It requires that such supplements be regulated as food, not as food additives or drugs, without compromising the FDA's authority to protect consumers from fraud and deception in labeling such foods.

There is an interesting history behind the development of this legislation. In 1962 the FDA proposed regulations requiring that most vitamins and mineral combinations and potencies should be obtained only with a doctor's prescription. Congress received hundreds of thousands of letters from irate consumers opposing the FDA's proposal. In response, Senators WILLIAM PROXMIRE and Richard Schweiker introduced a resolution to block the FDA's proposed rules and restrict its authority in regulating vitamins and minerals. Unanimously enacted by the Senate and House in 1976 the Proxmire-Schweiker bill amended the Food and Drug Act to include, for the first time, a definition of "foods for special dietary uses."

In March of 1979, the FDA attempted to reverse this clear congressional intent of the Proxmire-Schweiker resolution. A proposal was issued to regulate vitamins and minerals as "Over-the-Counter" (OTC) drugs, if they were offered for use in the prevention or treatment of a vitamin or mineral deficiency. The FDA attempted to prevent controversy by making the regulation appear to be conditional, and applicable only to those supplements used to treat deficiencies. Are not all vitamins and minerals used to replace some deficiency in our diets? The constituents noticed this ironic twist, and responded with the same level of opposition as they had expressed to the earlier FDA proposal. Once again, Senate and House offices were overwhelmed with negative reactions from the folks back home. Clearly, they would not stand for such Government intrusion into their right to determine their own diets.

To his credit, the new Commissioner of the Food and Drug Administration, Dr. Arthur Hull Hays, Jr., assured the Senate shortly after taking office that he would rescind the over-the-counter regulations proposed in 1979. He plans to make a formal announcement of this rescission in the Federal Register before the end of this year.

Dr. Hayes is obviously a unique exception to his predecessors in demonstrating commonsense and leadership in directing the FDA. Unfortunately, Dr. Hayes will not remain in office forever. Therefore, I believe that we in Congress have a responsibility to provide statutory protection for the kind of regulatory policy Dr. Hayes has initiated. Mr. President, we are public servants, elected to serve the people, not to regulate them. We need to insure this relationship through the passage of S. 1277. It would remove the FDA's option to regulate, as either drugs or food additives, any vitamins, minerals, and other food supplements used to treat a dietary deficiency.

It certainly seems peculiar to me that we give people credit for being smart enough to elect us to office, but question their judgment when it comes to taking care of themselves. S. 1277, the Voluntary Vitamins Act of 1981, is long overdue.

NEW YORK STATE RESOLUTION CONCERNING IRISH UNIFICATION POLICY

Mr. THURMOND. Mr. President, I ask unanimous consent to have printed in the RECORD Resolution No. 1207, which was adopted by the New York State Legislature, and which has been received by the Office of the President pro tempore.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

LEGISLATIVE RESOLUTION—ASSEMBLY NO. 1207

Whereas, The members of the New York State Legislature, being for the most part not of Irish ancestry, have viewed the English Government's lack of response to the recently ended Maze Prison hunger strike, the ultimate protest against injustice, with increasing horror; and

Whereas, This Legislative Body believes that the time has come for Americans of all ethnic backgrounds to take notice of the urgent human appeal that is the message of these Irish martyrs and patriots; and

Whereas, The United States purports to have a special relationship with the United Kingdom which should also imply a special responsibility for the actions of the United Kingdom; and

Whereas, Certain responsible groups in the United Kingdom, although not in the seats of power, have urged that the Government of the United Kingdom adopt an explicit policy that Northern Ireland be united under the jurisdiction of Free Ireland over a reasonable period of time, most likely a decade; and

Whereas, The announcement of an explicit unification policy, the unification itself however to take place through a gradual process over a number of years, would assuredly have the effect of initiating the processes of psychological as well as political and economic adjustment to this inevitable occurrence; and

Whereas, Those who prefer to avoid action using as a cloak for their real motivation the false excuse that the particular dilemma of Northern Ireland is forever insoluble should have been confounded by the recent example of the Rhodesian solution; now, therefore, be it

Resolved, That the Government of the United States shall express to the Govern-

ment of the United Kingdom our firm conviction that an Irish unification policy must be implemented if the United Kingdom wishes to retain its status as a nation which lays claim to a reasonable standard of civilization, and to a special relationship with the United States, this conviction to be expressed in increasingly concrete terms, both diplomatic and economic, as time passes; and be it further

Resolved, That a copy of this Resolution, suitably engrossed, be transmitted to the Honorable Ronald Reagan, President of the United States, to the President Pro Tem of the Senate, to the Speaker of the House of Representatives, to the Secretary of State and to each member of Congress from the State of New York.

GUAM EXPRESSES SUPPORT FOR NATIONAL TUITION TAX CREDIT LEGISLATION

Mr. THURMOND. Mr. President, I ask unanimous consent to have printed in the RECORD two resolutions, Resolutions Nos. 192 and 201, that were adopted by the 16th Guam Legislature and which have been received by the Office of the President pro tempore.

There being no objection, the resolutions were ordered to be printed in the RECORD, as follows:

RESOLUTION No. 192

Be it resolved by the Legislature of the Territory of Guam:

Whereas the 1981 Packwood-Moynihan Tuition Tax Credit Bill would establish a federal tax credit for tuition paid by parents who send their children to a non-government school; and

Whereas, an additional feature of the 1981 Packwood-Moynihan Tuition Tax Credit Bill is a refund provision for those parents who do not earn a taxable income but do pay tuition for their children to attend a non-government school; and

Whereas, the 1981 Packwood-Moynihan Tuition Tax Credit Bill would apply to college, vocational, secondary and elementary tuition; and

Whereas, under present law, parents who exercise their basic right to send their children to a non-government school are being doubly taxed and are not afforded relief as proposed by the 1981 Packwood-Moynihan Tuition Tax Credit; and

Whereas, November 1981 has been declared "National Tuition Tax Credit Month" to draw attention to the proposal that tuition tax credit legislation is urgently needed to remove the unfair burden of double taxation placed upon parents who exercise their basic right to educate their own children according to their own moral, religious and cultural values; now, therefore, be it

Resolved, that the Sixteenth Guam Legislature of the territory of Guam does support passage of federal tuition tax credit legislation with refund provisions as proposed in the 1981 Packwood-Moynihan Tuition Tax Credit Bill and urges the Congress and the President to accept this legislation that would eliminate tax penalties which now exist for those parents who pay tuition to send their children to non-discriminating, non-government schools whose curriculum corresponds with religious, moral and cultural values embraced by the families; and be it further

Resolved, that the Speaker certify to and the Legislative Secretary attest the adoption hereof and that copies of the same be thereafter transmitted to the President of the United States of America, the Honorable Ronald Reagan; to the U.S. Secretary of Education; to the Speaker of the United States House of Representatives; to the President of the U.S. Senate; to all members of the U.S. Congress; to the Honorable Antonio B. Won Pat; to His Excellency Bishop Felixberto C. Flores; to the Administrators of each nongovernment schools within the territory; and to the Governor of Guam.

RESOLUTION No. 201

Be it resolved by the Legislature of the Territory of Guam:

Whereas, the Congress of the United States has under consideration H.R. 3517; and

Whereas, if enacted, H.R. 3517 would grant permanent resident status to nonimmigrant, aliens who have been long-term residents of the Virgin Islands; and

Whereas, the persons who are the beneficiaries of H.R. 3517 are ones who entered the Virgin Islands under a temporary worker program authorized by Section 101(a)(15)(H)(ii) of the Immigration and Nationality Act; and

Whereas, the Judiciary Committee of the House of Representatives of the Congress has recommended enactment of H.R. 3517 by a vote of 20–0 and noted in a report to the House:

In 1975, a study by the Judiciary Subcommittee on Immigration, Citizenship and International Law concluded that there was a moral obligation to provide permanent residence status to H–2 workers and their families who have become established members of the Virgin Islands community and that legislation to regularize their status should be enacted. The study also recommended the temporary-worker program be tightened up; and

Whereas, the situation of many aliens in Guam is exactly parallel to that of those in the Virgin Islands in that the H–2 workers and their families came to Guam at a time when the territory was in need of their construction skills and the work these persons performed has been of material help in the stimulation and development of the island's economy; and

Whereas, the unlimited flow of nonimmigrant workers into Guam could now injure the island's fragile economy because it might result in the displacement of local workers; and

Whereas, H.R. 3517 seems to provide an equitable solution to the issue of how to grant permanent residency to a limited class of long-term "temporary" workers without creating an unending flow of new aliens into a small American territory, it being noted in the summary of H.R. 3517:

The bill expresses the sense of Congress that longstanding residents of the U.S. Virgin Islands with H–2 status have contributed to the development of the islands, are an integral part of the society there, and should be allowed permanent residence status. The bill also recognizes the need for Congress to prevent any further influx of aliens into the islands by limiting the ability of adjusted aliens to file immigrant visa petitions for their relatives.

The bill allows aliens admitted to the Virgin Islands as temporary workers, who have lived on the islands continuously since June 30, 1975, to have their status adjusted to that of permanent residents. Adjustments of status must be made within one year of the bill's enactment. The adjustment is also applicable to the alien spouse and minor children if they meet the residency period requirement. Adjustments would be denied to aliens found to be excludable from U.S. residence under the conditions of the Immigration and Nationality Act.

The bill provides the Secretary of State with discretionary authority to limit the number of immigrant visas that could be issued to alien spouses or unmarried children of individuals whose status is adjusted under the bill. Married sons, daughters, brothers, and sisters of aliens who become permanent residents pursuant to this bill would be unable to obtain visas unless it could be shown that denial would cause exceptional hardship. The bill prohibits the preference system restrictions contained in the bill from being applied to the administration of any other immigration law. The bill terminates the temporary-worker program in the U.S. Virgin Islands. It authorizes a joint report by the Departments of Health and Human Services; Education; Housing and Urban Development; Labor; and Interior, the Attorney General, and the Virgin Islands Government on the social and economic impact of the bill on the Virgin Islands. Findings must be reported to Congress and the President within one year of the bill's enactment; and

Whereas, the Legislature is of the opinion that the same solution should be applied to Guam as is being proposed for the Virgin Islands; now, therefore, be it

Resolved, that the Sixteenth Guam Legislature does respectfully request the Congress of the United States to amend H.R. 3517 to allow the Immigration and Naturalization Service to process for permanent residence those aliens who entered Guam as defense parolees or H–2 workers prior to 1977 and who are still within the island at the time H.R. 3517 is enacted into law; and be it further

Resolved, that those aliens be permitted to sponsor for permanent residency only their spouses and children who would enter the United States prior to attaining their 18th birthday; and be it further

Resolved, that the Speaker certify to and the Legislative Secretary attest the adoption hereof and that copies of the same be thereafter transmitted to the President of the United States; to the President of the Senate and the Speaker of the House of Representatives of the United States Congress; to the Attorney General of the United States; to the Commissioner of the Immigration and Naturalization Service; to Guam's Washington Delegate; and to the Governor of Guam.

STATE RESOLUTIONS CONCERNING MIA'S AND POW'S IN VIETNAM

Mr. THURMOND. Mr. President, as the President pro tempore, I would like to call to the attention of my colleagues resolutions passed by the States of Massachusetts and Pennsylvania which concern POW's and MIA's in Vietnam.

These resolutions are further proof of a growing interest throughout our Nation over the continuing tragedy of those Americans who are still unaccounted for after the Vietnam war. For years, I have urged a renewed emphasis on resolving this situation, especially for the families, relatives, and friends of those who are still listed as POW's and MIA's. Anything less than a full national effort to resolve this tragedy is not acceptable.

Mr. President, I commend the distinguished members of the General Assembly of Pennsylvania and of the State Senate in Massachusetts for their worthy resolutions. In order to share the sentiments of these concerned State legislators with my colleagues, I ask unanimous consent that these two resolutions be printed in the RECORD.

There being no objection, the resolutions were ordered to be printed in the RECORD, as follows:

HOUSE RESOLUTION No. 20

Whereas, Article VIII, section (a) of the peace accord which ended the Vietnam Conflict provided that the United States and

Vietnamese governments would, on the date of United States troop withdrawal, exchange prisoners of war and complete lists of information on all military personnel who died in captivity or were found dead by the enemy; and

Whereas, There are still nearly 2,500 Americans still unaccounted for by the Indochinese governments (specifically Vietnam, Laos and Cambodia), even though there have been approximately 1,000 siting reports of captured Caucasians, of which 300 are based on reliable first-hand information; and

Whereas, The Vietnamese government has, to date, only returned the remains of 72 United States soldiers who died in captivity and, who along with the Cambodian and Laotian governments, have provided a dismal record of cooperation toward the full accounting of all Americans still unaccounted for; and

Whereas, Fundamental humanitarian principles are violated by the continuing lack of cooperation from the Indochinese governments; therefore be it

Resolved (the Senate concurring), That the General Assembly of the Commonwealth of Pennsylvania memorialize the President of the United States, Congress and the Department of Defense to continue to place a high priority on securing the fullest possible investigative accounting of Americans listed missing in action (MIA), prisoner of war (POW) or killed in action (KIA) body—not recovered and; be it further

Resolved, That copies of this resolution be transmitted to the President, the Speaker of the House of Representatives, the President of the Senate, the appropriate committee chairmen in both chambers of Congress, the Secretary of Defense and the Joint Chiefs of staff.

RESOLUTIONS REQUESTING THE GOVERNOR TO PROCLAIM THE MONTH OF NOVEMBER, NINETEEN HUNDRED AND EIGHTY-ONE AS P.O.W.-M.I.A. AWARENESS MONTH

Whereas, More than seven years after the end of the participation of the United States Armed Forces in the Vietnam war there remains approximately two thousand, five hundred Americans still unaccounted for and missing in action; and

Whereas, There is reliable information that justifies our belief that a number of the Americans still unaccounted for are still being held as prisoners in Southeast Asia, particularly by the North Vietnamese Government; and

Whereas, The withholding of information by the North Vietnamese Government as to the existence of the remains of Americans in Southeast Asia and the existence of living Americans still being held prisoner in Southeast Asia is a violation of the highest order against humanity, causing indescribable suffering to the families of those missing in action or still prisoners of a war long ended; and

Whereas, The negotiations by commissions and other represntatives of the United States have lacked the success and the tenacity of purpose which could have forced the P.O.W.-M.I.A. issue in Southeast Asia to have been resolved to the satisfaction of the American people, particularly the families of the P.O.W. and M.I.A. Americans; and

Whereas, We must not allow the efforts by the United States Government to slacken and die by the lessening of public clamor for action on this P.O.W.-M.I.A. issue, remembering that throughout American history our prisoners of war have always been called upon to make uncommon sacrifices; and

Whereas, We must sacrifice for those who have suffered so much in fulfilling their duty as citizens of the United States by our taking the time to renew the public pressure and awareness against our Government's seeming tendency to desert and turn away from a total confrontation of this problem; therefore be it

Resolved, That the month of November in the year nineteen hundred and eighty-one be proclaimed by His Excellency the Governor, Prisoner of War-Missing In Action Awareness Month; and be it further

Resolved, That appropriate acts of awareness, and individual and group communications to the President and Congress of the United States and other suitable action be taken to spread awareness throughout the Commonwealth thereby increasing the public demand that the Government of North Vietnam complete a full and honest accounting of the identity of all Americans numbered among the twenty-five hundred known by said Government to be dead or alive, who are still in Southeast Asia; and be it further

Resolved, That this resolution be made known throughout the Commonwealth as a public service by courtesy of the various entities of the news media operating within the Commonwealth; and be it further

Resolved, That this resolution be forwarded to the President of the United States, the Governor of the Commonwealth, the United States Secretary of State, the Speaker of the United States House of Representatives, and the President Pro Tem of the United States Senate.

THE FISCAL YEAR 1982 BUDGET AND THE CITIES—A HUNDRED CITY SURVEY

Mr. ROBERT C. BYRD. Mr. President, since this administration took office last January, it has pushed through the largest package of budget and tax cuts in our history, and we now hear that more spending cuts will have to be made.

Before we are forced to make new cuts, we should fully understand what we have already done. Because these cuts were made through an unusual use of the reconciliation process, many Senators did not have the opportunity to carefully review the cuts they were asked to vote for.

As the reports from various sectors come in, it is more and more obvious that we have sliced through the fat, and severed muscle from bone in many places. The U.S. Conference of Mayors has recently completed a survey of 100 cities and has issued a report entitled "The FY 82 Budget and the Cities." This survey details the harsh impact this year's budget cuts are already having, and warns of greater dangers from future cuts.

According to this survey, 61 percent of the cities responding have already laid off workers, and 13 percent more say they will do so soon. Forty-one percent of the cities say they have already or will soon increase taxes. Sixty-four percent of the cities said they will reduce services. For instance, Little Rock has had to end its street resurfacing efforts; St. Paul Minn., has had to eliminate 20 policemen; and Toledo now collects garbage only once every 2 weeks. These cuts threaten the safety, security, and health of all citizens, and more cuts mean that these threats will multiply.

Fully 63 percent of the responding cities said they will have to defer work on capital infrastructures, such as waste water drainage, city waterlines, and sewer projects. We can defer such infrastructure repairs, but at some point we must make them if our Nation's cities are to survive. The longer we wait the more it will cost. Such deferrals are a clear example of the penny-wise, pound-foolish approach to budget reductions that was embedded in much of the administration's 1982 program.

So that my colleagues may better understand the impact these cuts have on real people and real places, I ask unanimous consent that the Conference of Mayors survey be printed in the RECORD.

There being no objection, the survey was ordered to be printed in the RECORD, as follows:

THE FISCAL YEAR 1982 BUDGET AND THE CITIES

INTRODUCTION

Recently-enacted federal budget cuts are imposing immense burdens on city budgets, resulting in massive layoffs, service reductions, tax increases, and postponement of needed capital investments. FY82 cuts in federal spending have fallen disproportionately on grants to state and local government, with cities forced to absorb major reductions in housing, transit, employment, and other programs. Nor is this the first cut which cities have faced. For three consecutive fiscal years since FY80, cities have had to adjust to major reductions in federal aid.

Federal budget cuts have resulted in the following service cuts at the local level:

Reductions in school services;

Major cutbacks in employment and training programs;

Elimination of park and recreation programs;

Crippled housing efforts;

Reduced police, fire, and sanitation services;

Sharp reduction in street, road, and bridge maintenance;

Cuts in city programs to serve the poor;

Reduced transit service at a higher fee;

Rapidly deteriorating urban infrastructure;

Deferral of purchases of garbage trucks, buses, and other city-owned equipment, and reduced maintenance;

Dirtier water; and

Reductions in community and economic development programs.

A survey of one hundred American cities, conducted by the U.S. Conference of Mayors from November 3–10, 1981, indicates that federal cutbacks in key urban programs have already caused cities to reduce substantially the services they provide to urban residents. They predict that further cuts, such as a 12-percent across-the-board cut proposed by the Administration, will have major adverse effects on cities and city residents.

The survey asked cities to indicate how they have been affected by federal cuts in public transportation, housing and community development programs, public assistance, wastewater treatment programs, education, CETA, parks and recreation programs, and public works. (See Appendix I for a list of the cities surveyed and Appendix II for the list of questions used in the survey). Questions also included how the cuts are hitting urban budgets now and how potential cuts may affect them in the future.

The picture that emerges is stark. Sixty percent of cities are laying off workers; 41 percent have raised or will soon increase taxes; and a substantial majority have reduced services substantially and deferred capital spending to try to absorb federal cutbacks. Cities variously warn that they are already at the "bare bones level" "cut to the marrow," and stress the seriousness of the cuts on their continued ability to meet the needs of their people. Cities emphasized the leadership they are exhibiting by raising taxes at the local level, by mak-

ing the difficult choices, and by trying valiantly to overcome the barriers they face.

As one official from a city in the South stated, the goal of the city as a "life-enhancing residential community, and as a viable economic entity," is severely threatened by federal withdrawal of funds. And, a city official from the far West observed, "Cities touch people more closely than any other level of government. These cuts mean the loss of amenities and services that people take for granted. We are paring our essential services to the bone. Where do we go from here?"

The U.S. Conference of Mayors will continue to survey the nation's cities on a periodic basis to assess the impact of budget cuts and related economic policies on those cities.

The U.S. Conference of Mayors is committed to working with the Administration and the Congress toward policies to enhance the nation and its cities. It is the hope of the Conference that the information such as that found in this survey will make a positive contribution to the federal policymaking process.

FEDERAL BUDGET CUTS AND THE FISCAL CONDITION OF CITIES

The FY 82 federal budget cuts have caused large and immediate budget adjustments by cities. A significant majority have already made decisions to increase taxes, lay off workers, postpone capital spending, and reduce services. The details are highlighted below.

City Worker Layoffs: Sixty-one percent of all cities have had to lay off workers as a result of federal budget cuts. An additional 13 percent say they will soon do so. These layoffs have a particularly adverse impact on city revenues, welfare burdens, city services, and crime rates.

1a. [Have you] laid off workers?

	Number	Percent
Yes	59	61
No	25	26
Not yet, but will	13	13
Total	97	100

While the number of layoffs varied by the size and fiscal condition of cities, some cities were forced to reduce their work force by as much as 20 percent, including York, Pennsylvania and Youngstown, Ohio.

Layoffs by cities

City:	Number, if given	Percentage, if given
Allentown	--	1–2
Anchorage	--	3–4
Austin	45	.5
Baltimore	1,000	2.89
Berkeley	--	1–2
Billings	55	7
Buffalo	1,400	10
Cedar Rapids	4	--
Charleston, W. Va.	--	.5
Corpus Christi	360	3
Dallas	50–75	--
Des Moines	20–25	1
Detroit	124	5
Duluth	*15	--
El Paso (fewer than)	10	--
Ft. Wayne	10	--
Gulfport	30	10
Las Vegas	100	7
Lincoln	23	2
Little Rock	63	5
Long Beach	12–13	--
Los Angeles	2,100	7.6
Louisville	796	--
Madison	45	3
Manchester	200	**10
Memphis	220	2
Miami	954	--

St. Paul	150	4
Springfield	250	10
Tampa	699	13.5
Toledo	254	8
Wilmington	45	--
Winston-Salem	40	2
York	5	20
Youngstown	212	20

*Positions eliminated.

**Through layoffs and attrition.

***Includes 401 positions eliminated through attrition.

NOTE.—42 Cities of the 59 that have experienced layoffs gave a number that could be cited; 5 others gave a number, but asked that they not be quoted directly. These layoffs include CETA workers and other city employees.

Layoffs recognize no regional boundaries, as the figures below indicate.

Regional distribution of cities with layoffs

Region:	Number	Percentage
New England	6	10
Midwest	17	29
Southwestern U.S.	4	7
South	13	22
Far West (including Alaska)	9	15
Mid-Atlantic	10	17
Total	59	100

In describing its layoffs, Louisville indicated that it "has been forced to lay off approximately 703 CETA employees who were placed in various city departments and outside agencies. In addition, approximately 93 general fund positions in various city operating departments were eliminated largely because of a 12 percent reduction in the city's fiscal year 1981–82 payments. These included positions in the parks patrol unit, school crossing guards, and sanitation workers."

Tax Increases: Despite restrictions on city revenues, many cities are responding to federal budget cuts by raising local taxes. Of the 96 cities responding, 40 (41 percent) have raised or will raise taxes, and 1 (1 percent) tried, but failed.

Twenty-seven cities specified the kind of tax increase adopted, with some adopting more than one increase.

Types of tax increases

Number of cities

Tax increases:	
Property	18
User fees	11
City income	3
Utility	2
Sales	1

Ten cities, surveyed and responding to this question, already have a sales tax; 18 have an income tax; and 11 have both a sales and income tax. It is important to emphasize, however, that revenue-raising through sales, income taxes, and other methods, are prohibited in a number of states. Currently, 40 states do not allow local governments to levy income taxes, and local sales taxes are not allowed in 24 states. Limitations on property taxes, such as Proposition 2½ in Massachusetts, further hamstring the revenue-raising capacity of cities.

Service Reductions: In order to cope with federal cutbacks many cities have had to reduce city services. Ninety-three cities responded to this question. Of these, 64 (69 percent) stated that they have had to, or will soon, reduce services; 29 (31 percent) reported that they have not, although some noted that they were already cut to the bone and could not cut any more.

The types of services cut and the number of cities indicating reductions in these areas are as follows: (It is important to remember that one city could cut in more than one area.)

Service area cut:	*Number of cities*
Park and Recreation	20
Health and Human Services	14
Public Works	10
Sanitation	9
Across the board in all departments	9
Fire Protection	8
Police Protection	8
Libraries	7
Streets and Bridges	7
Training and Employment	7
Environment	3
Arts	2
Mass Transit	2
Some, not specified	1

Many cities have been forced to reduce services in several areas. For example, Berkeley, California, noted that their cuts have been across-the-board, but noted that the federal aid cuts have had a particularly adverse impact on personnel levels in the fire department, police station closings, reduction of police-administered staff, and have resulted in nearly a two-thirds reduction in community social services.

Boise noted that their reductions have affected library hours, recreational programs, and street lighting. Although it has a growing population, Boise has added only three policemen, and no firemen, to their city staff. In Little Rock, city officials have eliminated street resurfacing for lack of funds; their situation has been exacerbated by voter repeal of a $3 million road tax. In addition, Little Rock officials have been forced to consider the closing of fire stations.

Manchester has reduced its park maintenance, street sweeping, and refuse collection. Nashville has reduced fire code inspections, the juvenile court budget, health department staff, sanitation, social services for the elderly and deinstitutionalized persons, parks, recreation programs, libraries, jails, and workhouses. Pawtucket has reduced public works and such social services as pedestrian crossing guard programs for the elderly.

One Sun Belt city is reducing cash assistance to the indigent, vacant lot weed control, drainage maintenance, parks and recreation, health, the arts, and air pollution control programs. In addition, it has reduced family planning monies; programs for women, infants, and children; and community services. The city official noted that, "These cutbacks are necessary despite some increases in local revenue sources that we have generated and corresponding budget increases, because the city has not been able to keep pace with its service needs."

St. Paul has closed three recreation centers, reduced library hours from five days to four a week, eliminated 20 police positions, and four firefighter positions, and the rest of of its cuts are spread throughout the city departments.

Toledo has reduced garbage collection from weekly to every two weeks. It has virtually eliminated park and recreation activities, and has completely eliminated its con-

sumer protection program. The city has not increased its police force since 1979, with reductions there being made by attrition. Springfield has cut all departments except public safety.

Deferral of Capital Spending: The Urban Infrastructure: The street, sewers, and bridges of many cities have not been adequately maintained or repaired. Sixty-three percent of the cities have deferred capital spending as a result of federal budget cuts or plan to do so.

These cities range across all regions of the country: Akron, Allentown, Baltimore, Berkeley, Billings, Boise, Buffalo, Cedar Rapids, Charleston, SC, Cleveland, Dade County, Denver, Des Moines, Detroit, Duluth, El Paso, Fargo, Flint, Gulfport, Kansas City, MO, Lincoln, Long Beach, Los Angeles, Louisville, Manchester, Memphis, Minneapolis, Nashville, Omaha, Pawtucket, Pittsburgh, Richmond, Rockford, St. Louis, St. Paul, Salt Lake City, San Jose, Seattle, Springfield, Winston-Salem, Yonkers, York.

(Five cities requested anonymity.)

Nine cities stated that they have not yet had to defer capital spending, but that they will have to do so soon. These are Burlington, Charleston, West Virginia, Dayton, Hartford, Indianapolis, Little Rock, Miami, Portland, Oregon and Tucson.

Denver stated that it had "almost totally" deferred capital spending, particularly affecting expansion of libraries, badly needed bridges, and wastewater drainage.

Cities most frequently cited deferral of capital spending for street and bridge projects. Other deferrals have hit parks and recreation programs, building inspection and code maintenance, fire and police stations, water projects, sanitation, mass transit, and libraries.

Asked to indicate whether or not any "major urban infrastructure plans had been deferred," 62 cities responded with an indication of impact on their infrastructure efforts. Of these, 63 percent stated that they will defer such major undertakings.

Cities that have deferred major infrastructure plans: Allentown, Austin, Berkeley, Boise, Buffalo, Charleston, SC, Dade County, Denver, Des Moines, Detroit, Duluth, Fargo, Flint, Kansas City, MO, Louisville, Manchester, Memphis, Nashville, Oakland, Omaha, Pawtucket, Providence, Richmond, Rockford, St. Louis, St. Paul, Salt Lake City, Toledo, Warwick, Wilmington, Winston-Salem, Yonkers, Youngstown.

Examples of such major infrastructure deferrals include Allentown, which has deferred a sewer run-off system; Berkeley, which has deferred road repairs, street sweeping, and all equipment maintenance and replacement; Boise, recreation and park maintenance; Buffalo, street resurfacing, street lighting, a sludge transfer plant which is required by the Environmental Protection Agency, and an updating of city water lines; Charleston, South Carolina, many equipment purchases, including garbage trucks and street sweepers; Des Moines, a major sewer project, which has been in planning for several years; Duluth, storm sewer construction; Louisville, city incinerator repairs; Manchester, transportation centers; Memphis, major street repairs; Omaha, two fire stations, three senior citizen centers, and water and sewer projects; Rockford, road expansion in industrial areas; and Youngstown has deferred buying any new fire equipment and noted that they "can't repair all the bridges and streets that need repairs."

One point is clear—the impact of budget cuts respects no limits. It hits all cities, and affects all services within a city, and reduces the quality of life of all of a city's residents.

The sections which follow spell out in some detail the urban services affected by federal budget cuts.

GENERAL REVENUE SHARING

Cities use general revenue sharing funds for a wide range of municipal services ranging from fire protection to street lighting. City officials in 60 percent of the cities responding said they would be forced to lay off workers if their general revenue sharing allocations are cut, with the number of layoffs in the cities interviewed ranging from a half dozen workers to more than 75. At least one-quarter of those responding said they would have to also increase taxes in the face of such a cut, and 70 percent said city services would be significantly curtailed.

Those services affected by such cutbacks include police and fire protection, street lighting, parks and recreation, sewer construction, major infrastructure work, sanitation services, street maintenance, and health and human services. Birmingham reports there would be a reduction or elimination of the Neighborhood Participation Program. Tampa uses revenue sharing for 19 percent of its police department budget, and would face serious cutbacks in police service with a 12 percent revenue sharing cut.

Over 25 percent of the cities predict they would have to increase property taxes if revenue sharing is cut. Many other cities would be unable to raise taxes because of taxpayer resistance, state restrictions, or taxing authority or strict tax restrictions which have been adopted.

The keystone of the Reagan Administration's "New Federalism", general revenue sharing has become an integral part of city budgets. It is clear that any cut in this program, which is widely supported by local officials, will have a major adverse result on city services and tax rates.

STATE BLOCK GRANTS

A major thrust of the FY82 budget proposals was the development of state block grants to replace categorical programs formerly run by the federal government. These block grants in health and human services, education, and community development for small cities are pointed to by the Administration as harbingers of its "New Federalism." Many cities expressed misgivings about direct state entitlement through block grants without adequate safeguards for city involvement in the development of allocation plans and priorities for the use of these funds. Our survey bears out the concerns which were expressed prospectively by so many cities.

State block grants (percent of those responding):

55 percent said the state has not consulted with them or offered an opportunity to participate in the state's decision-making process.

38 percent said they have not been able to get information from their states about the implementation of the block grants.

58 percent said they expected to lose money as a result of the block grants. Only 1 community surveyed thought the block grants would mean an increase in funds.

42 percent said their state was opting to take over the Small Cities CDBG program, and 27 percent said they were doing it poorly, or had some complaints about the process. Fully 53 percent didn't know how the state was carrying out this transition.

Many of the cities contacted said that consultations with the state had occurred only after decisions had been made and a program drawn up. This was true in states as diverse as California, Tennessee, Nebraska, and Maine. Many communities said communication had begun only after they had initiated it. Other cities said they had met with genuine lack of response even after initiating contact themselves and seeking information from the states. Respondents blamed their troubles with the states on confusion at the state level about the programs and their responsibilities; historic bad relations between the city and the state; and state legislatures with strong rural and antiurban biases.

Many cities expressed strong doubts that their needs would receive the same attention from their states as they have from Washington. One major reason for this apprehension is a widespread belief that states will disproportionately cut the share of funds going to urban areas in order to provide coverage of some kind in every part of the state. In Washington State, for instance, the Human Services Department is anxious to maintain a basic level of services everywhere in the state. Reduced overall funding means that areas like Seattle will receive less funding than in the past so that rural areas can receive some service at all. Needs-based allocations, cities believe, will not be adopted by states. Rather, the effort will be to spread funds to every possible constituency, particularly the strong rural-suburban contingents which dominate many state legislatures.

EMPLOYMENT AND TRAINING

Severe cuts in employment and training programs funded under the Comprehensive Employment and Training Act are having a very negative effect on city economies at a time when national and city unemployment rates are extremely high. The national unemployment rate at, 8 percent and rising, translates into double-digit rates in many cities and 50 percent rates for minority teenagers.

In response to the Administration's elimination of all public service jobs under CETA Title IID and VI in FY82, cities have laid off all of their CETA employees—a total loss of 300,000 jobs from the CETA system.

Resulting costs to individual cities in dollars and services are immense an diverse. Of the 65 cities reporting direct financial effects due to the elimination of CETA, 42 percent are paying unemployment compensation, and 8 percent welfare. One northeastern city will spend approximately $20–25 million on unemployment compensation for former CETA employees, based on 2,000 people getting $130/week for 34 weeks. Columbus, Ohio is spending $40,000–$50,000 per month for unemployment compensation. Baltimore anticipates losing $27 million in wages, which multiplies to a $60 million drain on the economy because of lost wages. Only eleven percent of those cities surveyed felt there would be little direct cost to their cities, and only 20 percent said the county, state, and/or federal governments are paying the costs.

The stark reality of being newly unemployed in a recession economy is the prospect faced by former CETA employees. Some—but not all—former CETA employees had been hired by the city government in 52 percent of the respondent cities, other governments in 26 percent, private industry in 47 percent and nonprofit organizations in 5 percent. Fully 10 percent of the cities said none of their former CETA employees had found employment.

In Anchorage, 18 of the 80 employees laid off are now on the city payroll. Buffalo city government had hired 100 and private industry 380, of the 1,400 laid off. In Corpus Christi, 253 of the 362 terminated have been hired by the city government. Detroit city government has picked up 1,000 of the 1,124 laid off from CETA. Two hundred of the 760 laid off in Fort Wayne have found other jobs. In Fresno, the city has hired 40–50 of the 250 unemployed. In Los Angeles, of the 5,000 laid off, 63 are working for the city, 300 for other governments, and 800 for private industry.

Of the 10,330 laid off in New York City, 5,350 have been hired by the city, 39 by other governments, and 347 by private industry. Less than 5 percent of Pawtucket's

115 former CETA workers have found new jobs. None of Savannah's 83 public service employees has been re-employed. Approximately 40 of Waterbury's 205 laid-off CETA employees are working for the city. Five hundred of Seattle's 523 are working for the city now. And, in Toledo, 125 of the 694 are working for the city and other governments and none in private industry.

Of the 71 cities reporting the termination or cuts in services, 30 percent have reduced or eliminated parks and recreation programs, 25 percent health and human services programs, 20 percent street and bridge maintenance and construction, and 17 percent training and employment projects, most affecting youth. Maintenance and security in city housing projects will be cut in over 10 percent of the cities surveyed. Health and human services affected include day care, transportation and food programs for the elderly, alcohol and drug abuse centers, youth counseling, rape crisis centers, minority advocacy, displaced homemaker programs, and health delivery services. Aid to community-based organizations, which provide many of these services, will be eliminated in 13 percent of the cities surveyed. In Atlanta, at least 10 community-based organizations have closed so far and the termination of the CETA program will have "a significant negative impact on the city." According to an official in Cedar Rapids, the program was "killed without regard to its effectiveness. PSE was our best program." Public service employees represent "20 percent of Miami's current work force—it will be a severe loss to the city." Eight percent said some programs in all public services will be terminated and many large urban cities, like Detroit, which must pick up all the costs of the terminations of employees and services, feel it will mean "disaster" for their communities, especially for the poor and minorities.

Mayors and county officials are now working for reauthorization of a national employment and training program that will continue the direct federal-city relationship established in 1973 under the Nixon Administration's Comprehensive Employment and Training Act. Many cities surveyed stressed that the direct federal-city link has worked well for them and that they want to see it continued.

One person with over eight years of experience as a city employment and training director made the following observation: "under the Nixon Administration, we worked out a compromise to provide a way by which all cities and counties with a population over 100,000 could tackle their employment and training issues directly in concert with the federal government. Thus, in 1973, we agreed after months of negotiation that while there is a role for all governmental levels, the best system is one in which cities work with the federal government directly, without any intermediary barriers. That direct system works, and we have to keep it."

Many city officials expressed apprehension about a fundamental restructuring. As one official of a Midwestern city said, "Look, we are really hard hit by all these cuts and by our unemployment. We have just laid off more than 500 city workers and eliminated 300 more vacant positions from city rolls that we needed to have filled. It was bloody and painful and hard to say 'get lost' to people, some of whom had thirty years in with the city. In addition to our having to lay off city workers, we are dealing with a huge unemployment problem here. Remember, when you see an eight percent unemployment figure nationally, that translates into 15 or 20 percent or higher unemployment in cities, and in some instances, among our minority youth population, for example, we have unemployment over 40 percent."

The survey question on layoffs of public service employees produced a broad range of observations, not only about Public Service Employment (PSE), but also about the employment and training system in general. The picture that emerges is that cities across the country feel serious apprehension about the effects of federal cubacks on urban employment and training programs in this country. When recent proposals to shift responsibility for employment and training from the local to the state level are added to the discussion of federal employment and training cutbacks, local officials expressed even more alarm.

COMMUNITY AND ECONOMIC DEVELOPMENT

Since 1974, Community Development Block Grants (CDBG) have provided cities around the country with a flexible source of funds for infrastructure improvements, neighborhood development, housing rehabilitation, and targeted delivery of services to low- and moderate-income people. Proposed funding for the program in FY82 was equal to FY81 levels, despite the addition of some 35 new SMSA's to the program. Also, other complementary programs such as Section 312 rehabilitation loans, Section 701 planning grants, and low-income energy weatherization were substantially reduced or terminated, and the burden of providing these services pushed into the CDBG program. The FY82 budget legislation on the program translated to an effective cut in real dollars of 10 percent for all entitlement communities, compared to allocations in FY81. Cities surveyed said that this cut is having an immediate effect in this way:

Community development block grants (percent of respondents):

35 percent of the cities surveyed said that the FY82 cuts in CDBG already enacted have had a substantial effect.

72 percent said that a further 12 percent cut would have a disastrous or substantial effect.

Surveyed cities said that services under CDBG have already been curtailed as a result of projected funding cuts. Nearly all the cities contacted said that CDBG cutbacks will mean across-the-board reductions in activities such as capital improvements in distressed neighborhoods; reduction in the amount of housing rehabilitation; cutbacks in services such as special transportation for the elderly in target neighborhoods, and elimination or reduction of street paving and repaving programs in deteriorated areas.

An additional 12 percent cut in FY82 funding for CDBG was viewed by most cities as particularly serious. Atlanta, for instance, said that it would be "disastrous." "In addition to a general deferral of programs now underway, there will be no other place to make up the lost funds—all the pots are empty now." The city pointed out that there is little hope of aid from its state, particularly given its rural bias and the stiff competition from rural areas for scarce funds. Boston said further cuts would be "devastating" "—these (funds) are the city's principal development tools." Buffalo pointed out that CDBG funds are the key to its economic development efforts to increase its revenue base and become more self-sufficient. One southern community commented, "We've been given ten new things to do with this program and one-half the money." El Paso commented that all social service programs would be cut by at least $200,000. Another southwestern city stated that a further cut would mean that existing commitments from previous years would have to be broken, leaving some projects unfinished in target neighborhoods.

Another major thrust in city programming since 1974 has been economic development. The adoption in 1977 of the Urban Development Action Grant (UDAG) program spurred even greater attention to this vital area. Program funding through the Economic Development Administration (EDA) also provided cities resources which they could use to leverage private sector investment to create jobs and reduce dependence on public assistance. The UDAG program was cut by 26 percent in FY82 from FY81 levels; EDA was proposed by the Administration for elimination. The UDAG program appears headed for an additional 12 percent cut in the second round of Congressional budget reductions.

Urban economic development (percent of respondents):

31 percent said the cutback in UDAG has had a substantial effect in their communities.

38 percent said reductions in EDA were having a substantial effect.

45 percent said further cuts in UDAG would have a disastrous or substantial effect locally.

51 percent said the elimination of EDA would have a disastrous or substantial negative effect on their communities.

The City of Knoxville summarized many comments by calling UDAG cuts "self-defeating." Thanks to the program, that city has "totally revitalized our downtown."

In Dayton, the EDA cutbacks will mean that a $1 million revolving business loan fund to help businessmen in the city stay in business there, will not be funded completely. Ft. Wayne will be forced to cut staff in the city working on economic development projects because of the withdrawal of EDA support. Portland, Maine's effort to revitalize its waterfront for private investment and jobs may be lost entirely if EDA funding is cut off. Salt Lake City might have to abandon a downtown development project because of the EDA cuts. Youngstown, which has lost 10,000 jobs since 1977, needs loan guarantees from EDA to attract new industries and help those there now to expand.

ASSISTED HOUSING PROGRAMS

In the March revisions to the FY82 budget, housing assistance funds were proposed to be cut by nearly 30 percent. This reduction in funding affected cities' ability to use Section 8 subsidies in existing, rehabilitated, and newly constructed housing, and to develop publicly-owned and operated low-rent housing. Subsidies for the operation of low-rent public housing also were slated for cuts, and public housing authorities were notified to expect no more than 85 percent of the funds to which they were entitled by the Administration's own Performance Funding System. Cities across the country are feeling the impact of these cuts.

Assisted housing programs (percent of those responding):

57 percent characterized the cuts already enacted as having a disastrous or substantial effect in their communities.

70 percent said an additional 12 percent cut would cause a disastrous or substantial impact in their communities.

Particularly serious were the comments of many respondents—many of whom asked not to be identified by name—that further cuts in housing funds could easily lead to the bankruptcy of local public housing agencies. Many communities said that further cutbacks in public housing operating subsidies would lead to the closing of substantial numbers of public housing units. One southern jurisdiction pointed out that it has a waiting list of 27,000 people already for public housing, and its housing authority is close to bankruptcy. The City of St. Paul characterized a further cut in housing assistance as "devastating," pointing out that without additional federal assistance, the city's efforts to encourage the development of smaller, more energy-efficient homes will be hampered. This will mean further waste in energy and space in the city, while putting increasing pressure on the existing housing stock.

City after city noted that vacancy rates

are below 3 percent, in many cases hovering between 1 and 2 percent. Cities as diverse as Corpus Christi, San Jose, and Springfield, Missouri, all pointed to low vacancy rates as a major problem which cutbacks in federal housing assistance will exacerbate.

While cities share responsibility with states and counties for public assistance programs, a large number of cities surveyed expect to be negatively affected by cuts in federal income support programs.

More than 33 percent of the cities said they have a public assistance or general assistance program for the indigent, with the remaining cities reporting that counties, states or non-profit agencies are responsible for these programs.

Where cities provide assistance programs, the three most common are general assistance, emergency services, and medical assistance programs. Because one-fourth of the program's clients are on Medicaid and/or Medicare, reductions in federal support for these programs will cost the city revenue. For the past 25 years, one southwestern city has been giving assistance to those ineligible for state aid. Already feeling the pinch, the city says, "we have reduced our program by consolidating staff and making smaller amounts available for cash assistance. The future focus will probably be on home energy costs and homemaker services."

Some 58 cities stated that cutbacks in federal income support programs are resulting in calls from or on behalf of the poor. An increase in calls and inquiries from the poor was experienced by 40 cities surveyed. Another 18 said public assistance agencies were calling to ask the city for help or money for the poor. Thirty-nine cities felt calls were being placed to county officials responsible for administering public assistance programs.

"The impact is immediate," says Atlanta. "Poeple are asking for help." And, in Knoxville, "people are contacting the city because they don't know where to go now." Calls are up 30 percent in one southwestern city and up 20 percent in Baltimore. New Bedford projects "calls will really hit the city if unemployment increases."

Almost all cities that fund local assistance programs expect federal cutbacks to result in increases in the city's public assistance budget. Cities that won't have increases say it is because there isn't any more local money available. Cities relying on states and counties to operate assistance programs foresee a ripple effect that will end up taking a bite out of the city budget.

In Madison, the city's public assistance budget is expected to jump 15 percent in fiscal year 1982. Providence has had a first quarter budget increase to $2 million, up from $1.5 million.

In Baltimore, the city projects changes in the food stamp income eligibility standard may mean $1.1 million in lost income to some 20,000 of Baltimore's working poor and households with high expenses relative to income. For the city, there will be more stress placed on emergency services.

Cincinnati's health department is facing "a real crisis" with the loss of approximately $3.5 million in federal grants. Hard hit will be programs directed to mothers and infants, immunizations and rat control.

Many cities anticipate a domino effect where, as the providers of last resort, they will be obligated to step in and aid the indigent. In Columbus, Ohio, the county funds the general assistance program for the poor, but federal cutbacks will place a greater burden on city social services. "If the county can't handle the needs, the city may have to develop new programs," predicts Corpus Christi. Buffalo reports the county operates public assistance programs, but reductions in federal funds may make the county increase taxes, "thereby creating an adverse impact on the city's ability to raise sufficient revenue for city programs. There's already a gap between county expenditures for public assistance and county revenue to provide them." And, in Texas, the state has made heavy cuts in day care and nursing home services, forcing El Paso to compensate by increasing its budget for these.

Many cities also make contributions to private, nonprofit agencies. Of the 90 cities which make such contributions, donations total $1 million annually. These city dollars support a wide range of activities which include social and health services, cultural, educational, and recreational programs, legal services, and economic development. Additionally, some cities contribute in-kind services to their private, non-profit agencies. A total of 11 cities indicated that their contributions will be reduced in FY82. Berkeley will have to cut their contributions by 60 percent and Denver by 50 percent. Fresno will have to take the extreme measure of eliminating the city's contribution to the private sector.

Combined cutbacks in availability of city general assistance funds and in contributions to private, non-profit agencies, when viewed in combination with cutbacks in federal and state programs that directly assist the poor and disadvantaged, paint a picture of great hardship and significantly decreasing assistance for the poor and the working poor.

EDUCATION

Education services are being reduced in most cities across the country. Layoffs are rampant. School lunches cost more. These are the impacts now—and the impacts in the coming months.

Reduced Services: The most dramatic impact of the federal cuts in education has been in the reduction of services, as indicated by three-fourths of the 62 responding cities. Even more significant are the areas cited as most frequently receiving the cuts—Title I programs for the disadvantaged, bilingual education, and programs for handicapped students.

And it does not appear that new local dollars will be available in many cities to make up this slack in reduced services. Forty percent of the cities responding said that school taxes would be increased to offset the federal cuts. State laws prohibit many other cities from even considering this option.

In view of the large numbers of disadvantaged and handicapped children presently served by special programs, as well as the increasing numbers of non-English speaking immigrant and refugee children, the federal cuts in special services could portend serious problems. For example, Dade County alone has an influx of 16,000 new students from Cuba and Haiti whose special needs cannot be met. The availability of special services has given school systems large clienteles of special needs students who will have to be educated within the regular curriculum.

Since it is doubtful that the regular education programs of school systems can respond to all the needs of children served by special programs, city social service and health agencies will be called upon to assist. And, cities also may have to cope with more frustrated youths who become school dropouts as a result of the diminished capacity of public school systems.

Layoffs: Layoffs also were a frequently cited result of the federal cuts. Nearly two-thirds of the responding cities indicated that reduced federal funds had necessitated employee cuts across all categories of school personnel.

Other Effects: Other effects cited by 14 of the 40 responding cities were school closings, service fees for recreation, and fewer auxiliary staff members such as counselors, tutors, and aides. Los Angeles schools have suffered a severe setback in integration efforts because federal funds for this purpose have been cut from $15 million to $7 million.

Future Impact: In discussing the future impact of federal cuts, several cities indicated it was too early to predict effects. However, reduced services were again cited as the primary target area by 95 percent of the respondents. In the words of the Director of Finance for the East Baton Rouge Parish School Board, "Title I special programs will evaporate." More layoffs were predicted by 79 percent of the 33 respondents. School closings, increased taxes, and other stringent measures, were indicated by 65 percent of the responding cities. Atlanta summed up its situation by stating that "the effects will be traumatic."

School Lunch Program: The school lunch program will suffer in many cities with increased costs and prices resulting in decreased participation in several cities. For example, in Baltimore, 4,918 children have dropped out of the school lunch program. As a result, some schools may not be able to continue their programs. Of 54 cities providing information about the impact of the cuts on their school lunch program, almost a third said the effect was disastrous, another third said substantial, and the remainder indicated moderate effects.

INDUSTRIAL REVENUE BONDS

Tax-exempt Industrial Revenue Bonds (IRBs) have played an increasingly important role in city economic development efforts in recent years. Cities report that this tool has been particularly helpful in working with small businesses which need funds at reasonable interest rates to expand and increase employment. The Administration has proposed curtailing or even ending the tax-exempt status of these bonds for small issues. Cities surveyed said this would have a serious negative effect on their economic development efforts.

Industrial revenue bonds (percent of respondents):

64 percent of those surveyed said they used IRBs.

79 percent said that an elimination of IRBs would have a disastrous or substantially negatiive effect on their cities.

34 percent said requiring a 5 percent match for issuance of the bonds would make their use impossible.

Cedar Rapids reported that, "it would stop all expansion in the city" if IRBs were eliminated. "All the economic growth of the last two years (in Cedar Rapids) depended on IRBs. The effect would be dramatic." A southern city said that a job creation effort involving 11,500 jobs in depressed parts of the city would be halted if IRBs were terminated. Garland, Texas reported that "it would have a substantial effect. There have been about 8 projects here receiving IRB assistance, all small issues."

Requiring cities to match IRBs with local funds would virtually end the program in most areas, according to survey respondents. Berkeley said it would make it "impossible" for the city to participate in the program. Cedar Rapids said that state law would prohibit it from matching the funds at all. Duluth said that "budget constraints make any match impossible." Gulfport said "the city would stop issuing them" if a match were required. Indianapolis said such a requirement would have a "chilling effect."

TRANSPORTATION

The nation's cities are enduring difficulty across the board in meeting basic urban transportation needs including public transit, streets, roads, and bridges. And the situation is likely to get more difficult in the months ahead.

Public Transportation: Fare increases—both recent and projected—and the common thread running through most urban public transportation systems, combined with rider-

ship declines and reductions in service. The summary figures below graphically illustrate the dilemma.

Public transportation and cities (percent of respondents):

Sixty percent have had fare increases in the last six months.

Fifty-three percent expect another fare increase in less than a year.

City officials are concerned that additional cuts in federal operating assistance will result in cuts in service, decline in ridership, and increased fares. With further cuts in the capital program, the most likely impact would be deferred purchase of new equipment along with generally deferred maintenance.

Public transportation can be the victim of a vicious cycle. Budget cutbacks yield higher fares, which lead to declining ridership, which results in deferred maintenance and service cutbacks, further impairing services.

But more than an economic cycle, federal transit budget cuts mean real impacts in cities. Public transportation serves a largely dependent population—the poor and the elderly, in particular. Yet fares are approaching $1.00—one way—in cities across the country.

Transit also serves an independent population—those who can afford to make the choice between transit and other modes. As fares rise and service shrinks or declines, this group might return to their automobiles—which means a far greater amount of street congestion, energy waste and dirty air in cities.

Cuts—particularly in operating assistance—mean that just as transit is poised to make major gains, cities will have neither the resources to expand nor to properly maintain their public transportation resources.

The U.S. Conference of Mayors has argued that in addition to the overall level of federal resources, it is critical to look at the uses of those dollars. The Administration's proposal to phase out operating assistance would make the federal transit program highly inflexible—available for capital only. The Conference has proposed an adequately funded flexible block grant approach so that local officials, within broad limits, could tailor federal resources to meet local needs.

Streets, Roads and Bridges: Transportation is a basic component of the urban infrastructure. Unless cities can reverse the decline in the infrastructure, any possible economic growth in the future will either fail to develop or surely bypass them.

By all accounts, the urban transportation infrastructure is in serious disrepair, as the figures below indicate.

Streets, roads and bridges (percent of respondents):

56 percent have decreased their budgets for streets, roads and bridges in this fiscal year.

65 percent indicated that the situation is deteriorating.

Local budgets for streets, roads, and bridges which are declining, will get worse should the Administration's proposal to eliminate the Federal Aid Urban System (FAUS) go forward. The FAUS program is the only federal effort specifically targeted to meet the surface transportation needs of local government.

It is important to note that city budgets in the infrastructure area are not decreasing because of federal largesse, either current or anticipated. Rather, decline in this budget account is the direct result of the need for Mayors to divert funds to the pressing day-to-day service needs of police, fire, and sanitation, to name a few. Added to this are the revenue and expenditure ceilings under which many cities must live.

Finally, the street, highway, and bridge budgets of cities are uniquely tied to the bond market. Conditions in these markets, sensitive to federal tax policy and interest rates, are now making city participation in the bond market difficult.

Clearly, cities want to do the necessary job in the transportation infrastructure area, but are pressed for funds from all sides—federal, state and local. As noted, the ability to do much more at the state or local level to raise new revenues is limited. One possible answer is enhancement of an existing national user tax—the federal tax on gasoline. This source could be raised and sufficiently targeted to have an extremely positive impact on meeting street, highway, bridge and public transportation needs without further denting the federal budget.

WATER QUALITY

Progress in cleaning up urban water is headed for a halt in cities across the country unless the federal government soon resumes its funding of the Wastewater Treatment Construction Grants Program.

The construction grants program has paid for 75 percent of the costs for states and localities to meet federal clean water mandates. The Administration, with Congressional approval, has withheld funding pending revision in the basic clean water law. But, while Congress works toward a new law, cities are left with massive sewerage treatment plants uncompleted. City reaction is summarized below.

Wastewater treatment construction grants: The Effect of Zero Funds for FY82 (percent of respondents):

9 percent say it has had a disastrous effect.

23 percent say it has had substantial effect.

16 percent say it has had moderate effect.

Nationally, some 30 states across the country have either ceased, or will soon cease, program operations because federal funds have run out.

What cities currently face in the clean water field is a classic case of federal mandates but no federal resources. But, what makes this situation far more serious and severe is that many cities are under federal court order to meet the clean water mandates. The court orders, and Congressional action, make no allowances for the absence of planned-on resources.

Major cities have also suffered because the program is administered through the states and large-scale projects have often not received adequate attention on state priority lists.

Because these wastewater plants are essentially construction projects, they will also suffer by the increased costs brought about by inflation, if and when construction finally resumes.

Many cities report that because of the withdrawal of federal funds, urban residents will be forced to pick up the costs of completion through higher user fees. These costs have been inflated by mandated requirements and technologies.

Because sewerage capacity is such a basic element of the urban infrastructure, many cities fear that the program moratorium will also have a negative impact on their community and economic development plans—there is no growth and development without the proper sewer facilities.

Finally, to the extent that cities attempt to complete federally mandated projects with more local funds, it will require diversion from other important city projects.

The Wastewater Treatment Construction Grant program has historically been a roller coaster of both funding and regulations, and as such, has continuously presented a major challenge for cities to handle. This latest funding crisis, however, puts the cities as never before, on the receiving end of arbitrary federal decisions and places urban environmental programs in jeopardy.

URBAN PARKS AND RECREATION

Mayors are being forced to curtail local expenditures for these efforts by a wide margin. Cities understand the importance that parks and recreation access contributes to community and economic development and the quality of life in cities. But as funds grow increasingly scarce, cities are forced to both reduce all budgets across the board and divert funds to public safety functions such as police, fire and sanitation. Moreover, the public service employees who performed many critical tasks in the parks and recreation areas are now gone. The figures below illustrate the severity of the problem.

Urban parks and recreation (percent of respondents):

65 percent have made or plan to make reductions in the cities parks and recreation budget.

$1.1 million is the average dollar reduction.

13 percent is the average percentage reduction.

The federal government has never played a large role in the financing of urban parks and recreation systems, although those cities, which have received small funding from the Urban Parks and Recreation Recovery Program (UPARR) or the Land and Water Conservation Fund (LWCF), have found that it can play a crucial role in helping to turn a city around.

But when UPARR or LWCF are cut, or when other federal programs are cut, one way or another the city parks and recreation department will be among the first to bear the impact. And this is displayed in very human terms.

One major city will have to soon close 10 of 52 recreation centers—a twenty percent elimination of a system. Many programs in many cities designed to keep youth off the street have had to start late and prematurely end. One big city is literally closing its parks and recreation department for one-half of the year.

The bottom line for city park and recreation efforts is a lower level of services. Some cities report that they will attempt to go to the bond market or adjust local tax sources to compensate for lost park funds, but expect difficulty in doing so. The elimination of the federal Land and Water Conservation Fund and the reduction of the Urban Parks and Recreation Recovery Program increases the burden.

The dramatic and swift reduction and decline in the overall park and recreation effort of all levels of government will hit hardest at those with the least recreation choices—the poor and the elderly. Parks and recreation resources should also be considered part of the urban infrastructure—to the extent they continue to decline, the prospect for the city as the foundation of economic growth is also diminished.

Many cities are now working hard to support their park and recreation systems through a variety of means including contributions of dollars and human resources from the private sector and volunteers. The future of parks and recreation opportunities in cities will rest on a complex partnership between a variety of participants, anchored by city governments, but including the state and federal governments and the private sector.

APPENDIX I

List of all cities surveyed:

1. Akron, Ohio.
2. Allentown, Pennsylvania.
3. Anchorage, Alaska.
4. Ann Arbor, Michigan.
5. Atlanta, Georgia.
6. Austin, Texas.
7. Baltimore, Maryland.
8. Baton Rouge, Louisiana.
9. Berkeley, California.
10. Billings, Montana.
11. Birmingham, Alabama.
12. Boise, Idaho.
13. Boston, Massachusetts.
14. Buffalo, New York.

15. Burlington, Vermont.
16. Cedar Rapids, Iowa.
17. Charleston, South Carolina.
18. Charleston, West Virginia.
19. Cheyenne, Wyoming.
20. Chicago, Illinois.
21. Cincinnati, Ohio.
22. Clearwater, Florida.
23. Cleveland, Ohio.
24. Columbus, Ohio.
25. Corpus Christi, Texas.
26. Dade County; Florida.
27. Dallas, Texas.
28. Dayton, Ohio.
29. Denver, Colorado.
30. Des Moines, Iowa.
31. Detroit, Michigan.
32. Dubuque, Iowa.
33. Duluth, Minnesota.
34. Elizabeth, New Jersey.
35. El Paso, Texas.
36. Erie, Pennsylvania.
37. Fargo, North Dakota.
38. Flint, Michigan.
39. Fort Wayne, Indiana.
40. Fresno, California.
41. Garland, Texas.
42. Gulfport, Mississippi.
43. Hartford, Connecticut.
44. Indianapolis, Indiana.
45. Kansas City, Missouri.
46. Knoxville, Tennessee.
47. Las Vegas, Nevada.
48. Lincoln, Nebraska.
49. Little Rock, Arkansas.
50. Long Beach, California.
51. Los Angeles, California.
52. Louisville, Kentucky.
53. Madison, Wisconsin.
54. Manchester, New Hampshire.
55. Memphis, Tennessee.
56. Miami, Florida.
57. Minneapolis, Minnesota.
58. Nashville, Tennessee.
59. New Bedford, Massachusetts.
60. New Haven, Connecticut.
61. New Orleans, Louisiana.
62. New York, New York.
63. Norfolk, Virginia.
64. Oakland, California.
65. Omaha, Nebraska.
66. Pawtucket, Rhode Island.
67. Philadelphia, Pennsylvania.
68. Pittsburgh, Pennsylvania.
69. Portland, Maine.
70. Portland, Oregon.
71. Providence, Rhode Island.
72. Richmond, Virginia.
73. Riverside, California.
74. Rochester, New York.
75. Rockford, Illinois.
76. Rockville, Maryland.
77. St. Louis, Missouri.
78. St. Paul, Minnesota.
79. Salt Lake City, Utah.
80. San Antonio, Texas.
81. San Diego, California.
82. San Francisco, California.
83. San Jose, California.
84. Santa Barbara, California.
85. Savannah, Georgia.
86. Seattle, Washington.
87. Springfield, Missouri.
88. Syracuse, New York.
89. Tacoma, Washington.
90. Tampa, Florida.
91. Toledo, Ohio.
92. Tucson, Arizona.
93. Warwick, Rhode Island.
94. Washington, D.C.
95. Waterbury, Connecticut.
96. Wilmington, Delaware.
97. Winston-Salem, North Carolina.
98. Yonkers, New York.
99. York, Pennsylvania.
100. Youngstown, Ohio.

APPENDIX II

100 City Survey, Follow-up, November 1981

City:
Contact:
Phone:

Questionnaire

The U.S. Conference of Mayors is conducting a survey of 100 cities which we intend to use in our lobbying efforts here in Washington, D.C. We intend to make public information you and other cities provide, so if there is any need for confidentiality at any point in the survey, please let me know.

I want to ask you several questions on the impact of the FY82 budget cuts on your city:

1. What budget adjustments has your city made in FY82 as a result of cuts in federal aid?

(a) Laid off workers? Percent of workforce? If so, how many?

(b) Increased taxes? If so, which taxes? Do you have a city income or sales tax? Does your state allow you to levy one?

(c) Cut services? If so, which?

(d) Deferred capital spending? If so, which projects in particular? Were any major urban infrastructure plans deferred?

2. If your general revenue sharing allocation is cut by 12 percent in FY82, what budget adjustments would your city have to make?

(a) Lay off workers? If so, how many? And what type?

(b) Increase taxes?

(c) Cut services? If so, which services?

3. When was your most recent transit fare increase?

Do you expect another fare increase before Oct. 1, 1982?

Has ridership declined as a result of your last fare increase?

Do you expect ridership to decline before Oct. 1, 1982?

What would be the likely effect on your transit system of an additional 12 percent cut in federal operating assistance for FY82?

(a) Increased fares?
(b) Cutbacks in services?
(c) Declining ridership?
(d) Other (explain)

What would be the likely effect on an additional 12 percent cut in federal capital assistance in FY82?

(a) Deferred maintenance?
(b) Deferred purchases of new equipment?
(c) Other (explain)

4. As you know, federal subsidized housing programs have been cut by nearly 50 percent in FY82. What effect has this had on your own local housing efforts?

(a) Substantial
(b) Some
(c) Little
(d) None

What types of programs?

What will be the result of an additional 12 percent cut in your housing allocation?

5. What has been the effect in your community of federal cutbacks in FY funding for Community Development Block Grants, UDAG and EDA?

What will be the effect if CDBG and UDAG are cut by another 12 percent and if EDA is eliminated?

6. Does your city use industrial revenue bonds? If so, what would be the impact on your local development efforts if small issue IRBs were eliminated by the Treasury Department?

If the city were required to put up 5 percent of its own funds to match the IRB?

7. Does your city have some sort of public assistance or general assistance program for the indigent? As a result of cutbacks in federal income support programs—food stamps, AFDC, unemployment compensation, Medicare, etc.—have you received more calls and inquiries from the poor?

Do you expect the city's public assistance budget to increase?

8. So far in FY82, no funds have been appropriated for the EPA wastewater treatment program. What has been the effect of this on your city's water and sewer programs?

Are you under court order to make improvements?

9. In implementing the new block grants, has your state consulted with your city and has your city been allowed to participate in the decision-making process? Explain:

Have you been able to get information from your state about the implementation of the block grants?

How have services in your community been affected by the block grants? What do you anticipate will happen?

(a) City will lose money?
(b) Funding about the same?
(c) City will gain funds?

Is your state administering the small cities portion of the Community Development Block Grant? What is your general impression of how well they are doing, whether or not you are a small city?

(a) Very well.
(b) Some complaints (explain).
(c) Poorly.

10. What impacts have the FY82 budget cuts in education already had on the school system in your city?

(a) Lay-offs
(b) Reduced services? Explain.
(c) Increases in school taxes?
(d) Other (e.g., school closings due to budget cuts)

What do you anticipate will be the future impact of the FY82 budget cuts on the school system in your city? (please respond in the same areas)

What has been the effect of FY82 budget cuts on your school lunch program?

11. How many CETA public service employees have been laid off since March, 1981?

Which services provided by public service employees have been eliminated?

How many of those public service employees who were laid off have been hired by the city government? By other governments? By private industry?

What kinds of costs have the city had to incur by the removal of PSE workers from the city payroll (e.g., unemployment compensation, welfare, etc.?)

How much were they?

12. In FY82, have you made or do you plan to make, any reductions in your city's parks and recreation budget? By how much?

13. In FY82, what is happening to your local budget for streets, roads, and bridges?

14. Does your city make contributions to private, non-profit agencies? If so, how much?

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Saunders, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Acting President pro tempore laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, which were referred as indicated:

EC–2277. A communication from the Architect of the Capitol transmitting, pursuant to law, a report on all expenditures from moneys

appropriated to him for the period April 1 through September 30, 1981; to the Committee on Appropriations.

EC–2278. A communication from the Clerk of the U.S. Court of Claims transmitting, pursuant to law, a copy of the court's judgment order in re *The Pyramid Lake Tribe of the Pyramid Lake Reservation* v. *The United States*, No. 87–C; to the Committee on Appropriations.

EC–2279. A communication from the Assistant Secretary of Defense (Comptroller) transmitting, pursuant to law, a secret listing of contract award dates for the period November 15, 1981 to February 15, 1982; to the Committee on Armed Services.

EC–2280. A communication from the Director of the Defense Security Assistance Agency transmitting, pursuant to law, a confidential report on a proposed foreign military sale to Australia; to the Committee on Armed Services.

EC–2281. A communication from the Director of the Defense Security Assistance Agency transmitting, pursuant to law, a report on a proposed foreign military sale to Saudi Arabia; to the Committee on Armed Services.

EC–2282. A communication from the Deputy Assistant Secretary of Defense for Facilities, Environment, and Economic Adjustment transmitting, pursuant to law, a report on nine construction projects to be undertaken by the Army Reserve; to the Committee on Armed Services.

EC–2283. A communication from the Deputy Assistant Secretary of Defense for Facilities, Environment, and Economic Adjustment transmitting, pursuant to law, a report on seven construction projects to be undertaken by the Naval and Marine Corps Reserve; to the Committee on Armed Services.

EC–2284. A communication from the Comptroller General of the United States transmitting, pursuant to law, a report entitled "DOD Can Increase Revenues Through Better Use of Natural Resources it Holds in Trust"; to the Committee on Armed Services.

EC–2285. A communication from the Secretary of Transportation transmitting a draft of proposed legislation to eliminate the requirement of review and approval of plans and location for bridges and causeways over certain navigable waters of the United States; to the Committee on Commerce, Science, and Transportation.

EC–2286. A communication from the Deputy Assistant Secretary of the Interior for Territorial and International Affairs transmitting, pursuant to law, audit reports for Guam/TTPI/NMI and American Samoa; to the Committee on Energy and Natural Resources.

EC–2287. A communication from the Comptroller General of the United States transmitting, pursuant to law, a report entitled "Annual Report on Outer Continental Shelf Shut-In or Flaring Wells is no Longer Needed"; to the Committee on Energy and Natural Resources.

EC–2288. A communication from the Administrator of the Energy Information Administration transmitting, pursuant to law, reports on sales of refined petroleum products and sales of retail gasoline for August 1981; to the Committee on Energy and Natural Resources.

EC–2289. A communication from the Assistant Secretary for Congressional Relations, Department of State, transmitting a Process-Verbal of Rectification of the text of the Convention on the Conservation of Antarctic Marine Living Resources, 1980; to the Committee on Foreign Relations.

EC–2290. A communication from the Assistant Secretary of State for Congressional Relations transmitting, pursuant to law, an agreement between the American Institute in Taiwan and the Coordination Council for North American Affairs, relative to certain aeronautical equipment and services; to the Committee on Foreign Relations.

EC–2291. A communication from the Secretary of the U.S. Postal Rate Commission transmitting, pursuant to law, notice of a hearing scheduled for December 10, 1981, at the Postal Rate Commission, Washington, D.C.; to the Committee on Governmental Affairs.

EC–2292. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, a copy of an Act of the Council, D.C. Act 4–115; to the Committee on Governmental Affairs.

EC–2293. A communication from the Chairman of the Council of the District of Columbia transmitting, pursuant to law, a copy of an Act of the Council, D.C. Act 4–114; to the Committee on Governmental Affairs.

EC–2294. A communication from the Associate Commissioner of the Immigration and Naturalization Service for Examinations transmitting, pursuant to law, a report on orders exercised under section 212(d)(3) of the Immigration and Nationality Act in 521 cases; to the Committee on the Judiciary.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. MOYNIHAN, from the Select Committee on Intelligence:

Special Report entitled "Report of the Senate Select Committee on Intelligence on the Casey Inquiry" (Rept. No. 97–285).

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committee were submitted:

By Mr. THURMOND, from the Committee on the Judiciary:

Edward R. Becker, of Pennsylvania, to be U.S. Circuit Judge for the Third Circuit;

Jackson R. Kiser, of Virginia, to be U.S. District Judge for the Western District of Virginia;

Robert G. Doumar, of Virginia, to be U.S. District Judge for the Eastern District of Virginia;

Brent D. Ward, of Utah, to be U.S. Attorney for the District of Utah for the term of 4 years;

Joseph P. Stadtmueller, of Wisconsin, to be U.S. Attorney for the Eastern District of Wisconsin for the term of 4 years;

Donald B. Ayer, of California, to be U.S. Attorney for the Eastern District of California for the term of 4 years;

Louis G. DeFalaise, of Kentucky, to be U.S. Attorney for the Eastern District of Kentucky for the term of 4 years;

William S. Vaughn, of Missouri, to be U.S. Marshal for the Eastern District of Missouri for the term of 4 years;

Howard V. Adair, of Alabama, to be U.S. Marshal for the Southern District of Alabama for the term of 4 years;

James L. Meyers, of Louisiana, to be U.S. Marshal for the Middle District of Louisiana for the term of 4 years;

Paul R. Nolan, of Washington, to be U.S. Marshal for the Eastern District of Washington for the term of 4 years; and

Harry Connolly, of Oklahoma, to be U.S. Marshal for the Northern District of Oklahoma for the term of 4 years.

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. PELL (for himself and Mr. BUMPERS):

S. 1896. A bill to amend the Internal Revenue Code of 1954 to repeal the special leasing provisions enacted by the Economic Recovery Tax Act of 1981; to the Committee on Finance.

By Mr. DURENBERGER:

S. 1897. A bill to amend the Internal Revenue Code of 1954 to provide an additional 8 years to amend governing instruments to meet the requirements for gifts of split interests to charity, and for other purposes; to the Committee on Finance.

By Mr. BOREN:

S. 1898. A bill to amend the Internal Revenue Code of 1954 to exempt certain vehicles, trailers, bodies, chassis, parts, and accessories used for farming purposes from the excise tax and from the highway use tax imposed on such property; to the Committee on Finance.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. PELL (for himself and Mr. BUMPERS):

S. 1896. A bill to amend the Internal Revenue Code of 1954 to repeal the special leasing provisions enacted by the Economic Recovery Tax Act of 1981; to the Committee on Finance.

REPEAL OF SPECIAL LEASING PROVISIONS

● Mr. PELL. Mr. President, I am today introducing legislation to repeal the so-called "leasing" provision of the Economic Recovery Tax Act of 1981.

This is the provision of the act that permits corporations to buy and sell Federal tax credits as though the credits were stocks, bonds or bushels of wheat.

This leasing provision has been in effect for little more than 3 months, but it is already apparent that it is an unjustified and outrageous raid on the U.S. Treasury and on the taxpayers of the Nation. Indeed, this "leasing" provision is really a "leeching" provision because it permits wealthy, profitable corporations to leech billions of dollars from the taxpayers.

The original estimate was that this provision would cost the Treasury $27 billion in lost revenue during the next 5 years. It is now apparent that corporations are going to take far greater advantage of this bonanza than anticipated and the costs probably will be much higher.

This tax loss has a direct and heavy impact on the Federal budget. Unless this loophole is closed, every tax dollar lost through it must be made up either by further cuts in Government programs, by increasing taxes on others, or by adding to the Federal deficit.

To me the choice is clear. Vital Federal programs already have been severely cut, and the Federal deficit must be reduced, not increased, if we are to bring inflation under control and bring down interest rates. And it would be unthinkable to increase the taxes paid by the average American to pay for what has been aptly described as a food stamp program for wealthy corporations. There is only one reasonable course of action and that is to repeal the "leeching" provision.

Let me explain why this provision is wasteful and economically unjustified.

The provision permits a corporation which has little or no Federal tax bill to transfer excess investment tax credits or depreciation allowances to another corporation which can make better use of the tax credits. The transfer is made through complex transactions involving the sale and leasing of equipment. The transactions however are mere paper shuffling with no purpose other than to obtain hundreds of millions of dollars of extra tax reductions.

Typically, these transactions are between highly profitable companies that are looking for ways to cut their Federal taxes, and other corporations that have tax credits but have done so poorly in the competitive marketplace that they did not earn any profits and thus do not owe any taxes from which they can deduct the credits.

Typically, then the "leeching" provision helps two kinds of corporations: Wealthy firms that do not need any help, and inefficient, noncompetitive firms that do not deserve any help.

There may be fact be occasions when there is economic justification for aiding an industry or a firm that is having temporary economic difficulties. But there are far better, more efficient and direct ways to provide assistance. Under the leaching provision, the unprofitable company in a leasing transaction realizes about 20 percent or less of the value of the tax credits it sells. Eighty percent or more goes to benefit the wealthy firm that needs no additional tax breaks.

If we apply that ratio to the $27 billion to be spent through this provision during the next few years, it means that $21 billion will benefit profitable corporations and only $6 billion will go to corporations facing financial difficulty. It is the equivalent of running a welfare program in which $4 is paid to wealthy, nonneedy persons for every dollar paid to the truly needy. It is clearly unjustified.

There is one additional class of nonneedy persons who are profiting immensely from this "leeching" provision, and that is the corporate law firms that arrange these tax marriages between corporations. The typical fee for brokering one of these deals is one-quarter of 1 percent of the tax credits involved. At that rate corporate law firms will pick up about $67 million in fees during the next 5 years. At a time when we are slashing legal aid for the poor, I wonder if we really want to subsidize corporate law firms.

We should consider also the basic question of whether it is good public policy to permit selling and trading or Federal tax credits. If it is good policy then the privilege should not be reserved to corporations, but extended to the average taxpayer.

After all, many individual Americans today have Federal tax deductions which they cannot fully use, or cannot use as well as others. For example, a taxpayer with a $10,000 annual income may have during 1 year a serious illness involving $15,000 in medical bills. Obviously he cannot deduct his full medical expenses from his income. Should we permit him to sell his excess medical deductions to the highest bidder? After all, the medical deductions would be worth $7,500 to a wealthly, healthy taxpayer in a 50 percent tax bracket.

Or consider the $1,000 personal exemption allowed each taxpayer. For a person in the 20 percent tax bracket, that exemption provides a tax reduction of $200, but for a person in the 50 percent tax bracket the same exemption is worth $500. Should we permit those in the lower income brackets to auction off their exemptions to higher income taxpayers? A wealthy taxpayer might pay, for example, $350 for the exemption, providing an extra $150 to the low-income person, and an extra $150 tax break to the well-off taxpayer.

The fact is that we do not allow this kind of commercial trading of tax breaks among individuals and we should not permit it among corporations.

Finally, Mr. President, to underscore the size of this corporate tax loophole, let us consider what the Federal Government might do with that $27 billion if we did not give it away to corporations.

That $27 billion is more than double the projected deficit in the social security trust fund over the next 5 years. That $27 billion would fully fund, for the next 10 years, the program of basic educational opportunity grants to needy college students at the current budget level.

The leasing provision of the 1981 Tax Act clearly was a mistake. It was adopted without hearings in either the House of Representatives or the Senate. It slipped through without a shred of debate on the floor of the House or the Senate.

David Stockman, Director of the Office of Management and Budget, commenting in his Atlantic magazine interviews on the tax bill said, "The hogs were really feeding. The greed level, the level of opportunism, just got out of control."

Mr. President, the hogs have fed off the taxpayers long enough through the leasing provision. It should be repealed promptly.

I ask unanimous consent that the text of my bill repealing the lease provisions of the Economic Recovery Tax Act of 1981 be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1896

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. REPEAL OF SPECIAL LEASING RULES.

(a) IN GENERAL.—Subsection (f) of section 168 of the Internal Revenue Code of 1954 (relating to accelerated cost recovery system) is amended by striking out paragraph (8) and redesignating paragraphs (9) through (11) as paragraphs (8) through (10), respectively.

(b) CONFORMING AMENDMENTS.—

(1) Paragraph (5) of section 168(f) of such Code (relating to short taxable years) is amended by striking out the last sentence thereof.

(2) Subsection (a) of section 1245 of such Code (relating to gain from disposition of certain depreciable property) is amended by striking out paragraph (6).

SEC. 2. EFFECTIVE DATE.

The amendments made by this Act shall apply to agreements entered into after January 1, 1982.●

By Mr. DURENBERGER:

S. 1897. A bill to amend the Internal Revenue Code of 1954 to provide an additional 3 years to amend governing instruments to meet the requirements for gifts of split interests to charity, and for other purposes; to the Committee on Finance.

CHARITABLE REMAINDER TRUST BILL

● Mr. DURENBERGER. Mr. President, today I am introducing a bill to extend for 1 year expiring provisions permitting the reformation of charitable remainder trusts. The current tax laws governing deferred giving to charity are complex and have been strictly construed by the Treasury Department and the Internal Revenue Service in their regulations and rulings.

To alleviate the problems of unqualified, or nondeductible, gifts of partial interests, Congress in 1974 granted temporary relief permitting the reformation of such gifts so as to permit unqualified gifts to be revised and thereby become deductible. The relief was temporarily extended by Congress in 1976, 1978, and 1980. This fourth temporary extension will give charities, the Treasury, and the Congress time to work out a permanent solution that all parties now acknowledge is needed.

My distinguished colleague, BARBER CONABLE, is introducing similar legislation in the House of Representatives. I hope that both bodies will take action on this proposed legislation before existing law expires on December 31, 1981. The revenue loss is small and is really only the loss of tax windfalls—taxes the Treasury would not have received if the gift of the property had conformed to the existing, very technical, law.

Mr. President, as the Federal Government reduces its direct support for many activities in the social service, education, health, and other areas, we in Congress must do what we can to encourage alternative delivery systems such as charitable organizations. This bill is a small but important part of this effort to limit tax obstacles to increased individual support of charitable organizations.●

By Mr. BOREN:

S. 1898. A bill to amend the Internal Revenue Code of 1954 to exempt certain vehicles, trailers, bodies, chassis, parts, and accessories used for farming purposes from the excise tax and from the highway use tax imposed on such property; to the Committee on Finance.

EXEMPTION OF CERTAIN FARMING EQUIPMENT FROM CERTAIN TAXES

● Mr. BOREN. Mr. President, today I am introducing legislation to amend the Internal Revenue Code of 1954 to exempt from excise taxes trailers designed to be used with light duty vehicles for farming purposes or for transporting horses or livestock.

Congress acted in 1971 to amend section 4061 of the Internal Revenue Code to exclude from the manufacturer's excise tax certain bodies and chassis of trucks, buses, truck trailers, and semitrailers.

Congress passed this legislation with the intent of exempting from the tax the majority of farm ranch trailers, including all but the three-axle trailers of the so-called gooseneck configuration.

The exclusion of these truck trailers and semitrailer chassis and bodies, applies if the chassis and bodies are suitable for use with a trailer or semitrailer having a gross vehicle weight of 10,000 pounds or less.

However, unrealistically low limits are imposed upon trailers intended to be used for farming or for horse or livestock transport purposes because of very technical regulations, rulings, and procedures which IRS has issued to administer this law. These restrictive administrative practices have severely limited the use of the exclusion in the case of these farm and ranch trailers.

Only a small number of producers—many of whom are currently involved in disputes with the IRS in some States—manufacture the trailer in question. Some 15,000 people are employed by this industry. Because of the small size of the industry and because the industry does not have precise engineering standards or specifications, it is almost impossible for the industry to respond to the strict limitations which IRS is seeking to impose.

A further hardship is imposed because the IRS lacks sufficient personnel to enforce payment of the tax by all producers. Therefore, IRS often fails to assess the tax on some marginal producers, primarily welding shops which may only build two or three trailers a year. This puts "legitimate" trailer producers at a competitive disadvantage.

Under Treasury regulations, the primary determinant of gross vehicle weight is the maximum load-carrying capability of the axles. Often producers of farming trailers used for transporting horses and livestock use the same axles that recreational vehicles and motor homes use because of the availability and reasonable cost of these axles. Due to the purpose for which these axles are designed, they are often rated at more than 10,000 pounds of gross vehicle weight.

Regardless of the use of "RV" axles for horse and livestock trailers, these trailers are truly used for farming purposes. As such, these trailers should be eligible for the light duty truck exemption.

My bill would change current practices to provide an exemption from the 10 percent manufacturers' excise tax in the case of sales of farming vehicles, chassis, trailers, bodies and equipment which are designed for use for farming purposes or transporting horses or livestock.

Enactment of this legislation will greatly benefit both agriculture and the trailer manufacturing industry. Because the tax is passed on to consumers, in the form of higher prices, its removal will be helpful to agriculture. It also resolves a tax inequity which these manufacturers have suffered under IRS interpretations of the law.

This legislation provides for a more equitable and sensible application of the manufacturers' excise tax. The House has previously passed similar legislation on two different occasions, and I think it is time for the Senate to act on this measure.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1898

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. EXCISE TAX EXEMPTION FOR CERTAIN VEHICLES, TRAILERS, BODIES, PARTS AND ACCESSORIES USED FOR FARMING PURPOSES.

(a) IN GENERAL.—Paragraph (2) of section 4063(a) of the Internal Revenue Code of 1954 (relating to the exemption from the manufacturer's excise tax for certain farming equipment) is amended to read as follows:

"(2) FARMING EQUIPMENT.—The tax imposed under section 4061 shall not apply in the case of any vehicle, trailer, semitrailer, body, chassis, part or accessory designed—

"(A) to process or prepare seed, feed, or fertilizer for use on farms;

"(B) to haul feed, seed, fertilizer, or harvested crops to, from, or on farms;

"(C) to spread feed, seed. or fertilizer on farms;

"(D) to load or unload feed, seed, fertilizer, harvested crops, or livestock on farms;

"(E) to transport livestock to, from, or on farms;

"(F) to feed livestock on farms; or

"(G) for any combination of the purposes described in subparagraphs (A) through (F).

For purposes of the preceding sentence, the term 'farm' has the meaning given such term in section 6420(c)(2).".

(b) EFFECTIVE DATE.—The amendment made by this section shall apply with respect to articles sold after the date of the enactment of this Act.

SEC. 2. HIGHWAY USE TAX EXEMPTION FOR CERTAIN MOTOR VEHICLES, TRAILERS, AND SEMITRAILERS USED FOR FARMING PURPOSES.

(a) IN GENERAL.—Section 4483 of the Internal Revenue Code of 1954 (relating to exemptions from the highway use tax) is amended by adding the following new subsection (d):

"(d) CERTAIN FARM VEHICLES.—The tax imposed by section 4481 on the use of highway motor vehicles shall not apply to any motor vehicle, semitrailer, or trailer which—

"(1) is described in section 4063(a)(2), and

"(2) is to be used for a purpose described in section 4063(a)(2).".

(b) EFFECTIVE DATE.—The amendment made by subsection (a) of this section shall be effective after the date of the enactment of this Act.●

ADDITIONAL COSPONSORS

S. 473

At the request of Mr. DURENBERGER, the Senator from Arizona (Mr. DECONCINI) was added as a cosponsor of S. 473, a bill to amend the Internal Revenue Code of 1954 to provide that the amount of the charitable deduction allowable for expenses incurred in the operation of a motor vehicle will be determined in the same manner Government employees determine reimbursement for the use of their vehicles on Govornent business.

S. 881

At the request of Mr. DANFORTH, his name was withdrawn as a cosponsor of S. 881, a bill to amend the Small Business Act to strengthen the role of the small, innovative firms in federally funded research and development, and to utilize Federal research and development as a base for technological innovation to meet agency needs and to contribute to the growth and strength of the Nation's economy.

S. 1131

At the request of Mr. DANFORTH, the Senator from Alabama (Mr. DENTON) was added as a cosponsor of S. 1131, a bill to require the Federal Government to pay interest on overdue payments and to take early payment discounts only when payment is timely made, and for other purposes.

S. 1215

At the request of Mr. PROXMIRE, the Senator from Delaware (Mr. ROTH) and the Senator from New Mexico (Mr. SCHMITT) were added as cosponsors of S. 1215, a bill to clarify the circumstances under which territorial provisions in licenses to distribute and sell trademarked malt beverage products are lawful under the antitrust laws.

S. 1272

At the request of Mr. CANNON, the Senator from Minnesota (Mr. DURENBERGER), the Senator from Pennsylvania (Mr. HEINZ), the Senator from Montana (Mr. MELCHER), and the Senator from Alaska (Mr. MURKOWSKI) were added as cosponsors of S. 1272, a bill to modify certain airport and airway user taxes to provide appropriate funding for the Airport and Airway Trust Fund, and for other purposes.

S. 1450

At the request of Mr. CANNON, the Senator from Connecticut (Mr. WEICKER) was added as a cosponsor of S. 1450, a bill to provide for the continued deregulation of the Nation's airlines, and for other purposes.

S. 1610

At the request of Mr. DANFORTH, the Senator from Pennsylvania (Mr. SPECTER) and the Senator from Pennsylvania (Mr. HEINZ) were added as cosponsors of S. 1610, a bill to increase the excise tax on cigarettes and to transfer the revenues from such tax to the Federal Hospital Insurance Trust Fund.

S. 1625

At the request of Mr. MOYNIHAN, the Senator from Vermont (Mr. LEAHY) and the Senator from Kansas (Mr. DOLE) were added as cosponsors of S. 1625, a bill to authorize the President of the United States to present on behalf of Congress a specially struck gold medal to the widow of Roy Wilkins.

S. 1651

At the request of Mr. BENTSEN, the Senator from Oklahoma (Mr. NICKLES) was added as a cosponsor of S. 1651, a bill to combat international terrorism.

S. 1656

At the request of Mr. DURENBERGER, the Senator from Hawaii (Mr. INOUYE) and the Senator from Alabama (Mr. HEFLIN) were added as cosponsors of S. 1656, a bill to amend the Internal Revenue Code of 1954 to clarify certain requirements

which apply to mortgage subsidy bonds, and for other purposes.

S. 1675

At the request of Mr. HATFIELD, the Senator from West Virginia (Mr. RANDOLPH) was added as a cosponsor of S. 1675, a bill to help eliminate world hunger and malnutrition and promote global security.

S. 1701

At the request of Mrs. HAWKINS, the Senator from Kentucky (Mr. FORD), and the Senator from Kentucky (Mr. HUDDLESTON) were added as cosponsors of S. 1701, a bill to amend title 28, United States Code, to authorize the Attorney General to acquire and exchange information to assist Federal, State, and local officials in the identification of certain deceased individuals and in the location of missing children and other specified individuals.

S. 1780

At the request of Mr. ROTH, the Senator from Nevada (Mr. CANNON), and the Senator from Arkansas (Mr. BUMPERS) were added as cosponsors of S. 1780, a bill to provide civil penalties for false claims and statements made to the United States, to recipients of property, services, or money from the United States, or to parties to contracts with the United States, and for other purposes.

S. 1785

At the request of Mr. NUNN, the Senator from Virginia (Mr. HARRY F. BYRD, JR.), and the Senator from North Carolina (Mr. EAST) were added as cosponsors of S. 1785, a bill to increase the penalties for violations of the Taft-Hartley Act, to prohibit persons, upon their convictions of certain crimes, from holding offices in or certain positions related to labor organizations and employee benefit plans, and to clarify certain responsibilities of the Department of Labor.

S. 1839

At the request of Mr. DURENBERGER, the Senator from Maine (Mr. COHEN) was added as a cosponsor of S. 1839, a bill to amend the effective date provision of section 403(b)(3) of the Windfall Profit Tax Act of 1980 (Public Law 96-223) to further defer the effective date of certain provisions providing for the recognition as income of LIFO inventory amounts.

S. 1840

At the request of Mr. DURENBERGER, the Senator from Utah (Mr. GARN) was added as a cosponsor of S. 1840, a bill to amend section 170 of the Internal Revenue Code of 1954 to increase the amounts that may be deducted for maintaining exchange students as members of the taxpayer's household.

SENATE JOINT RESOLUTION 117

At the request of Mr. BOREN, the Senator from Minnesota (Mr. BOSCHWITZ), the Senator from Nevada (Mr. CANNON), the Senator from Florida (Mr. CHILES), the Senator from Nebraska (Mr. EXON), the Senator from Kentucky (Mr. FORD), the Senator from Arizona (Mr. GOLDWATER), the Senator from Alabama (Mr. HEFLIN), the Senator from South Carolina (Mr. HOLLINGS), the Senator from Kentucky (Mr. HUDDLESTON), the Senator from Hawaii (Mr. INOUYE), the Senator from Louisiana (Mr. JOHNSTON), the Senator from Indiana (Mr. LUGAR) the Senator from Georgia (Mr. MATTINGLY), the Senator from Hawaii (Mr. MATSUNAGA), the Senator from South Dakota (Mr. PRESSLER), the Senator from Arkansas (Mr. PRYOR), the Senator from West Virginia (Mr. RANDOLPH), the Senator from New Mexico (Mr. SCHMITT), the Senator from New Jersey (Mr. WILLIAMS), and the Senator from North Dakota (Mr. ANDREWS) were added as cosponsors of Senate Joint Resolution 117, a joint resolution to authorize and request the President to designate the week of January 17, 1982, through January 23, 1982, as "National Jaycee Week."

SENATE JOINT RESOLUTION 121

At the request of Mr. MITCHELL, the Senator from Massachusetts (Mr. KENNEDY), the Senator from Ohio (Mr. GLENN), and the Senator from Vermont (Mr. LEAHY) were added as cosponsors of Senate Joint Resolution 121, a joint resolution to provide for the designation of the year 1982 as the "Bicentennial Year of the American Bald Eagle" and the designation of June 20, 1982, as "National Bald Eagle Day."

SENATE RESOLUTION 238

At the request of Mr. BENTSEN, the Senator from Montana (Mr. MELCHER), the Senator from Nebraska (Mr. ZORINSKY), the Senator from Hawaii (Mr. INOUYE), the Senator from Georgia (Mr. MATTINGLY), the Senator from Michigan (Mr. RIEGLE), and the Senator from Nevada (Mr. CANNON) were added as cosponsors of Senate Resolution 238, a resolution to retain the deductability from personal taxes of interest paid on residential mortgages.

AMENDMENT NO. 638

At the request of Mr. DECONCINI, his name was added as a cosponsor of amendment No. 638 proposed to H.R. 4995, a bill making appropriations for the Department of Defense for the fiscal year ending September 30, 1982, and for other purposes.

AMENDMENTS SUBMITTED FOR PRINTING

NATIONAL DISABLED VETERANS WEEK

AMENDMENT NO. 641

(Ordered to be printed and referred to the Committee on the Judiciary.)

Mr. CRANSTON (for himself, Mr. RANDOLPH, Mr. MATSUNAGA, Mr. DECONCINI, and Mr. MITCHELL) submitted an amendment intended to be proposed by them to the joint resolution (S.J. Res. 123) authorizing and requesting the President to proclaim "National Disabled Veterans Week."

AMENDMENT NO. 641 TO SENATE JOINT RESOLUTION 123: PROPOSED NATIONAL DISABLED VETERANS WEEK

Mr. CRANSTON. Mr. President, I am today submitting, on behalf of myself and Senators RANDOLPH, MATSUNAGA, DECONCINI, and MITCHELL, an amendment to Senate Joint Resolution 123, which was introduced on Tuesday, November 10, by Senator HAYAKAWA to authorize and request the President to proclaim the week of November 7, 1982, as National Disabled Veterans Week.

Mr. President, as ranking minority member of the Committee on Veterans' Affairs, I strongly support the basic concept, embodied in Senate Joint Resolution 123, of setting aside a week to honor those veterans who incurred disabilities in their service to our Nation as members of the U.S. Armed Forces. The needs of this group of veterans, together with the survivors of those who have died from service-connected causes, are the top-priority concern in my work on the Veterans' Affairs Committee. I believe that it is most appropriate—as we continue our efforts to insure that the programs that the Congress has established to provide these veterans with the compensation, readjustment, health-care, and other benefits that they need and deserve are as effective and efficient as possible—that a week be specially designated to honor these veterans and recognize the invaluable contributions that they have made to our national security and welfare. The proclamation of a special week in their honor would also serve to remind all our citizens of the great debt that we owe this special group of veterans as a result of the service they performed and the sacrifices they made on behalf of all of us.

Therefore, I congratulate Senator HAYAKAWA for having introduced this resolution.

Indeed, I would support the establishment of a permanent week, not just one in 1982, for this purpose.

However, Mr. President, there are a number of changes that I believe should be made in the resolution in order for it to express more appropriately its basic concept. These changes, which are incorporated in our amendment, although suggested, unfortunately could not be made before the resolution was introduced.

Mr. President, I urge that the Judiciary Committee give our amendment its most serious consideration in its deliberations on the resolution and that that committee and the Senate give the resolution, with appropriate amendments, prompt consideration so that adequate time would be available following its enactment for preparations to make National Disabled Veterans Week the well-planned, widely observed occasion that it should be.

Mr. President, I ask unanimous consent that a document describing and showing the changes that our amendment would make in the resolution be printed in the RECORD at this point.

There being no objection, the document was ordered to be printed in the RECORD, as follows:

SUMMARY AND CORDON RULE OF CHANGES PROPOSED TO BE MADE IN THE PREAMBLE AND BODY OF SENATE JOINT RESOLUTION 123 BY AMENDMENT NO. 641

A. SUMMARY OF AMENDMENTS TO SENATE JOINT RESOLUTION 123

The changes that our amendment would make can be summarized as follows:

1. The first clause of the preamble makes reference to "2,500,000 disabled veterans in

the United States"; the amendment reads "2,300,000 veterans with disabilities resulting from their service in the United States Armed Forces". This change is proposed because of the importance that the very first part of the resolution make clear that the veterans to be honored are those who suffer from service-connected disabilities and because, according to best information available to the Veterans' Affairs Committee, the correct number, rounded to the nearest one hundred thousand, is 2,300,000. The VA's budget documents for fiscal year 1982 include data showing that there were 2,268,219 recipients of VA service-connected disability compensation in fiscal year 1980 and projections that there were 2,275,707 recipients in FY 1981 and will be 2,281,007 in FY 1982. In addition, there are an unknown number of veterans who have disabilities that they incurred as a result of active-duty service but for which they are not receiving VA compensation. However, there are no reliable estimates that would warrant the use of a number larger than 2.3 million for this purpose.

2. The third clause of the preamble gives certain examples of the types of severe disabilities that these veterans endure and includes only one category of mental disabilities—"delayed-stress syndrome"; the amendment adds a reference to "other mental disorders". In providing examples of the severe disabilities from which some veterans suffer, it seems preferable to cite a broad category that includes the most incapacitating disabilities, psychoses in this case, rather than to name just one specific type of disability that—although it can be very serious and is a tragic consequence of combat experiences for many—is not as debilitating as some other mental conditions.

3. The fourth clause of the preamble declares that "16 to 35 percent of all disabled veterans are jobless as a result of their disabilities"; the amendment states instead that service-connected disabled veterans "consistently experience inordinately high rates of joblessness." Unfortunately, due to the manner in which employment data are collected and analyzed, there are no reliable data to support the use of any specific percentages of joblessness among service-connected disabled veterans. Although it is generally agreed that disabled persons are significantly more likely to be jobless than nondisabled individuals, the Department of Labor's Bureau of Labor Statistics does not compile unemployment statistics on handicapped individuals generally or on disabled veterans specifically. As numerous hearings on the employment of veterans, including service-connected disabled veterans before the Veterans' Affairs Committee and the Labor and Human Resources Committee have demonstrated, it is most appropriate to include a reference to joblessness as a special, very significant problem that many service-connected disabled veterans face. However, in light of the unavailability of reliable data, the more general reference to the extent of this problem is called for.

4. In the fifth clause of the preamble and in the text where references are made to disabled veterans' contributions to "the welfare" of our country, the amendment expands that characterization to include references to their contributions to the "national security," which was the primary objective of these veterans' service. In addition, in the fifth clause of the preamble, the amendment would include mention of the fact that these veterans' contributions helped "our Nation preserve its freedom, strength, and prosperity."

5. The amendment makes certain clarifying changes in the resolution.

B. CORDON RULE

Changes in the preamble and body of the resolution that would be made by the amendment are shown as follows (matter proposed to be omitted is shown in brackets, new matter (and the "resolved clause", which is not changed) is printed in italic, and other matter in which no change is proposed is printed in roman without brackets):

S.J. RES. 123 AS AMENDED

Whereas there are [2,500,000 disabled veterans in the United States] *2,300,000 veterans with disabilities resulting from their service in the United States Armed Forces;*

Whereas *these* disabled veterans have sacrificed their well-being in the service of their country;

Whereas *many of these* disabled veterans endure severe disabilities, such as loss of limb, paralysis, blindness, deafness, and delayed-stress syndrome *and other mental disorders;*

Whereas [16 to 35 percent of all disabled veterans are jobless as a result of their disabilities] *these disabled veterans consistently experience inordinately high rates of joblessness;* and

Whereas disabled veterans have made [important] *vital* contributions to the national *security and* welfare *by helping our Nation preserve its freedom, strength, and prosperity:* Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the President is authorized and requested to issue a proclamation designating the week of November 7, 1982, as "National Disabled Veterans Week", in recognition of the contributions [that disabled veterans have made to the welfare of the United States, and calling upon all Government agencies and the] *that veterans with service-connected disabilities have made to the national security and welfare of the United States and calling upon Government agencies at the Federal, State, and local levels and the* people of the United States to observe the week with appropriate programs, ceremonies, and activities.

DEPARTMENTS OF LABOR, HEALTH AND HUMAN SERVICES AND RELATED AGENCIES APPROPRIATION ACT, 1982

AMENDMENT NO. 642

(Ordered to be printed and to lie on the table.)

Mrs. HAWKINS (for herself, Mr. WILLIAMS, and Mr. CRANSTON) submitted an amendment intended to be proposed by them to the bill (H.R. 4560) making appropriations for the Departments of Labor, Health and Human Services, and Education, and related agencies for the fiscal year ending September 30, 1982, and for other purposes.

DEPARTMENT OF DEFENSE APPROPRIATION ACT, 1982

AMENDMENT NO. 643

(Ordered to be printed.)

Mr. HOLLINGS proposed an amendment to the bill (H.R. 4995) making appropriations for the Department of Defense for the fiscal year ending September 30, 1982, and for other purposes.

AMENDMENT NO. 644

(Ordered to be printed.)

Mr. HOLLINGS proposed an amendment to the bill, H.R. 4995, supra.

NOTICES OF HEARINGS

COMMITTEE ON RULES AND ADMINISTRATION

Mr. BAKER. Mr. President, on behalf of Mr. MATHIAS I wish to announce that the Committee on Rules and Administration will hold a meeting on Tuesday, December 8, 1981, at 10 a.m., in room 301, Russell Senate Office Building. The purpose of the meeting is to receive testimony on two proposals that would authorize construction of a memorial to Franklin Delano Roosevelt.

Senate Joint Resolution 95, introduced by Senator HATFIELD, authorizes and directs the Secretary of the Interior, subject to the supervision and approval of the Franklin Delano Roosevelt Memorial Commission, to proceed with the construction of the Franklin Delano Roosevelt Memorial in the District of Columbia. S. 1638, introduced by Senator MOYNIHAN, provides for the establishment of a national memorial to FDR in New York.

Those interested in testifying or submitting a statement for the record should contact the Committee on Rules and Administration, 305 Russell Senate Office Building, Washington, D.C. 20510, telephone—224–6352.

COMMITTEE ON GOVERNMENTAL AFFAIRS

Mr. ROTH. Mr. President, I would like to announce for the information of the Senate and the public that the Committee on Governmental Affairs will hold a hearing on Tuesday, December 8, 1981, at 10 a.m. in room 3302 of the Dirksen Senate Office Building to discuss the nomination of Mr. Frederic V. Malek of Virginia to be a Governor of the U.S. Postal Service for the term expiring December 8, 1989. For further information, please contact Margaret Hecht at 224–4751.

SUBCOMMITTEE ON FEDERAL EXPENDITURES, RESEARCH, AND RULES

Mr. DANFORTH. Mr. President, the hearing scheduled for December 3, 1981, by the Subcommittee on Federal Expenditures, Research, and Rules, Committee on Governmental Affairs, to consider the uniform procurement system draft proposal submitted to the Congress by the Office of Federal Procurement Policy, has been postponed at the request of the Department of Defense. It is the intent of the subcommittee to reschedule the hearing in the near future.

AUTHORITY FOR A COMMITTEE TO MEET

COMMITTEE ON FOREIGN RELATIONS

Mr. STEVENS. Mr. President, I ask unanimous consent that the Committee on Foreign Relations be authorized to meet during the session of the Senate on Wednesday, December 2, at 1:30 p.m., to hold a confirmation hearing on the nominations of Kenneth Brown to be Ambassador to the Congo and Francis McNamara to be Ambassador to the Gabonese Republic.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENTS

FNMA CARRYBACK/CARRYFORWARD AMENDMENT

● Mr. BAUCUS. Mr. President, I am pleased to express my support for S. 1883, introduced by Senator PACKWOOD. As a

cosponsor of this bill, I feel its passage is necessary for a variety of reasons, the most important of which is that hopefully it will help bring a little money to the housing market. This amendment would extend the Federal National Mortgage Association's net operating loss carryback to 10 years and carryforward to 5 years, thus conforming the tax treatment of FNMA to other financial institutions. At present, FNMA, like most businesses, can carry back 3 years and carry forward 15.

FNMA, a corporation chartered by Congress, provides assistance and stability to the home mortgage market. Today FNMA holds $59 billion in home mortgages—1 out of every 20 in America.

In 1969, Congress created a longer carryback provision for financial institutions which invest heavily in real estate, out of concern for the impact of market swings. FNMA was simply overlooked in 1969 because the law establishing FNMA's present charter was enacted in 1968, and FNMA's transition to private status was not completed until 1970.

S. 1883 simply corrects this anomaly by providing FNMA with the same carryback/carryforward treatment as other financial institutions. This is entirely appropriate in terms of tax equity or parity, since FNMA's business and financial cycles are closely linked to those of the thrifts and other financial institutions.

This amendment will provide FNMA with a needed planning and management tool in 1982, although it will have no budgetary impact until fiscal 1983. In future years, its budgetary impact will be determined by interest rate conditions.

In sum, this amendment's long-range impact is primarily to shift the revenue loss for the Nation's housing and lending institutions to a more propitious time. That should help in these troubled times.●

DISAPPEARANCE OF SISTERS JEAN REIMER AND HELEN LAVALLEY IN GUATEMALA

● Mrs. HAWKINS. Mr. President, I believe that all Americans are affected by the tragic loss of life that casts a dark shadow over the future of Central America. Daily our newspapers are filled with pictures and stories of diplomats, businessmen, and peasants being swiftly and brutally murdered in the revolutionary atmosphere engulfing the region. The strife that is rending Central American society is provoking extreme responses from all sides. When this strife swallows up innocent victims our sadness is especially deep. This seemed to be the case early last week when two Dominican nuns who have been doing missionary work in Guatemala were reported missing. Shortly after their disappearance, I expressed my concern for the safety of Sisters Jean Reimer and Helen Lavalley to Gen. Romeo Lucas, President of Guatemala. In response, I received a letter from Mr. Carlos Toledo Vielmann, the Public Relations Secretary to President Lucas indicating that as soon as the Government learned that the two nuns were missing they "immediately issued orders for the search, location, and rescue of the missing ones."

Concern for the safety of Sisters Reimer and Lavalley was commendable and fully warranted. Both of the sisters are American citizens, and it is the duty of the U.S. Government to protect its nationals living abroad. However, Mr. President, it was entirely unwarranted to use the concern for the well-being of the two missionaries as a pretext for thinly veiled accusations against the Government of Guatemala.

I have thought that our country prided itself on the tradition of innocent until proven guilty. However, Americans who implied that the Guatemalan Government was responsible for the disappearance of the two Dominican nuns turned American tradition on its ear. They imputed guilt where later events proved no crime was committed. Last week the two missing nuns were located safe and sound, and allegations that they were abducted or murdered were proven false.

Mr. President, it concerns me that prominent Americans would use this sort of an occasion to launch an attack on the Government of Guatemala. I do not condone the human rights violations that have occurred in Guatemala or other countries of the region. However, we must bear in mind that abuses in these countries are due principally to the military involvement of Cuba and the Soviet Union in the affairs of the region. The intervention of Cuba and the Soviet Union have exacerbated the problems in the region, and the constant stream of Soviet and Cuban arms, supplies, and trained personnel into Guatemala, and other Central American countries have increased the level of combat.

We cannot afford to be naive in these matters. War does not conform to neat rules. Innocent victims are sometimes and unfortunately trapped between the combatants. And in the type of terrorist warfare promoted by the Cubans, innocent victims are frequently the targets of the combat. Even in our own Civil War, civilian casualties were high.

These cruel facts should encourage us to redouble our efforts to insure peace throughout the world. But peace cannot be bought at any price, and we must remember that the overthrow of a government does not guarantee that a better government will take its place. Iran, Nicaragua, South Yemen, Ethiopia, the Soviet Union, and Cuba are only a few illustrations of this fact. I believe that we should take these historical lessons to heart and recognize that we can damage our own national interests and the interests of improved human rights throughout the world if we insist on treating human rights of countries at war as our paramount concern.

Mr. President, I am very happy that Sisters Reimer and Lavalley were located safe and sound, and I hope that this happy ending will remind us all not to leap again to conclusions until all the facts are in.

Mr. President, I ask that the letter from Mr. Vielmann mentioned earlier be printed in the RECORD.

The letter follows:

[Translation]

GUATEMALA,
November 27, 1981.

Senator PAULA HAWKINS,
U.S. Senate,
Washington, D.C.

DEAR SENATOR HAWKINS: In reply to your kind inquiry addressed to the President of the Republic, General Romeo Lucas, regarding the fate of two Dominican nuns, one priest and one young seminarist, whose disappearance in Guatemala was reported five days ago, I am pleased to advise you that this group of religious people was located safe and sound. I would like to inform you that upon learning of their disappearance through the U.S. Embassy, we immediately issued orders for the search, location and rescue of the missing ones.

I would like to take this opportunity to make Your Honor aware of the fact that the initial news concerning this case, as well as the latest that has been published by the press in that country, project the feeling that these clergy people were kidnapped by security agents from my government. This is not the first time that this happens, since there seems to be certain media in your country which bears a marked intention to present my government as a ferocious dictatorship, capable of executing the most horrendous crimes.

The blame for that adverse and unjust propaganda, fostered and financed by the Soviet Union, lies precisely on the hostile critique which is promoted in your country against the Guatemalan authorities, who are engaged in a bloody fight against the criminal elements that are attempting to unstabilize our nation. These groups, armed and trained outside Guatemala, are committed only to the sinister plans of international communism, whose objective is to sink Guatemala in a political and economic chaos, as tactics serving the strategy of hegemonic control in our continent.

It is indeed regrettable that powerful individuals in the United States, completely unaware of what is really happening in Guatemala, are willing to become echo boxes of an evil propaganda against my government. That, in spite of the existing friendship between our countries, we are treated like enemies. And that, while the Soviet Union is supplying the terrorists through Cuba with all the warfare armaments that they request, we are denied the right to purchase the equipment we require to repel their offensive.

My government respects and practices the democratic values which are deeply treasured in your country. General elections for the free choice of a new Guatemalan government are scheduled for March of the coming year. But these pacific, orderly and legal options are rejected by the guerrillas, whose raids, kidnappings and bombings, as well as other terroristic tactics, are a direct attack against the Guatemalan freedoms. It is deplorable that some of your prominent people have joined the agents of international communism in their endeavor to eradicate from our hemisphere all vestiges of peace, order and justice.

I hope that authorized voices, like your own, speak up to straighten matters into their proper place.

Respectfully yours,
CARLOS TOLEDO VIELMANN,
Public Relations Secretary
of the Presidency.●

BICENTENNIAL YEAR OF THE AMERICAN BALD EAGLE

● Mr. KENNEDY. Mr. President, I am pleased to join in sponsoring Senate

Joint Resolution 121, to provide for the designation of the year 1982 as the "Bicentennial Year of the American Bald Eagle" and the designation of June 20, 1982, as "National Bald Eagle Day."

In the 200 years since its designation as our national symbol, the American bald eagle has been sadly reduced in numbers. Destruction of its natural habitat by expanding development and environmental pollution is largely responsible for the decline of this majestic bird.

Recent studies, however, indicate that the bald eagle population has begun to recover. This comeback is attributable to the substantial efforts of various governmental agencies, private groups, corporations, and individuals. The success of their efforts with the American bald eagle should inspire us to conserve all of our precious national wildlife resources and the habitat which is essential to them.●

S. 1692: THE NEED FOR EXPEDITED PORT DEVELOPMENT

● Mr. ABDNOR. Mr. President, David A. Howard, publisher of American Shipper magazine, earlier this year wrote a most interesting article that has only come to my attention since our Subcommittee on Water Resources reported S. 1692. Mr. Howard argues that the shipping industry is best served if the industry is willing to pay the cost of new port development, in return for expedited permitting and development. I believe that this is a sound position, and I believe it is one that my colleagues should examine with care.

I ask that the article be printed in the RECORD.

The article follows:

HOW TO GET A 55-FT. COAL PORT GOING IN A HURRY

(By David A. Howard)

An article commencing on page 32 of this issue reports on the bill introduced by Senators Warner and Johnston to provide Federal financing and a fast-track approach to dredging three American harbors to depths of 55 feet to meet the needs of the export coal trade. Associate Editor Larry Dennis handled the story—including the thorny problem of reaction from areas which may be denied 55-foot harbor depths at Federal expense. While there is little question about the need for 55-foot projects, the extra depth will be beneficial to other types of trade—oil, petrochemicals, heavy industry—giving the chosen ports advantages far beyond the coal trade alone. Politics will come into play. Larry's article is straight-forward, objective reporting.

I addressed the same topic at a meeting of the North Atlantic Ports Association in Washington December 4. Washington Editor Tony Beargie covered the NAPA meeting [illegible] Shipper page [illegible] specifically instructed him to skip over what [illegible] appear here—not up front.

Here is the gist of what I said:

I recommended that any port seeking a 55-foot channel depth for coal ships should finance the project itself and levy tolls against deep-draft vessels to pay for the project. I acknowledged that the word "toll" is a dirty thought in the maritime industry, but led my audience through a simple exercise in mathematics to prove (I hope) my point.

I asked each member of the audience to take out a pencil, the back side of an envelope or some other piece of paper, and jot down certain figures.

(1) "In the upper right hand corner, jot down the number of years it required to complete your latest harbor deepening project, from the time it was agreed the extra depth was needed until the project was completed and ready for use." (I imagine most everyone wrote a number between 15 and 20 years.)

(2) "Next, jot down your rough estimate—I'm sure you have one—of what it would cost to deepen your harbor from its present depth to 55 feet to handle the coal business."

(3) "Divide that number by 10. It will give you the approximate annual cost of paying off the revenue or general obligation bonds you must issue to finance the 55-foot project." (Actually, it is a high side figure. But never mind. I didn't want anyone accusing me of being low.)

(4) "For your next figure, write down the approximate number of tankers and bulkers which entered your port last year. Don't worry about the size; some will be large; some will be small."

(5) "Now, divide that number in half. I'm assuming here that if you have 55 feet of water and attract larger ships, the actual number of vessels will be smaller."

(6) "Take the number of ships you just wrote down and divide it into the annual cost of paying off those bonds."

"That, good friends, is the average toll which will have to be assessed against each deep draft ship taking advantage of the extra depth you provide in going from your present depth of channel to 55 feet."

"It's a rather frightening figure, I'm sure.

(7) "For your final figure, write down the extra revenue a vessel owner will earn on each voyage by being able to load to 55 feet instead of 42 feet or 38 feet, depending upon the depth of your present channel."

"This last figure will give you some idea of the toll which any bulk ship owner would be very happy to pay—if you only gave him the chance."

(A toll of about $1,000 per inch of draft over 40 feet is a likely toll figure according to my own calculations, but I forgot to cover this point in my talk at Washington.)

Admittedly, the figures will not add up for some ports. "If your harbor has a granite base at 40 feet, maybe God never intended for you to be a coal shipping port."

I pointed out that rail distance from coal mines should have little to do with a port's decision on whether to go after the coal business. An extra hundred miles of rail is next to nothing compared to the advantage in ocean freights obtained with a vessel loaded to 55 feet.

Lastly, I made a suggestion about what could be the most logical point in the eastern United States to develop a deep draft harbor especially for the coal trade. It's Panama City, Florida, where the Gulf of Mexico runs 100 feet to within a few hundred yards of the Florida shoreline. A few miles to the east, at Port St. Joe, the Gulf shallows up again. To the west, at Pensacola, it shallows up also. The ideal natural phenomenon occurs in the East only at Panama City (unless you consider the South Florida ports of Miami, Port Everglades, and West Palm Beach).●

MIAMI CONFERENCE ON THE CARIBBEAN

● Mrs. HAWKINS. Mr. President, Sunday evening I was privileged to introduce Special Trade Representative William Brock as the main speaker at the session of the Fifth Annual Miami Conference on the Caribbean. The purpose of this and the preceding conferences was to open dialog on economic development of the Caribbean basin nations. Seven heads of State from Caribbean basin nations were in attendance as well as scores of businessmen and government officials from all over the region.

I have had a long-standing interest in the affairs of the Caribbean basin because my home State of Florida is a Caribbean State. Florida not only engages in extensive trade with the Caribbean basin nations, but shares with the region a common history, linguistic and cultural ties. Though not commonly thought of as such, because of Florida, Mississippi, Louisiana, and Texas, the United States is a Caribbean nation as well, and we share with other Caribbean nations a stake in the future of the region. Conferences such as this that help harness the talents, resources, and good will of private business for the region's economic development hold out bright prospects for the future.

Mr. President, I ask that the statements given by Dr. Robert V. West, Jr., president of the Caribbean/Central American Action which sponsored the conference, and Special Trade Representative William Brock who was the main speaker at the opening session be printed in the RECORD following my remarks. I hope that my colleagues will read these statements and learn further about the administration's ideas on the Caribbean and the role that private enterprise will play in bringing to this important region long-term stability and prosperity.

The statements follow:

REMARKS OF DR. ROBERT V. WEST, JR.

Distinguished Members of the Head Table, Ladies and Gentlemen:

I appreciate this opportunity on behalf of Caribbean/Central American Action to add some brief remarks to those of Governor Graham on the occasion of the opening of this conference. Witnessing what appears from this auspicious beginning to be the most successful and significant to date in this series of Miami Conferences on the Caribbean, cannot help but be struck by the extent to which the concept of this conference and the number and prominence of its participants have grown in these few short years.

Caribbean/Central American Action has followed a parallel course during the same period of time in its early development and in its steadily growing reputation, corporate support and range of activities.

I like to believe that both of these developments—the blossoming of the Miami Conference and of C/CAA—reflect the fact that an idea many of us have had for a long time is now an idea whose time has come.

In the context of U.S. policy, for those of us in this country, the crux of the idea is recognizing that both the U.S. private sector and the United States as a nation have a major stake in the healthy future of Caribbean countries, and both our business community and our government need to intensify their efforts to deal with the problems threatening that future.

In a broader context transcending our respective national concerns, the idea is a conviction that a private-sector oriented development approach in the final analysis has the most to offer the developing world, and that the Caribbean is a singularly appropriate region in which to demonstrate that fact to skeptics in our midst and around the globe.

Tonight we have an opportunity to hear a representative of President Reagan's Administration set forth the U.S. Government's

concept and approach at the highest policy level to the challenges it perceives in the region. Ambassador Brock is a particularly appropriate individual to deliver this message since as U.S. Trade Representative he has been designated as inter-agency coordinator of the Administration's Caribbean Basin Initiative. Tomorrow morning and at the subsequent luncheons and dinners on the program, leaders of Caribbean and Central American nations will present a similarly high-level policy overview of their perceptions and approaches to the challenges facing the region.

I would be very surprised if any of these public-sector presentations fail to touch in some way upon the question of the role of the private sector in development—the extent to which such a role of reliance upon it is useful, adequate, appropriate, feasible and/or important.

Complementing this governmental policy perspective, the intensive working sessions of the conference focus on factors that make a private-sector development strategy feasible from the point of view of the private sector itself.

President Reagan at Cancun and elsewhere has announced that U.S. development policy will emphasize trade and investment and those aid programs that support them.

Numerous governments across the Caribbean have come to power in the last two years on a platform emphasizing development, through enterprise as well as better relations with the United States.

The fact that many of those governments, and others throughout the region, are represented at this conference by their chief executive or high-level cabinet members itself, indicates the importance they place on the issues and the implementation of private-sector based development strategies.

All this not only means we can act now as we never have before, but that we must act now or run the risk of forfeiting the opportunity for the indefinite future. The same optimism that has accompanied the resurgence of private-sector organizations, and the return to political leadership of governments eager to stimulate appropriate enterprise, will turn quickly to greater cynicism and hostility than in the past if the promises don't materialize. We're looking at a short window in time, probably no longer than the terms of office of the governments elected on the enterprise platform. Until our own talk of private enterprise starts translating into actual jobs, actual export markets, actual joint ventures, it is just a theory to its Caribbean audience, and its popularity will vanish if we can't make it work.

All eyes are on the U.S. Government right now to see if we are going to make it through that brief opening of opportunity or not. The announcement of the Caribbean Basin Initiative, the appointment of the Rockefeller Committee on Jamaica, the visits and consultations by U.S. officials with public and private sector leaders in the region to develop ideas for the Initiative—all these are signs that have created a tremendous amount of hope and expectation in the region, laced with a degree of skepticism in some quarters as a result of past disappointments. I believe that the Administration's participation in this conference itself gives substantial cause for renewed optimism. The telephone words of greeting from the President, the presence here of Ambassador Brock, and the participation of numerous other U.S. Government officials both as panel speakers and as conference registrants, indicate a true desire not just to deliver a message, but to listen and learn, and to build more insights into policies now under development.

In this context, I think it is appropriate to point out that there are three separate messages which the Caribbean and the U.S. business communities are waiting to hear from the Reagan Administration. The details of the policy package—new trade or investment incentives or the like—are only the first. There is also a desire for a basic sense that the U.S. Government truly understands that economic needs are at the heart of the political challenges in the region. And there is a need for reassurance that when the Government says private sector activity will play the lead role, it means to go out and mobilize it—not that it believes the whole scenario will just happen automatically.

Trusting that we will have a better grasp of all these matters after this evening's presentation, I will proceed to a final point. And that is that if the U.S. Government and the governments in the region are feeling the pressure to perform, the U.S. business community should be feeling it even more. For the ball is truly in our court now.

We are the ones who for years have said that developing countries have relied too much on governmental action instead of private enterprise.

We are the ones who have criticized traditional U.S. development aid programs and urged greater involvement for business.

We are the ones who have complained that the United States Goverment hasn't done enough to show support for foreign governments friendly to private enterprise.

Now is our chance to perform or forever hold our peace. I am optimistic. The people in this room tonight have come here with high hopes. A conference like this should produce some actual results.

I believe we will have failed if the participants here from governments in the region leave without a stronger sense that the U.S. private sector is able and willing to address their needs.

I believe we will have failed if the representatives of U.S. corporations in this gathering leave without a new commitment to actively seek opportunities in the Caribbean.

We do not intend to fail.

We intend to demonstrate that a private-sector based development strategy will work in the Caribbean because we know it can, we know it must, and we intend to see that it does.

ADDRESS BY AMBASSADOR WILLIAM E. BROCK

I don't have to tell you that this Conference finds our nations standing at a crossroads. I don't have to tell you that for too many years we have struggled, albeit with good intentions, but as yet unsuccessfully with a recurring economic malaise in the Caribbean Basin.

There is no easy solution, and it's about time that we all realized that.

At the recent summit in Cancun, President Reagan addressed the real issues of development and urged that overly ambitious and unrealistic solutions not be allowed to continue to divert us from the practical steps that can be taken now to promote progress. particularly at the bilateral and regional level. The true benefits of development are to be found in concrete and often complicated activities, not in abstract formulas or grand designs.

The problems of the Caribbean are serious, and are having a spillover effect outside the Basin. President Reagan has been clear that he places a high priority on helping to solve those problems. The kind of approach he wants to take, and that I believe we all want, is one which will focus on the long-term economic well-being of the nations of the Caribbean: Approaches which aren't dependent solely or largely on government assistance or which raise expectations that can't be realized.

We have been the subject of some criticism from those who ask: "Why is this Caribbean Basin Initiative taking so long to develop?" "When will the promised 'unveiling' take place?"

There is a pretty simple answer. It wouldn't have taken very long to come forward with a 'quick-fix' solution . . . or to have announced a unilateral program that was developed without the benefit of the views of the people it was designed to help.

And the unveiling? Well, we're not engaged in this effort for its public relations aspects.

Over the last six months, we have been engaged in the task of melding trade, investment, and financial assistance measures into a workable approach to regional development. We have been seeking a coherent and integrated package that would give us the best chance of unleashing the kind of energy; the kind of serious interest among entrepreneurs that could turn the prevailing economic outlook on its head. We have not reached for panaceas because we know they don't exist. Instead, we have considered how we might join with other interested countries to energize the spirit of self-help which already exists in the area.

It was quickly apparent that, in some cases, the measures being considered might be viewed as a departure from traditional U.S. practice in the program areas affected. You may take it as an indication of our seriousness and of our deep-felt concern for the problems of the Caribbean Basin that at no time during our internal discussions have we precluded adoption of a measure solely because it might depart from traditional policy. This flexibility was communicated during our consultations with potential beneficiaries, and it had the welcome effect of opening dialogues that were frank and absent of any divisive rhetoric.

If the Initiative is to break new ground, we must make our Congress a partner in the process. Therefore, the Administration has begun consultations with our legislators. We have also been working closely with representatives of the Commonwealth of Puerto Rico and the Virgin Islands so as to ensure that the Initiative has both the benefit of their perspectives on regional development, and takes into account their development needs.

We also came to realize that an integrated program would be far less effective if we moved ahead without the active participation of a number of major regional lenders, including Venezuela, Mexico, and Canada. The three nations I've mentioned are all major contributors now—proportionately greater than we. We need to mobilize their own special problem-solving approaches to effectively deal with the complex range of issues. We have, therefore, adopted a cooperative approach, which is collegial in planning, will allow contributors individual scope, and is focused on measures tailored to the special problems of each of the beneficiaries. We are deeply grateful that Mexico, Canada, and Venezuela have each shown an intense interest in cooperative efforts designed to achieve mutual objectives in this cause.

Let me return to the subject of our consultations with the Governments and private sectors of the potential beneficiaries. Although time consuming, we have learned a great deal through this process. We are gratified by the sense of common vision that has begun to develop, and we will proceed to the implementation phase only with the concurrence and support of the nations whose development is tied to the measures contemplated.

Our consultations generally began with a review of the current local economic and business climate. Without a predictable and favorable setting for an expansion in investment and production, it would be pointless for us to even consider measures in the trade and financial assistance areas. We found that there had been, and continued to be, a tendency to view investment attraction primarily as an issue of incentives—both direct or through special tax treatment. On the other hand, it was acknowledged that international business still viewed some parts of the Carib-

bean and Central American Basin as high-risk areas.

To change this perception, it was generally concluded that bilateral investment treaties covering such issues as right-of-entry, national treatment, expropriation, and dispute settlement procedures would be helpful, if such treaties meet the self-determined needs of the area's nations. Clear rights and guarantees to investors, and predictable standards of investment treatment would be powerful signals of national commitment to market-oriented solutions to economic problems.

While investment treaties would ameliorate some of the element of risk that reduces the level of private sector activity, there is still a need for political risk insurance that is now in part available from our own Overseas Private Investment Corporation and from similar national entities in developed countries. Interest in this type of risk coverage also exists among the middle and upper-income developing countries.

Therefore, we have been exploring the feasibility of a multilateral political risk insurance institution which would be open to investors from all nations and which would extend the scope of risk coverage to fill gaps which currently exist under the OPIC-type arrangements. Investment in the Basin must come from the broadest group of contributors, and this strongly argues for an expanded insurance program.

In another context, potential host governments were generally satisfied with the effectiveness of the OPIC investment promotion program, particularly the special country missions, and we have plans to expand these operations over the coming months.

One obstacle to restoring business confidence widely cited by Basin nations is the lack of short-term financial resources. Ordinary, short-term commercial credit has almost disappeared in some states of the region—and this is a major factor in an unfolding economic nightmare for these nations. The problem is so acute in some nations that existing enterprises are without access to sufficient working capital to carry on with their production. Small manufacturing concerns are the first to be hit by the credit squeeze since limited resources are being directed in the first instance to public sector programs and then to larger companies.

We are most anxious to be able to respond—to the extent our own resources will permit—to the liquidity crisis. But we seek to do this in a way that reinforces our fundamental long-term objectives by combining additional financial assistance with opportunities for trade and investment. In this way, the beneficiaries will have an improved potential for meeting future credit obligations. We hope to be able to forge a multination response soon.

Another means of generating greater entrepreneurial interest—and one which has had support from private enterprise in the Basin and in the United States—would be to implement changes in U.S. tax treatment for investors. We also know that existing tax policy is based on extended experience. Accordingly, we will have to carefully examine the range of proposals for tax code and tax treaty initiatives which were proposed to us, recognizing their potential importance as a means of promoting increased private sector interest in the region.

Our mutual goals for new investment in the region and the maximum utilization of existing productive capacity cannot be realized without a healthy outlook for trade. There can be no question that substantial export markets currently exist which can be developed and secured by the region's private sector. The United States provides extremely favorable access for most manufactured exports from the region. The post-Tokyo Round U.S. duty structure contains few rates over five percent. Duty-free access for most products is provided the Caribbean Basin nations and other developing countries under the U.S. Generalized System of Preferences.

During our consultations with the potential beneficiary states, we were struck by the fact that exporters and governments continued to find our GSP difficult to understand and use, despite frequent seminars. There is confusion surrounding the petition process and problems in predicting product eligibility under the existing value-added and country-of-origin criteria.

We remain convinced that, over time, exporters of the Basin must be able to reap more fully the benefits of the GSP system. But we recognize the importance of expanded trade as an engine of growth for the region. We have come, therefore, to consider a more tailored and simplified extension of duty-free access for the Basin, within the constraints of our international obligations under the General Agreement on Tariffs and Trade and other international accords such as the Multifiber Arrangement.

If such a further modification of our tariff policy can be justified on the basis of its impact upon private sector activity in the region, and if we are satisfied that the beneficiaries are taking all feasible steps to create a domestic economic and political climate conducive to private enterprise, then I am personally willing to recommend that we move to something approaching a one-way free trade area in most product sectors—not only to insure stable market access, but equally to create a magnet for world-wide investment interest.

Returning to the question of capital availabilty, we were struck during our consultations by the breadth and number of truly worthy public sector capital projects that are under consideration and which would be supportive of our mutual efforts to spur commercial expansion. There are also a host of initiatives in the areas of technical assistance, training for public sector managers, techniques of modern marketing, and so forth which are competing for scarce financial resources. In this setting, I think there is a demonstrated need for increased financial assistance, which contributors and international institutions should help fund.

Turning from the potential elements of the Initiative to the environment in which it's being developed, intensive consultations with the Basin countries, the Nassau Four, and others interested in this Initiative, both at home and abroad, has been a hallmark of our policy-making process. This is a time-consuming but vital component to the formulation of sound policy.

This practice of prior consultation with our neighbors must become a common feature of our policy-making process. In the trade area, previous consultations have been conducted mainly when the U.S. was considering the adoption of measures that might negatively affect one or more of our neighbors. But perhaps ignored has been the pressing need to consult on common problems and opportunities, in a spirit of cooperation—not confrontation.

This kind of exchange of views should become routine and not be confined to trade issues. Divisive problems should not be the only catalyst for such exchanges. Opportunities abound not only for consultation but for jointly-sponsored projects within the hemisphere.

For this reason, I believe a meeting of trade ministers from the Latin American and Caribbean countries would be very welcome and provide all of us an opportunity to discuss the Trade Agenda for the next decade in preparation for the 1982 GATT Ministerial meeting.

One specific Agenda item for which we share with the countries of Latin America and the Caribbean a desire for more effective international discipline is the matter of safeguard actions. The United States soon will suggest a work program on safeguards that will provide a basis for subsequent GATT Ministerial consideration. We hope that the countries of Latin America and the Caribbean will support this work program and its long-term objectives.

The GATT Ministerial should be viewed by the Latin American and Caribbean nations as an opportunity to raise legitimate concerns regarding the operation of the multilateral trading system.

A successful GATT Ministerial will help to reduce present uncertainties associated with making the transition to freer trade policies. It is our hope that the Ministerial will start a new effort that will result in significant benefits for Latin American and Caribbean countries that pursue pragmatic, market-oriented policies of trade expansion and diversification.

I would like to conclude by reiterating the importance we place on a multi-faceted Caribbean Basin Initiative. We need a stable platform for development—resting on three strong supporting pillars—trade, investment, and aid. A fourth leg is cooperation, and cooperation means listening to what others have to say and giving them an opportunity to consider and respond to what you have in mind. The result will be a new sense of our common purpose.

We are being careful not to overstate what can be achieved by our mutual efforts. Some of what we do will have an immediate, positive effect; but by far the greatest benefits may not be felt for many years. Future generations will thank us for our patience and restraint and for our concern for the future as well as for the present.●

ADDRESS BY JACK W. FLYNT, NATIONAL COMMANDER OF THE AMERICAN LEGION

● Mr. MITCHELL. Mr. President, on November 14, the National Commander of the American Legion, Jack W. Flynt, addressed the Maine Department of the American Legion at the Napoleon Ouellette Post No. 24 in Rumford, Maine. Mr. Flynt's remarks convey the sense of the frustration and anger that many veterans, especially Vietnam veterans, have experienced since viewing the portrayal of Vietnam veterans in the PBS show, "Frank: A Vietnam Veteran."

There are millions of Vietnam veterans who are well-adjusted, productive members of our society. These men and women deserve our respect and gratitude.

There are, however, many others who continue to suffer from scars, both physical and psychological, inflicted during the Vietnam war. To these men and women, we have an obligation that we must not ignore. We must continue our increasing efforts to resolve the controversies surrounding the provision of health care for these veterans and work to see that our debt to them is paid in full.

The maintenance of an independent and viable VA hospital and health care system is an essential element of our commitment to our Nation's veterans. As Commander Flynt notes, this system must remain committed to the needs of all veterans. As a member of the Senate Veterans' Affairs Committee, I will work to see that we do not lose sight of this vital goal.

Mr. President, I ask that the full

text of Commander Flynt's remarks be printed in the RECORD along with a biographical sketch of Commander Flynt.

The material follows:

REMARKS BY JACK W. FLYNT

Last month . . . I sat at a long low table in a darkened conference room in our Washington headquarters . . . to preview a video tape of a Public Broadcasting Service Veterans Day special. When I walked into that conference room . . . I glanced around the room at those gathered there to view the tape with me. I had no idea the danger I was in . . . the risk I was taking . . . not only by being in a darkened room with ten or fifteen Vietnam veterans . . . but by working closely . . . day in and day out . . . with a professional staff made up of nearly 60 percent Vietnam veterans.

Well, if I believed what I was to see that day . . . If "Frank: A Vietnam Veteran" is typical . . . as the Public Broadcasting Service would have us believe . . . then I take my life in my hands every time I deal with our national staff. For gathered at that table with me—all from the Vietnam war—was a Silver Star winner . . . a combat medic . . . an infantry platoon leader . . . a retired Air Force colonel . . . to name only a few. All of them are . . . I believe . . . the best in the country at what they do . . . all of them are professionals, committed to serving America's veterans through service to God and Country. What I saw in "Frank: A Vietnam Veteran" caused me, not fear . . . not distrust. No. What it caused was sorrow . . . and not a little anger. Sorrow . . . that so many fine Americans were about to be painted black by one broad brush stroke . . . Anger . . . that the sacrifices and suffering of so many fine men and women were to be treated with so little dignity . . . so little respect.

Those of you who have seen the program . . . know what I felt . . . you saw what I saw . . . and your outrage must equal my own. Why? Because of the contrast such a program provides with the proper recognition all veterans so richly deserve.

Three days ago . . . on Veterans Day . . . I stood in the warm Texas sunshine . . . before one of the most revered symbols of liberty in my home state . . . indeed, in the nation. I stood before the Alamo . . . to join with thousands of other Americans to honor our veterans. I was privileged to lay a wreath before the tomb of one who died for this country . . . and to participate in a grand parade to honor those who fought . . . and lived to fight again, if necessary, for America. It was a special day, full of pageantry and tradition. On that day in Texas . . . America's veterans were honored with dignity . . . and with the respect and gratitude they so richly deserve.

But as I spoke, my heart was heavy . . . knowing that elsewhere, a whole generation of this country's veterans were not so honored. They . . . and much of the nation . . . saw their ability questioned . . . their motives suspected . . . their performance in war called disgraceful . . . by the implication that "Frank" was typical. But worse, a generation of veterans . . . who themselves have fought hard for the respect they deserve . . . had their characters sullied once again. After years of silent suffering . . . and years of fighting for their rights . . . they felt old wounds reopened . . . old prejudices revived . . . and old stereotypes renewed.

That, ladies and gentlemen, is the legacy of "Frank: A Vietnam Veteran." It is a legacy the Veterans of Vietnam do not deserve.

Here in the department of Maine, you know that as well as I do. Your record of success in dealing with the real . . . not imagined . . . problems of Vietnam veterans, have long been a source of inspiration to the rest of the national organization. The battle in which you . . . even today . . . are embroiled . . . over your right to continue to operate the DVOP program . . . underscores not only your ability to do a tough job well . . . but more, your willingness to fight for the right to do that job. Your unequalled successes in placing veterans in jobs—at a rate three times that achieved by government agencies at less than half the cost—proves two things to me:

It shows that the Legionnaires of Maine can make national programs work, and work right. But more, it shows that the implications of "Frank: A Vietnam Veteran" are wrong. The veterans of Vietnam can work . . . they will work . . . and they can be important contributors to society—if they are given the chance. That is the real damage done by the PBS program. Barriers that have been knocked down—education, employment, social—knocked down by the hard work and commitment of dedicated caring people like yourselves—can go up again, if the stereotype and prejudices included in "Frank" take hold anew. We of the American Legion cannot allow that to happen.

Dedication to America's interests is an attribute common to members of The American Legion. It is strong here . . . it is strong across the National Organization . . . and it is strong among the Vietnam veterans in our ranks.

In Washington, Vietnam veterans . . . under the direction of the National Security/Foreign Relations Commission . . . carry out the mandates of the national organization in matters dealing with our active military . . . our alliances . . . our relationships with all nations. Our Economic Commission relies on the abilities and talents of a Vietnam Veteran . . . to see that the mandates of employment and job security for veterans are carried out. And our legislative interests on Capitol Hill are protected by some of the best representatives any organization can send to the offices of Congress.

I was in Washington on the day of the critical AWACS vote in the United States Senate. Less than two weeks before the vote, the NEC resolved to support the sale . . . and in that short period of time . . . your legislative staff in Washington marshalled the Legion's resources and ensured that our views were known in the Senate. The 52–48 vote in favor of the sale was a victory you can be proud of . . . for The American Legion shares no small portion of the victory. It was a victory not for a party, not for any group . . . but a victory for the nation . . . and for peace.

That, ladies and gentlemen, is the kind of thing the Vietnam Veteran can accomplish. He is not alone. Like his fellow veterans from all wars, he can do so much more. Here in Maine, he toils in your factories . . . educates your children . . . mans your police forces . . . treats your illnesses . . . fights your fires. He builds your houses, edits your newspapers, and yes, he prays with you.

Right now, his prayers may be a little different. He may be praying that he not be denied again . . . the respect that he has earned. He may be asking God that none see fit to bar him from the job he deserves. He may be asking that the insult to him . . . at the hands of misguided broadcasters . . . not cause others to reject service in defense of the nation he suffered to protect. And he may be asking for all of us to help.

We will not forget him.

We will fight alongside him for a resolution to his concerns over Agent Orange. We will fight to maintain the VA hospital system as one committed to the needs of all veterans. We will fight for his right to work. We will continue to fight for a secure, free nation in which he can raise his children. And we will fight to see that he always enjoys the respect and gratitude he so richly deserves.

Ladies and gentlemen, The American Legion will never be idle when the interests of the nation or its protectors are threatened. We will not go unheard . . . and we will remain a force to be reckoned with. Why?

Because of you . . . Because of your strength . . . as shown by your high levels of accomplishment . . . and your commitment to our ideals of service to God and Country. The voice of The American Legion rings clearer . . . and speaks louder . . . because of the commitment you, as Legion and Auxiliary members, show to truth and honor. You will not be fooled by such false and misleading portrayals as "Frank: A Vietnam Veteran." It is one view . . . a view that holds no deep truth, because . . . as the founder of Boston's Trinity College—Amos Bronson Alcott—said nearly a century-and-a-half ago:

"The deepest truths are best read between the lines, and for the most part refuse to be written."

Ladies and gentlemen, the deep truths about America's veterans are written in blood . . . sacrifice . . . and honor. Those of us who have been there . . . can read between those lines.

Thank you.

[Biographical Sketch]

JACK W. FLYNT, NATIONAL COMMANDER, THE AMERICAN LEGION

Jack W. Flynt, 58, of Dimmitt, Texas, was elected National Commander of The American Legion the nation's largest veterans organization of nearly 2.7 million members, at the closing session of the Legion's 63rd annual National Convention Sept. 3 in Honolulu, Hawaii.

A U.S. Army veteran of World War II, he served in the Persian Gulf area and in the European Theater with Headquarters and Service Company, Allied Forces Headquarters, Caserta, Italy. He has been an active Legionnaire for nearly 30 years and is a member of Greer H. Estes Post 445, Dimmitt, Texas.

He attended Texas A&M for two and a half years before leaving school to enter military service. On return to civilian life, he resumed his formal education at West Texas State University.

He has been engaged in farming, ranching, farm related businesses and the insurance industry throughout his working career. He was designated a Charter Life Underwriter by the American College of Life Underwriters in 1974. He withdrew from active participation in his private business early in 1981 to devote full time to his campaign for the office of National Commander of The American Legion.

Flynt has taken an active role throughout his three decades of membership. He served his home post as service officer, commander and adjutant, an office which he held until his election as National Commander.

He held many district and department (state) offices in The American Legion of Texas, including that of Department Commander in 1966–67. During that same year his wife, Mary, served as Department President for the Texas American Legion Auxiliary.

At the state level, he was a member of the Finance Committee, Department Board of Trustees, Chairman of the Department Convention City Commission, Rehabilitation Commission, a counselor at Texas Boys State and President of The American Legion Convention City Corporation of Texas.

At the National level of Legion activity, Flynt served four years as Texas' American Legion National Executive Committeeman

and nine of his thirteen years as a member of the National Americanism Commission were spent as chairman of the Subcommittee for Youth Activities. In 1974–75, he was National Vice Commander of The American Legion.

Commander Flynt's family is thoroughly American Legion oriented. His wife has been active in the Auxiliary. Their son, U.S. Air Force Capt. Jack W. Flynt II, is a member of George S. Berry American Legion Post 575, Lubbock, Texas, and was a citizen of Texas American Legion Boys State. Their daughters, Karron and Sharron, both are members of the American Legion Auxiliary and former citizens of Texas American Legion Auxiliary Bluebonnet Girls State.

Flynt is active in affairs of his church, having served as Sunday School Superintendent for five years, secretary of his church's official board and secretary of Methodist Men.

He is a member of the Sheriff's Association of Texas, Texas A&M Century Club, Farm Bureau and several Agricultural commodities organizations. He is also a 32nd Degree Mason and a member of all Masonic Orders.

He has served as fund drive chairman for the Salvation Army and for the Red Cross Chapter of his home community.

Through all of his activities in the Legion and civic and social service, Commander Flynt has shown an intense interest in young people and in family life. Among his principal objectives during his term of office will be to emphasize the importance of American youth and the need to restore in American family life the morality, integrity and respect that has made the family the bedrock foundation of American Society.●

EDUCATION'S THREE MILE ISLAND

● Mr. EAST. Mr. President, as we continue to search for ways to make existing programs more effective and to eliminate waste of our tax dollars we encounter new concepts that challenge our way of thinking. Whereas humanitarian programs were once gauged by the dollar amount appropriated now they are beginning to be judged by the results they produce.

Dr. McCay Vernon, editor of the "American Annals of the Deaf" and professor of psychology at Western Maryland College has written an article appearing in the October 1981 issue of the Peabody Journal of Education, Vanderbilt University, Nashville, Tenn., that challenges us to rethink what the best educational programs for disabled children are. The shortcomings of Public Law 94–142 are outlined in this article and some valid points raised that demonstrate more money is not always the solution to every problem that confronts us.

Mr. President, I ask that this article be printed in the RECORD:

The article follows:

EDUCATION'S "THREE MILE ISLAND": PL 94–142

The education for All Handicapped Children Act of 1973 (PL 94–142) is the most important legislative issue affecting handicapped youth in our lifetimes. Its generality far exceeds disabled youth because of the fundamental economic, constitutional, political, and moral-philosophical questions it raises. Unfortunately, the law was enacted without these broader issues being understood or even raised.

THE LAW

PL 94–142, now being implemented nationally, requires local educational agencies to ensure a free, least restrictive public education for all disabled children, regardless of costs (Price & Goodman, 1980; Raiser & Nagel, 1980). They must either provide education themselves or pay for it if obtained elsewhere. The program must exist in the least restrictive environment irrespective of cost. For example, if satisfactory education is available locally at a reasonable price, this is not sufficient if there is a "less restrictive" program elsewhere, even though the latter may be prohibitively expensive (Vernon, 1979).

Historically, the law grew out of efforts by parents to place their mentally retarded children in schools instead of hospitals or settings where no services were provided (Pennsylvania Association for Retarded Children vs. Commonwealth, 1971). We must realize that the law developed from the needs of retarded youth, not handicapped children generally.

Initially, laws promising education for handicapped children appear as a humane effort on the part of our government to embody in legislation the basic Constitutional guarantee of equal opportunity for all. In reality, PL 94–142 is an ill-conceived law embodying a "Pollyanna-Horatio Alger-like euphoria contrary to fact perception of reality." It threatens the education of an entire generation of handicapped youth and squanders the limited educational funds available in our country for both disabled and regular children. At a deeper level, it raises Constitutional, economic and moral issues at the heart of this nation, currently and in the future. At a practical level, PL 94–142 jeopardizes realistic efforts at serving disabled children by legislating the impossible and by indiscriminately wasting fiscal resources. Pat Bauer reported in the Washington Post (May 23, 1980) illustrating parts of the problem:

Six-year-old Brooke Bennett was transferred from her Fairfax County public school by her parents last winter after she told them repeated stories about classroom disruptions and violence by a hyperactive classmate.

"We don't want to send our child to that school anymore. The teachers are spending all their time with the kids who are acting out," says Brooke's mother, Jody Bennett of Vienna.

"I believe in the concept of mainstreaming (teaching handicapped students in conventional classroom settings). But if we're going to mainstream, we're going to have to provide some resources to support it."

Dr. Harry Silver, an associate director of the National Institute of Mental Health, says it may well be impossible for school districts to comply with the law, serve all the handicapped students who need help and still stay within their present budgets.

These are strong statements. Without equally strong supporting evidence, they represent nothing more than a polemic. Let us consider the evidence.

POLITICAL-CONSTITUTIONAL

Among the most cherished rights of states and local communities, rights guaranteed by the Constitution, are those related to education. By leaving education primarily to states and local communities, our country rose from 1850 to 1950 to international eminence (first place, to be boastful) in science, technology, medicine, and the general level of education and productivity of our population. While this remarkable achievement did not result solely from local control of education, it would never have occurred if local control had not worked extremely effectively.

The existence of forced racial segregation remains the one undeniable and shameful failure of these years of local jurisdiction. This fact stands as a stinging indictment of an otherwise successful, proven approach to education for the United States. How does all of this relate to the Education of All Handicapped Children Act? About 1963 the federal government began implementing the education of handicapped children in dominating, controlling ways—a fact best reflected in dollars and cents. According to Lavor (1976) from 1963 until 1976 the United States Office of Education, now the Department of Education, increased funding for disabled children from 2.5 million dollars (a token amount in the federal budget) to more than one billion dollars in 1980. In other words, the federal fiscal investment increased more than 4,000 times between today and 17 years ago.

No one is naive enough to think, as Vernon (1979) pointed out, that local school districts get this money without massive federal control over what they do. Most state programs for the handicapped rely on federal dollars for their support (Lavor, 1978). They were in 1975 when PL 94–142 was passed. This financial dependence of the states on federal government sets the economic stage for the passage of the Bill. Congress enacted PL 94–142 and dictated to local school districts: "You will educate all disabled children." Previously, most districts failed to do so. Furthermore, the Congress stated (in PL 94–142) that local schools would provide this universal education in the best, i.e., the least restrictive, way possible, regardless of costs. As a result, school districts inherited an impossible dilemma. They either surrendered all federal monies they had already used to support their existing programs for handicapped children or else they assumed the overwhelming financial burden of PL 94–142. The latter costs are both astronomical and in many cases wasteful.

An analogy best illustrates the situation created by the Education for All Handicapped Children Act. The states and local school districts were and are in the position of the beautiful young maiden with no money or job skills who has accepted a mink coat, luxury apartment, sports car, and $2,000 monthly allowance from a lecherous politician. The federal government, like the depraved suitor providing all these luxuries, intends to proceed with the courtship. Instead of demanding sexual indulgence, however, the federal government mandates through the monitoring power of PL 94–142, full control of exactly what states and local school districts do educationally with their handicapped children (PL 94–142, 94th Congress, November 1975). Furthermore, the law, through the same monitoring power, controls exactly how much these districts are going to pay for these educational services with their own state and local money, regardless of how much money it requires. The federal share of the cost is minimal, namely 12% above what it costs to educate a regular student (see Table 1.)

When the depraved lover who has financially indulged the young maiden approaches the moment of truth the crassness of his carnal bargain is inevitably settled by some token statement of affection. Similarly, as the federal government prepared financially and politically to ravage local school districts the inevitable seductive verbiage appeared. Those who passed the law promised that they would help significantly to pay costs of implementation. Needless to say, the amounts authorized by Congress were not appropriated by Congress. In fact the minute sums appropriated have been reduced substantially (see table 1). Thus, like the deflowered maiden still waiting for her marriage proposal but long since replaced by another woman, local school districts have been royally seduced. They now must pay for educational services chosen and determined, via monitoring, by the Department of Education.

What all of this means constitutionally is that by virtue of PL 94–142 the federal government now dictates to local schools exactly what they will do with their own handi-

capped children, deciding how much local money to spend to do it, and determining the circumstances by which the federal government will oversee compliance. This represents an extreme legal position with respect to the Constitution and one into which our country has moved gradually without conscious awareness.

FUNDING HISTORY FOR EDUCATION FOR ALL HANDICAPPED CHILDREN ACT, STATE GRANT PROGRAM

[Dollar amounts in millions, contribution in percent]

Fiscal year appropriation	For use by schools in—	Administration request	Congress appropriated	Contribution Authorized	Contribution Actual
1977	1977–78	----------	$252.0	$5	$5
1978	1978–79	$365	566.0	10	10
1979	1979–80	804	804.0	20	12
1980	1980–81	(1)	874.5	30	12
1981	1981–82	922	----------	40	12

[1] OMB request is $862,000,000; administration can change that.

ECONOMIC AND PHILOSOPHICAL-ETHICAL VALUES

Every society has limits on what it can provide its citizens, including those with handicaps. This unpleasant, but axiomatic, fundamental must underlie realistic programming. Years ago when special schools were established for handicapped children, the basic rationale was twofold. First, authorities recognized it as a human moral obligation. Second, these special schools selected children likely to become self-supporting, contributing members of society once given specialized education. This assumption proved true for most such programs; e.g., Gallaudet College which educates deaf students has returned a huge dividend for every tax dollar invested.

In general, for disabled youth not showing potential to be self-supporting, contributing members of society there were no schools. The needs of most of these individuals for food, shelter, supervision, and recreation was recognized and provided. Sometimes these services were inadequate—e.g., in certain hospitals for the mentally retarded. All of this has changed with the passage of PL 94–142. Now every handicapped child must receive an optimal comprehensive educational program regardless of cost. An actual case exemplifies what this means:

"Judy is a psychotic child three years old whose mental illness is due to an irreversible organic brain syndrome which is incurable. She requires 24 hour a day care due to extreme hyperactivity. Judy is severely mentally retarded and has multiple other physical and psychological problems. She lives in a small county of 40,000 people in New Jersey. Under PL 94–142 she must be educated in the least restrictive environment. In Judy's case this comes to $60,000 a year. It will continue to cost at least this much until she is 21. This represents an expense of over $1,500 a year for each citizen of her county. the total cost will be over a million dollars for the period from now until she is 21."

Obviously Judy is an extreme case, but she illustrates an important economic fact. Under PL 94–142, we as a country will be making by far our heaviest per capita educational financial investments in those youths least able to contribute to society. In fact, large sums of education money normally spent on gifted or average children, most all of whom will return a dividend to society, we must invest now in children with little or no probability of ever being other than wards of the state. Many, including myself, who staunchly support education and services for handicapped youth, believe that PL 94–142 ultimately will do more to reduce than increase these services. Public resistance will produce a backlash effect similar to that generated by Prohibition legislation. To focus this discussion, we must face three major issues raised by PL 94–142:

1. Can we continue to make our biggest per capita educational investment in those least able to return a dividend to society? If we can, is it appropriate? The question makes us all uncomfortable. For this reason, neither Congress nor education has confronted the facts directly and realistically. Attempts to do this cause one to be perceived as against handicapped children, hardly a position with which a politician or teacher wants to be identified.

2. Can the federal government tell local school districts how to spend their own educational dollars and remain consistent with the Constitution?

3. PL 94–142 places tremendous emphasis on a local program for the child. Theoretically this can benefit young children in particular. Is it feasible economically, however, and in terms of other resources? To illustrate, let's take a deaf child living in a small town in Illinois. For this child to acquire a good education requires a specifically trained teacher who understands his communication and language learning problems, a speech pathologist who can work with this aspect of education, an audiologist to measure hearing, sound treated classrooms, a sign language interpreter, special textbooks, a loop induction amplification system in all classrooms, in-service education of all teachers and administrators, ad infinitum. To provide these services locally for only one child is inordinately expensive, costing in the range of $25,000 to $50,000 annually.

Even then, I seriously doubt the wisdom of keeping a deaf child isolated from other deaf children. Furthermore, when you start requiring several professionals to work individually in a small locality with a single handicapped child the supply of professionals, as well as the supply of money, soon runs out. In a purely economic sense, PL 94–142 is analogous to the federal government directing Chrysler Motor Company to build each car in the locale where they will sell it. Picture the cost of this kind of decentralization. Remember PL 94–142 states that the optimal program is to be provided and that we cannot raise costs as a relevant issue.

Thus far, we have considered some of the broad constitutional, economic, and moral issues represented by PL 94–142. Let us again consider one type of handicap, early profound deafness, and examine the effect of the law in "the world of reality."

CURRENT PRACTICE

First of all, local school districts say, "Give us federal money, even if only a token of what it takes to do the job demanded by PL 94–142." Then, because they face resistance to increased local taxes, these school districts ask themselves, "How can we make a little profit on this money; i.e., how can we process these deaf children and still have some federal funds left for other purposes?" Of course, according to Pechter (1978), the obvious answer is to just dump the deaf, or other disabled, child in a regular class with 30 hearing children and supply no supportive services. This is exactly what is happening all over the United States today.

More commonly the dumping approach is supplemented by a token tutor or resource teacher. The deaf student (and 15 other handicapped children) may see this teacher briefly once or twice weekly. Regardless of the details of the individual programs, the essence of what is happening today, as Vernon (1979) states, is that while PL 94–142 promises handicapped children and their families Utopia, it actually provides a horrendously poor education, in direct contradiction to most of what we have learned about the teaching of deaf and other handicapped children during the last century.

Another irony of the law is that for a minority of sophisticated, aggressive, litigious parents, it offers thousands of dollars worth of education for their children. If they intimidate local educators, or if they willingly devote years to the struggle, they can use this law to obtain a smorgasbord of special education goodies. Pechter (1978) says, however, that for the average, less sophisticated, less educated parent, those who are most in need, the system does not work.

The Individual Educational Plan, court hearings, etc. involve such overwhelming complexity that these parents are left helpless to obtain anything for their children except what local school officials offer (Pechter, 1978; Vernon, 1979). Usually these officials are from the field of general education and know nothing about deafness. As the end result, children and families most in need of educational services receive the least under PL 94–142. The bright, capable, litigious families already possessing the most to start with, can widen the differences between the "haves" and the "have nots."

SUMMARY

PL 94–142 is not merely going to devastate an entire generation of disabled youth educationally and psychologically—it has a generality far beyond handicapped children. It represents a fundamental departure from long standing interpretations of the Constitution relative to education. Economically, it imposes on the education of the disabled a position which says (a) cost is not to be considered a factor in developing an educational program, and (b) we will invest the most money in children least able to return to society a dividend on this investment.

If the road to hell is paved with good intentions, PL 94–142 certainly represents enough of a brick to cover half the distance. It is to education what Three Mile Island is to the use of nuclear energy.●

EMERGENCY RESPONSE

● Mr. DECONCINI. Mr. President, the State of Arizona has initiated the development of an emergency self-management training and public education program. The program represents a new approach to insuring the safety of citizens during times of both natural and man-caused disasters. The purpose of the program is to provide Arizona educators and adult groups with comprehensive, instructional materials that can be utilized to teach self-management preparedness and response skills relevant to emergency situations. Arizona's foresight in providing this program will enable its citizens to work cooperatively with emergency services organizations and will give them the opportunity to develop skills that could help each individual to minimize—or avoid—the consequences of a disaster situation.

The program represents a cooperative effort—between Government and the private sector—to address an existing need. Since private sector support of a program of this nature gives the project credibility, the project requires an expanded base of private sector support. Sponsorship by additional private sector organizations would reduce the burden on current sponsors and could help provide the program more directly to concerned citizens. The Government and industry team approach to public education established in this project is necessary in times of significant Federal

funding reductions for educational programs.

Civil preparedness programs have been developed in the past, but they have had serious methodological problems. In order to overcome these problems, and to provide a unique approach in this important area, a competitive request for proposals was issued by the Arizona Division of Emergency Services. Desert-Mountain Associates, an Arizona corporation specializing in skill-based training and instructional product development, was awarded the professional services contract for completion of the project, and development efforts were initiated in January 1981, under the sponsorship of the Arizona Division of Emergency Services (Charles Ott, Jr., director), the Arizona nuclear power project, and the Salt River project.

Desert-Mountain is developing a program that represents a systematic research and development process based on skill-learning, as opposed to merely relating information about potential disasters. After surveying existing materials and interviewing emergency services experts and educators throughout the State, subject matter parameters and instructional specifications were established. These specifications provide a basis for citizens who participate in the program to become skilled in numerous survival techniques that will enable them to prepare for and mitigate a number of disasters likely to occur in Arizona.

Six topics and three levels of audience have been selected. These parameters were established on the basis of input from emergency services personnel, educators, and Arizona citizens. The topics are: Radiation safety, floods, desert-mountain survival, earthquakes, hazardous materials and energy-related emergencies. The audience levels are preteenage, teenage, and adult. A model set of materials on radiation safety has been developed and is undergoing a preliminary tryout.

The program sponsors and Desert-Mountain Associates, Inc., are to be commended for addressing an important and difficult task. The net result of the development and implementation efforts will be a citizenry that is better able to survive in both peacetime and attack-related emergencies. At a time when citizens throughout the country are registering their concerns about their vulnerability to disaster situations, especially to nuclear attack, Arizona has taken a step in the right direction.

I heartily encourage Arizona citizens to make use of the program materials when they become available in 1983, following the final field test. I believe that the program will serve as a national model for skill-based emergency preparedness and response training.●

PRESIDENT'S EXPORT COUNCIL CITES IMPORTANCE OF EXPORT TRADING COMPANY LEGISLATION

● Mr. HEINZ. Mr. President, as its first order of business upon being reconstituted by President Reagan, the President's Export Council adopted a resolution calling for prompt enactment of export trading company legislation and urging the President to make this his top priority in the international trade area.

As the resolution points out, growth of the trading company concept is essential if we are to involve small- and medium-sized businesses more fully in exporting activities. Over the long term this concept promises to change the way this country approaches exporting, in the process making us both more competitive and more aggressive at the very time we are finding the competition ever tougher.

The Senate has already expressed its support for export trading companies, having passed the legislation in question unanimously last April. That bill, S. 734, which Senators DANFORTH, TSONGAS, BENTSEN, and I introduced, is now pending in the House, and it is to the House that the President's Export Council urges the President to direct his attention and persuasive powers. I have recently noted some signs of progress on this measure in the other body, and I hope that this resolution will help convince House Members to continue moving this bill. The Reagan administration, of course, needs no such convincing, having supported the bill from its inception, but I am also pleased to note the increasing level of administration involvement in efforts to get S. 734 enacted.

Mr. President, I ask that the text of the President's Export Council's letter to President Reagan be printed in the RECORD.

The letter follows:

THE PRESIDENT'S EXPORT COUNCIL,
Washington, D.C., October 30, 1981.

The PRESIDENT,
The White House, Washington, D.C.

DEAR MR. PRESIDENT: On behalf of the President's Export Council, I submit herewith its resolution calling for prompt enactment of legislation to facilitate the formation and operation of export trading companies:

The President's Export Council, as its first order of business, agreed to advise you that the establishment of the export trading company concept should be your top priority in the international trade area.

Export trading companies are necessary in order to realize economies of scale and to provide small firms with access to the expertise so often critical to successful international competition. Formation of such companies should provide a major step in the economic recovery of the nation. They would contribute to the reduction of the nation's trade deficit by fostering the growth of exports, which already contribute approximately 20,000 jobs for every one billion dollars in sales.

We recognize that the Administration has already endorsed the export trading company concept, but call your attention to the fact that immediate action in the House of Representatives is necessary if legislation is to pass this year. We urge the Administration to intensify discussions with appropriate committees in the House, particularly the Judiciary Committee, in order to work toward speedy passage of export trading company legislation.

We hope you will give our views close attention, as this is one of the most practical ways in which the United States can increase exports.

Sincerely,

J. PAUL LYET,
Chairman.●

THE WHITE HOUSE CONFERENCE ON AGING

● Mr. PELL. Mr. President, senior citizens from all over the country have come to Washington this week to participate in the third White House Conference on Aging.

This event, first held in 1961 and again in 1971, has played a significant role in the development of the aging agenda for each of the two preceding decades. The Older Americans Act of 1965 and the medicare and medicaid programs grew out of resolutions that were developed by delegates to the first White House Conference on Aging. The second White House conference was no less eventful and paved the way for the passage of the supplementary security income (SSI) program and the extension of the mandatory retirement age.

The program recommendations that emerged from both of these conferences were the products of many hours of discussion and free exchange of ideas among the delegates.

This year's conference on aging is unique in many ways. Because of the need to restrain Federal spending, much of the discussion will focus on ways to improve the quality of existing Federal aging programs and to more effectively target senior citizens who are most in need.

During the budget process, which began last spring, Congress has voted repeatedly to trim the tree of Federal programs. In my view, however, far too many branches of the tree have been cut off and the so-called "social safety net" has become smaller and smaller. The White House Conference on Aging offers a forum for those who are directly affected by these cutbacks to speak and share their thoughts on how our Federal financial resources can be more efficiently utilized.

I have been concerned, therefore, Mr. President, about rumors that the administration has tried to dictate the rules of procedure for this conference and limit debate on individual committee reports.

Without a free exchange of ideas or sufficient opportunity for the delegates to play a meaningful role in the deliberations of the White House Conference on Aging, it is useless to hope that any significant recommendations will emerge from this year's conference.

Many of the delegates have strong feelings about the direction of the administration's economic program because they have experienced the effects firsthand.

They have come a long way and have spent many hours preparing for this conference and ought to be allowed to share their views without interference with the American people.

I hope that these issues will soon be resolved so that the Congress and the administration will have the full benefit of the experience and expertise of the participants in the White House Conference on Aging.●

SENATOR ABDNOR WRITES ON HARBOR DEVELOPMENT AND S. 1692

● Mr. MOYNIHAN. Mr. President, the distinguished chairman of the Water Resources Subcommittee, the Senator from South Dakota (Mr. ABDNOR), has written an article for the Baltimore Sun on the subject of harbor development. I commend his words to all who have an interest in seeing this country capitalize on one of our greatest economic opportunities in the coming decade—the export of American steam coal. The boon will not occur uniess we build deepwater ports to accommodate the supercolliers now being built by our foreign buyers.

Senator ADBNOR and I are cosponsors of a bill, the National Harbors Improvement Act (S. 1692), that would encourage ports to proceed immediately with harbor development plans. Financing of port improvements would be undertaken entirely by the local port, thus freeing the ports from the burden of the congressional authorization and appropriations process. Our bill retains a strong commitment to the continued Federal maintenance of all our harbors by requiring the ports to pay only 25 percent of their maintenance dredging costs. Our bill would confine the regulatory process for dredging permits to 2 years.

Under Senator ABDNOR's leadership, the Water Resources Subcommittee reported S. 1692 to the full Environment and Public Works Committee on November 18, 1981. The committee will mark up the legislation on December 2, 1981.

The arguments for rapid Senate action are made quite strongly in the chairman's article. Its timeliness cannot be understated. Mr. President, I ask that Senator ABDNOR's article be printed in the RECORD.

The article follows:

[From the Baltimore Sun, Nov. 21, 1981]

HARBOR DEVELOPMENT

(By JAMES ABDNOR)

America's port capabilities lag behind much of the world. We lack deep ports. Thus, we have no ability to use the superships that haul coal, and other commodities at far lower costs per ton.

Yet our present system, where Congress authorizes projects and appropriates federal dollars to dredge channels, one by one, seems unlikely to produce any rapid improvements.

Let's look at the record:

It now takes a generation—about 26 years—to begin construction on a typical Army Corps of Engineers water project. Congress hasn't passed a new water resources bill since 1976. We have a backlog of $50 billion in authorized, but unbuilt, federal water-resources projects. It will take 25 years to work through that backlog. Spending on Corps of Engineers work, in uninflated dollars, is now half what it was 15 years ago.

On the other side is the demand. America has an opportunity to augment exports dramatically with the sudden surge in demand for U.S. coal. But deepened coal ports won't come cheaply. The 50-foot-deep Baltimore project would cost the federal government about $340 million. When you tote them all up, you arrive at a cost of $3 billion. Compare that with the $180 million the federal government has been spending yearly on harbor deepening.

There simply are not enough federal dollars around to deepen all the harbors we would like to deepen. Also, we face an increasing backlog of unfufilled maintenance dredging.

President Reagan may have provided guidance with the challenge he set in his September economic message. "When the federal government provides a service directly to a particular industry or to a group of citizens, I believe that those who receive the benefits should bear the costs." He has called for full port-by-port cost recovery for harbor work.

For the first time in U.S. history, reality forces us to look beyond Washington for harbor improvements. We must let investors and shippers, not the Congress, determine where the dollars are spent.

Senator Moynihan of New York and I are sponsoring a bill that shifts all the costs for new harbor-project work to the local port authorities, while continuing a major federal subsidy for subsequent yearly maintenance dredging. This is how the Dutch do it, and they have one of the world's best harbors—Rotterdam. A beneficiary-pays concept will move port development out of politics into decisions based on economic sense.

It certainly would be easy to say that the already authorized Baltimore Harbor project should be built right away, with federal dollars. I'm not sure that it would sound so logical in other port cities. And, frankly, it is probably not possible in Congress.

It would certainly prove unfair if we forced local government to swallow these harbor costs. But my proposal specifically allows local government to collect user fees from the ships that are the direct beneficiaries.

This means that the foreign coal buyers will have to pay some of the cost. If substantial benefits truly exist, shouldn't the ports be able to obtain necessary funding in the marketplace, then repay it through fees collected as a result of the additional, more efficient shipping?

The average added user charge on shipping a ton of coal, to amortize a deepened port, would run to $2 a ton or less. The savings to the shipper from economics of scale would be about $6 a ton. And don't forget, shippers are paying port charges now that are far higher than would be imposed under a user-charge scheme. It costs nearly $50 a ton to handle some types of cargoes at Baltimore now.

Finally, the bill includes language that will greatly expedite local project approval and development. I am confident we can build projects in a few years, rather than decades.

It is vital that Congress move quickly on the Abdnor-Moynihan legislation. Last week, our Subcommittee on Water Resources approved my bill and sent it to the full committee for action December 2. We need to provide certainty to the ports and to their customers, we need to assist President Reagan in meeting the goal of economic recovery that he has set for our nation.●

ORDER OF PROCEDURE ON TOMORROW

Mr. STEVENS. Mr. President, it is my understanding that there are already entered orders for rollcall votes tomorrow. Is that correct?

The PRESIDING OFFICER. There has been no ordering of yeas and nays on anything that has yet been taken up for tomorrow.

ORDER FOR THE RECOGNITION OF SENATOR BUMPERS ON TOMORROW

Mr. STEVENS. Mr. President, I ask unanimous consent that the Senator from Arkansas (Mr. BUMPERS) be entitled to a special order following the two leaders on tomorrow.

The PRESIDING OFFICER. Without objection, it is so ordered.

THE PROGRAM ON TOMORROW

Mr. STEVENS. Mr. President, will the Chair state what then is the program for the morning following the special order of Senator BUMPERS?

The PRESIDING OFFICER. At 9:40 a.m. there will be 20 minutes of debate on two amendments of the Senator from South Carolina Senator HOLLINGS. That will be followed by two back-to-back votes on those two amendments on which the yeas and nays have not been ordered.

Mr. STEVENS. I understand.

There is the unanimous-consent agreement that was entered last evening at my request that sets four treaties for a vote, one vote to count for four, at 4:20 p.m. tomorrow afternoon. Is that still correct?

The PRESIDING OFFICER. The Senator is correct.

The Chair stands corrected. The yeas and nays have been ordered on those four treaties, one vote to count as four.

MINERAL LEASING LAWS AMENDMENT

Mr. STEVENS. Mr. President, if my good friend from West Virginia is in agreement, I ask that the Chair lay before the Senate Calendar Order No. 373, H.R. 4591.

Mr. ROBERT C. BYRD. Mr. President, there is no objection on this side.

The PRESIDING OFFICER. The bill will be stated by title.

The legislative clerk read as follows:

A bill (H.R. 4591) to amend the mineral leasing laws of the United States to provide for uniform treatment of certain receipts under such laws, and for other purposes.

There being no objection, the Senate proceeded to consider the bill.

The PRESIDING OFFICER. The bill is before the Senate and open to amendment. If there be no amendment to be offered, the question is on the third reading and passage of the bill.

The bill (H.R. 4591) was ordered to a third reading, was read the third time, and passed.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. ROBERT C. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

PIRACY AND COUNTERFEITING AMENDMENTS ACT OF 1981

Mr. STEVENS. Mr. President, I ask that the Chair lay before the Senate Calendar Order No. 383, S. 691.

Mr. ROBERT C. BYRD. No objection.

The PRESIDING OFFICER. The bill will be stated by title.

The legislative clerk read as follows:

A bill (S. 691) to amend titles 18 and 17 of the United States Code to strengthen the laws against record, tape, and film piracy and counterfeiting, and for other purposes.

There being no objection, the Senate proceeded to consider the bill which had been reported from the Committee on the Judiciary with amendments, as follows:

On page 2, line 6, strike "and", and insert "or other";

On page 2, line 11, strike "an", and insert "other";

On page 2, strike line 18, through and including line 21, and insert the following:

"(2) the term 'traffic' means to transport, transfer or otherwise dispose of, to another, as consideration for anything of value or to make or obtain control of with intent to so transport, transfer or dispose of; and

On page 3, line 13, after "used", insert "or intended to be used";

On page 3, line 17, strike "audiovisual work or motion picture", and insert "motion picture or other audiovisual work";

On page 3, after line 19, insert the following:

"(d) When any person is convicted of any violation of subsection (a), the court in its judgment of conviction shall in addition to the penalty therein prescribed, order the forfeiture and destruction or other disposition of all counterfeit labels and all articles to which counterfeit labels have been affixed or which were intended to have had such labels affixed.

"(e) Except to the extent they are inconsistent with the provisions of this title, all provisions of section 509, title 17, United States Code, are applicable to violations of subsection (a).".

On page 4, line 10, after "section", insert the following: "and such penalties shall be in addition to any other provision of law";

On page 5, strike line 3, through and including line 5, and insert the following:

"(C) is a second or subsequent offense under either of subsections (b)(1) or (b)(2) of this section, where a prior offense involved a sound recording, or a motion picture or other audiovisual work";

On page 5, line 23, after "or", insert "other";

On page 6, strike line 9, through and including line 11, and insert the following:

"(2) the terms 'reproduction' and 'distribution' refer to the exclusive rights of a copyright owner under clauses (1) and (3) respectively of section 106 (relating to exclusive rights in copyrighted works), as limited by sections 107 through 118, of title 17.".

On page 6, in the material between line 20 and line 21, strike "and", and insert "or other".

So as to make the bill read:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Piracy and Counterfeiting Amendments Act of 1981".

SEC. 2. Section 2318 of title 18, United States Code, is amended to read as follows:

"§ 2318. Trafficking in counterfeit labels for phonorecords, and copies of motion pictures or other audiovisual works

"(a) Whoever, in any of the circumstances described in subsection (c) of this section, knowingly traffics in a counterfeit label affixed or designed to be affixed to a phonorecord, or a copy of a motion picture or other audiovisual work, shall be fined not more than $250,000 or imprisoned for not more than five years, or both.

"(b) As used in this section—

"(1) the term 'counterfeit label' means an identifying label or container that appears to be genuine, but is not;

"(2) the term 'traffic' means to transport, transfer or otherwise dispose of, to another, as consideration for anything of value or to make or obtain control of with intent to so transport, transfer or dispose of; and

"(3) the terms 'copy', 'phonorecord' 'motion picture', and 'audiovisual work' have, respectively, the meanings given those terms in section 101 (relating to definitions) of title 17.

"(c) The circumstances referred to in subsection (a) of this section are—

"(1) the offense is committed within the special maritime and territorial jurisdiction of the United States; or within the special aircraft jurisdiction of the United States (as defined in section 101 of the Federal Aviation Act of 1958);

"(2) the mail or a facility of interstate or foreign commerce is used or intended to be used in the commission of the offense; or

"(3) the counterfeit label is affixed to or encloses, or is designed to be affixed to or enclose, a copyrighted motion picture or other audiovisual work, or a phonorecord of a copyrighted sound recording.

"(d) When any person is convicted of any violation of subsection (a), the court in its judgment of conviction shall in addition to the penalty therein prescribed, order the forfeiture and destruction or other disposition of all counterfeit labels and all articles to which counterfeit labels have been affixed or which were intended to have had such labels affixed.

"(e) Except to the extent they are inconsistent with the provisions of this title, all provisions of section 509, title 17, United States Code, are applicable to violations of subsection (a).".

SEC. 3. Title 18, United States Code, is amended by inserting after section 2318 the following new section:

"§ 2319. Criminal infringement of a copyright

"(a) Whoever violates section 506(a) (relating to criminal offenses) of title 17 shall be punished as provided in subsection (b) of this section and such penalties shall be in addition to any other provisions of title 17 or any other law.

"(b) Any person who commits an offense under subsection (a) of this section—

"(1) shall be fined not more than $250,000 or imprisoned for not more than five years, or both, if the offense—

"(A) involves the reproduction or distribution, during any one-hundred-and-eighty-day period, of at least one thousand phonorecords or copies infringing the copyright in one or more sound recordings;

"(B) involves the reproduction or distribution, during any one-hundred-and-eighty-day period, of at least sixty-five copies infringing the copyright in one or more motion pictures or other audiovisual works; or

"(C) is a second or subsequent offense under either of subsections (b)(1) or (b)(2) of this section, where a prior offense involved a sound recording, or a motion picture or other audiovisual work;

"(2) shall be fined not more than $250,000 or imprisoned for not more than two years, or both, if the offense—

"(A) involves the reproduction or distribution, during any one-hundred-and-eighty-day period, of more than one hundred but less than one thousand phonorecords or copies infringing the copyright in one or more sound recordings; or

"(B) involves the reproduction or distribution, during any one-hundred-and-eighty-day period, of more than seven but less than sixty-five copies infringing the copyright in one or more motion pictures or other audiovisual works; and

"(3) shall be fined not more than $25,000 or imprisoned for not more than one year, or both, in any other case.

"(c) As used in this section—

"(1) the terms 'sound recording', 'motion picture', 'audiovisual work', 'phonorecord' and 'copies' have, respectively, the meanings set forth in section 101 (relating to definitions) of title 17; and

"(2) the terms 'reproduction' and 'distribution' refer to the exclusive rights of a copyright owner under clauses (1) and (3) respectively of section 106 (relating to exclusive rights in copyrighted works), as limited by sections 107 through 118, of title 17.".

SEC. 4. The table of sections for chapter 113 of title 18 of the United States Code is amended by striking out the item relating to section 2318 and inserting in lieu thereof the following:

"2318. Trafficking in counterfeit labels for phonorecords and copies of motion pictures or other audiovisual works.
"2319. Criminal infringement of a copyright.".

SEC. 5. Section 506(a) of title 17, United States Code, is amended to read as follows:

"(a) CRIMINAL INFRINGEMENT.—Any person who infringes a copyright willfully and for purposes of commercial advantage or private financial gain shall be punished as provided in section 2319 of title 18.".

The PRESIDING OFFICER. The bill is open to further amendment. If there be no further amendment to be proposed, the question is on agreeing to the committee amendment in the nature of a substitute.

The committee amendment was agreed to.

The bill was ordered to be engrossed for a third reading and was read the third time.

The PRESIDING OFFICER. The bill having been read the third time, the question is, Shall it pass?

So the bill (S. 691), as amended, was passed.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. ROBERT C. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

INDEFINITE POSTPONEMENT OF SENATE CONCURRENT RESOLUTION 48

Mr. STEVENS. Mr. President, I ask that the Chair lay before the Senate Calendar Order No. 388, Senate Concurrent Resolution 48, a concurrent resolution disapproving the proposed sale to Pakistan of F–16 aircraft, and I ask unanimous consent that that calendar item be indefinitely postponed.

The PRESIDING OFFICER. Without objection, it is so ordered.

EXECUTIVE SESSION

RETURN OF TAX CONVENTIONS WITH THE ARAB REPUBLIC OF EGYPT, ISRAEL, AND THAILAND

Mr. STEVENS. Mr. President, I ask unanimous consent that the Senate go into executive session for the purpose of considering calendar item No. 2, Senate Executive Resolution No. 2, the Return of Tax Conventions with the Arab Republic of Egypt, Israel, and Thailand.

The PRESIDING OFFICER. Without objection, the Senate will proceed to executive session. The executive resolution will be stated.

The legislative clerk read as follows:

A resolution (S. Ex. Res. 2) Return of Tax Conventions with the Arab Republic of Egypt, Israel, and Thailand.

The PRESIDING OFFICER. The question is on agreeing to the executive resolution.

The executive resolution (S. Ex. Res. 2) was agreed to.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. STEVENS. Mr. President, I ask unanimous consent that the President be notified of the action taken in executive session.

The PRESIDING OFFICER. Without objection, it is so ordered.

LEGISLATIVE SESSION

Mr. STEVENS. Mr. President, I ask unanimous consent that the Senate return to the consideration of legislative business.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STEVENS. Mr. President, is there an order for convening yet tomorrow morning?

The PRESIDING OFFICER. There is not yet an order.

RECESS UNTIL 9 A.M. TOMORROW

Mr. STEVENS. Mr. President, I ask unanimous consent that the Senate stand in recess until 9 a.m. tomorrow morning.

There being no objection, the Senate, at 7:36 p.m., recessed until 9 a.m., Wednesday, December 2, 1981.

NOMINATIONS

Executive nominations received by the Senate December 1, 1981:

NATIONAL TRANSPORTATION SAFETY BOARD

Eugene V. Lipp, of California, to be a Member of the National Transportation Safety Board for a term expiring December 31, 1986, vice James B. King, term expiring.

DEPARTMENT OF STATE

Gerald E. Thomas, of California, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Cooperative Republic of Guyana.

William Robert Casey, Jr., of Colorado, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Republic of Niger.

Mark Evans Austad, of Arizona, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Norway.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Clarence Eugene Hodges, of Maryland, to be Chief of the Children's Bureau, Department of Health and Human Services, vice John A. Calhoun III.

DEPARTMENT OF STATE

The following-named career Member of the Senior Foreign Service of the Department of Commerce for promotion in the Senior Foreign Service to the class indicated:

Career Member of the Senior Foreign Service of the United States of America, Class of Minister-Counselor:

Joseph F. Christiano, of New York.

The following-named career Members of the Foreign Service of the Department of Commerce for promotion into the Senior Foreign Service as indicated:

Career Members of the Senior Foreign Service of the United States of America, class of Counselor:

Walter Clair Lenahan, of Washington.

Daniel Taher, of New Jersey.

DEPARTMENT OF STATE

The following-named persons for appointment as career Members of the Senior Foreign Service, class of Counselor, Consular Officers, and Secretaries in the Diplomatic Service of the United States of America:

Wayne Hoshal, of Virginia.

Robert Carl Liimatainen, of Michigan.

For reappointment in the Foreign Service as a Foreign Service officer of class 3, a Consular officer, and a Secretary in the Diplomatic Service of the United States of America:

Richard Alan Megica, of Florida.

For appointment as Foreign Service officers of class 3, Consular Officers, and Secretaries in the Diplomatic Service of the United States of America:

Duane Edwin Sams, of Connecticut.

Susie Jacqueline Tucker, of California.

For appointment as a Foreign Service Information officer of class 3, a Consular officer, and a Secretary in the Diplomatic Service of the United States of America:

Alfred F. Head, of Virginia.

For appointment as Foreign Service officers of class 4, Consular Officers, and Secretaries in the Diplomatic Service of the United States of America:

Donald J. Amis, of California.
Lawrence Rea Baer, of California.
Perry Edwin Ball, of Georgia.
Bruce Edward Carter, of Pennsylvania.
Miguel de la Pena, of Massachusetts.
David B. Dunn, of California.
Alfred Gonzales, of California.
Andrew Lewis Allen Goodman, of Illinois.
Daniel Kiang, of New York.
Gerald J. Loftus, of Florida.
Carl S. Matthews, of Virginia.
Albert G. Nahas, of Pennsylvania.
Lauren Peters, of Hawaii.
Francis Joseph Ricciardone, Jr., of New Hampshire.
John Richard Schmidt, of Wisconsin.
Richard Henry Smyth, of California.
James R. Van Laningham, of Arizona.
Edward H. Vázquez, of New Jersey.
Thomas J. White, of New York.
Howard C. Wiener III, of Virginia.

Nesbitt, Donald L.
Parks, John L.
Simmonds, James L.
Wheeler, Gerard C.

The following-named temporary lieutenant commanders of the U.S. Naval Reserve for permanent promotion to the grade of lieutenant commander in the line and various staff corps, as indicated, pursuant to section 611(a) of the Defense Officer Personnel Management Act (Public Law 96–513) and title 10, United States Code, section 624 as added by the same act, as applicable, subject to qualifications therefor as provided by law:

LINE

Pryor, Hershel W., Jr.
Sine, Don T.

MEDICAL CORPS

Mayers, Douglas L.

DENTAL CORPS

Kiselica, Lawrence D.

The following-named officer of the line of the U.S. Navy, for appointment in the Civil Engineer Corps, as permanent lieutenant (junior grade), pursuant to section 611(a) of the Defense Officer Personnel Management Act (Public Law 96–513) and title 10, United States Code, section 532 as added by the same act, as applicable, subject to qualifications therefor as provided by law:

Aalbue, Frederick A.

SENATE—*Wednesday, December 2, 1981*

(Legislative day of Monday, November 30, 1981)

The Senate met at 9 a.m., on the expiration of the recess, and was called to order by the President pro tempore (Mr. THURMOND)

PRAYER

The Chaplain, the Reverend Richard C. Halverson, LL.D., D.D., offered the following prayer:

Let us pray.

Father in Heaven, this Government was conceived as "of the people, by the people and for the people." I pray for the people of these United States, for their blessing and renewal. Help them to understand their responsibility as citizens, to vote, to communicate with their elected officials on a constructive, continuing basis. Help them to understand that that complaining and criticizing do not compensate for duty, that duty calls for their involvement and support and that elections are the provision for change. Give them the wisdom to see that selfish interests are as deadly in the private sector as in the public.

I pray for the people of God, for the churches that they may accept the biblical mandate to pray for their leadership and realize that criticism does not compensate for prayerlessness. Forgive the churches O God, for demanding that Congress legislate a morality that the churches fail to produce among their members. Help them to understand that judging a decision from hindsight is no trick, that hindsight is an exact science. Help them to appreciate the uncertainties in foresight from which decisions must be made. I pray this in the name of Him who loved enough to lay down His life for sinners. Amen.

RECOGNITION OF THE MAJORITY LEADER

The PRESIDENT pro tempore. The majority leader is recognized.

Mr. BAKER. I thank the Chair.

COMMENDATION OF THE SENATE CHAPLAIN FOR HIS PRAYERS

Mr. BAKER. Mr. President, I take this opportunity to commend the Chaplain of the Senate, Dr. Halverson, for the series of inspiring and thoughtful prayers he has delivered to the Senate on its opening since he became Chaplain of this body.

THE JOURNAL

Mr. BAKER. Mr. President, I ask unanimous consent that the Journal of the proceedings of the Senate be approved to date.

The PRESIDENT pro tempore. Without objection, it is so ordered.

ORDER FOR ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, I believe there is a special order for the recognition of the distinguished Senator from Arkansas (Mr. BUMPERS) to follow on after the recognition of the two leaders; is that correct?

The PRESIDENT pro tempore. The majority leader is correct.

Mr. BAKER. Mr. President, I ask unanimous consent that after the recognition of the two leaders and the execution of the special order, there be a period for the transaction of routine morning business to extend not beyond the hour of 9:40 a.m. this morning in which Senators may be permitted to speak for not more than 2 minutes each.

The PRESIDENT pro tempore. Without objection, it is so ordered.

ORDER OF PROCEDURE

ROLLCALL VOTES AT 10 A.M. ON HOLLINGS AMENDMENTS

Mr. BAKER. Mr. President, I believe there is an order entered on yesterday to provide that at 9:40 a.m. the Senate will resume consideration of H.R. 4995, the Department of Defense appropriations bill, and that at that time there will be limited debate on two Hollings amendments of 10 minutes each, equally divided, with two rollcall votes to occur thereafter. Have those rollcall votes been ordered?

The PRESIDENT pro tempore. They have not been ordered yet.

Mr. BAKER. But by virtue of the unanimous-consent request on yesterday it would be in order by one showing of seconds to provide for that?

The PRESIDENT pro tempore. The leader is correct.

Mr. BAKER. Mr. President, I ask for the yeas and nays now on both amendments.

The PRESIDENT pro tempore. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. BAKER. Mr. President, at 10 o'clock then two rollcall votes will occur back-to-back, a 15-minute rollcall on the first Hollings amendment to be followed immediately, without intervening motion, debate, appeal or point of order, by a second vote of 10 minutes duration.

ROLLCALL VOTE AT 4:20 P.M. ON FOUR TREATIES

Mr. President, also at 4:20 this afternoon under an order previously entered, the Senate will go into executive session to consider four treaties with one vote to count for four. So the Senate will have a very busy day today from the standpoint of rollcall votes. Three votes, including one for four treaties, are provided for in these orders already entered.

No doubt there will be a great number of votes on other amendments. The leadership intends to try to obtain final passage on this bill this evening. Senators should be on notice that that may require a late evening.

I apologize to Senators and, more especially, to their families and friends in that connection. But I am sure all Members will recall that before the Thanksgiving recess the leadership placed Senators on notice that the usual arrangement of confining late hours to Thursdays only would no longer apply until the end of this session.

ORDER OF BUSINESS

Mr. BAKER. Mr. President, I have no further need for my time under the standing order, and I am prepared to yield it to any Senator who wishes it.

In the meantime, Mr. President, I ask unanimous consent that my time remaining under the standing order and the time of the distinguished minority leader be reserved until a later time during this session day.

The PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I suggest the absence of a quorum.

The legislative clerk proceeded to call the roll.

Mr. PROXMIRE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. ARMSTRONG). Without objection, it is so ordered.

Mr. PROXMIRE. Mr. President, I ask unanimous consent that I may use 1 minute of the minority leader's time. I understand that is acceptable.

The PRESIDING OFFICER. Without objection, it is so ordered.

GENOCIDE CONVENTION NO THREAT TO FIRST AMENDMENT

Mr. PROXMIRE. Mr. President, the first amendment guarantees of free speech and assembly are the underpinnings of the American democratic system. Opponents of the Genocide Convention claim that its ratification will abridge these rights.

Mr. President, that is simply not the case.

Article III of the convention prohibits direct and public incitement to commit genocide. The original draft of the convention made punishable "all forms of public propaganda tending by their systematic and hateful character to provoke genocide * * *." The opposition focuses on this version.

Perhaps they are unaware, Mr. President, that the drafters removed this pro-

vision after the United States made it clear that the American legal system prohibits interference with speech unless it creates a "clear and present danger." As the Genocide Convention is now construed, no person in the United States can be apprehended for incitement to commit genocide unless the tests of free speech are met.

Mr. President, there are ample precedents in our judicial history to protect our first amendment guarantees. In the most recent case dealing with free speech, *Brandenburg* v. *Ohio*, 395 U.S. 444 (1969), the Supreme Court reaffirmed that the State cannot prohibit the advocacy of the use of force or violation of the law unless such advocacy would produce imminent lawless action.

Mr. President, the language of the convention is consistent with this decision. This assessment was reaffirmed in the 1970 testimony by then Assistant Attorney General William Rehnquist who stated that constitutional free speech protections would not and could not be affected in any way by the Convention's terms.

Mr. President, we must put to rest the issue of first amendment rights with regard to the Genocide Convention. The Convention will not abridge our constitutional guarantees. They are secure.

Let us instead address that fundamental human right that the Convention seeks to protect—the right of groups to exist; the right upon which our constitutional freedoms are founded. The Genocide Convention is the international instrument for the protection of those freedoms.

I urge its immediate ratification.

RECOGNITION OF SENATOR BUMPERS

The PRESIDING OFFICER. Under the previous order, the Senator from Arkansas (Mr. BUMPERS) is recognized for not to exceed 15 minutes.

THE BUDGET-BUSTING TAX BILL

Mr. BUMPERS. Mr. President, during the past year, we have been struggling to balance the budget. The battle has not gone well because Congress passed and the President signed a budget-busting tax bill which will reduce revenues by $37.7 billion in fiscal year 1982, and by a total of $242.7 billion in the 2 succeeding years. Those were estimates at the time and will likely be more than $350 billion in the final analysis.

We reached the ridiculous culmination of that battle, the budget-balancing battle, a week ago when we spent the weekend agreeing to a continuing resolution authorizing appropriations which we thought the President would approve.

This standoff has been brought about by a looming budget deficit which may total $100 billion in 1982. To avert that possibility, we have again examined all spending programs to determine what is expendable, but we have ignored a new program which is estimated to cost $26.9 billion by the end of fiscal year 1986.

It is a subsidy proposed by the administration to bail out unprofitable companies, despite its repeated expressions of support for a laissez-faire economy. Moreover, this subsidy program is tremendously inefficient because it allows profitable corporations additional tax benefits for no discernible purpose.

Even as the Government was being shut down last week, profitable corporations continued to draw their payments, because this subsidy program is a tax subsidy, consisting of the sale of tax breaks through leases which are simply paper transactions between businesses. This completely unjustified subsidy was part of the Economic Recovery Tax Act of 1981.

I cannot believe the President, and certainly I know the Congress, ever had any such intent.

I had intended to introduce a bill today repealing the leaseback provision of the tax bill, but since Senator PELL did so yesterday in introducing S. 1896, I am announcing my support and cosponsorship of Senator PELL's bill and I urge my colleagues to do likewise.

The Economic Recovery Tax Act of 1981 has, in the words of Robert Altman of Lehman Brothers, "virtually phased out the corporate tax in America." This result stems from the conjunction of the act's incredibly generous accelerated cost recovery system (ACRS) and its leasing provisions.

The ACRS offers such enormous deductions for capital expenditures that, along with allowable tax credits, it will drastically reduce and in many cases eliminate the taxable income of corporations, and for companies which have been particularly harmed in the weak economy, it will reduce their tax liability well below zero.

I might say, Mr. President, most corporations that pay income taxes henceforth ought to fire their accountants.

Anticipating this situation, the administration proposed amending the laws determining the tax consequences of sales and lease backs, to allow a corporation with such a tax loss to transfer title to depreciable property to a taxpayer with a large tax liability who in turn leases the property back to be used as if no sale had occurred.

The buyer of the property is thus allowed to take the related depreciation deductions, despite the fact that the seller continues to use the property. Such a "sale" is a pure paper transaction, lacking any independent economic substance, and, in the absence of the special leasing amendments, it would be completely ignored for tax purposes.

Consequently, it is very clear that the leasing provisions of the Economic Recovery Tax Act are nothing more or less than a pure tax subsidy, and recent reports concerning its misuse demonstrate why it should be eliminated. These reports show that some of the actual beneficiaries of these provisions clearly do not fall within the range intended by Congress.

For example, Occidental Petroleum "sold" $95 million in excess tax credits. Assuredly, oil companies, which received their own enormous tax breaks in the tax bill, were not intended to qualify for the leasing subsidy as well. On the contrary, they are enjoying the high prices and profits which are a source of the economic problems burdening other companies.

At the same time, some of the intended beneficiaries of the leasing provisions have had difficulty qualifying. Chrysler is a good example. The IRS initially promulgated regulations which cast a cloud over tax losses sold by companies threatened with insolvency. Consequently, Chrysler experienced difficulties selling its losses until the IRS reversed itself. It is very likely that this uncertainty weakened Chrysler's negotiating position and reduced the benefit it received from the leasing transaction eventually consummated.

This experience illustrates a second problem with this tax subsidy. It is an extremely inefficient means of delivering money to the intended beneficiaries. Because the transactions lack economic substance aside from the tax consequences, they necessarily require the parties to split the tax advantages.

Furthermore, it stands to reason that the companies needing help most would be in the weakest bargaining position and, in all likelihood, they would have to give the greater portion of their tax benefits to the "buyer" in order to arrange the transaction. Similarly, by definition, the only buyers in such transactions must be profitable enterprises.

In addition, these leasing transactions are fairly complicated, so they require the services of intermediaries, who naturally receive compensation. Solomon Bros., for example, earned about $5 million in fees this fall from this one provision of law. Therefore, only a small portion of each leasing transaction actually benefits the "seller."

The flaws in this back-door subsidy result from congressional inattention. It was proposed by the administration and became part of the Conable-Hance amendment, which the House substituted for the tax bill reported by the Ways and Means Committee. It had not been considered by that committee, and it was ignored in the House debate on the broader issues of the tax policy embodied in the tax cut bill. The Finance Committee in the Senate gave it such brief scrutiny that its report on the tax bill did not even distinguish between the estimated revenue loss arising from the leasing subsidy and that arising from ACRS. Perhaps as a consequence of that silent treatment, the full Senate never debated the issue at all.

Certainly, Senators would have been interested to discover that the 6-year loss

was estimated at $26.9 billion, broken down as follows:

Fiscal year:	(In billions)
1981	$0.4
1982	2.6
1983	3.6
1984	5.1
1985	6.7
1986	8.5

The presidents of the corporations I have talked to now report that the number and size of leasing transactions which have already occurred indicate that the first-year estimates are too conservative by half.

The magnitude of this subsidy should be compared to the Chrysler bailout legislation, which guaranteed loans up to $1.43 billion, and which Congress agonized over for weeks—agonized over $1.43 billion in loan guarantees to Chrysler. Since such loan guarantees are generally accounted for in the budget at one-third the face amount, the budget impact of the Chrysler legislation would be $477 million. Thus, the leasing provisions have an anticipated budget impact which is 56 times greater than the Chrysler bailout, but they received about one-thousandth the attention of that well-publicized legislation.

The only attention which this unprecedented subsidy has received is ex post facto, and it consists of news reports, with headlines such as these from the Wall Street Journal: "Leasing Accords Involve Billions In Gear as Initial Rounds of Tax Credit Sales Ends"; "Firms Battling Uncertainties, Midnight Deadline In Drive for Tax Gains on Leasing Arrangements"; "Chrysler Renews Push To Sell Tax Credits: 'Paper Lease' Could Net Firm $30 Million"; and "IBM Buys $100 Million CSX Tax Credits, Its Second Such Purchase Within a Week."

Consider the Washington Post reports: "Profitable Firm Capitalizes On Tax Law"; "Losses from Tax Breaks May Top 1982 Estimates"; "General Electric Buys $26 Million Worth of Chrysler Tax Breaks"; and "Value of New Lease System Questioned." Business Week referred to the leasing system as a "Tax Credit Bonanza."

Mr. President, Congress never intended the results which these articles report. No adequate justification has ever been offered for this subsidy, and it should be ended. It may be possible that a justification can be found, and, if so, the leasing subsidy, or a similar provision with appropriate safeguards, can be enacted.

Mr. President, I urge my colleagues to join in cosponsoring Senator PELL'S bill, S. 1896.

Mr. President, I ask unanimous consent that Senators HART, NUNN, EXON, METZENBAUM, BURDICK, and PRYOR also be added as cosponsors to the Pell bill.

The PRESIDENT OFFICER. Without objection, it is so ordered.

ROUTINE MORNING BUSINESS

The PRESIDING OFFICER. There will now be a period for the transaction of routine morning business not to extend beyond 9:40 a.m., in which Senators may speak for up to 2 minutes each.

NEW CUTS REPORTED FOR CITIES, HOUSING

Mr. DODD. Mr. President, I wish to bring to the attention of my colleagues a most disturbing report contained in an article in todays' Washington Post by Spencer Rich and Herbert H. Denton entitled "New Cuts Reported for Cities, Housing." This article outlines possible recommendations for fiscal year 1983 by the Office of Management and Budget with respect to the major programs administered by the Department of Housing and Urban Development.

It is speculated that the administration intends to virtually eliminate all further Federal assistance designed to address the housing needs of this Nation's lower income families and senior citizens and to phase out the largest and most effective means of Federal support for the problems confronting our cities and rural areas.

If these actions are translated into actual recommendations, this administration will be continuing on a course of action designed to both dismantle the Department of Housing and Urban Development and this Nation's historic commitment to the recognized goals of decent, adequate shelter and community development and revitalization.

While I recognize that some will argue that the reports in this article only address ongoing administration negotiations and not final policy pronouncements, it is difficult to be assured by the prospects for a reversal of this situation given the magnitude and severity of these recommendations and the dominance which the Office of Management and Budget has held to date in budget negotiations with domestic agencies.

In addition, even if some accommodation should be reached in terms of the budget actually transmitted to the Congress in January, these reports highlight very serious trends in administration policies for the future, which run counter to the goals enunciated and reaffirmed by the Congress and various administrations over the past 50 years.

This article reports that the administration is considering either the total elimination of future Federal assistance for addressing the housing needs of the poor or the replacement of the current array of Federal housing programs with a new and limited program of vouchers "worth small amounts of money which could apply against their rents."

If anyone believes that these reports are unrealistic, I would direct their attention to the administration's recommendations for subsidized housing in the current fiscal year. The proposal by the prior administration for 260,000 new assisted housing unit reservations was reduced initially by the Reagan administration to a level of 175,000 units and then further to less than 150,000 units. This is occuring at a time of continuing, unprecedented need among the poor for decent housing opportunities at affordable levels and the worst total housing depression in this country since statistics have been kept.

In my State of Connecticut alone, 175,000 households are in need of housing assistance due to either the quality of their current housing or their current, excessive rent burdens.

It has been estimated, further, that in New York City, approximately 30,000 individuals are homeless. For those who believe that vouchers may be an appropriate alternative to failed Federal housing policies, I refer them to recent quoted statements by HUD Secretary Pierce which talked of vouchers as a means to eventually phase out any Federal involvement in addressing the housing needs of the poor.

This article goes on to discuss proposals under consideration to eliminate the HUD community development block grant and urban development action grant programs over the next 2 years. These programs have not only been immensely successful, but have also been the major forms of Federal support for the development and revitalization of our urban, suburban, and rural communities. It is ironic that the same administration which just several months ago argued to terminate a variety of categorical grants and consolidate these functions within the community development block grant program, would now come forward to terminate this block grant effort.

How are we to react to other administration recommendations to consolidate programs into block grants when the most successful effort to date in this regard is targeted for extinction? How are we to react to an administration which espouses the need to look to private sector solutions, when the UDAG program which encompasses this principle of Federal leveraging of substantial private investment is now being questioned?

Mr. President, the Congress must send a signal that it does not intend to even consider these draconian and counterproductive policies. We must not allow the panic associated with failed economic policies to reverse this Nation's commitment to the poor and our distressed urban and rural areas. The despair which will result from these recommendations more than offsets the benefits of any negotiating posture.

I ask unanimous consent that this article from the Washington Post be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

SUBSIDIES FOR POOR A TARGET: NEW CUTS REPORTED FOR CITIES, HOUSING

(By Spencer Rich and Herbert H. Denton)

The Office of Management and Budget is seeking to kill the government's largest aid program for cities and drastically cut back the third-largest and now fastest-growing federal welfare program, subsidized housing for the poor, sources in and out of government said yesterday.

The housing program might be supplanted in part by a new and smaller system of housing vouchers, sources said.

The contemplated cuts are certain further to aggrieve city and state officials upset by the cuts in aid the Reagan administration already has made.

To placate and to compensate cities for at least part of their loss, Richard Williamson, head of White House liaison with cities and states, said in an interview during a meeting of the National League of Cities in Detroit that the administration probably would not seek to phase out the $4.6 billion general revenue sharing program for local governments as once threatened, and in fact might move to increase it somewhat.

The possible urban and housing budget cuts are the latest in a series surfacing in recent days as the administration has refined its forthcoming budget for fiscal 1983. Administration officials have made it clear that this will involve further large spending cuts, mostly in domestic programs, in an effort to hold down a 1983 deficit that many experts now think will exceed $100 billion.

The political problems this may cause the administration became clear at the League of Cities meeting. The predictable criticism came from Democrats; New York Mayor Edward I. Koch attacked "the sham and shame of the new federalism," which he said "imperils the cities and is wholly lacking in realism and responsibility."

But Republicans were also critical. Guest speaker Mark O. Hatfield (R-Ore.), chairman of the Senate Appropriations Committee, criticized the administration for cutting domestic programs while increasing defense. And the most stinging criticism of the day came from Vermont Gov. Richard Snelling, a Republican and chairman of the National Governors Association.

"Frankly, I think that what is happening is that we are having an economic Bay of Pigs," Snelling said. "What is happening is that . . . we get tax cuts, which pleases the supply siders. We get budget cuts, which pleases the monetarists. We get dribs and drabs of federalism and we talk about it a lot, which appeases the federalists, and we sure are whacking away at the substance of government. . . . The problem with this potpourri is that it is in fact not an economic policy. Any of the above would be an economic policy. What we have is not an economic policy."

Snelling appealed to the assembled officials to join the governors in seeking an economic summit with the president to discuss budget cuts.

While Snelling was speaking in Detroit, the U.S. Conference of Mayors reported here that OMB Director David A. Stockman had notified the Department of Housing and Urban Development that he wants to phase out by 1984 the existing program of community development block grants and a companion program of urban development action grants. He has also told the department he wants to provide authority in fiscal 1983 for no new subsidized housing units for the poor.

In recent years, the number of new units authorized annually for these programs for the poor, which include the so-called Section 8 program and public housing, has been running at more than 200,000. In fiscal 1982, the Republicans cut this but only to about 150,000. The housing programs are expected to cost nearly $10 billion in fiscal 1983, behind only Medicaid and food stamps for the poor.

Neither HUD nor OMB would comment on the contemplated cuts. The Stockman proposal is not final; HUD Secretary Samuel R. Pierce Jr., said to be angry over the proposal, has the right to appeal to the president, who plans to hold a series of budget meetings with Cabinet officers starting this week.

Sources said Stockman wants to reduce the community and urban development grant programs from the $3.6 billion authorized in fiscal 1982 to $2.4 billion in 1982, $1.2 billion in 1983 and eliminate new budget authority altogether starting in fiscal 1984.

Sources said Stockman wants to cancel some of the 150,000 new subsidized housing units Congress voted for this year, then eliminate all new authorizations for the low-income units in fiscal 1983, reversing two generations of federal housing policy. Other sources said a handful of new units might be funded in fiscal 1983. HUD' own request for fiscal 1983 was for an added 100,000 to 144,000 units.

In place of the existing programs, Stockman reportedly is considering giving large numbers of low-income households, perhaps as many as 200,000, vouchers worth small amounts of money which they could apply against their rents. This idea has been put forward by the president's advisory committee on housing as less costly and otherwise preferable to existing subsidies, which commit the government to keep up payments over periods of 15 years or more.

BENEFITS OF THE AGRICULTURAL EXTENSION SERVICE

Mr. PRESSLER. Mr. President, as the conference committee on the farm bill continues to meet and the Senate will soon consider the conference report on the agriculture appropriations bill, I would like to take this opportunity to express my support for agricultural research and extension activities. Earlier this year, I testified before the Senate Appropriations Subcommittee on Agriculture, Rural Development, and Related Agencies in support of increased funding for agricultural research and extension activities.

I was pleased to see the Appropriations Committee increase the funding level for these programs above the administration's request. These will be Federal dollars well spent. I firmly believe that if we are to continue to increase agricultural productivity, great strides in agricultural research and a continued effective extension service is essential. This is especially important in these days of slowing rates of increases in farm productivity.

Having grown up on a small family farm, I know from personal experience that the Cooperative Extension Service has been very effective in increasing farm productivity. The Cooperative Extension Service has been an excellent example of cooperation among Federal, State, and local governments for more than 100 years.

I have personally been involved with 4–H and other vocational education groups since I was a young boy. I was a member of the local 4–H club, the Humboldt Hustlers, for 9 years, and during this time I enjoyed several great experiences. While I was an active member of 4–H, I was fortunate enough to attend two 4–H club congresses in Chicago, the 1961 World Agricultural Fair in Cairo, Egypt, and I had the honor of giving the "National Report to the President" to the late John F. Kennedy in the White House in March 1963.

More recently, I have had the opportunity to address the 50th National 4–H Conference in April 1980, and this year I was honored by being presented the "Partner in 4–H Award," the highest honor in 4–H.

As chairman of the Congressional Advisory Board for Distributive Education Clubs of America (DECA), I have had the privilege of working with young students throughout the country. Like 4–H, DECA is an organization dedicated to excellance in vocational understanding, civic consciousness, social intelligence and leadership development. I have been very involved in vocational education programs such as 4–H and DECA for many years, and I have received many honors and benefits from these activities.

While not all young people are as fortunate as I was in my 4–H involvement, these youth organizations are still extremely important in the lives of a great number of young people; 4–H is the fastest growing youth organization in the country. In 1970, 4–H membership was 3 million, and presently 4–H has about 5.8 million members; 4–H does not only serve rural America. Of the 5.8 million participants, 39.5 percent live in cities of populations over 10,000 and only 20.5 percent actually live on farms. But this 20.5 percent means that 37 percent of all farm youths are members of 4–H.

The 4–H offers programs to help young people in all areas. A recent study of 4–H in inner city Detroit showed a 60-percent reduction in juvenile crime in the immediate area. In the rural area, 4–H'ers produce millions of pounds of farm products which contribute greatly to the American economy. In all areas of the country, 4–H members learn important characteristics such as sportsmanship, animal husbandry skills and management techniques. These skills will be of great value to these young people later on in life.

Many of the benefits the young people receive from 4–H and these other programs are because of the dedication of the adult leaders. These leaders are area county extension personnel and volunteers. County extension agents and home economists spend about 31 percent of their time on 4–H program activities and volunteer leaders spend about 10 hours for every 1 hour a professional staff person spends. A study showed that each 4–H club leader gives an average of $1,000 per year in terms of mileage, materials donated and contributions given without record. This means the 4–H program is very dependent on the services of dedicated volunteers and this makes it a very cost-effective program.

Federal expenditures on agricultural research and extension activities are dollars well spent. The average Federal outlay for 4–H members is only $12.75, and

America gets a return of about 10 times that amount in the value of volunteer services, and contributions that are stimulated by this investment. This does not take into account the future increases in productivity of agriculture and other areas that this research and training will create. This is especially important today because of the great importance of agricultural exports and the reduced rate of increase in farm productivity.

ARSON

Mr. GLENN. Mr. President, once again the deadly, billion-dollar crime of arson has reared its ugly head. This time we were lucky; no lives were lost. However, the $35 million fiery wave of destruction which struck the historic mill area in Lynn, Mass., left 400 persons homeless and 1,500 persons without jobs. In a single day, this apparent arson wiped out 5 years of rehabilitative efforts in this historic area.

Mr. President, the devastating nature of this crime underscores the need to step up our Federal antiarson campaign. It also underscores the urgency for Congress to pass S. 294, the Anti-Arson Act of 1981, which I introduced to combat the crime of arson. I commend Senator KENNEDY, among others, for his strong and continued support of this legislation. It is only through that kind of support that we can effectively begin to control the crime of arson.

The historic mill area tragedy also underscores the need for an effective Federal law enforcement agency, such as the Bureau of Alcohol, Tobacco, and Firearms' arson enforcement program, with the technical and investigative resources to assist State and local authorities in solving such "incendiary" arson fires.

I ask unanimous consent to have printed in the RECORD an article from the Washington Post entitled "Historic Mill Area Ruined by Arsonist."

There being no objection, the article was ordered to be printed in the RECORD, as follows:

HISTORIC MILL AREA RUINED BY ARSONIST

LYNN, MASS., November 29.—Club-toting National Guard troops patrolled against looters today in the ruins of Lynn's historic shoe mill district blitzed by a $35 million firestorm police say was started by an arsonist.

"It looks like Berlin in 1945," said Fire Chief Joseph Scanlon.

An estimated 400 persons were left homeless and 1,500 lost their jobs because of the Saturday fire, which destroyed 17 buildings and damaged six others in a five-block area, wiping out five years of rehabilitation efforts in this old mill city 10 miles north of Boston.

[The Christian Science Monitor reported that Mayor Antonio Marino had vowed to rebuild the burned-out section but conceded that at least a year probably will be lost until the effort can go forward again.]

Gov. Edward J. King, who met today with local officials, said he planned to go to Washington to ask President Reagan to declare the city of 90,000 a disaster area, making it eligible for federal aid.

The state attorney general offered a $1,000 reward for the arrest and convinction of the arsonist.

"It was an incendiary fire," said state Fire Marshal Joseph O'Keefe. "These things don't happen by an act of God."

A force of 230 guardsmen from the 102nd Field Artillery were working 40-man shifts and patrolling in pairs to reinforce city and state police, said guard Lt. Jeanne Fay.

Nearly 600 firefighters from 79 communities as far as Exeter, N.H., 45 miles north, worked 12 hours to head off the flames hopscotching from structure to structure.

Brisk winds fanned the flames into a firestorm that created hurricane-force gales. An unidentified firefighter said the flames were so hot at times that water from firehoses evaporated before it reached its mark.

A firefighter with a fractured leg and two elderly women suffering smoke inhalation were admitted to Lynn Hospital.

Many of the buildings were old shoe mills converted into shops and apartments. The eight-story Vamp Building, recently converted to 242 apartments at a cost of $12 million, was one of the buildings destroyed.

Lynn had ambitious plans for its affected area, including extensive housing for the elderly and a $26 million community college that was to have occupied some of the old buildings. In all, the downtown renewal effort was expected to cost $200 million.

ANGEL ISLAND

Mr. HAYAKAWA. Mr. President, in 1882 our Nation passed the Chinese Exclusion Act, preventing the immigration of Chinesee citizens unless they were children of U.S. citizens. Regardless of that act, thousands of hopeful Chinese continued to seek entry into the United States. From 1910 to 1940 about 175,000 Chinese—relatives or supposed relatives of American citizens—were processed at Angel Island in the San Francisco Bay. Angel Island became the west coast's Ellis Island

A frame building still stands on Angel Island. That building served as a detention barracks for the thousands of Chinese arriving each year. Our harsh immigration policies caused some of them to wait as long as 2 years to learn if they were to be admitted to the United States or sent back to China. The confusion, despair and hope of those people were expressed in poems that were carved on the walls of the barracks.

That building is now being restored as a part of Angel Island State Park and will serve as a museum. We must not allow ourselves to forget how easy it can be for a nation to adopt immigration policies based solely on racism; the museum will serve as an important reminder for us, and for future generations.

The Los Angeles Times published an article by Sam Hall Kaplan about Angel Island on November 22, and I recommend it to my colleagues. I ask unanimous consent that the article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

ANGEL ISLAND: STORY OF CHINESE IMMIGRATION LIVES ON EMOTIONS PRESERVED IN POETRY ON WALLS OF DETENTION BARRACKS

(By Sam Hall Kaplan)

ANGEL ISLAND, CALIF.—If there is one historic landmark representing America's prejudice in the past toward the Chinese immigrant, it is the so-called "wooden building" on this serene island in San Francisco Bay.

About 175,000 Chinese wanting desperately to enter the United States were processed, and many incarcerated, in the building when it functioned from 1910 to 1940 as a detention barracks for the West Coast's immigration station.

While some of the Chinese waited to be allowed to enter the United States or be deported back to China, they carved into the walls of the building poems in intricate Chinese characters, expressing their confusion, anguish, despair and hope.

". . . I have run into hard times and am uselessly depressed.
There are many obstacles in life but who will commiserate with me?
If at a later time I am allowed to land on the American shore,
I will toss all the miseries of this jail to the flowing current."

The two-story wooden frame building, surrounded outside by a nine-foot wire mesh fence topped by barbed wire, is slowly being restored by the Office of the State Architect as part of Angel Island State Park.

The restoration is intended to serve both as a museum revealing an ignominious chapter of American history and as a tribute to the perserverance and pride of the Chinese who passed through it. The state effort is being watched over by the Angel Island Immigration Station Historical Advisory Committee.

"This is the West Coast's Ellis Island," said Paul Chow, chairman of the committee, as he led a tour of the barracks. "This is the first foothold in America for many Chinese. This is our Plymouth Rock, our Statue of Liberty."

The "wooden building" at times held as many as 500 persons. Some were arbitrarily detained for as long as two years, according to histories of the barracks compiled by the state and the Chinese-American community in the Bay Area.

"America has power, but not justice.
In prison, we were victimized as if we were guilty.
Given no opportunity to explain, it was really brutal.
I bow my head in reflection but there is nothing I can do."

Immigration officials detained them to check their papers and interview them at length to try to determine if they were the children of Chinese who were U.S. citizens—the only group of Chinese, with a few exceptions, allowed into the United States at the time under the Chinese Exclusion Act of 1882.

THE GOLDEN MOUNTAIN

Despite America's prejudice against them, as embodied in the legislation and past policies, the Chinese still believed gam saan—the golden mountain, their name for California—held the promise of a better life than the poverty pervading China in the early part of the 20th Century.

And so they came, some the sons and daughters of the Chinese who had labored in the United States in the 19th Century and

some not. Those who were not were known as "paper sons," having obtained false documents claiming they belonged to a family already here.

These illegal efforts were rationalized by the Chinese, who considered the Exclusion Act unjust in its singling out of their ethnic group. Thousands of other Asians, mostly Japanese, also were processed on the island, but because of treaties between their governments and the United States, few were detained.

"I thoroughly hate the barbarians . . .
They continually promulgate harsh laws to show off their prowess.
They oppress the overseas Chinese and also violate treaties.
They examine for hookworms and practice hundreds of despotic acts."

When the immigrants arrived, the men were separated from the women, including husbands and wives, and not allowed to communicate. Officials feared they would coach each other on their family stories after one was interrogated to determine if they were indeed related to a U.S. citizen.

OBSCURE QUESTIONS

The questions often were obscure, tricking both "paper sons" and actual members of a family. According to immigrant service transcripts, the questions included how many chickens did a family have in China and how many steps led to their attic there.

Everyone was confined to the barracks, which at times became overcrowded, particularly in the men's section where narrow bunks were stacked three high. It was in the second-floor men's area and bathroom that the poems were carved. No poems by women were found.

The women's bathroom presented a special problem. There were a dozen toilets with no partitions between them and, being modest, the women would put paper bags over their heads for privacy. The bags were left outside the bathroom door.

There also were suicides, usually among the women when they learned they were being deported. Few persons had money to pay for their return to China. While the men could work on the return boats as cooks or deckhands, all most women were allowed to do was prostitute themselves. Instead, some chose to hang themselves in the lone shower stall.

Barred from landing, I really am to be pitied.
My heart trembles at being deported back to China.
I cannot face the elders east of the (Yangtze) river.
I came to seek wealth but instead reaped poverty.

The humiliations on the island also left their mark on persons who passed through the station. Few Chinese apparently were willing to talk about their experiences with "Westerners" after they settled in the United States. "They wanted to forget," explained Chow, whose father, Hing Gai Chow, was detained on the island in 1922.

When the island was opened as a state park in 1956, however, the elder Chow returned for a visit, "to rid himself of the fear," recalled his son. But he was told when he got off the ferry that there were no immigration barracks there, only a detention building that had been used for a few prisoners of war in the early 1940s. It was decaying and closed to visitors.

Demolition was planned for the barracks when, in 1970, a park ranger, Alexander Weiss, noticed the characters carved in the walls. The local Asian community was contacted, the poems translated and an effort by Chinese-American students was launched to save the building.

The poems were collected and included in a book, "Island: Poetry and History of Chinese Immigrants on Angel Island 1910–1940," by Him Mark Lai, Genny Lim and Judy Yung, as a project of the Chinese Culture Foundation of San Francisco. One hundred and thirty-five poems in the original Chinese with English translation are included.

When Chow told his aging father in 1976 about the effort to restore the barracks, "he put his suit, tie and hat on and came with me to see for himself," recalled the 53-year-old transportation engineer. "When he found where his bunk was, he began crying, "It's all over, I have no more fear, I am free.'" The elder Chow died in 1977.

"The low building with three beams merely shelters the body.
It is unbearable to relate the stories accumulated on the island slopes.
Wait till the day I become successful and fulfill my wish!
I will not speak of love when I level the immigration station!"

Since visiting the barracks with his father, Chow has been a determined member of the committee lobbying for public and private funds to preserve the building. The state has allocated $325,000 for the present work, but Chow said much more is needed if the museum is to open as planned next May.

"I want it finished soon so that many of the old-timers who went through the barracks and are still living can see it and rid themselves of the yoke of fear and be set free, like my father, before they go to the grave," said Chow.

As for the broader public, Chow feels the museum will be a valuable history lesson in reminding all Americans of what had happened on the island and the contributions the Chinese went on to make in gam saan.

"There are tens of thousands of poems composed on these walls.
They are cries of complaint and sadness.
The day I am rid of this prison and obtain success,
I must remember that this chapter once existed."

Mr. SPECTER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. HOLLINGS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. Morning business is closed.

DEPARTMENT OF DEFENSE APPROPRIATIONS, 1982

Mr. HOLLINGS. Mr. President, a parliamentary inquiry. What is the pending business?

The PRESIDING OFFICER. The pending business will be stated by title.

The legislative clerk read as follows:

A bill (H.R. 4995) making appropriations for the Department of Defense for the fiscal year 1982, and for other purposes.

AMENDMENT NO. 643

The PRESIDING OFFICER. The pending question is on amendment No. 643.

The text of the amendment follows:

Beginning on page 2, line 1, strike out through line 12 on page 3, and insert in lieu therefor the following:

TITLE I

MILITARY PERSONNEL

MILITARY PERSONNEL, ARMY

For pay, allowances, individual clothing, subsistence, interest on deposits, gratuities, permanent change of station travel (including all expenses thereof for organizational movements,) and expenses of temporary duty travel between permanent duty stations, for members of the Army on active duty (except members of reserve components provided for elsewhere), cadets, and aviation cadets; $14,130,781,000.

MILITARY PERSONNEL, NAVY

For pay, allowances, individual clothing, subsistence, interest on deposits, gratuities, permanent change of station travel (including all expenses thereof for organizational movements), and expenses of temporary duty travel between permanent duty stations, for members of the Navy on active duty (except members of the Reserve provided for elsewhere), midshipmen, and aviation cadets; $10,453,767,000.

MILITARY PERSONNEL, MARINE CORPS

For pay, allowances, individual clothing, subsistence, interest on deposits, gratuities, permanent change of station travel(including all expenses thereof for organizational movements), and expenses of temporary duty travel between permanent duty stations, for members of the Marine Corps on active duty (except members of the Reserve provided for elsewhere); $3,151,526,000.

MILITARY PERSONNEL, AIR FORCE

For pay, allowances, individual clothing, subsistence, interest on deposits, gratuities, permanent change of station travel (including all expenses thereof for organizational movements), and expenses of temporary duty travel between permanent duty stations, for members of the Air Force on active duty(except members of reserve components provided for elsewhere), cadets, and aviation cadets; $11,730,381,000.

The PRESIDING OFFICER. The Senator from South Carolina is recognized.

Mr. HOLLINGS. I thank the distinguished Presiding Officer.

Mr. President, I understand that is the amendment relative to the end strength of both the Army and the Air Force. I understand that we are limited to 5 minutes on each side for that amendment and 5 minutes on each side for the ammunition amendment.

Relative to the strength or manpower force of the Army and the Air Force, we go back to 1979. At that time, we debated the end strength of the Army. Just a couple of years ago, we found that when they missed the volunteer call by some 17,000, it was then the Army's position, officially stated in the record, that that made three-fourths of all the divisions in CONUS—the Conti-

nental Army Command of the United States—noncombat ready.

In other words, Mr. President, what we really have, in essence, is a readiness factor. It seems like a small amount in the Office of Management and Budget. You just strike it. It is a great winner with a dollar-for-dollar spend out rate. It has no constituency. You can cut procurement items but you only save, the first year, about 8 cents of the dollar cuts. But you get a dollar-for-dollar result in cutting back on manpower, so it is a wonderful budgeting device.

The Air Force has a readiness of C–1, C–2, C–3, and C–4, where they measure the capability of the manpower, of equipment, of spare parts, of ammunition, and everything else; and these cuts will move units away from C–1 and toward C–4 status.

In the Army, they had hoped to fill that "hollowness." That is not the description of the Senator from South Carolina. That is the description of our distinguished Chief of Staff, General Meyer.

President Reagan came to town and was elected, I am sure, on that particular score. I know that I was reelected on that particular score. We were not going to talk about it. We were going to do something about it. We were going to fill out the hollow Army. We were going to give meaning to the rapid deployment force and credibility to our allies in NATO. They have always faulted us; whereas, we now have a Commander in Chief who does not believe in the draft, a Commander in Chief who does not support registration, and now a Commander in Chief and administration that do not support readiness or credibility.

How can we go to conferences at Geneva and talk with any credibility whatsoever about our intent, when we know all along that we are unprepared from a readiness standpoint to engage in any conventional conflict? Our only posture is that of nuclear war, and that is all we ask for every time we come to the floor of the Senate.

So I hope that my colleagues will look at this particular measure. It starts us toward what Secretary Weinberger described as a need, in the 5-year period, to embellish the Armed Forces by 100,000.

This is just a 6,000 add-on to the Army and a 6,000 end strength add-on to the Air Force. The 12,000 cut is against the President's request of this spring, and I hope everybody on the other side will please support the President of the United States.

Mr. STEVENS. Mr. President, I yield such time as he may require to the Senator from Texas.

Mr. TOWER. Mr. President, I reluctantly oppose the amendment of the Senator from South Carolina. I fully appreciate what he is trying to do, but I point out that the Armed Services Committee was assured by the Army and the Air Force that the proposed cuts would not—I repeat, not—impair operational readiness.

I point out that the Armed Services Committee was assured by the Army and the Air Force that the proposed cuts would not impair operational readiness. In fact, when the uniformed leadership of the Army and the Air Force were presented with the revised budget, they elected to reduce their end strengths rather than suffer cuts in other areas. Neither Congress nor the Office of Management and Budget made that decision for them.

General Meyer stated that he would prefer a slightly smaller Army with modern equipment rather than a larger Army with obsolete weapons. The Army Chief of Staff and the Secretary of the Army recognized this painful fact-of-life in testimony before the Senate Armed Services Committee on February 3, 1981:

Senator HUMPHREY. Let me turn to the area of force structure. General, does the Army place a higher priority on increasing the capability of our current forces or on building additional divisions to increase our force structure?

General MEYER. I believe it is absolutely essential that we fix what we have first, sir.

Senator HUMPHREY. Secretary Marsh: do you concur in this?

Secretary MARSH. Yes, sir, I agree with that very much.

Later in the same hearing, the Secretary of the Army reiterated this same point:

Secretary MARSH. General Meyer and I have talked at some length about the size of the Army and it is clear that if you take the current 24 divisions . . . the first priority before expansion beyond this 24 division force is to bring this force up to the level of readiness and modernization that is necessary.

What will be the effect of maintaining the Army end strength in 1981 at the same level approved for fiscal year 1981? According to the Defense Department the reduction in planned end strengthen growth will allow the Army to consolidate recent recruiting and retention success into improved manpower effectiveness.

The Air Force, on the other hand, advised the committee that—

The reduction of 6,000 is mostly programmatic, reflecting reduced workload in strategic forces as well as in the training establishment where higher retention rates have reduced the number of personnel accessions to meet end strength.

It appears to me, Mr. President, based upon these statements of fact, that the Army and the Air Force will suffer no adverse impact on operational readiness if the amendment of the Senator from South Carolina is defeated.

I hope we will ultimately expand our end strength. For the time being, I think the resources and the funding that go into acquisition and training and pay can better be spent for the modernization of our forces.

Mr. HOLLINGS. Mr. President, I ask unanimous consent that the names of Senators GLENN, MITCHELL, LEVIN, PRYOR and BUMPERS be added as cosponsors of the manpower amendment; that the names of Senators GLENN, MITCHELL, PRYOR, BUMPERS, HEFLIN, LEVIN, and NUNN be added as cosponsors of the ammunition amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HOLLINGS. Mr. President, how much time do I have remaining?

The PRESIDING OFFICER. The Senator has 4 minutes and 26 seconds remaining.

Mr. HOLLINGS. Mr. President, is that on both amendments or one amendment?

The PRESIDING OFFICER. The Senator is correct.

Mr. HOLLINGS. It is on both amendments?

The PRESIDING OFFICER. Yes. That is the time remaining for debate on the two amendments.

Mr. HOLLINGS. Then let me move quickly. I did not realize we divided it that way. That is all right.

We must not impair the end strength of our Armed Forces. Let me answer my distinguished chairman of the Armed Services Committee because he and I work the same side of the street.

Necessarily the Chief of Staff would testify and if I were Chief of Staff I would testify that I would prefer a small army with the proper equipment rather than a large army unequipped. Otherwise, we would just have large confusion. We do not have an army if we do not have the equipment.

But that is not the choice. I have another amendment and we will argue that right now about giving it the equipment.

I am only trying on the end strength to move forward and bring us back, let us say, to 1962. There was not any Vietnam going on at that time. With this particular amendment we will still be 275,000 men less in the Army than what there were back in 1962.

So let us talk about what the real commitment of the United States is—what we are trying to build is not a small army with good equipment or a big lousy army that is unequipped. I am trying to give a credible army with credible equipment, and I will move right to the point relative to the ammunition.

There is no substitute for the actual practice in the field when it comes down to the matter of getting together and firing ammunition.

I have been in that particular regard myself as a young junior ROTC student sent to Fort Baracas, Fla. We thought we knew something about firing. We had simulated the firing of the 155, the 90 millimeter and other weapons and as hotshot college students we got down there and when we finally got the cross-section set and everything else figured, the first round disassembled the gun crew. It took us 15 minutes to reassemble. The target was passing out of sight before we got back together. That was the first day. But we fired down there for a good 6 weeks during the summer, and I

can tell the Senate by the end of the 6-week period we were right on target both in antiaircraft and offshore firing.

So that is what we are really asking for. It is ammunition of a sufficient sum to really make our troops combat ready so that when John Fialka and everyone else writes he will not have us deficient, way down below all the other allied troops at the NATO front. We will have some credibility there.

The fact of the matter is that my distinguished colleague from Texas will come in and move right quickly for $355 million to enhance and get more nuclear warheads. When it comes to $148 million for troops in the field, then we have a real problem there. We are going to do some cutting. Everyone wants more nuclear warheads as if that is what this country needs. Additional nuclear warheads are probably one of the last it needs.

But what we really need is the ammunition for the troops.

I stated on last evening that Clausewitz said that the Nation fights the war that it is prepared to fight.

If we listen to that statement and analyze it we will understand it. We can only fight the war that we are prepared to fight and in reality what we have is an unpreparedness in the rapid deployment force. In the Indian Ocean and Persian Gulf, we stepped down there, we cut the fuel, and Senator GLENN will come with his amendment to that effect. Additionally we have unpreparedness in NATO. We do not have the ammunition there. We pointed out that the staff observed only last year in October that they fired 70 percent of their ammunition allocation in the first month, in October, and so we are not prepared to fight conventionally at NATO.

We are only prepared to fight with respect to a nuclear engagement. That is a tragic thing. Here we have plenty of money. We have $40 billion—we will get to that B–1 amendment. There is not a shortage of funds. We have all kinds of money but we are taking it away from the readiness and the credibility, the morale, the stamina, and the capability of our fighting man in the field. We say what is wrong with him? He is on drugs. We will give him drug counselors. We give him all this money for solicitation to bring him in.

We are spending $1 billion for that. We are trying to hoodwink him and bring him in, but once we have him there we will not let him act like a fighting troop, because of lack of ammunition. They fire one TOW missile a year or one Red Eye if they are on the winning crews, and that kind of nonsense must stop.

So we really need this. This is what the Army asked for. In March they asked for way more, not just for the 60 day, but if we had the 180-day readiness posture which we should have according to the Army green book, then we would be asking for a good bit over our $148 million. So trying to be realistic, our amendment is for the $148 million.

The PRESIDING OFFICER. If the Senator will suspend, the Senator's time has expired.

Mr. HOLLINGS. I thank the distinguished Presiding Officer.

The PRESIDING OFFICER. Who yields time?

Mr. HOLLINGS. Mr. President, I ask unanimous consent to add Senator ROBERT C. BYRD of West Virginia as a cosponsor to both amendments.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. TOWER. Mr. President, again I find myself in fundamental agreement with my distinguished friend from South Carolina because I believe that readiness and sustainability—and what we are talking about when we are talking about ammunition we are talking about sustainability—are enormously important. I think they have been treated as stepchildren for too long, and I think it is largely our fault here in Congress. We have underfunded these things ourselves, so we are making up for past sins.

But as the Senator from Alaska pointed out we do have a substantial increase, actually some 18 percent over what President Carter recommended for this fiscal year that we are appropriating money for, so there is a substantial increase in that area.

The fact is with all of the increase in defense spending we still have to set priorities and we have been pushing a bow wave ahead of us for several years in terms of Army modernization. We are going to be spending an enormous amount of money on improving the field equipment of the Army and that is sadly overdue.

Although I wish very much to support the amendment of the Senator from South Carolina for additional ammunition for sustainability, I think we have to look across the spectrum of what our requirements are and make sure that other requirements are adequately funded.

Therefore, as I say, reluctantly I will oppose the amendment of the Senator from South Carolina. I hope that we will continue to be alive in this body to the problems of readiness and sustainability and next year we will continue to reflect our concern with again another increase in real terms for the purchase of ammunition, missiles, those things that are required to make our forces sustainable in the field and at sea.

AMENDMENT NO. 644

Mr. STEVENS. Mr. President, I only wish to make a few comments concerning the ammunition amendment.

The bill that is before the Senate is $56 million over the budget request of the President for ammunition procurement. It is $780 million over the 1981 fisal year funding level for ammunition procurement. We have had a 50-percent increase in ammunition procurement as far as the recommendations here in this bill are concerned.

There is no question that we have provided as much money as can be effectively spent to increase ammunition procurement.

The difficulty is that as a practical matter we have just given the Department of Defense almost too much money in this area and we are going to cause additional inflation in this one area if we are not careful.

It is a low priority item and again with due respect to my good friend from South Carolina I note that this is one amendment that is part of the larger amendment that he and the Senator from Michigan wished to pursue. It has now been taken apart piece by piece. It is really the B–1 amendment. The idea was to increase all of these other accounts and take the money away from B–1. I hope the Senate will realize that we have already increased the ammunition procurement. There is $780 million more for ammunition in this fiscal year than the last fiscal year. That is adequate, and I hope the Senate will agree.

The PRESIDING OFFICER. All time has expired.

Mr. STEVENS. I move to table each amendment individually and ask unanimous consent that that be in order.

The PRESIDING OFFICER. Is there objection?

Mr. STEVENS. Have the yeas and nays been ordered now on the motion to table?

The PRESIDING OFFICER. Without objection, the motion is in order. The yeas and nays have yet to be ordered.

Mr. STEVENS. I ask for the yeas and nays on each amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. STEVENS. It is my understanding these are to be back-to-back votes?

Mr. HOLLINGS. The first 15 minutes and the second 10.

Mr. STEVENS. Is that ordered, the first 15 and the second 10?

The PRESIDING OFFICER. The Senator is correct.

Without objection, it is in order to order the yeas and nays on both motions.

VOTE ON MOTION TO TABLE AMENDMENT NO. 643

The question is on agreeing to the motion of the Senator from Alaska to lay on the table UP amendment No. 643. The yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. CRANSTON (when his name was called). Mr. President, on this vote I have a live pair with the Senator from Mississippi (Mr. STENNIS). If he were present and voting he would vote "yea." If I were permitted to vote I would vote "nay." I therefore withhold my vote.

Mr. STEVENS. I announce that the Senator from Minnesota (Mr. DURENBERGER), the Senator from Arizona (Mr. GOLDWATER), and the Senator from Maryland (Mr. MATHIAS) are necessarily absent.

Mr. CRANSTON. I announce that the Senator from Nevada (Mr. CANNON), the Senator from Arizona (Mr. DECONCINI), the Senator from Kentucky (Mr. HUDDLESTON), the Senator from Louisiana (Mr. LONG), the Senator from Mississippi (Mr. STENNIS), and the Senator from

Nebraska (Mr. ZORINSKY) are necessarily absent.

I further announce that, if present and voting, the Senator from Arizona (Mr. DECONCINI) would vote "nay."

The PRESIDING OFFICER (Mr. SIMPSON). Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 54, nays 36, as follows:

[Rollcall Vote No. 434 Leg.]

YEAS—54

Abdnor	Grassley	Percy
Andrews	Hatch	Pressler
Armstrong	Hatfield	Proxmire
Baker	Hawkins	Quayle
Boschwitz	Hayakawa	Roth
Burdick	Heflin	Rudman
Byrd, Harry F., Jr.	Heinz	Schmitt
	Helms	Simpson
Chafee	Humphrey	Specter
Cochran	Jepsen	Stafford
Cohen	Kassebaum	Stevens
D'Amato	Kasten	Symms
Danforth	Laxalt	Thurmond
Denton	Lugar	Tower
Dole	Mattingly	Wallop
Domenici	McClure	Warner
East	Murkowski	Weicker
Garn	Nickles	
Gorton	Packwood	

NAYS—36

Baucus	Ford	Metzenbaum
Bentsen	Glenn	Mitchell
Biden	Hart	Moynihan
Boren	Hollings	Nunn
Bradley	Inouye	Pell
Bumpers	Jackson	Pryor
Byrd, Robert C.	Johnston	Randolph
Chiles	Kennedy	Riegle
Dixon	Leahy	Sarbanes
Dodd	Levin	Sasser
Eagleton	Matsunaga	Tsongas
Exon	Melcher	Williams

PRESENT AND GIVING A LIVE PAIR, AS PREVIOUSLY RECORDED—1

Cranston, against.

NOT VOTING—9

Cannon	Goldwater	Mathias
DeConcini	Huddleston	Stennis
Durenberger	Long	Zorinsky

So the motion to lay on the table UP amendment No. 643 was agreed to.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the motion to lay on the table was agreed to.

Mr. STAFFORD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. STEVENS. Mr. President, the next vote is a motion to table the second amendment dealing with the increase in ammunition procurement. Is that correct?

The PRESIDING OFFICER. The question before the Senate is on agreeing to the motion to lay on the table amendment No. 644, that is correct.

Mr. STEVENS. Have the yeas and nays been ordered?

The PRESIDING OFFICER. They have been.

Mr. STEVENS. Is this a 10-minute rollcall vote?

The PRESIDING OFFICER. It is a 10-minute vote.

Mr. STEVENS. May we have order?

The PRESIDING OFFICER. The Senate will be in order.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that I be recognized for 2 minutes.

May we please have order in the Chamber?

Mr. RANDOLPH. Mr. President, I suggest the Chair ask Members to take their seats.

The PRESIDING OFFICER. We shall not proceed until the aisles are cleared and order is in the Chamber. Without objection, the Senator from West Virginia is recognized.

Mr. ROBERT C. BYRD. Mr. President, may we have order in the Senate?

The PRESIDING OFFICER. The Senate will be in order.

Mr. ROBERT C. BYRD. Mr. President, a motion to table is a perfectly legitimate motion. I can recall the times when I was the majority leader when the minority raised quite a fuss about not being able to get up-and-down votes.

These are legitimate amendments and I think the Senate is entitled to vote up or down on at least some of them. I would urge that the majority consider letting us have up-or-down votes on amendments and just not move to table one after the other of these amendments. I say that hoping the majority will take that under advisement. I think the Senate is entitled to a vote. I think the people back home are entitled to know how our friends stand, up or down on these amendments. I say that recognizing that the Senator has every right to move to table if he wants to. But I would like to see some up-or-down votes.

I would suggest that Senators not call up their amendments until they get ready to see them tabled, if we cannot get some understanding that we are going to have some up-or-down votes. I do not want to delay this bill, and there is an interest, I am sure, on the part of the majority—and I can appreciate that—in seeing this bill finished today.

I can say, however, that there will be no time agreement on any amendments unless we can get up-or-down votes on at least some of them. I cannot stop any Senator from moving to table an amendment once it is up, but I would suggest that, until we get some understanding that we are at least going to get some up-or-down votes, we not call up our amendments until after we make our speeches on them. Otherwise, we will have our amendments tabled as I had mine tabled.

Mr. STEVENS. Mr. President, I would be more than willing to agree that we have an up-or-down vote on the amendment suggested by the Dear Colleague letter of the Senator from South Carolina and the Senator from Michigan. That was an anti-B–1 amendment that indicated that the funds that would be deleted from the B–1 bomber would be allocated to certain defense modernization readiness priorities. We have now voted on five of those individually. I understand we are going to vote on the other 10 individually. It looks like it is a process of voting to increase military spending, apparently for the Record, but it really is not at all.

I would be more than happy to discuss up-or-down votes on substantive amendments. These are dilatory amendments. The Senators indicated to the Senate they intended to present them all at once and they are being presented seriatim. I would be happy to discuss a time agreement right now to vote on the B–1 bomber, to vote on the MX, and to vote on the bill, and to agree that we will have up-or-down votes on the B–1 bomber, the MX, and specific amendments that are substantive in nature. But dilatory amendments ought to be tabled. There is no other way to control the floor to try to get to the substantive amendments.

Mr. ROBERT C. BYRD. Will the Senator yield?

The PRESIDING OFFICER. The minority leader is recognized.

Mr. ROBERT C. BYRD. Mr. President, I am sure that the distinguished acting Republican leader does not intend to say that the amendment I called up yesterday was a dilatory amendment. If I really wanted to be dilatory, I could call it up again. I could find a way to call up my amendment again.

Mr. STEVENS. I am certain that the minority leader could do that. As I said yesterday, his was a very ingenious amendment. We treated it with the respect it should be given, debated it at length, and tabled it because it is one of these amendments that we anticipate going through somehow until we get to the question of the B–1.

Does my good friend from South Carolina want to offer the whole amendment and go after B–1 and these reallocations to readiness and defense?

Mr. President, they are not dilatory if they are in fact taking money from one part of the bill and putting it in other functions. I would be happy to agree to an up-or-down vote at a time certain on the Hollings-Levin amendment whenever the Senator is ready to offer it. But until that time, I think we should continue to try and clear the decks and get ready for those major amendments when they do come.

The PRESIDING OFFICER. The Senator from South Carolina.

Mr. HOLLINGS. If the Senator will yield 30 seconds, the distinguished Senator from Ohio right here is very much in favor of the B–1 and I am very much opposed to it. It is a fundamental difference. He happens to agree with the readiness provision and the manpower provision, and I happen to agree with it. Under those circumstances, which is a difference of opinion among the body of 100 Senators, when we present them individually and not to your tune, taste or liking, characterizing them as dilatory is uncalled for.

They are very serious amendments. We would be delighted to debate them one by one. If we had had the time we would have had many of them in the Appropriations Committee. As you know, we added on the *Iowa* and we will add on some more that you did not only think were dilatory but uncalled for. We can add on some. But just because we on this side are trying to get readiness and credibility back to our Armed Forces, we should not be characterized as being dilatory.

Mr. STEVENS. Mr. President, what is the time situation? I would be happy to continue to debate it. I think we were intended to vote on this amendment. I ask that we proceed with this vote. I

shall be happy to discuss it with my friend at length after we dispose of it.

VOTE ON MOTION TO TABLE AMENDMENT NO. 644

The PRESIDING OFFICER. The time allowed has expired. The question is on agreeing to the motion to table amendment No. 644. The yeas and nays have been ordered. The clerk will call the roll.

The bill clerk called the roll.

Mr. CRANSTON. Mr. President, I have a live pair on this vote with the Senator from Mississippi (Mr. STENNIS). If he were present and voting, he would vote "yea." If I were permitted to vote, I would vote "nay." Therefore, I withhold my vote.

Mr. STEVENS. I announce that the Senator from Minnesota (Mr. DURENBERGER), the Senator from Arizona (Mr. GOLDWATER), and the Senator from Maryland (Mr. MATHIAS) are necessarily absent.

Mr. CRANSTON. I announce that the Senator from Nevada (Mr. CANNON), the Senator from Arizona (Mr. DECONCINI), the Senator from Louisiana (Mr. LONG), the Senator from Mississippi (Mr. STENNIS), and the Senator from Nebraska (Mr. ZORINSKY) are necessarily absent.

I further announce that, if present and voting, the Senator from Arizona (Mr. DECONCINI) would vote "nay."

The PRESIDING OFFICER. Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 55, nays 36, as follows:

[Rollcall Vote No. 435 Leg.]

YEAS—55

Abdnor	Gorton	Percy
Andrews	Grassley	Pressler
Armstrong	Hatch	Proxmire
Baker	Hatfield	Quayle

PRESENT AND GIVING A LIVE PAIR, AS PREVIOUSLY RECORDED—1

Cranston, against.

NOT VOTING—8

Cannon	Goldwater	Stennis
DeConcini	Long	Zorinsky
Durenberger	Mathias	

So the motion to lay on the table amendment No. 644 was agreed to.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the motion was agreed to.

Mr. BOSCHWITZ. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The Senator from Pennsylvania is recognized.

Mr. SPECTER. Mr. President, the defense budget for fiscal year 1982, including substantial funding for the B–1 bomber, poses difficult and complex issues which require the balancing of many factors in making final judgments. Historically, or at least until World War II, the United States has shunned military power because of the protection afforded by the vast oceans which separate us from Europe and Asia. Except for noting this attitude, which still lingers in our national consciousness, it is not necessary in this brief statement to detail the historical events which make preparedness a regrettable necessity.

The arms race makes little sense, but unpreparedness makes even less sense. As nations spend billions for guns while millions of people do not have bread, let alone butter, we wonder about the allocation of our gross national product between defense and social programs. When we observed the advanced social programs of Norway in the late 1930's, it was obvious that those programs meant little in the face of invasion by the German hobnailed boot. So, perhaps, 6 percent of our gross national product is realistic for national defense.

The rationale for nuclear armament is built on a series of hypotheticals. If the Soviets invade the Persian Gulf then the United States will———; or if the Soviets take Poland or move farther into Western Europe, then we responded by———.

Our possible responses are not articulated for the stated reason that we should not commit ourselves in advance or rule out any options. However, the more likely reason is that we simply do not know what we should do or would do in those contingencies.

Somewhere in the hypothetical scenarios, the contingency inevitably arises that we would be subject to nuclear blackmail or Soviet aggression in some critical area or even Soviet attack on the United States itself if we do not have a massive retaliatory force. Nobody knows how these hypothetical situations would work out; but many of us are unwilling to take the chance, so we return to the conventional lessons of history.

History teaches that military strength deters aggression by others, and experience with Soviet foreign policy underscores that generalization.

As the U.S. Senate debates this defense appropriations bill, our Nation, the Soviet Union and other countries are substantially building up their military power. All profess an intention not to use such force for offensive purposes, but only for defense or to deter aggression by others.

It is anomalous that the Soviet Union has an extensive system to defend against nuclear attack since we in the United States find it inconceivable that our Nation would ever attack the Soviet Union. On the other hand, the United States has very little by way of such defensive capability even though we feel that the possibility of Soviet attack, even if remote, is much more likely than the reverse.

In any event, the temper of the times is to be strong. The debate rages over the issue of superiority versus parity with the more popular expression being that our military strength should be second to none, which means at least a stalemate, if not a slight practical edge.

In light of the potentially catastrophic consequences of being unprepared, it is my personal judgment that we must be militarily strong. It is a form of insurance policy. This particular insurance is very expensive; but, as with any insurance, the insured prefers to pay the premium and not collect rather than incur the risk-event and collect.

As is usually the case, the questions on the defense appropriations bill are easier to formulate than the answers:

First. How much can we afford to spend for defense considering our gross national product?

Second. How much can we afford to spend for defense considering the competing needs in social programs?

Third. How much can we afford to spend for defense considering the current deficit and its impact on inflation, interest rates and unemployment?

Fourth. How much can we afford not to spend for defense considering the Soviet potential for aggression?

Fifth. How much can we afford not to spend for defense considering the dire consequences of being unprepared?

Sixth. What impact will our military strength have in stimulating strategic arms reduction talks?

Against this background, I have decided to vote in favor of the current request for funding for the B–1 bomber. I make no commitment for future votes on funding because future events will inevitably raise new issues. I have had the benefit of extensive briefings by the Department of Defense and the Air Force in Washington.

I have read extensively about the B–1 bomber by those who favor and oppose it. I have also consulted with people who favor and oppose the B–1 including colleagues in the Senate. In addition, I visited Edwards Air Force Base on November 28, last Saturday, where I observed the B–1 bomber and the B–52 bomber and received extensive additional briefings on those airplanes.

There are no exact answers to how long the B–1 can penetrate the Soviet air defense. That depends on the evolving level of Soviet defenses and the evolving status of our countermeasures to avoid detection. I am persuaded that the B–52's are too old to be relied upon until we have the advanced technology bomber, commonly known as the Stealth bomber. Even beyond the time when the B–1 can penetrate, it has significant utility as a cruise missile carrier.

Congress, as well as the Department of Defense, must be vigilant to avoid escalating costs on the B–1 bomber. Secretary Caspar Weinberger has given positive assurances that change orders will not be tolerated and that the contracts

on the B–1 will be extremely tightly drawn to avoid the known pitfalls of other escalating contracts. The private contractors have verified the toughness of the Department of Defense negotiating posture.

I am optimistic that congressional support of the B–1 bomber and a strong defense generally will provide President Reagan with the bargaining strength to succeed in the strategic arms reduction talks. There is reason for optimism on the President's initiatives in missile reduction in Europe. The Soviet response did not totally close the door. It is a hopeful sign that United States and Soviet negotiators began talks in Geneva on limiting nuclear weapons in Europe on the same day, November 30, 1981, that debate began in the Senate on the defense appropriations bill.

Certainly, unilateral disarmament makes no sense. The mixed messages from the Carter administration to the Soviet Union on this subject were unsuccessful. While it is futile to speculate on the possibility of a causal connection between President Carter's cancellation of the B–1 bomber, and other lack of military preparedness, and the Soviet invasion of Afghanistan, it is reasonably clear that the Soviets do not respect or respond to weakness with good deeds.

I am convinced that President Reagan places a very high priority on having a balanced budget by 1984. It may well be that the only way to achieve that balanced budget by 1984 will be to rethink defense appropriations and expenditures. Given a strong hand by Congress in our willingness to prepare militarily, President Reagan may be able to reduce the table stakes in the international military-poker game as a means of attaining the goal of a balanced budget by 1984. As I see it, that is our best bet and the best judgment call.

While I understand the necessity for secrecy, I am concerned that Congress must have appropriate access to the information necessary to discharge our duties in voting on these and related issues. I was dissatisfied with the debate in the Appropriations Committee because some of my Senate colleagues were interrupted in their arguments by other colleagues on the ground that they were making inappropriate disclosures of classified information even though the session was closed to the public and was attended only by Senators and staffers.

For that reason, I voted "present" when the issue of the B–1 bomber came before the Appropriations Committee. I have since obtained answers to the questions which were raised in those discussions, but I think it important to express my reservations about those limitations on our discussions and on any process which fails to make appropriate disclosure on matters on which we are called upon to vote.

Mr. President, while I have the floor I shall briefly comment on another subject that relates to use of coal instead of oil by our Armed Forces.

I commend the subcommittee on defense appropriations for the specific provisions which prohibit the use of funding for conversion from coal to oil and encourage the use of coal.

I emphasize the importance of these provisions for two reasons: First, in the national interest we should use coal wherever that is possible as an alternative to oil because of the stranglehold of OPEC oil, its escalating costs, and very difficult strategic position that we are in in reliance on such oil.

Second, because of the abundance of coal in this country with particular reference to my own State of Pennsylvania, I was pleased to see the language in the appropriations defense bill which prohibits conversions from coal to oil and which will encourage the use of coal as a very important item both nationally for defense and in the national interest to eliminate the dependence on OPEC oil and for States like Pennsylvania which have an abundance of coal.

I yield the floor.

The PRESIDING OFFICER (Mrs. KASSEBAUM). The Senator from Alaska is recognized.

Mr. STEVENS. Madam President, it is my understanding that the Senator from Nebraska (Mr. EXON) has an amendment dealing with force modernization. We have discussed this matter, and he is agreeable to a time limitation of 30 minutes equally divided, with the understanding that there will be an up-or-down vote at the end of that time. If that is correct, I am prepared to make that request.

Mr. EXON. Madam President, will the Senator yield?

Mr. STEVENS. Yes.

Mr. EXON. Madam President, the acting majority leader has accurately described the agreement we have entered into, and I will seek the floor on my own in a few moments. I will offer an amendment with regard to force modernization structure with the understanding that I would be entitled to an up-or-down vote on the amendment, the half hour time limit equally divided to be followed by a rollcall vote.

Mr. STEVENS. Madam President, I make that request. It is my understanding that any amendment to the amendment would have to be germane. I know of none that will be offered, but we could make provision for 10 minutes in the event there is an amendment to the amendment.

Mr. ROBERT C. BYRD. Madam President, reserving the right to object, will the distinguished Senator put a time limit on any amendment in the second degree?

Mr. STEVENS. I did ask for a time limit of 10 minutes on any amendment in the second degree, with the proviso that such amendment would have to be germane.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

UP AMENDMENT NO. 728

(Purpose: To increase by $60 million the funds available for the Army's Force Modernization program)

Mr. EXON. Madam President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Nebraska (Mr. EXON) proposes an unprinted amendment numbered 728:

On page 7, line 13, delete the following: "$15,354,400,000" and in lieu thereof insert the following: "$15,414,400,000".

Mr. STEVENS. Madam President, I ask for the yeas and nays on the Senator's amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. EXON. Madam President, I was quite disappointed to see my friend from Alaska ask for the yeas and nays on the amendment I just offered, because I was very hopeful that the majority side of the aisle would agree by voice vote to this amendment. But since that is not the vogue in the U.S. Senate today on this vital matter affecting our national defense, I must go into some type of an explanation.

I would first like to say, Madam President, I have been quite surprised by some of the statements that have been made on the floor by those of us who feel that readiness is such a key area that we want to add to the reductions that have been made by the Appropriations Committee.

Let me start out by saying that I hope those on the other side of the aisle, indeed those on this side, would not misinterpret this Senator's remarks with regard to the fact that I am automatically opposed to the B–1 bomber or the MX because I think force structure is so vitally important.

With that and with the clear understanding, hopefully, that this Senator stands ready to support more for readiness for our defense forces, which we have been led to believe for a long, long time, especially during the Presidential campaign of last year that ended last November, that readiness of our forces, including our rapid deployment force, was critical to this Nation's defense in meeting the ever-increasing threat that we see by the potential enemy around the world, Madam President, let me say that the amendment I am offering today goes to the very heart of the issue of force readiness that has been discussed so much on the floor during the debate on this measure and, indeed, with other considerations before the Senate.

My amendment restores $60 million to the Army Operation and Maintenance Appropriation that was cut by the Appropriations Committee. Restoring these funds will provide the full amount requested by the administration in fiscal year 1982 for the Army's force modernization efforts.

Madam President, it is my understanding that this cut that was made by the Appropriations Committee of the Senate of about $60 million contrasts with only a $5-million cut made on the House side. Therefore, as we address this amendment, I hope my colleagues on both sides of the aisle will give serious consideration to it, rather than following blindly the

dictates of the leadership on that side of this important body.

Madam President, the operation and maintenance accounts are not often well understood, so I want to take a minute to describe for my colleagues why I am proposing to restore the amount cut by the Appropriations Committee. And I hope that those few Senators gathered on the floor will listen carefully to what I say and those in their offices, or staffs listening to my comments will at least take into account what the Senator from Nebraska is saying and advise their Senators how they think they should vote, at least advise their Senators as to what this is all about rather than having them come through the door, as is customary, go down to the well and cast a vote as they are instructed to do by the leadership.

The appropriation for the Army's force modernization efforts from which these funds were cut provides the resources to finance the operation and maintenance costs associated with supporting new equipment that is purchased through the procurement accounts. Without the necessary support costs in the O. & M. account, the new equipment that the Army buys would literally never leave the factory.

Let me give some specific examples of what this force modernization line item buys. The funds in this line item which the Appropriations Committee cut, and which my amendment would restore, pay the transportation costs of new equipment from the factory door to the operational unit in the field. The costs associated with insuring that the troops are adequately trained to operate this equipment are paid from this line. Any changes in stockage of spare parts or equipment to maintain the new equipment are paid from this line.

The list goes on and on, Madam President, but the point is clear, and the central point is simply this: In this Senator's opinion, at least, there are few other areas in this appropriations bill that have a greater and more immediate impact on force readiness than the funds associated with the force modernization efforts. What good are the billions that we appropriate to buy new equipment if we do not provide the funds necessary to fully utilize the equipment once it comes off the production line.

Madam President, I have said before, and I repeat, too much of this administration's defense posture are "show and tell" in their impact. This $60 million amendment is not good "show and tell," but it is essential to our basic readiness requirements.

The Appropriations Committee noted correctly in their report that there have been some delays in getting new equipment to the field since the budget was submitted. In the committee's opinion, these delays justify the reductions in the amount requested by the Army. But the committee failed to note that there have been and will be deliveries of other equipment more quickly than the Army originally anticipated in their budget request.

For example, the Army now expects to receive 211 more improved TOW vehicles and 25 more improved Hawk air defense missile systems during fiscal year 1982 than this budget supports. These are only two examples, Madam President. In fact, the increases from the original budget estimate for the more rapid delivery of equipment to the field exceed the decreases expected from delayed deliveries by $26.5 million. In other words, the amount included in the committee bill is $86.5 million below the amount the Army now says is required to meet this vital readiness function in fiscal year 1982. This amendment restores only two-thirds, or $60 million, of this shortfall.

Madam President, this modernization effort was one of the programs which the Reagan administration strongly emphasized in their amendments to President Carter's fiscal year 1982 defense budget. In the October budget cuts in the Defense Department, this line item was left untouched. The administration continues to support the full budget request for this program, which my amendment restores.

And I hope that my colleagues would understand that. And I might add that since the mood is to support the President, not unlike the old phrase "Support Your Local Sheriff," it seems appropriate that we should apply that term now, especially to those on that side of the aisle. I agree that the $60 million amendment that I have offered for readiness is not very good "show and tell," but I urge my colleagues to consider that it is critically important as far as our readiness is concerned.

In closing, Madam President, regardless of the charges that have been made today, this is not one of those frivolous amendments made to delay the bill. On the contrary, I hope I have been able to demonstrate to the Senate that the reductions suggested by the Appropriations Committee here appears to run counter to the consensus in this body to improve the operational readiness of our military forces.

I urge my colleagues to support the amendment.

May I inquire of the Chair how much time I have remaining on my 15 minutes?

The PRESIDING OFFICER. The Senator from Nebraska has 5 minutes and 40 seconds remaining.

Mr. EXON. I reserve the remainder of my time.

Madam President, I yield 2 minutes to the Senator from Michigan.

Mr. LEVIN. Madam President, I thank my friend from Nebraska. I congratulate him on his amendment. And I ask unanimous consent that, if I am not already listed as a cosponsor of his amendment, I be added as a cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LEVIN. Madam President, this amendment, like the other amendments, goes to the cutting edge of America's readiness. I was very much intrigued by my friend from Alaska when he talked about these amendments as being dilatory. These amendments represent moneys which were in the Reagan March budget. They represent, I think without exception—perhaps the Byrd amendment of yesterday would be one—but for the most part they represent amendments in moneys that were in the Senate authorization bill. They represent moneys that were in the House authorization bill.

And may I say, in the case of the amendment of my friend from Nebraska, they represent moneys that were in the Reagan October request. Even when the President proposed that we make cuts in readiness on Indian Ocean readiness and presence, cuts in the many other areas that are set forth in that "Dear Colleague" letter which my friend from Alaska has quoted from, even when the President suggested those readiness cuts in October, the one that the Senator from Nebraska is seeking to restore was not cut—was not cut—in the Reagan October request. That was cut by the Appropriations Committee.

So while all of these amendments have in common, or nearly all, that they were in the original Senate authorization bill, in the original Reagan bill, this one is not.

The PRESIDING OFFICER. Will the Senator suspend? He has used his 2 minutes.

Mr. LEVIN. I wonder if I might have 1 more minute to put in these figures.

Mr. EXON. I yield.

Mr. LEVIN. Madam President, the Reagan October request for this item, this critical readiness Army item for the Army, was $976 million. The bill which came out of the Senate Appropriations Committee was $916 million. Again may I say that this amendment would add back $60 million to this line item to restore the President's October request.

I think it is inappropriate for the Appropriations Committee to suggest that these amendments, when they were in the Senate authorization bill originally before it went to conference, when they were in the President's March request—and in this case when it was in the President's October request—are dilatorius or frivolous. These are serious. They deal with the B–1 bomber. People should be able to express themselves on these items. I am sorry to see tabling motions because I think there should be up-or-down votes.

The PRESIDING OFFICER. Who yields time?

The Senator from Alaska is recognized.

Mr. STEVENS. I can assure my friend from Michigan that there will be an up-or-down vote and I hope the Senate will sustain the Appropriations Committee.

Force modernization is a new descriptive category in Army operation and maintenance. Over $900 million is provided for this purpose. The funds are spread throughout the bill.

We examined this category and we found that based upon Army estimates, the delivery of the weapons system to be supported—maintenance and operation costs for new vehicles, new systems—fewer M–1 tanks will be delivered, fewer infantry fighting vehicles will be delivered, and other equipment than was originally planned in the March estimates for fiscal year 1982.

Our information indicates that there are 103 fewer M–1 tanks, 165 fewer trucks, and 6 fewer Tacfire artillery systems. All of this means less money

will be required. I am delighted that our friends have pointed out we have done our job. Our job is to look over these requests and to see if there is any fat in them. There is over $60 million in excess of requirements in this $900 million account. So we recommended a reduction of $60 million.

It is a reduction from the President's request but it is in line with the authorization. It is money that we all agree is not needed in 1982 to maintain force modernization. There is just no reason for us to include in this bill moneys that cannot efficiently be spent within fiscal year 1982.

I said to my good friend from Nebraska I am delighted to have the opportunity to agree to an up-or-down vote on this because it is one of the items in the Dear Colleague letter that does address a reduction that was made by the committee with due deliberation because the money just is not needed. It is in excess of the requirements of the Army for force modernization. There is absolutely no reason to provide $60 million more than is necessary to meet this requirement.

I hope the Members of the Senate will examine our suggested reductions and will ask us to defend them. I am willing to defend this one anywhere because with over $900 million in an account that did not even exist last year—I am corrected. It is not an account. It is a category of expenditures. It is a breakout of a category of expenditures, force modernization.

To take $60 million from that and to say this is the portion of savings which we are going to make and I am proud of that. I am delighted our committee agreed with us. I see nothing here to indicate that we are wrong.

The overstatement of operations and maintenance costs, the delay in the delivery of the vehicles and systems I mentioned, indicate to us that there is absolutely no reason to give more money than is required for the Army for force modernization.

I would call the attention of the Senate to the fact that in doing this, in taking the $60 million out of this, we put the money into real property maintenance and said to catch up as far as the backlog in real property maintenance.

We have an unacceptably high backlog of maintenance and repair that has been shoved back each year. We said, "Here are $60 million you do not need for this force modernization and we want you to use the $60 million and try to catch up on some of the real property maintenance, some of the buildings and systems that are deteriorating, not only in this country but throughout the world, which will cost us a great deal more in the future if we do not dedicate that money to it now."

The PRESIDING OFFICER. Who yields time?

Mr. EXON. May I inquire how much time I have remaining?

The PRESIDING OFFICER. The Senator from Nebraska has 2 minutes 16 seconds.

Mr. EXON. Madam President, I am disturbed to hear the acting majority leader, who has been very active on this whole bill, indicate that there was fat in the budget, in this item, proposed by the President of the United States.

We all know and the record is clear that this President of the United States is the greatest budget cutter who has ever come down the pike. I think it is most unfair for my friend from Alaska to indicate that the President would send us a figure that he still stands by that has fat in it. At least, that is the first time that fat in the budget has been acknowledged on that side of the aisle.

Madam President, it is very interesting to me that in all of the additions that we have attempted to make to this appropriations process only one has survived. I give credit to my friend from Alaska because I know that he was against adding the money for the old battleship.

I guess what we are confronted with here, Madam President, is that everything we propose to increase readiness is voted down with tabling motions. The only thing that passed was the old battleship. Can anyone in this country believe that the only change that should be made in the recommendations of the Appropriations Committee is spending more money to bring an old tub out of mothballs?

I think it is particularly ironic that that is the only readiness item that has passed on the floor of the Senate.

In conclusion, I would simply say once again that the B–1 and the MX, as important as they are, are great show and tell items, but readiness is still a critical factor.

If I had the time, I would go into several other items where the Army has advised us that they are going to have earlier delivery of some of the weapons systems. While I would agree with my friend from Alaska that some would not be delivered on time, as I said in my opening statement, this does not restore all the money that is needed; only about two-thirds of it.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. EXON. I yield the floor.

Mr. STEVENS. Madam President, I thank my good friend. Again, I can only tell the Senate that we evaluated in depth the information provided by the Army on their new systems, their new vehicles—tanks, vehicles, trucks. This category of funds is to provide for the operation, servicing, and maintenance of those new systems as their forces modernize, and there is just no reason to give them more money than they need. If anyone wants to be known as a person who really is willing to throw money which is not needed at the military, then I can suggest that this is the amendment to vote for.

Our committee recommended a reduction to reflect the reevaluation of all the requirements in the force modernization program for the Army and we reduced them, took $60 million out of a total program of over $900 million.

Madam President, I yield back the remainder of my time.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the amendment of the Senator from Nebraska.

The yeas and nays have been ordered. The clerk will call the roll.

Mr. STEVENS. I announce that the Senator from Minnesota (Mr. DURENBERGER), the Senator from Arizona (Mr. GOLDWATER), and the Senator from Maryland (Mr. MATHIAS) are necessarily absent.

Mr. CRANSTON. I announce that the Senator from Nevada (Mr. CANNON), the Senator from Arizona (Mr. DECONCINI), the Senator from Louisiana (Mr. LONG), and the Senator from Nebraska (Mr. ZORINSKY) are necessarily absent.

I further announce that, if present and voting, the Senator from Arizona (Mr. DECONCINI) would vote "yea."

The PRESIDING OFFICER. Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 37, nays 56, as follows:

[Rollcall Vote No. 436 Leg.]

YEAS—37

Baucus	Glenn	Mitchell
Bentsen	Hart	Moynihan
Biden	Hollings	Nunn
Boren	Huddleston	Pell
Bradley	Inouye	Pryor
Bumpers	Jackson	Randolph
Byrd, Robert C.	Johnston	Riegle
Chiles	Kennedy	Sarbanes
Cranston	Leahy	Sasser
Dodd	Levin	Tsongas
Eagleton	Matsunaga	Williams
Exon	Melcher	
Ford	Metzenbaum	

NAYS—56

Abdnor	Gorton	Packwood
Andrews	Grassley	Percy
Armstrong	Hatch	Pressler
Baker	Hatfield	Proxmire
Boschwitz	Hawkins	Quayle
Burdick	Hayakawa	Roth
Byrd, Harry F., Jr.	Heflin	Rudman
	Heinz	Schmitt
Chafee	Helms	Simpson
Cochran	Humphrey	Specter
Cohen	Jepsen	Stafford
D'Amato	Kassebaum	Stennis
Danforth	Kasten	Stevens
Denton	Laxalt	Symms
Dixon	Lugar	Thurmond
Dole	Mattingly	Tower
Domenici	McClure	Wallop
East	Murkowski	Warner
Garn	Nickles	Weicker

NOT VOTING—7

Cannon	Goldwater	Zorinsky
DeConcini	Long	
Durenberger	Mathias	

So the amendment (UP No. 728) was rejected.

Mr. STEVENS. Madam President, I move to reconsider the vote by which the amendment was rejected.

Mr. McCLURE. Madam President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. STEVENS. Madam President, I inform the Senate that it is my understanding that the Senator from Pennsylvania (Mr. SPECTER) has an amendment and then following that amendment the Senator from Ohio (Mr. GLENN) will have an amendment.

We are happy to try to schedule any amendments that Senators wish to discuss.

I believe we are going to be prepared to accept the amendment of the Senator from Pennsylvania, but I will wait and hear it being explained first.

UP AMENDMENT NO. 729

(Purpose: To add $4,000,000 for the Field Artillery Ammunition Support Vehicle)

Mr. SPECTER. Madam President, I send to the desk an amendment and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The bill clerk read as follows:

The Senator from Pennsylvania (Mr. SPECTER) proposes an unprinted amendment numbered 729.

On page 17, line 11, strike out "$3,958,600,000" and insert in lieu thereof "$3,962,600,000".

Mr. SPECTER. Madam President, this is a rather modest amendment in the amount of $4 million, considering the $200 billion-plus defense appropriations bill which we are considering today.

The specifics are that $4 million would be added for long-lead funding for the field artillery ammunition support vehicle, in accordance with the President's March and September budget request. I believe this relatively small sum is very important in making sure that we have the production lines for this vehicle so that they will remain open to insure that it be produced rapidly and efficiently. It has been estimated that deleting the funding of this $4 million will delay production of the FAASV by 7 to 10 months and will undoubtedly drive the unit costs much higher.

The need for such an ammunition vehicle has been well documented. Soviet military strategy has always placed great emphasis on the use of massed artillery to saturate enemy positions prior to attacking with its ground forces. Given Soviet preponderance in numbers of tanks and artillery forces, NATO forces must be able to survive longer than their Soviet counterparts and must be able to make every artillery round count.

NATO must, therefore, possess artillery units that can survive a massive Soviet attack and be ready to fire. In order to achieve such a result, all elements of our artillery units need to be provided adequate protection and sufficient mobility. NATO now has a self-propelled howitzer, the M–109 A1/A2/A3, without a comparably effective and protected ammunition vehicle to supply it.

The FAASV was developed in order to meet that requirement. The Army, in August 1980, contracted for five prototypes to be delivered in the first quarter of 1982. The testing for these vehicles is scheduled to be completed by April 1982 and production is expected to begin in September of that year.

The $4 million the Army has requested for long-lead funding in the 1982 budget will provide the engines and transmissions for these vehicles. This is the first time long-lead funding has been requested for such vehicles because the company that produces the engines, Detriot Diesel, needs assurances that enough vehicles will be produced to keep its production lines open for these machines. But, the company that produces the FAASV's chassis also risks having to close its production lines if these funds are not provided.

If this $4 million is not added now we risk delaying the entire program at a time when the need for an adequate well protected mechanized and mobile ammunition support vehicle is critical, and I think that it is a relatively modest sum on a program of obvious importance.

I urge adoption of this amendment.

I yield the floor.

Mr. STEVENS. Madam President, we had deleted the $4 million for the field artillery ammunition support vehicle as being premature. It was my understanding at the time that that item would have been in the House bill and as we have explained to the Senate before, the way we dealt with this bill we were not sure exactly what was in the House bill.

The amendment will not be in conference unless we do accept the Senator's amendment.

It was our understanding that it would be in conference and it is budgeted and the Army does indicate that it does have the need for the money.

What I am saying is I am most willing to recommend to the Senate that we take the amendment of the Senator because we wanted this to be a conferenceable item and without his amendment it would not be.

The PRESIDING OFFICER. Is there further debate on the amendment?

If not, the question is on agreeing to the amendment of the Senator from Pennsylvania.

The amendment (UP No. 729) was agreed to.

Mr. STEVENS. Madam President, I move to reconsider the vote by which the amendment was agreed to.

Mr. COHEN. I move to lay that motion on the table.

MILITARY HANDGUNS

Mr. COHEN. If I may have the attention of the distinguished acting majority leader, it is my understanding that the Defense Department has made a decision, at least on a preliminary basis, to explore the feasibility of moving from the current .45 caliber, .38 caliber revolvers in our military services to a uniform 9 millimeter revolver.

It is also my understanding that the House Armed Services Committee has recommended and has indeed provided funding to allow the Department of Defense to carry out the testing and evaluation procedures that would allow DOD to make a proper decision as to who should have the contract on that particular weapons system.

Under the appropriations bill money has been deleted, not provided for, but there has been express provision that would delay the implementation of this program.

I was wondering if I could explore with the Senator from Alaska whether or not we could not have some understanding as to what the difficulty seems to be with the 9 millimeter weapon.

I have heard, for example, that there is some concern that one firm, namely Beretta, has been sort of "wired" for selection by the Department of the Army.

I will say to my friend from Alaska that I am sensitive to such types of charges because indeed some years ago when I was in the House there was a report in the New York Times that a contract for a certain machinegun that a company in Maine was a competitor for had been "wired" to a Belgian firm, and a deal had been made. That was first denied by the administration at that time. We ended up by bringing a lawsuit against the Department of Defense, receiving a preliminary injunction, and basically finding a very unsatisfactory resolution so far as the Maine company was concerned. So I am sensitive to the suggestion or indeed any charges that have been made that one company might be given preferential treatment over another.

My understanding is that a number of companies are currently in competition; that, in fact, it has not been predetermined that any one firm should receive the contract, but that request for proposals has disclosed that there are a number of firms, Smith & Wesson, Beretta, Maremount, and Heckler and Koch, which are now candidates, and the Department of Defense would, in fact, make a selection by January 1982.

So I was wondering whether or not the Senator from Alaska has objections to a fair evaluation being conducted if, in fact, there has been no deal made; if, in fact, there is a pledge for fair and impartial evaluation; if, in fact there could be some assurance, whether through GAO or some other mechanism, to insure the proper oversight and evaluation to make sure this decision is conducted not as an incentive, not as a sweetener for any other country to go forward with other programs, but strictly on the merits, and whether the distinguished Senator would remove his own objections.

(Mr. KASTEN assumed the chair.)

Mr. STEVENS. I am grateful to the Senator for the opportunity to discuss the general provision concerning the 9 millimeter handgun.

We desire to halt the initiative of the Army to permit the Government to provide for the procurement of a new weapon to replace the traditional .45 and .38 handguns. The reason is that the program was never authorized, funds were never sought for the program in the 1982 budget, and we have some 540,000 handguns in the military inventory.

The proposal would be to replace those with some 590,000 9 millimeter pistols at a cost of over $400 per weapon.

Again my problem was that the authorizing committee had not looked at it, had not authorized the program. We had not been specifically requested to look at it as an appropriation request in the appropriations process, and we just found it was ongoing.

So there is not just report language, there is a provision in the bill directing that this procurement be stopped until Congress evaluates the question of whether we do want to modernize these weapons, if it is indeed modernization, and to answer the questions of the Senator which he has raised as to how this is to be done. I have some indication. One of the proposals was to rebore the barrel of the existing weapons and to then call those 9 millimeter weapons.

We both attended the NATO parliamentary conferences, and we know the desire for standardization. I do not op-

pose standardization, but it just seems to me that a program of this type, which could evolve a substantial procurement program, ought to be authorized and it ought to be treated in the normal appropriations process.

Since the matter is in the House bill, I would suggest that in the conference something similar to what the Senator suggests would be possible, and I hope he would allow us the flexibility to deal with the provisions in the House bill and to deal within the conference with those provisions.

Mr. MITCHELL. Mr. President, will the Senator yield?

Mr. STEVENS. The Senator has the floor and I am responding, I guess.

Mr. COHEN. I yield to the Senator from Maine.

Mr. MITCHELL. I thank the Senator from Maine and I thank the distinguished floor manager.

I think it is important to make a record on this point regarding the origins of this initiative.

In 1977 the Air Force requested authority and funding to develop a new model .38-caliber ammunition for handguns used by Air Force personnel. The House Committee on Appropriations reacted to this request by ordering a handgun study by that committee's surveys and investigations staff.

As a result of that study in 1978, the House Appropriations Committee urged the Department of Defense to standardize its handgun inventory and its handgun ammunition inventory, and in characterizing that report a year and a half ago the chairman of the House Appropriations Subcommittee on Defense stated, and I quote:

A study in 1978 by the Surveys and Investigations staff found an intolerable proliferation of handguns and handgun ammunition in the Department of Defense. More than 25 models and types were present in the inventory. For 2 years—

And this is a statement made a year and a half ago—

the committee has been exhorting the Department of Defense to expeditiously make the decision on a standard handgun and handgun ammunition and prepare a transition plan to achieve that standard.

So this is a response by the Department of Defense to the urgings of Congress.

I submit for the RECORD and ask that it be printed in its entirety a copy of a letter dated yesterday addressed to the distinguished floor manager from the Deputy Secretary of Defense in which he urged that this current evaluation continue.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

THE SECRETARY OF DEFENSE,
Washington, D.C., December 1, 1981.

Hon. TED STEVENS,
Chairman, Subcommittee on Defense, Committee on Appropriations, U.S. Senate, Washington, D.C.

DEAR TED: This is to inform you that the Department of Defense favors the completion of our current evaluation of candidate handguns to replace the current .45 caliber pistols and .38 caliber revolvers.

Our actions to select a standard weapon to replace the numerous makes and models of handguns are well overdue and consistent with Congressional language.

We have already issued Request for Proposals and received from industry weapons for tests. Our test agencies are now in the process of testing the hardware. Our schedule calls for completion during January 1982.

We are confident that the current acquisition strategy for 9mm handgun procurement is in the best interests of the Services and is not unfair to industry. Any interruption of this process would call into question the credibility of our acquisition procedures.

Sincerely,

FRANK C. CARLUCCI,
Deputy Secretary of Defense.

Mr. MITCHELL. This letter stated, and I will quote just briefly from it:

This is to inform you that the Department of Defense favors the completion of our current evaluation of candidate handguns to replace the current 45 caliber pistols and 38 caliber revolvers.

Our actions to select a standard weapon to replace the numerous makes and models of handguns are well overdue and consistent with Congressional language.

We have already issued Request for Proposals and received from industry weapons for tests. Our test agencies are now in the process of testing the hardware. Our schedule calls for completion during January 1982.

We are confident that the current acquisition strategy for 9mm handgun procurement is in the best interests of the Services and is not unfair to industry. Any interruption of this process would call into question the credibility of our acquisition procedures.

That is from the Deputy Secretary of Defense.

So I believe, Mr. President, that there is a well-founded basis for proceeding consistent with congressional intention. I hope that the distinguished floor manager would be able to act in accordance with the request of the senior Senator from Maine regarding a fair supervised evaluation procedure that does not delay this important procurement process.

Mr. COHEN. Mr. President, I yield to the Senator from Virginia.

Mr. WARNER. Mr. President, I associate myself with the expressions of both Senators from Maine. I, too, have looked into this handgun situation. I believe it should remain with the Department of Defense to continue to advise this Congress on the need or lack thereof to proceed for a replacement weapon in the area of handguns.

I thank the Senator from Maine.

Mr. STEVENS. Mr. President, I understand full well what the Senators are saying. I have a stack of mail, I say to my good friend from Maine, from the people in the Department of Defense. If there is anything that can bring about their readiness to equal their ability to deliver mail to anyone who is involved in a bill on the floor that affects them, I would be happy to try and accommodate them to see if we could give them the same capability to respond to a threat as they can respond to a situation such as that letter the Senator describes. We have that letter. But they really have not responded to our problem.

The problem really is why should they be going about a major procurement—maybe $200 million is not a major procurement anymore to some people. It still is in terms of the Appropriations Subcommittee. And there is no reason for them to be proceeding on a basis that apparently has no set plan.

The House committee issued a report, the Investigation Subcommittee of the Armed Service Committee issued a report in September. It found a lot of things.

The Senators from Maine would like the GAO involved. The GAO has been involved. At the request of the GAO, an Air Force gunsmith completed the conversion of a .45-caliber pistol to 9 millimeters in approximately 10 minutes. And the total retail cost of all the parts used was approximately $100. As a result of that, a U.S. arms manufacturer informed the U.S. Army Materiel Readiness Command that it would submit a proposal to convert all .45-caliber pistols to 9 millimeter for $170. Yet the procurement that is involved, the XM9, is dealing with a program of approximately $400 per weapon to replace all weapons.

Now, we really think that the Army and the Department must come up with some program and explain it to the Congress. What is the Army going to do with the 540,000 handguns now in inventory? Why do they need 590,000 new 9-millimeter pistols if the existing pistols could be converted and, if, in fact, it could be done in the Army's own ordnance probably for less cost than anywhere else?

All we are saying, Mr. President, is that the program just does not seem to have any coherence right now. We have directed that it be stopped. The House has directed that it go ahead. The matter is in conference and it will be a very interesting issue, I think. We will definitely pursue the suggestions of the Senator from Maine when we do get to conference with the House on the issue.

Mr. COHEN. I yield the floor.

Mr. DODD addressed the Chair.

The PRESIDING OFFICER. The Senator from Connecticut.

Mr. DODD. Mr. President, I would just like to endorse and support the comments of the Senator from Alaska. As one from New England, obviously we have a number of firms that are interested in this particular issue. But I think it is important to point out the fact, as it pertains to some American corporations, that the request for proposal made on this issue by the Department of Defense came out on June 30. The original request for proposal had allocated 45 days for the preparation of a 500-page technical report and the fabrication of some 30 prototypes of the 9-millimeter handgun.

For those companies already producing a 9-millimeter handgun, this was a relatively simple matter. For 70 years, the Colt .45 has been the principal sidearm of the U.S. Army. Colt has not produced a 9-millimeter handgun in any quantity or to the Army's exact specifications. And until the request for proposal was forthcoming it did not bother going about the business of even making

some 30 prototypes of the 9-millimeter process on June 30.

But in 45 days to produce 30 samples in a very competitive bid process, as well as comply with the 500-page technical report is not feasible. It was virtually impossible, even for a large corporation like Colt. We asked at that time for an extension, which was granted, of 75 days and then 89 days. But, at that time, it was still not enough time to produce the 30 samples.

I think it is also worth noting that a major bidder is the Berrata Corp., an Italian corporation. And at a time when we are trying to keep as much business and procurement business onshore, there is a great deal of suspicion that, in fact, the Berrata Corp. would be the winner in the bidding contest.

In fact, it might be of some interest to my colleagues from Maine that I have prepared an amendment, which I have not offered and do not intend to offer, but it might serve as a compromise position. My amendment would have allowed for an extension of the bidding process to allow bona fide contractors in this country to comply with the very difficult requirements of a 500-page technical report and the more difficult task of producing 30 samples of a handgun, 30 samples which would obviously be of such a nature that they would be competitive, and that actually an extension of the bidding process might be a way of dealing with this issue in conference.

But, in the meantime, to suggest somehow that after 70 years of having one primary handgun, that in 45 days, or 75 days, we are going to be able to produce a 9 millimeter handgun, it is not going to serve our interests and not serve the interests of our NATO allies, as well, not to mention some additional requirements required as a result of that. It would be a significant drain of U.S. dollars to an offshore company that I suspect is going to emerge as the winner of that contest.

So it seems to me that it is wiser to allow this bidding process to go a bit longer than we allowed and, if not, just continue with the present sidearm, which has served the Nation well for 70 years. And, God knows, in the budget crunch, when we are talking about millions of dollars for a handgun at a time when we are discussing theater nuclear weaponry, at a time when every nickel in the budget seems to evoke heated debate on the floor of the Senate, that we might focus our attention on some other priorities.

I would at least be interested in knowing from my colleagues from Maine whether or not a proposal to extend the bidding process might be something that they could support when, in fact, we do get to conference on this issue.

Mr. President, I yield the floor.

Mr. MITCHELL addressed the Chair.

The PRESIDING OFFICER. The Senator from Maine.

Mr. MITCHELL. Mr. President, I would like to note, so the record will be clear, that it was stated publicly at a hearing in the House that the services had agreed on standardization of handguns on the 9-millimeter model over a year-and-a-half ago. This is not something that anybody should have been surprised at or was surprised at. It is something that was well known before that and stated publicly at that time.

Second, I would also point out that we are not talking about a procurement here. We are talking about completion of a testing and evaluation process that was commenced in response to a congressional initiative that the funds involved are unobligated funds from the 1981 bill. This is not a procurement. If there is to be a procurement, obviously the services will come back and that will be a specific item in a future appropriations bill. I think that should be clarified, in light of the statements made by the distinguished Senator from Alaska.

Mr. STEVENS. Mr. President, it is my understanding that the Senator from Ohio wishes to offer an amendment now. In trying to schedule these, I would ask unanimous consent that following the Senator from Ohio that the Senator from Maine (Mr. COHEN) be recognized.

The PRESIDING OFFICER. Is there objection?

Mr. STEVENS. The Senator from Arkansas (Mr. PRYOR) would like to follow Mr. COHEN. That will be agreeable to us. We will try to work out time agreements as we hear what the amendments are.

The PRESIDING OFFICER. Without objection, it is so ordered. The Senator from Ohio is recognized.

NAVAL OPERATING FUNDS

Mr. GLENN. Mr. President, if any of us went out and bought a new car and kept it in the garage because we did not want to go to the expense of buying gasoline to put in the tank, one might think we were a little bit addled. I would think we would be at least addled if we did that.

Mr. President, that, in effect, is what we are doing with our Navy. We are considering over these days here many, many, tens upon tens upon tens of billions of dollars of expenditures for new equipment which is supposed to be used to carry out American policy around the world. Then with the Navy we are at the same time trying to save money by not giving our forces sufficient operating funds.

If those operating funds were being applied just generally worldwide, or just a general reduction in the Pacific, the Indian Ocean, Atlantic, Antarctic, wherever, we might be able to say, "Well, we will just accept it because it is a general cut."

But that is not the way this is being done. This cut in operating funds is being done in the most important naval geographical spot in the world. That is the Persian Gulf. Where we are trying to save money dangerously weakens us in that area of the world most vital to the United States and the whole free industrialized world. In fact, we still get nearly 20 percent of our oil out of the Persian Gulf. Our representation there, our military forces there, also provides the protection for Western Europe, a Western Europe that gets 50 percent of its oil from the Persian Gulf.

We also supply the protection for the oil sealanes to Japan, which gets over 75 percent of its oil from the Persian Gulf.

A couple of years ago I was in the Orient, in Japan, and I was talking to one of the people at the Ministry of International Trade and Industry. He made the statement in one of the breaks that we had in the meeting that on any given day there is a tanker every 100 miles between Japan and the Persian Gulf. While I cannot vouch for that, it may be two-way traffic, but whatever kind of traffic it is, it indicates the importance that we attach to the Persian Gulf.

During the AWACS debate, we adequately illuminated the importance of the Persian Gulf area and the vital role it will play into the indeterminate future. With the cutbacks we are making in energy research, alternate energy research, and conservation, I do not see our dependency on the Persian Gulf changing much over the next decade, probably, or decade and a half, even. So our attachment to the Persian Gulf is going to remain just as tight as it is now and just as important as it is now.

Those alternate fuels research funds, incidentally, were some $776 million in the Carter budget submitted in January of this year and they were cut in the new administration to only $443 million. So we have decimated our basic energy research, noncompetitive with private business energy research, to what I think may be pennywise in this year's budget but it is very pound foolish for the future.

It does indicate that we will for the indefinite future retain our dependency for oil on the Persian Gulf. Western Europe will be saddled with that same kind of dependency and Japan also will be saddled with that same kind of vulnerability that we all share together and which we are taking on the military load of protecting in that Persian Gulf area.

President Reagan has made numerous statement to spell out the importance of that area, and that most critical piece of naval geography in the world, the Strait of Hormuz.

Our carrier forces assigned to the Indian Ocean were put there for a very good reason. They were put there not just to make a show of force. They are probably the most combat-ready force that we have anywhere in this world. Nowhere else in the world are American forces required to take off on every mission as combat ready as those forces in the Persian Gulf.

When we placed those carriers in the Persian Gulf, the two carriers that were assigned there, it was a commitment that I backed then and I still firmly support, as I believe do most Americans. I believe honestly that most Senators in this Chamber supported that two-carrier commitment.

Those carrier forces that go off every day in that part of the world take off daily fully armed, with guns, rockets, bombs loaded, ready for whatever might occur, literally, with only minutes of warning time.

Let me say that these are not show forces. These are not bluff forces in any way, shape, or form.

The United States has 13 carriers, two of which have been assigned in the past to this vital Persian Gulf area. I know of no more important use for naval forces

today than for them to be in the Indian Ocean region, ready and on station for whatever may occur.

Yet in the interest of budget cutting, Secretary of Defense Weinberger has proposed reducing that carrier force from two carriers to one solely to save $74.6 million in operating funds. This is not new equipment. This is an effort to save money from operating budgets. The lame argument was made after the fact that carriers in the Mediterranean could probably transit the Suez Canal within a few days and be available in the Persian Gulf area. There are just a couple of things wrong with that argument. No. 1, our nuclear carriers cannot go through the canal, and even if they could, with 4 to 5 days delay getting to any scene of action around the Persian Gulf or that Strait of Hormuz, there may be very little need for their presence once they do arrive.

Time is the most critical factor we have in determining what could happen to those vital oil heads in Saudi Arabia and other areas along the Persian Gulf. Much as we all want a balanced budget, this cut just plain carries things too far.

It comes down to a question of commitment. Do we have a commitment to that Persian Gulf area or do we not? Can our NATO allies really be encouraged to take over more of the NATO burden which we justify because of our Mideast commitment that protects them also and protects the 50 percent of oil for Western Europe that comes out of that Persian Gulf?

Can we ask them to accept our commitment while at the same time we in fact cut back on that commitment by cutting our carrier forces in the Persian Gulf in half?

I already mentioned Japan. In Japan we are trying once again to get them to increase their defense expenditures above the self-imposed 1 percent of GNP limit that they have had for many, many years. It gives us little ground to operate on when we are saying to them that, "We are protecting your interest in the Persian Gulf, protecting those oil lines, shipping lines, from the Persian Gulf to Japan," and encouraging them to make a bigger defense commitment in their own home area to relieve us of some of that responsibility, and at the same time we turn around and cut our commitment to the Persian Gulf in half.

Mr. President, our carrier battle groups in the Persian Gulf and Indian Ocean are not bluff forces. They are not labeled "for show purposes only."

We recently completed expensive exercises in the Mideast to show our resolve in that area. We went through all the motions of parachute troops dropping in. We went through bombing exercises on the ranges there.

We went through landing exercises, conducted with the few marines that were aboard the vessels in the Indian Ocean. We showed our resolve in that Middle East area. Those were, what we might say, the show-purpose type forces. But those carrier battle groups off the Strait of Hormuz are not bluff forces. They are the only loaded and ready combat forces we have in the Persian Gulf area. To lessen that presence will have inestimably important effects.

Mr. President, it makes absolutely no sense to spend tens upon tens of billions of dollars for new equipment and then not have it available to meet America's and the free world's most vital interests and, indeed, those of the whole industrial free world—all for lack of the comparatively few dollars to put gas in the tank. I hope everyone will join in supporting this amendment that I shall call up shortly to restore the $74.6 million worth of naval operating funds dedicated not to expanding forces, not to increasing forces in the Middle East area, but just to maintaining the naval force that we have had committed to that area.

Mr. President, I am offering this amendment because the administration's recent action in reducing our naval combat presence in the Indian Ocean is a dangerous example of structuring our military forces not on the basis of the threats we face, which I have outlined, but on the basis of a balance-sheet mentality. You just cannot run security forces solely on that basis. I let the administration speak for itself in this matter.

Before the Senate Committee on Armed Services on September 28, the Secretary of Defense, aided and abetted by the Chairman of the Joint Chiefs of Staff, admitted that the defense budget cuts proposed by the Reagan administration would, among other things, cause us to cut back significantly our naval presence in the Indian Ocean-Persian Gulf region by at least half a battle carrier group.

Then, on October 1, the Secretary of Defense told the Senate Foreign Relations Committee on this force reduction. By the Secretary's own testimony, this was attributed by the Secretary as a move dictated not by a changing military situation but solely by a budget directive that he had received.

Mr. President, such preposterous reasoning, unfortunately, is not new to our Republic. In fact, it brings to mind a famous exchange that occurred during the Constitutional Convention in Philadelphia when one of the delegates moved that, "The standing Army should be restricted to no more than 5,000 men at any one time." The Convention's Presiding Officer, George Washington, was prohibited from offering motions of his own, so he turned to another delegate and whispered, "Amend the motion to provide that no foreign enemy shall invade the United States with more than 3,000 troops at any one time."

Mr. President, these are more dangerous times for our country than even those days and we are apparently lacking the kind of leadership that prompted George Washington to turn aside silliness at that Convention so long ago.

Obviously, Mr. President, there have to be spending constraints on national defense. But we will benefit little from a balanced Federal budget if we find ourselves in deep troubles abroad because our Military Forces are inadequate to support our foreign policy.

As the Stockman Atlantic revelations demonstrate, this obsession with book balancing to the near exclusion of any consideration of our vital foreign interests can lead us down some very dark and very dangerous alleys.

We simply cannot afford the luxury of a new isolationism, Mr. President, and we cannot afford to have our security policy be determined by budget managers who have already exhibited a willingness to doctor the books to support their own economic prescriptions.

Obviously, there are practical limits to Government spending. No Government department—whether it be Health and Human Services or Defense—can ever get all the money its program planners claim is necessary. Once these departments submit their best case budget requests, it is then up to the President to identify truly essential programs and to marshal public support for them. Indeed, that is what leadership is all about, Mr. President.

Absent from the defense debate is a thorough and tough-minded examination of exactly what our vital interests are in today's world and how our military forces can deter or meet concrete threats to those interests. In its search for the magic defense budget numbers, the administration seems oblivious to the fact that the world has not really changed much in the 10 months since Mr. Reagan's inauguration.

The Soviet Union continues the largest peacetime arms buildup since Hitler's Germany. The military balance between America and the U.S.S.R. remains precarious, with long-term trends ominously running against us. Serious problems still threaten to divide the NATO alliance. We are more vulnerable than ever before to an interruption of critical raw materials imported from abroad.

Mr. President, I have supported—and still support—defense initiatives that promise to correct some of the problems caused by our past neglect of the military. I have voted to renew our strategic bomber fleet by building the updated B–1. We need the global force projection capabilities—conventional as well as nuclear—of a modern replacement for the B–52. I also requested the addition of over $300 million to this year's defense budget to procure new amphibious shipping capabilities.

That is an area we have not dealt with yet, Mr. President, because we talk about all the forces, all the troops, all the equipment we want to move over into these areas if we need them. Then we look at the transportation we have or do not have to get them where they might be needed, and we come up very, very short.

These are just general examples of the kinds of equipment we need for a variety of purposes, but other questions still remain unanswered. What about the size of our land forces? Or the structure of rapid deployment forces? How about the extent to which we will station combat forces overseas, as opposed to those that would be garrisoned in the United States? For questions like these, answers must be sought not at the Pentagon, but at the White House.

Unfortunately, I do not see any reassuring signs that the administration is making a systematic effort either to

define our foreign policy or to tell our military planners what kinds of forces we need to support that policy.

Mr. President, I do not make these very pointed criticisms in a partisan spirit. I was critical of the previous administration for the same lack of planning to coordinate foreign policy decisions with the military buys. In my view, it is precisely this lack of policy definition that is causing confusion and divisiveness on the defense issue today.

We were recently told during the AWACS debate, for example, that our access to the Persian Gulf was a vital U.S. interest. In fact, the President even suggested that it was so important that we would protect the Saudi monarchy from internal, as well as external, attack, and we would give external protection to the other nations in the Persian Gulf from which flow those vital oil lines I mentioned earlier—20 percent of our oil, 50 percent of Europe's oil, and 75 percent of Japan's oil, with 60 percent of those totals coming from Saudi Arabia alone.

Yet, while we are talking about guaranteeing the internal and external security for nations in that part of the world or for the Saudis in particular, or an external protection for all the nations around the Persian Gulf, in the same breath, the administration announced that our naval strength in the Indian Ocean, the only real combat force in that area, was being reduced by the equivalent of half the carrier battle group, which is half the forces that have been assigned to it. When pressed for an explanation as to why we were whittling down our only "big stick" in the region, Secretary Weinberger freely told us that nothing had changed in the security situation; it was still vital, still a situation that was such that it deserved none of this reduction in forces.

What happened, of course, was that our military forces were being restructured strictly on the basis of a budget policy. Ignored was the basic proposition that we are either serious about our military needs or we are not. We cannot talk tough in the Persian Gulf and, in effect, carry a BB gun.

So my amendment would set right what I think is a very misguided action. It is more than that. It is an effort to tell our adversaries, clearly and without reservation, that we consider the Persian Gulf region the locale of our vital interests. It is an effort to tell our friends that we will be resolute. It is an effort to tell the administration that we must be serious and we must be consistent about our survival as a nation.

Mr. President, I think we send all the wrong signals when we pull down these carrier forces in the Persian Gulf. We are asking Europe to assume a bigger load of the defense burden we share together through NATO. We are asking the Japanese to increase their defense expenditures, to take a greater part of the load. We are basing those requests, at least in part, on the fact that we are assuming a new burden for the Persian Gulf that will probably go on for the next 10 or 15 years.

At the same time, we turn around, in the interest of $74 million, and say we will not provide operating funds to run 2 of the 13 carriers we possess in that most important naval geography in the world, the vicinity of the Strait of Hormuz, the entrance to the Persian Gulf.

AMENDMENT NO. 639

(Purpose: To add $74,600,000 to provide for the stationing of an additional one-half of one carrier battle group in the Indian Ocean)

Mr. GLENN. Mr. President, I call up the amendment. Several Senators have indicated that they wish to speak on this amendment. I do not see them in the Chamber at this time.

So far, the following Senators have asked to have their names added as cosponsors of the amendment: Senator JACKSON, Senator NUNN, Senator FORD, Senator CHILES, Senator LEVIN, Senator HOLLINGS, Senator BUMPERS, Senator PRYOR, Senator HART, and Senator ROBERT C. BYRD. I ask unanimous consent that their names be added as cosponsors.

The PRESIDING OFFICER. Without objection, it is so ordered.

Is the Senator referring to his printed amendment?

Mr. GLENN. I am.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Ohio (Mr. GLENN), for himself and others, proposes an amendment numbered 639:

On page 8, line 1, strike out "$19,944,389,000" and insert in lieu thereof "$20,018,989,000, of which not less than $74,600,000 shall be available only to station in the Indian Ocean one-half of one carrier battle group, in addition to other naval forces to be stationed in such ocean,".

Mr. STEVENS. Mr. President, the Senator's amendment is another unique one. I know that the Senator's background and experience are such that he speaks with authority in the area.

I hope the Senate will support the position of the committee. I shall outline the reasons for our position.

In the first place, we have $2.4 billion in this bill for steaming hours. That is an increase of $300 million over the steaming program in 1981. We have increased the amount in committee by $100 million. There had been a cut of $173 million in the revised budget. We put $100 million back. Since that time, the authorization committee and the House have confirmed that figure.

In other words, in this item, we are funding 100 percent of the authorized figure for steaming that is funded in our bill. The amount in our bill is identical to the amount in the House bill. The House added $100 million after our subcommittee indicated that it was going to put $100 million more into this item.

We are informed that the Navy considers the amount in our bill to be sufficient to carry out the mission in the Indian Ocean.

This is one of those items of readiness that one has to consider very carefully as we look to the question of how we put some portion of the reduction in our national expenditures onto the defense bill.

In this instance, there is no question that this is a reduction of $73 million below the March figure. At the same time, the bill is $100 million above the President's September figure.

The proposal to reduce the funding for steaming hours was reviewed not only by our committee but also by the authorization committee, by both committees in the House, and we have come up with this figure. Incidentally, almost simultaneously it came up to what was justifiable so far as the item is concerned, and without really knowing in advance where the other committee was going to go.

As I said, our committee added the $100 million back in subcommittee. The House added it. The authorization bill was signed yesterday. The authorization conference report accepted the administration's $74.6 million reduction, also.

The Senate has to ask itself a question in connection with the amendment of the Senator from Ohio, and it is this: Are there any places in this defense budget which should be reduced in order to have the Defense Department bear a share of this new concept of the September reductions?

The President recommended a reduction of $173 million, and we have added back $100 million. I am repeatedly asked, as the manager of the bill, "How close to the President's request are you going to be when you come out of conference?" I am not going to come very close to the President's request, which includes the September mark of $2 billion reduction in outlays which he has recommended for defense as part of the national drive to solve the complexing problems of inflation, recession, and unemployment. I am not going to come very close if we are to face increases in each area where we sought to trim the Department of Defense budget—not excessively, but to trim so that the Department would be compelled to live within our national objective of reducing the overall expenditures of the Federal Government.

As I have said, this is a tough amendment. I would not have anticipated that we would face it when we had already decided to add back into this bill—and there is in this bill—$100 million more than the President requested. I would not have anticipated facing it, knowing, as I do, that we are already more than $300 million above the 1981 level for steaming hours.

I would not have expected to face it, having already lost the *New Jersey* and *Iowa* fight, when I realized that just adding those two ships alone when they come on the line the annual cost will be $100 million more apiece for steaming hours.

I have never been known, I do not think, as being antidefense expenditures. As a matter of fact, to the contrary, it seems I spend most of my time justifying how I can justify presenting to the Senate a bill of the magnitude that we presented. Yet, now again I have the task of saying to the Senate this additional steaming time is not needed.

The decision of the authorization

committees in both the House of Representatives and the Senate was that it was not needed. The decision of the floor in the other body was that it was not needed.

We have restored as much as we believe can be efficiently used by the Navy for steaming hours consistent with its overall mission, and there is not much more that I can say.

In a bill such as this, we get to the point where we can say and I do say to the Senate that we will do our utmost to bring back a bill which is consistent with our national objectives. As we emerge from conference we will be as close as possible to the projected level of the budget as contained in the congressional budget that we ourselves have adopted. If we discount the pay bill it would be somewhere around $200 billion to $201 billion. That means rather than add money to this bill now the Senate should be asking what more can we take out because we have to take out over $8 billion to get down to that figure, and each amendment we have faced so far would have added money to the bill, not taken it away.

I know there may be some amendments coming to delete moneys, but I urge Members of the Senate to come forward with them. It may be that if the Senate disagrees with the committee on some items that we have included we would decide and come back and say let us put that money in steaming hours.

But there is no fat in this budget now. The problem really is how do we cut what is there now to get down to $200 billion to $201 billion.

I know that the Senator from Ohio knows, and I am extremely sincere in saying so, that he has picked an amendment that touches the very bowels of our naval program; steaming hours.

I can only say to you, Mr. President, to the Senator from Ohio, and to the Senate that this bill contains more money for steaming hours than anyone envisioned in the midterm of this year.

There is a $300 million plus increase from 1981, and incidentally with no significant number of new vessels involved, yet we have increased by over $300 million the moneys available for steaming.

I urge the Senate to save the increases for the time when we will have to pay the $100 million a year for the *New Jersey* and for the *Iowa* when those battle wagons are coming in and the battle groups start steaming. Then that $2.4 billion that we have in there for steaming hours now is going to be very, very low and we will be wondering where we can get the money to fund those operations. But right now we have funded to the maximum of our ability, in my opinion, the steaming hours for the Navy.

Mr. GLENN. Mr. President, I think the Appropriations Committee and especially the distinguished Senator from Alaska has done an admirable job in this very, very complex area. It is good that we do have these increases in operating funding because they have been desperately needed. We have been cutting back for too many years on operating funds, and I repeat my earlier statement. It does little good to buy tens upon tens upon tens of billions of dollars worth of equipment and then for lack of operating funds not be able to use that equipment in the best interests of this Nation.

So, I am very serious when I compliment him for getting the additional money back into the budget for additional steaming time, as it is called. It is $391 million above the previous year's level.

But, Mr. President, I come back to the statement of the Secretary of Defense. The Secretary of Defense is the one. This $47.6 million is not something I am conjuring up to give the Navy something they do not need because we have the testimony of the Secretary of Defense and the chairman of the Joint Chiefs of Staff who stated before our committee that the reason that we were having to pull one-half of our carrier task forces out of that Persian Gulf area was because they had to make cuts in operating funds. I think that is absolutely preposterous.

We are saying it is the most important area in the world, that we are carrying the ball for Europe, Japan, and our own interests out of that Persian Gulf and at the same time we have the Secretary of Defense who said, and I shall quote his words directly:

> There has been nothing that has changed the military situation to warrant a reduction in the defense budget.

He was referring to this particular area, and yet he was given a budget directive that he reduce that money and he was doing it, and he was taking it out on those Persian Gulf funds.

We may have additional operating money here. We may have additional steaming time money, and I think that is great, and I compliment once again the distinguished Senator from Alaska for his efforts in getting that in.

But I still come back to the fact that without this additional $74.8 million we are cutting back on our commitment in the Persian Gulf. We are not carrying out the commitment that we had told the Europeans we were going to carry out and that we had told the NATO people that we were going to carry out. We are not carrying out the commitment that we have based some of our requests to the Japanese on.

And this is all for this lack of $74.6 million while we vote over a $200-billion defense budget which will set the track for us for a number of years.

I do not know where we can make up this money. I know, I might suggest, in the basing mode on the MX, because I think that one is rather preposterous, and I may have another amendment to offer in that regard later on. The direction we seem to be going with the MX certainly gives us very, very little new security that I see. We are going to stuff a bigger missile, make it an even more attractive target, in a Titan hole that the Soviets already have the geographic coordinates for, and we call it increased security somehow, and it just does not fit. We are trading geographical vulnerability for another even more specified, more specific, bigger in a single spot already targeted missile they will not have to figure out new aim points, and we call that an increase in our security, and that is over $2 billion we have in this bill for that, $2,008,700,000, as I recall, without looking at the figure.

So if we want to place a cut, I think we have some pretty fertile fields in that area, if we are really serious about cutting.

Once again I come back to the fact that these are not my figures I am trying to get $74.6 million for some odd purpose here for the Navy; they are the figures given by the Secretary of Defense and the Chairman of the Joint Chiefs of Staff that our naval forces in the Persian Gulf are, in fact, being reduced by half on that basis, and that basis alone, and that the military situation there and the importance of that area have not changed one whit.

We are handing out, we are giving, all this emphasis around the world of our commitment to the Persian Gulf and how we are representing other people and they have to carry more of this load and, at the same time, we cut our only nonbluff forces, the only combat-ready forces. They are cut back and they are reduced.

We are saying maybe Israel will take a bigger load for us over there when combat starts, and we reduce our naval forces to show our commitment to that area.

We talk to the Saudis about how we are concerned about getting them involved in the Camp David peace process, and we are going to work with them and provide some kind of protection and have backup forces for them in that Persian Gulf. Then we cut them in half.

Mr. STEVENS. Mr. President, will the Senator yield?

Mr. GLENN. The Senator will yield.

(Mr. WALLOP assumed the chair.)

Mr. STEVENS. Mr. President, I am not sure, we argue about a lot of things, but the $100 million we restored is the equivalent of 1 day per quarter for each ship involved. This $74.6 million then by definition is less than 1 day per quarter for each ship involved.

That shows you how far on the margin it is between the Senator from Ohio and this Senator. I do not know how much closer we could come.

The problem I have is that the people who are involved, the authorizing committees on both sides, looked at this and said, "You know, that is not bad. If they have to do something, the Navy has to do something, to contribute to the overall problem of our economy. Let us ask them to steam slightly less per ship per quarter."

I do not know how we get involved in arguments over something like that.

I was just sitting here thinking, Mr. President, about the days I remember on this floor listening to people tell us that we ought never to have a presence in the Indian Ocean. I remember being harassed because I voted for some improvement in a place called Diego Garcia.

Now, all of a sudden, I find we are told we do not have a large enough presence in the Indian Ocean. These battle groups, once they get positioned in places like

the Indian Ocean, take on a life of their own, I am afraid, and it is awfully hard to even figure out why they should be steaming as much as they are. Maybe someone should come out on the floor and ask us what we are doing spending $2.4 billion in steaming hours rather than to ask us why do we not put $74.6 million more into steaming hours.

Mr. GLENN. Mr. President, will the Senator yield for a question?

Mr. STEVENS. Yes.

Mr. GLENN. Does the Senator not agree that that area in the Persian Gulf where we get 20 percent of our oil from and that Europe gets 50 percent of its oil from, and Japan gets over 75 percent, is probably the single most important waterway in the world, that Strait of Hormuz?

Mr. STEVENS. Ask that again. I am not sure I understood it.

Mr. GLENN. I say would the Senator not agree that the Strait of Hormuz and the approaches through the Strait of Hormuz through which come nearly 20 percent of our oil and 50 percent of Europe's oil and over 75 percent of Japan's oil is probably the most important single waterway in the whole world as far as the industrial free world is concerned?

Mr. STEVENS. I would answer that affirmatively. But I do not know why the American taxpayers ought to be paying to protect the sea routes for the Japanese, for everyone else, that is, going there to the extent that we are, and that was, of course—that is another subject that this Senator was supposed to be in Japan today discussing with members of the Diet, some of the questions about the extent of the Japanese contribution to the defense of the world.

But, as a practical matter, we find ourselves, those of us who support these bills, and my point is, ever being attacked on both sides. I really find it hard to understand the series of amendments that say that this bill has not provided enough money for defense. The Senator—and I am saying this as a friend—has an interesting amendment because it is true we cut $73 million from the March budget on steaming hours.

But if you look at that bill, we have overall a staggering amount of money, just absolutely a staggering amount of money, to be spent steaming around the oceans of the world to show the flag.

Mr. GLENN. Mr. President, will the Senator yield?

Mr. STEVENS. Yes.

Mr. GLENN. Would the Senator propose that we cut back any commitment to protecting that Persian Gulf area?

Mr. STEVENS. No, I do not propose that.

Mr. GLENN. How would the Senator——

Mr. STEVENS. I do not believe reducing the fleet deployments in the Indian Ocean by the amount that has been done—we will have 1½ carrier battle groups there instead of two under the administration's plans. I do not believe that is such a signal to the world that we are abandoning our commitment to protect the lanes through which our oil and the oil of the free world flows.

Somehow or other I would like to find some people starting to talk about when are the others going to pay for this. When are the people who produce that oil going to start paying for some of this protection for those lanes?

Mr. GLENN. Mr. President, will the Senator yield?

Mr. STEVENS. When are the Japanese going to start paying for it? When are other people besides our taxpayers going to start to protect the sealanes of the world?

Mr. GLENN. Mr. President, will the Senator yield.

Mr. STEVENS. Yes.

Mr. GLENN. There has been no Senator, I think, in this Chamber who has spoken more consistently and more fervently than the Senator from Alaska in this regard for other nations to share a proper burden, the defenses that we all share together.

But I would add this: In my own situation I have spoken out with equal forcefulness and I was in Japan this summer for one of those meetings, the Shimada Conference, where I was doing exactly that, and once again for the umpteenth time talking about the need to get the Japanese away from this self-imposed 1 percent of GNP limit they have imposed upon themselves for so many years.

I presented to that conference a whole series of things where I thought they would not be required to violate this constitutional prohibition against offensive weapons and their own public interest in these areas, and I pointed out six or seven specific areas where they could support us more adequately.

We have done some of the same things with regard to Europe. So I share the distinguished Senator from Alaska's views on this completely that we must push our allies into accepting more of this role.

But I would say that with the vital requirements for military security we have around that Persian Gulf area to try to pull back to some isolationist America concept that we will not put any forces there unless the Europeans put them out and the Japanese put them out just is not in our own self-interest at this point.

I would come back to the fact that while I fully appreciate the increases in steaming time money that have been put in, this is not something I am just trying to restore. We have the testimony of the chairman of the Joint Chiefs of Staff and the Secretary of Defense that this reduction of forces is being brought about solely by this budget reduction. This $74.6 million is what is causing the carrier forces to be cut in half.

Their testimony, I would also add, was not that we would have one-and-a-half carrier task forces there on the average; it is that they would augment on occasion, if they thought they could do so, and that over the next year's time, it may be an average of as much as 1.2 carriers, and that was the maximum they would go.

So I am not using my figures, I am using the rationale of the chairman of the Joint Chiefs of Staff, the rationale of the Secretary of Defense, and they are the ones who have said that we do, in fact, have to reduce our carrier task forces over there, and in that most vital waterway in the whole world where we are trying to provide some protection not only for our oil but for Western Europe while we try to convince them to come on stream with more support for our mutual defense effort, and we are trying to get the Japanese to do the same thing.

So I fully appreciate the floor manager's comments on that, because I share them completely in trying to get other people to share these burdens. But it still means that we still have to have two carriers, at a minimum, in that area, as I see it. They are the only nonbluff forces we have in that part of the world.

We can drop paratroopers over in Egypt and we can go over and bomb a practice range someplace, we can go in and land some of the marines off of the carriers over there so that we do have some people around, and those are nice for show time. Those are nice show time military forces.

But the planes that go off daily in that part of the world, armed with guns loaded, with rockets aboard, with bombs aboard, the only ones in that part of the world that really gives security to the Persian Gulf are our carriers, for instance, if there was an attack on the Ras Tanura oil heads. There can be a sneak attack across Oman to give the Saudis a lot of problems. They might or might not be able to counter that attack with the fighter forces that they have.

But I know one thing that would happen. I know that as quickly as that gong went off, that alert gong aboard that carrier, that we are going to have fighters catapulting off that carrier and going up and heading for the Persian Gulf just as fast as they can get there to support those oil heads which are not going to be protected for a lengthy period of time. The Saudis make no claim of having all-weather capabilities in that part of the world, nor a night protection capability. We are the only ones that can provide that kind of security in that part of the world and the security that we have dedicated, the security the President has talked about providing for Saudi Arabia and for other nations in that part of the world, is going to be cut in half.

They are saying that they will try and augment out of the Mediterranean, but you do not take nuclear carriers through the Suez Canal, so we cannot augment, really, unless it is a nonnuclear carrier that happens to be in that area at that particular time on rotation.

So what we are doing, in effect, is we are saying that we are lessening our commitment—this is the Chairman of the Joint Chiefs of Staff and the Secretary of Defense that is speaking, not me. They say that the lack of $74.6 million, in spite of the increase—and I compliment the Senator from Alaska for having gotten that in—the Secretary of Defense and the Chairman of the Joint Chiefs of Staff say that without this $74.6 million our carriers will be reduced by half. We have 13 carriers. And if we cannot dedicate two of them to that most important part

of the world, our interests are tied up, the interests of the whole industrialized free world are tied up, if we are to say that because of our budgetary concerns, because of this budget mentality that I support, but a balance sheet mentality applied to this extent to our defense budget and the operating funds for our naval forces, this is just cutting too far. This is just getting in the way of the security of this country. And you cannot just set the security of this country on that kind of a balance sheet mentality. It just flat will not work. That is the reason we are suggesting this.

I repeat again, it is the Secretary of Defense and the Chairman of the Joint Chiefs of Staff that say that is their sole rationale. They were told they had to cut back by this amount and they had to cut back on their operating funds by this amount, and I am trying to restore those funds.

Mr. BOSCHWITZ addressed the Chair.

The PRESIDING OFFICER. The Senator from Minnesota.

Mr. BOSCHWITZ. Mr. President, I would like to talk a moment on the amendment, although perhaps in a little different light than my friend from Ohio and my distinguished colleague, the majority whip, the Senator from Alaska.

The Senator from Ohio says that we are, in the event this amendment does not pass, cutting the security that we provide for that area in half, at least as it applies to aircraft carrier task forces and ability to provide carrier-based protection. And he talks about obligations and the importance of the Strait of Hormuz, which certainly no one will disagree with, the obligations we have to our friends around the world, including the Saudis, who I find to be very mystifying moderate friends.

Just as we debate today this add-on to the defense budget for the purpose of providing them more protection, I see in the Washington Post that the Saudis are offering the Omanis $1.2 billion if the Omanis would agree to cancel an agreement which would allow the United States access to its military facilities. Oman is the country in the Persian Gulf that is willing to make available meaningful types of military facilities so that we can provide some protection to the area.

It is my feeling that if effective protection is to be provided to the gulf, it cannot only be naval, it cannot come only from aircraft carriers, but it must primarily come from land-based operations.

Aircraft carriers are in jeopardy if they operate in the Persian Gulf. We sold the Iranians some Harpoon missiles prior to the fall of the Shah. Some of those missiles are still available and would be a great threat to ships in the Persian Gulf, particularly since the deep water suitable for cargo ships is on the easterly, Iranian side.

Mr. President, I am mystified by our friends the Saudis, and this is why I call them our mystifying, moderate friends. They allow their property to be overflown by the Russians so that the Russians can resupply the South Yemenis, their friends and allies; they allow the Russians to use their ports to bring in materiel to resupply their clients, the Iraqis; the Saudis will not allow us bases on their soil.

Now, these mystifying, moderate friends of ours are also moving in a most forceful way to prevent us from having base facilities in the neighboring state of Oman, a country with which the Saudis have had frequent conflicts, border conflicts, as recently as 1970–72, and with whom they have had many differences over the years.

While we speak about $74.6 million in this amendment, the Saudis offer their neighbors $1.2 billion in order to thwart us, and in order to frustrate our attempt to bring some type of protection to the Persian Gulf area, which we all agree is the oil lifeline of the free world.

Recently, we debated at some length on this floor, and throughout the offices of the Senate, the sale of the AWACS and the F–15 enhancement package to the Saudis. We were told that the Saudis were moderates, and, indeed, they are in that area of the world, when they are compared to some of their neighbors, such as the Iraqis, the Iranians, the Ethiopians, the South Yemenis or the Syrians. In that company, almost anybody is moderate, and certainly, in that company, the Saudis are.

We sold the AWACS and the F–15 enhancements to the Saudis on the basis that they would become part of the pillars of the defense of that area; that there would be an emerging consensus among the nations in that area when we showed our friendship through the sale of our most sophisticated equipment, and that this consensus would lead us to a firmer, more efficient defense of that very vital Persian Gulf region.

And what happened? Here we are debating adding some money to protect their interests and apparently the Saudis do not believe we are doing that at all. They are offering instead, $1.2 billion a huge sum, to the Omanis, if they will forbid us from having base facilities there.

It has been the official Saudi view that the gulf states must keep a certain distance from the United States, even though the Saudis have not been particularly critical of the relationship of the Russians with South Yemen. It has been the position of the Saudis that they not give us bases at all.

Now, as I said, as we debate this particular amendment, we find that they are trying to frustrate our efforts to protect that region in a meaningful way.

Mr. President, this amendment of $74.6 million is approximately 1/30th of 1 percent of the overall budget. I would assume that there is enough flexibility in that budget so that the Defense Department could be able to move to defend the Gulf region with another carrier if it desired.

Thus, I am inclined to go along with the administration, but I felt it necessary to speak about our mystifying friends and developments.

Mr. President, I have watched with some interest the amendments which are being offered to the defense appropriations bill. I watched with some interest the Members of the Senate who have, over a long period of time, voted very consistently against defense measures.

And now are voting to increase defense spending, while Members, principally on our side, who have consistently voted to increase defense spending, vote against the recent amendments because the bill before us now encompasses the amount the President has requested. So, we think it is enough.

Also, it was interesting to watch all the amendments offered to the continuing resolution we passed not so many days ago, with everybody establishing a nice record in the event they are going to run for reelection. I "voted against the elderly" and "voted against the sick" in order to maintain the integrity of the budget. This, I am sure, will come back at the time I run for reelection and will be brought to the attention of my constituents. I am sure this vote will, as well.

How can I say I am for defense when I voted against research, when I voted against funds to put an additional carrier in the Indian Ocean? But I will do so, Mr. President, because this is a very small portion of the overall budget. The Defense Department will have flexibility.

Meanwhile I hope that in the Persian Gulf region, our moderate but mystifying friends, the Saudis, will allow us to help them, will allow us to bring a protective coat to their region. Only the Omanis, among the Gulf States, have been cooperative up to this point in achieving those ends. I hope that the actions that I read about today regarding the Saudis will not be repeated and that hopefully they will show a cooperative spirit rather than a divisive spirit in the protection of this vital asset of the free world.

The PRESIDING OFFICER. The Senator from Michigan.

Mr. LEVIN. Mr. President, I rise in support of the amendment to restore $74.6 million the Navy's operating budget to maintain the presence of two aircraft carrier battle groups in the Persian Gulf-Indian Ocean, instead of cutting our efforts to defend that region by at least 25 percent.

At this point, Mr. President, I ask unanimous consent that I be listed as a cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LEVIN. Mr. President, this amendment is necessary to prevent the United States from reversing its previous commitment to keep two carrier battle groups in the Indian Ocean—a commitment I supported.

It is necessary to prevent the present administration from reversing itself on this vital issue.

We have already reversed ourselves on many other critical airlift and sealift needs.

As I pointed out yesterday, the administration, in October, reduced by over $1 billion the amount of money for airlift and sealift which is so desperately needed if we are going to get a rapid deployment force going. This amendment

is needed to correct that kind of deficiency.

I may add that this amendment, like the other amendments, is not some add-on which was dreamed up to bolster our conventional forces. This amendment reflects money which was in the President's March budget. This amendment reflects money which was in the authorization bill adopted by this Senate. This amendment represents money which was in the authorization bill adopted by the House.

It was not until the President in October reduced the amount of money for the Indian Ocean and Persian Gulf steaming days that the authorizing conference at that point, without any public hearings or discussions, simply adopted the reduced figure.

I felt at that time, when we adopted the conference report, we should, when we had the opportunity, correct that mistake. We did not have the opportunity in the conference report because it was not amendable. We have that opportunity today.

Defeat of this amendment would mean that fully half a carrier battle group would leave the very area of the world where the Soviets most directly threaten the peace and the national interests of ourselves and our allies.

There can be little doubt about the importance of this region of the world to the United States, NATO Europe, and Japan. This administration repeated that message at every opportunity during its efforts to convince the Senate to approve the sale of the AWACS radar warning planes and F–15 fighter enhancements to Saudi Arabia.

The Joint Chiefs of Staff, in their annual posture statement for fiscal 1982, also testified to this importance by stating:

> The United States has a number of major interests in the region comprising the Middle East, the Persian Gulf, and the northwest Indian Ocean. These interests involve access by the US and its allies to the resources of the area, most notably to oil from the Persian Gulf states—to include protection of transportation routes for the flow of that oil to North America, Western Europe, and Japan; support for friendly regional governments against potentially hostile states and groups; limitation of Soviet power and influence throughout the region; and deterrence of direct Soviet military intervention.
>
> In view of the almost total dependence of Japan and several West European allies on oil from the Persian Gulf, the question of continued access impacts directly on vital political and security relationships with NATO and Japan. This critical need by our allies for secure oil supplies from the Persian Gulf makes close US ties with major producing countries imperative, denotes the importance of unrestrained passage on seas and waterways throughout the region, and establishes the need to prevent hostile powers from directly or indirectly endangering the flow of oil.

Mr. President, the best means by which to deter any threats to these vital sealanes is through the ready presence of naval power in that region. Reduction of our presence there by half a carrier battle group weakens that deterrence.

Defense Secretary Weinberger on many occasions before the Armed Services Committee has testified about how important it is for the United States to maintain adequate presence in the Indian Ocean.

At his first official appearance before the Armed Services Committee on January 28, 1981, he spoke as follows:

> I think we have to increase our ability to do that. I don't have any doubts as to the correctness of the commitment. I hope that there is no misinterpretation or that you feel that anything I say is not clear. I think we need to do more and that we should do more in that area.

I fail to see how we will be improving our capabilities to carry out this commitment by reducing our naval presence in this region.

Let me remind everyone what the Joint Chiefs of Staff say about the Soviet threat to this region:

> As the invasion and occupation of Afghanistan attest, the Soviet Union has both the capability and the will to project massive military force into non-European areas on its periphery. Soviet power gravely threatens the security and integrity of nearby nations, and increases the likelihood of direct conflict with the United States. This is especially so in Southwest Asia, where the US and its allies are vitally concerned with continued access to Persian Gulf oil supplies.

I fail to see how we will be better able to deter or defeat that threat if we pull back on our forward-deployed forces in that region.

The administration talked a strong game when it came into office, Mr. President. It recognized and it spoke of the need to maintain the two-carrier battle groups in the Indian Ocean. It added sufficient funds to its March defense budget to maintain this presence.

But, later on, the administration reneged on that commitment and it reneged after both the Senate and the House Armed Services Committees agreed to keep those two carrier battle groups. Both Houses of Congress—both Houses of Congress—had these funds in their original authorization bills that they adopted for fiscal 1982. It was only in October when the administration reneged on this commitment and cut back the funds needed for this presence. Then, and only then, the authorizing conference committee, over a number of objections, including my own, changed the already-approved congressional agreement in this area and eliminated these funds—again without any public debate. It is only because Senator GLENN and a few others have brought this matter to the attention of the Senate that I hope we have a chance today to correct this terrible error in terms of our readiness and our presence in the Persian Gulf.

Mr. President, in addition to reducing our actual combat presence in this area, this cutback will raise serious questions among our allies and the nations in that region about the national commitment we have made to defend our vital interests in the Persian Gulf.

One of the major claims of the new administration was that it would be more consistent and reliable in maintaining our foreign policy commitments than the last administration, which it criticized roundly for what it said was vacillation. I happened to agree with some of that criticism of the past administration.

Secretary Weinberger, in his nomination hearing on January 6, 1981, stated the following in response to Senator EXON's question about how we were going to convince our allies to increase their own defense spending as we increased ours. Senator EXON asked the Secretary:

> Now, if we are going to go into this necessary military buildup, what thoughts or ideas do you have to encourage or insist, if you want to use that word, that our allies carry a heavier share of this burden also?
>
> Mr. WEINBERGER. Well, Senator, I think they should. I think that for the most part they want to. I think there are a number of different ways of going about trying to persuade them or to encourage them to do so. In the first place, I have to say I think that if we had a more consistent foreign policy, if we were viewed as a more reliable ally and an ally who did indeed have the resolution and the will to proceed along this path that you indicate we are going to take and that I agree we should take, then I think we might have a more immediate and favorable response.
>
> I do feel that there has been an uncertainty about America's course and a concern that the policy has moved back and forth somewhat more rapidly and perhaps with less advance consultation than could have been the case. And for that reason I think that one of the ways we would hope to bring about this result, which I fully agree we should try to bring about, would be to try to demonstrate that we had a consistent policy, that we were basically a very reliable and a very strong and a very useful ally, and that in order to increase that strength and usefulness, we needed major contributions from those countries that are basically joined by philosophy and by belief in space and freedom.

So spoke the Secretary about consistency. Cutting back on our battle carrier groups in the Indian Ocean, the most critical part of the world at this moment, does not demonstrate consistency. It does not demonstrate reliability. It instead raises the very uncertainty which this administration spoke about so eloquently earlier this year. Congress should demonstrate to the world, to the Allies and our adversaries, that the United States is as good as its word, that we will maintain our capabilities to defend the Persian Gulf with two battle carrier forces. The way to do this is to adopt the amendment which has been offered by my friend from Ohio.

I thank the Chair and I yield the floor, Mr. President.

The PRESIDING OFFICER. Who yields time?

Mr. GLENN. Mr. President, I thank the distinguished Senator from Michigan for his very fine statement with regard to this. I have discussed this privately with him. I know we do share views in this regard.

Mr. President, earlier, in our discussion here and our debate back and forth, there has been continued reference to the fact that the steaming time, as it is called, the operating funding budget for the Navy, has been increased somewhat this year—it now is up to about $2.4 billion—and that this was supposed to take care of this problem. But let me read from some of the testimony that we had in committee in this regard.

When Secretary Weinberger and Gen.

Davy Jones, the chairman of the Joint Chiefs of Staff, were before the Senate Committee on Foreign Relations, we were talking about this situation with regard to, basically, AWACS, but matters pertaining to the Persian Gulf came up. At that point, the chairman, Senator PERCY, asked what would happen to our national security and to our economy, both in the United States and in the free world, if a successful raid were made by an adversary, possibly such as Iran, on Saudi Arabia, and their production facilities were hit and crippled.

Secretary Weinberger replied:

Well, Mr. Chairman, we would be hurt. We get a little over 10 percent of our oil from that region.

I add that I think we get approximately what the Secretary said.

Europe would be close to devastation. The Europeans get very much more of their oil.

Assuming a major cut—I assume from your major loss of oil production—Japan would be seriously hurt. They get, practically speaking, all of their oil from that region.

So a serious permanent loss or a serious loss for any length of time of the oil production from that region would have enormously adverse effects throughout the Free World. This is the immediate direct impact. The effect on those nations' views of the United States' reliability as an ally or as a strong power would be almost as devastating.

I think that last part might bear repeating. This is the immediate direct impact. "The effect on those nations' views of the reliability of the United States' reliability as an ally or as a strong power would be almost as devastating."

I add, Mr. President, that reliability and constancy is what President Reagan has stressed as wanting in our relationships with those nations in the Persian Gulf area.

Later in that same hearing, it came my turn to question. I put forth some remarks here about statements that had been made in the Senate Committee on Armed Services that Senator HUMPHREY had conducted. I made the statement to the Secretary of Defense along the following lines that I was glad Senator PELL asked the question he did because I was a little concerned about the President's statement too.

I am not quite sure what we would do. We do not have an RDF in full operation force yet. And it feeds into another question that came up with your last appearance, I believe before the Armed Services Committee, that I wanted to get into a little bit and give you a chance either to correct or expand upon.

I went into a statement about the importance of the Persian Gulf area, where we get 20 percent of our oil, Western Europe 50 percent, Japan 75 percent, and of those totals, about 60 percent comes from Saudi Arabia.

I made another statement that it surprised me when, in testimony the Secretary of Defense had made before the Armed Services Committee in questioning by Senator HUMPHREY, the Secretary was asked what would be the effect upon the fleet in the Indian Ocean of the cut proposed in military spending for 1982 through 1984; and the Secretary indicated that it might be as much as a 50-percent cut—cutting from two carrier task forces to one.

I continue reading my statement at that point.

The transcript that I have goes back and forth. You would have to go down to one carrier group; that was your immediate response. Then there were some other exchanges and you said that the budget cuts you referred to will require us to go down to one carrier group in the Indian Ocean.

"Senator Humphrey. From two at this time? "Secretary Weinberger. Yes."

And it goes on and on. "Senator Humphrey. In the Indian Ocean. This includes the Gulf of Oman, the Arabian Sea?"

"Secretary Weinberger. Yes, sir."

"Senator Humphrey. From two at this time when we were rattling our sword and threatening to defend with force if necessary our vital interests in that part of the world, we are reducing our naval presence, which is our only meaningful presence in terms of projecting force, by 30 or 40 percent, is that correct?"

"Secretary Weinberger. Yes."

Then General Jones came in, saying we can bring ships through the Suez Canal and so on, which is correct. Then there was some discussion about the various percentages. Then you came back to the budget, the importance of the economy and cutting back on expenses and so on.

Well, I was very disturbed by this whole thing. I do not know whether you want to make a comment or not, but I know I wanted to comment on it.

Then, Secretary Weinberger's testimony before the Foreign Relations Committee:

I would be glad to comment. I do not think there was any suggestion that reduction of the defense capabilities was initially the idea of the Defense Department. There has been nothing that has happened since our budget was turned in in March, our revision of the previous administration's budget, that has changed the military situation to warrant a reduction in the defense budget.

There have been some economic problems. There have been some perceptions that it was necessary to make reductions in the defense budget, to work out some sort of equitable sharing of the discomforts. But there has not been any kind of indication from anybody in the administration or anywhere, so far as I know, that either the budget as submitted was too high or that the international situation had changed to require it to be reduced.

I interrupted that with a comment, and then Secretary Weinberger went on after I finished a short statement:

As you know there was an agreement upon a reduction of $2 billion in the outlays in the defense budget in 1982, which requires a reduction in authorizations of about $7.5 billion and similar reductions of $5 and $6 billion in the next 2 fiscal years.

Now, the perception seems to be around somewhere that these are cuts which can be very easily made and that this is a trifling sum. I remarked elsewhere that only in Washington would this be considered a trifling sum. The cuts do require some reductions.

One of those reductions is going down from a 1½ carrier task force in the Indian Ocean to 1 in the Indian Ocean. There is that reduction of forward deployment of carrier strength.

Before I go on with his statement, I add that we have had two task forces assigned, and the progress we actually achieved that corrected the figures the Secretary gave was that during that time period we have averaged 1.7 carriers in place.

I continue with Secretary Weinberger's statement:

General Jones correctly pointed out that we can make up for some of this by moving additional forces from the Mediterranean into the Indian Ocean rather quickly. But it is a reduction in capability.

Listen to this:

It is not a reduction in capability that is justified by changes in military conditions or international conditions. It is a change in capabilities which is required by an economic situation that is also very important.

But I do not think there is anything that needs any clarification in that. I think it is a perfectly straightforward position and is not in any way changed from the one that I presented to the Armed Services Committee.

I agree. It was not any change at all. I think it points out that the only reason why we are having half of the carrier forces there that we have been accustomed to having, while we are reducing them at the present time, I presume, is because of this $74.6 million that the Secretary was required to come up with and which we are trying our best to restore here today.

Mr. President, I should like to submit some additional testimony that was given before the Armed Services Committee. Senator HUMPHREY was questioning Secretary Weinberger, and he asked:

Senator HUMPHREY. Well, it sounds to me pretty draconian. Is not the Navy's budget capable of absorbing these cuts without this reduction in forces?

Secretary WEINBERGER. Senator, there is almost no way in which you can make cuts involving $2 billion in the fiscal year 1982 and $5 billion in 1983 without reducing the capabilities of the United States. Now, we believe that what we have with these cuts will enable us to do a very considerably greater amount than we have been able to do before.

But you cannot reduce the budgets of the Defense Department by these amounts, which as I have said on other occasions, it is only in Washington where these would be considered trifling reduction. You cannot reduce them by these amounts without getting into the bone and muscle of the Department's activities.

Mr. President, I suggest that unless we restore the operating funding so that we can at least keep two carriers assigned to the Indian Ocean, we, in effect, are abrogating the responsibilities we have displayed in our discussions with our NATO allies and are giving up the commitments we have made with the Japanese, at the same time asking them to spend more for our collective defense.

It seems to me unwise. I think it is analogous to what I started off with at the beginning of our debate here today: It makes no sense to buy a new car and put it in the garage for a lack of gas money to run it. In effect, that is what we are doing. We are saying that while we have the commitments around the world and we have 13 carriers that are supposed to be available, we cannot afford operating money to put them in the Persian Gulf area, the most important piece of naval geography in the world. To stand before the whole world with

that kind of misconstrued logic does not make any sense to me.

Mr. STEVENS. Mr. President, the bill before us is consistent with the authorization bill. It is consistent with the action taken by the House. We have added the $100 million, and the total of over $2.4 billion for fleet steaming hours is more than $300 million in excess of that provided last year. I think that is the sum and substance of it.

Mr. GLENN. Mr. President, will the Senator use the microphone?

Mr. STEVENS. I beg the Senator's pardon.

I said that we are at the level of the authorization bill. We are at the same level established by the House. We have provided $100 million more than the President requested in September, $300 million more than we provided in 1981, for a total of over $2.4 billion in fleet steaming time.

I see no need to add an additional amount as has been suggested by my good friend from Ohio. For that reason, I move to table the Senator's amendment.

Mr. GLENN. Mr. President, will the Senator withhold the motion to table the amendment? Senator HOLLINGS wishes to speak on this amendment, and I am told he is on the way.

Mr. STEVENS. I do withhold that, and I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. STEVENS. Mr. President, I ask unanimous consent that the order for the quorum call be suspended.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STEVENS. Mr. President, I ask for the yeas and nays on the Senator's amendment.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The yeas and nays were ordered.

Mr. ROBERT C. BYRD. Vote.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Ohio.

On this question, the yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Arizona (Mr. GOLDWATER) and the Senator from Maryland (Mr. MATHIAS) are necessarily absent.

Mr. CRANSTON. I announce that the Senator from Nevada (Mr. CANNON) and the Senator from Arizona (Mr. DECONCINI) are necessarily absent.

I further announce that, if present and voting, the Senator from Arizona (Mr. DECONCINI) would vote "yea."

The PRESIDING OFFICER (Mrs. HAWKINS). Are there any other Senators wishing to vote?

The result was announced—yeas 40, nays 56, as follows:

[Rollcall Vote No. 437 Leg.]

YEAS—40

Baucus	Glenn	Mitchell
Bentsen	Hart	Moynihan
Biden	Heflin	Nunn
Boren	Hollings	Pell
Bradley	Humphrey	Pryor
Bumpers	Inouye	Randolph
Byrd, Robert C.	Jackson	Riegle

So Mr. GLENN's amendment (No. 639) was rejected.

Mr. STEVENS. Madam President, it is my understanding the Senator from Maine (Mr. COHEN) has an amendment and following that we have already sequenced the amendment of Senator PRYOR. I would ask that following Senator PRYOR, the Senator from Alabama (Mr. DENTON) be recognized and following Senator DENTON the Senator from Vermont (Mr. LEAHY) be recognized.

Mr. CRANSTON. May I inquire what the Denton amendment is?

Mr. STEVENS. It deals with the Chappy James Flight Training Center in Alabama.

And the Leahy amendment, I do not know what that is. There is no time agreement on them.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

The Senator from Maine.

UP AMENDMENT NO. 730

(Purpose: To limit the use of funds for MX basing)

Mr. COHEN. Madam President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will state the amendment.

The bill clerk read as follows:

The Senator from Maine (Mr. COHEN), for himself, Mr. QUAYLE, Mr. MATTINGLY, and Mr. RUDMAN, proposes an unprinted amendment numbered 730.

On page 28, line 18, after the word "9,076,906,000," insert the following:

"of which $354 million shall be available only for Research and Development related to initial deployment of the MX missile in non-superhardened existing silos in a manner compatible with subsequent redeployment in a permanent basing mode to be recommended to the Congress by the President no later than July 1, 1983 which could include the addition to existing silos of ballistic missile defense, the provision of location uncertainty for offensive missiles and/or defensive systems, and superhardening."

Mr. COHEN. Madam President, the amendment that I sent to the desk and which I now offer, in the words of my colleague from Kansas, might be considered to be a simple amendment.

Mr. STENNIS. Madam President, may we have order so that Senators may hear?

The PRESIDING OFFICER. The Senate will be in order. Those Senators wishing to have conversations should retire to the cloakrooms.

Mr. COHEN. The amendment that I offer is cosponsored by my colleagues, Senator QUAYLE, Senator MATTINGLY, and Senator RUDMAN.

Basically, it is very simple on its face, but nonetheless I think it is a fundamental change in the approach that we are taking to the basing of the MX missile. There are several points which I think most in this Chamber would agree upon: That the basing of the MX missile in a permanent mode is essential to the Nation's defense; that basing the MX or basing any missile, whether it is Minuteman III, Minuteman II, or the Titan in a fixed site is an unsuitable mode for the ICBM force.

We have heard over and over again that this country now suffers a window of vulnerability. And that window of vulnerability is brought about because of the improvements that have been made by the Soviet Union in the targeting capability of their SS–18's and other large missiles that are capable, theoretically, of launching a first strike, a preemptive, so-called surgical strike against our ICBM force and taking out 90 percent or better in that strike.

Therefore, basing our missile force, our land-based missile force, in a fixed mode is unsuitable for its survivability. We have had years of testimony, volumes of testimony, I should say, presented to the Armed Services Committee and others, that in order to have survivability we need some form of deception for mobility, however one would like to classify it.

It also, I think, can be agreed upon that the hardening of missile silos, as has been recommended by the administration on an interim basis, does very little to improve missile survivability, and that such hardening does not reduce the threat of nuclear conflict or strengthen nuclear deterrence.

I would like to point to several comments that have been made before various committees by members of our Military Establishment.

The Chairman of the Joint Chiefs of Staff, David Jones, testified before the Senate Foreign Relations Committee that he had reservations about the practicality of interim basing in superhardened silos. He made essentially the same statement before the Senate Armed Services Committee.

Under Secretary of Defense Fred Ikle and Assistant Secretary of Defense for Development and Support, James Wade, told the Armed Services Committee that basing the MX in superhardened silos

provides a survivability that is "at very best marginal."

The Air Force Secretary, Lew Allen, in response to a comment that putting the MX in superhardened silos—and I am quoting now the Senator from Mississippi (Senator STENNIS)—"Sounds mighty weak to me."

That was a comment that my colleague made during testimony.

In response to that, Secretary Lew Allen said, "You are correct. It has not received a great deal of enthusiasm."

Allen and Lt. Gen. Kelly Burke, the Deputy Chief of Staff of the Air Force Research, Development and Acquisition, told our committee that basing the MX in superhardened silos was not a satisfactory solution to the vulnerability problem and could not insure survivability, although it buys us a little time. Mr. Burke also told our committee that he agreed with the statement made by former Secretary of Defense Harold Brown, that it does not make any difference whether you have a 5,000 PSI silo in the middle of a crater. "That was the basis for my recommendation that we go to MBS."

To come back to Gen. Richard Ellis, he said the answer to the question of whether hardening would really succeed in reducing the vulnerability of the MX to Soviet attack to the extent it would justify this expenditure, "When the last administration was having difficulty coming up with its basing mode, I recommended that by all means continue the development and production of the missile, the MX missile. Until you find a place to put it and decide upon a basing mode, put it in the Minuteman. Now, you are not going to get any more survivability but you are going to get a few more warheads with every survivor. But it was only an interim solution."

He said, "Rather than hardening it, I would rather use that money in some other aspect. We need money across the board in strategic systems. I would rather use the hardening money in some other aspect and depend on the fact that that is just a temporary home for the MX, recognizing that it will not be long."

Ellis, responding to a followup question by Senator NUNN as to whether he had seen any studies that would indicate hardening silos is a realistic and plausible question said, "We have asked that question of the experts many times. The answer I always got was that they never knew how to harden them strong enough in order to protect them against a CP which was believed to be the Soviets."

This document in my hand was sent to every single Member of the Senate, I think. It is called "Soviet Military Power." It was prepared by our Department of Defense. I think it is interesting that we should refer to this document prepared by our experts.

Turn to page 56 and I will read something to you concerning the Soviet military capability, their ICBM force.

On page 56 of this document, prepared by our experts, it says:

> The MIRVed versions carry 8 or 10 reentry vehicles (SS–18's). Each warhead of the 10 RV variant has a better than 50-percent chance of destroying a Minuteman silo. When used in pairs against a single target, the warheads are even more destructive. The single RV versions of the SS–18, with their large destructive power and accuracy, are capable of destroying any known fixed target with high probability.
>
> Are capable of destroying any known fixed target with high probability.

Later on that very same page, it talks about Soviet advances, what we anticipate will be the capability of the Soviet Union several years ahead. It says the following:

> The Soviet missile development program shows no sign of slackening. We expect improvements leading to new missiles and to the modification of existing missile systems. These improvements are expected to continue the trend toward greater capabilities against such hardened military structures as ICBM silos. As the accuracy of future Soviet missiles increases, it would be feasible for the Soviets to reduce the size of the individual RVs and thereby to increase the number of MIRVs carried on each missile.

In essence, this document says that the Soviet Union has the capability of overwhelming any known, existing, fixed targets, Minuteman existing silos; that they expect the accuracy of Soviet missiles to improve in the future, too, as to make even more probable their destructive capability.

With that kind of evidence presented to the committees, it becomes puzzling as to why we have decided on going for a hardening of those fixed silos, whether Minuteman II, III, or the Titan missile silos, why we would opt for hardening of those silos in the face of overwhelming military evidence to the contrary that it buys you very little, that it is of marginal importance.

Also to be considered is whether or not we want to, in my judgment, lower the threshold of nuclear war.

I think inherently in any decision about having fixed silos, we must deal with the question as to whether or not, by putting these new, bigger, more destructive missiles in a fixed mode we thereby lower that threshold and make them much more targetable, much more attractive for the Soviets to attack in a moment of strategic error, miscalculation, and madness. That has to be a factor that all of us must take into account as to whether or not we are going to commit ourselves to a future course of confining and limiting our decision on the basing mode to a fixed, hardened silo.

Mr. PRESSLER. Will the Senator yield?

Mr. COHEN. I yield.

Mr. PRESSLER. I ask to be added as a cosponsor, if I may.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PRESSLER. I visited Minuteman II sites in my home State of South Dakota during the recent recess. Are these the sites you are concerned with?

Mr. COHEN. I am not sure they have made any decision as to which silos they are going to harden. It would be easier to put an MX in a Titan silo but then it becomes more difficult to defend it. From a military point of view, it would be more desirable to put them in a Minuteman silo except that you then have some difficulties in dealing with the SALT II restrictions. So they have made no decision, to my knowledge, on if, in fact, they are going to put them into fixed silos at all. The administration to date has said that we have to go forward with the missile itself. I agree with that. We do not want to delay its IOC date any longer. Therefore, we have decided to take the interim step.

The interim step would include hardening existing silos or perhaps building new silos to accommodate the MX missile. That is the administration's posture because there has been a substantial amount of criticism directed to the policy, saying we will keep open the policy of going to a deceptive basing mode; we will talk about having a BMD, ballastic missile defense system; we will look at deep basing, at Big Bird, at even the Tridents or a combination missile, the D5.

But their focus right now is on the hardened silos as their interim solution.

Mr. PRESSLER. The report on Soviet military power from which the Senator read was given to me by the Air Force last Friday, when I inspected Minuteman II sites and a launch control facility in South Dakota.

Does that report say that the Soviets presently have the power with the SS–18 to destroy a fixed site missile, such as Minuteman II, Minuteman III, or the Titan, and by putting the MX into such a silo, hardened or whatever, they are easy targets for the Soviets?

Mr. COHEN. It says, "The single RV versions of the SS–18,"—capable of carrying 10 warheads—"with their large destructive power and accuracy, are capable of destroying any known fixed target with high probability."

Mr. PRESSLER. Therefore, Madam President, if we put the MX in the fixed silos, the Soviets would have the capability of destroying the MX.

Mr. COHEN. That is correct.

Mr. PRESSLER. I thank the Senator.

Mr. STEVENS. Madam President, will the Senator yield?

Mr. COHEN. I yield to the Senator from Alaska.

Mr. STEVENS. Madam President, I know that there is a number of reservations concerning certain aspects of the deployment of the MX missile. I want to make certain that I understand the Senator's amendment.

As I understand it, the amendment is not incompatible with the present decision of the President with regard to the deployment of the first 100 missiles. Is that correct?

Mr. COHEN. Madam President, would the Senator repeat that?

Mr. STEVENS. As I understand this amendment, Madam President, it is not incompatible with the decision of the President with regard to the initial deployment of the first 100 missiles. Is that correct?

Mr. COHEN. It is not incompatible, Madam President. It changes the emphasis. If I could try to simplify what that amendment says—it is rather technical language.

Basically, the administration has made a decision to proceed on an interim basis with the hardening of silos, keeping open the option of going to a deceptive basing mode, with either offensive or defensive missile, having BMD or deep-based mis-

siles or having a Big Bird or something else. They have kept that option open but have focused on hardening of silos as an interim solution.

What I have proposed in this amendment is to reverse that, to tip this glass of water upside down, saying, with this money you would spend for the hardening of silos, keep open an option to do other things; I would tip that glass of water upside down and say, we are going to take this money to do other things, keeping open the option of hardening fixed silos, but putting the emphasis upon deceptive basing mode, BMD, the Big Bird, whatever the other options are. Basically, this is changing the options from fixed targets or hardened silos to the other options they ought to be doing. It does not foreclose what the President wants, but it does change the entire emphasis.

Mr. STEVENS. Madam President, it is important to me to understand that there is nothing in this which would foreclose the decision the President has made.

Mr. COHEN. What it says is that money for R. & D. purposes—we cannot discuss military construction; military construction is not before us. We are not going to use any of the R. & D. money, the $354 million, for the purpose of hardening silos. What that money is going to be used for is to explore the other options which a good many other people and I believe ought to be explored. If DOD has other accounts that they want to use to come up with their hardened silos, they can do so; it would not be a violation of this. What this does is send—at least I think so—a strong signal to DOD that we think you are moving in the wrong direction; this is the direction most military experts support and which we feel is the most desirable.

Mr. STEVENS. And is it the position in this amendment that the funds in the bill for R. & D. could be used only in such a way as to be compatible with redeployment of the missile on a permanent basing mode to be recommended by the President, which could include not only the present decision but the other decisions the Senator has mentioned?

Mr. COHEN. That is correct. The finally determined basing mode could include, for example, superhardening. I would hope they would not go in that direction. I would suggest to the Senator that if that is the final suggestion, it be rejected by Congress. What this will do is force the administration to look at other options as opposed to what they are doing now, making a commitment to go forward on the hardening of the silos, saying we will leave open that option for the deep-based missile, the BMD, all these other options.

What I am suggesting is two things: That we change that direction, saying let us go forward on the other options, leaving open as another option the final hardening and move up that date from January 1, 1984 to July 1, 1983. I think the time has come for a decision, instead of dragging out the decision on the MX, that we come to some decision or conclusion on how we are going to base it.

Mr. STEVENS. Madam President, will the Senator let me explore one other thing? That is the date. I do intend to communicate with the Department concerning this matter to see what I might state on the floor concerning the position of the Department on the Senator's amendment.

What led to the date of July 1, 1983? In our appropriations or authorization process that is a strange time of the year. We deal with October 1 fiscal years, or we deal with authorization bills related to October 1. Why has the Senator picked July 1?

Mr. COHEN. Madam President, there are two factors I took into account. One was General Ellis' testimony before the committee that he felt the administration had 15 years of studies on the shelves, that they could accelerate their investigation, perhaps come up with a permanent basing mode for the MX within a calendar year. That was one factor I took into account.

The second factor was that this complies with the Air Force's own program, which calls for a series of phase points in the decisionmaking process. They had tentatively set August 2 as one of the points and July 3 as the other interim point for final decision. This July 1, 1983, date comports with one of their phase points. That is why it was chosen.

Frankly, I would have preferred to move it up to March of 1983, as suggested in a related amendment by Senator NUNN. That would get into our budget cycle authorization before our Senate Committee on Armed Services, or I could have delayed it until December. But I thought July 1 would coincide with an opportunity for our own committees to hear the evidence coming out of DOD. It would comply with the Air Force's own target date as one of their phase points for reaching an interim decision.

Mr. STEVENS. I thank the Senator.

Mr. President, I yield to the Senator from Idaho.

Mr. McCLURE. Madam President, one of the concerns that I think has been expressed by many people, I think the Senator from Maine touched upon in his opening remarks on this amendment. That is that the threshold of nuclear warfare has been lowered. Would not the Senator from Maine agree that that threshold has been lowered not by our decision with respect to a basing mode for MX or the development of MX, but that threshold has been lowered as a result of the increased capacity of the Soviets to strike at our ICBM force?

Mr. COHEN. Madam President, I do not disagree with that analysis. The fact that we have this window of vulnerability has come about principally because of the development of more accurate systems by the Soviets, which we in fact have contributed to by allowing the sale or transfer of ball bearings that had for years been banned. We sold them to them under the period of détente. That now makes their missiles much more accurate, which does in fact make our missiles more vulnerable.

What I was suggesting is that we have a number of options open; that if we go into a deceptive mode, that avoids the reduction of the threshold because it makes it less likely that the Soviets want to attack it. If we go to a fixed mode, then I suggest we do in fact lower the threshold, not because we want to do so.

I agree with the Senator that it is because the Soviets have, in fact, developed a first-strike capability. But that is the situation we find ourselves in.

Mr. McCLURE. Would the Senator agree further, Madam President, that that option is not ours? The option is forced by their technological development but, at least, development of a new MX missile gives us greater attack capacity or retaliatory capacity if, indeed, it leaves that silo prior to the time the incoming ICBM will arrive.

So that if it gets out of the silo, the fact that the new missile has greater capacity to destroy is a more effective deterrent weapon than the current generation of missiles.

Mr. COHEN. I do not question that it would be a greater deterrent. If we were to announce that we are now going to adopt, instead of a policy of MAD—or mutual assured destruction—a policy of launch warning, that raises another dimension to the problem of nuclear holocaust.

Mr. McCLURE. But, as a matter of fact, inherent in that is the reduction of the nuclear threshold to which the Senator makes reference. I agree with him on that. I think it is unfortunate, but it is a fact.

As a matter of fact, the deployment of the MX, which will give us greater ability to destroy, is in response to their greater ability to knock out what we have to destroy them with. But there are a couple of other factors.

As was indicated in the Senator's reading from the DOD publication, it takes a single warhead SS–18 to give the kind of assured destruction, or multiple warheads of smaller size to give high probability destruction, of a hardened silo site.

Therefore, we begin to restrict the ability of the Soviet Union to use their weapons in different ways. They would have to use the single large warhead or more of the smaller warheads in order to deal with the MX missile in a hardened silo. Therefore, they begin to use more of their weapons for a single purpose and have less available for other purposes.

Mr. COHEN. The only problem is that we are talking about 36 silos. We do not want to double up. The Senator is talking about 70-odd missiles out of an arsenal they have of thousands.

Mr. McCLURE. I think there are only 308 SS–18's, if I recall correctly, so we are beginning to use up a large part of the inventory for a single purpose.

Mr. COHEN. Three hundred and eight, with 10 heads.

Mr. McCLURE. But if it is 10 heads or a single head, they still have to use one on each site of more than one of the smaller heads.

Mr. COHEN. Or the 19's.

Mr. McCLURE. The 19's are not the question we are discussing at the moment with respect to the single capacity.

The other point is that it also limits the range of the choice of weapons which

the Soviets might be able to use to attack our system force. As it is now, with unhardened sites, they can attack it with their strategic submarine missiles as well as land-based missiles. But if you have a hardened ICBM site, that wipes out their capacity to destroy by their submarine-based missiles, and they have to use the ICBM of the land-based force as an attacking force.

Mr. COHEN. All I am suggesting is that because we are changing so few of the silos—in other words, talking about 36, they can overwhelm that by using up very little of their total capacity, so you have not compromised their ability much. It does not buy you very much for the amount of the investment.

Mr. McCLURE. I will not argue that point, but it buys something.

Mr. COHEN. As compared to what?

Mr. McCLURE. It complicates their problem to some degree.

Mr. COHEN. To some degree. But I say that to the extent they have the capacity they have, they could overwhelm that with very little effort.

I will not get into the whole debate of the MPS. But if you are talking about 146 shelters and the Soviets having to use two in order to overwhelm each shelter, you are talking about a significant compromise of how many warheads they have to use as to 70? You are talking about thousands in that case, as to 70 here.

I will not get into a debate on the MPS. That is dead so far as the administration is concerned, the way it was received by the Carter administration.

For us to put the MX, with a considerable investment, into a fixed silo, hardened or nonhardened, buys you very little—something, but not enough to compromise the Soviet strategic capability.

I am suggesting that this establishment of a priority on the part of the administration is misguided. It is wrong. I think the emphasis should be more on the other items on which they have agreed they will keep open an option: Offensive-defensive basing modes, Big Bird, and others.

That should be the emphasis, leaving open the option for a fixed silo, if they come to that conclusion, as a permanent basing mode; but I do not believe they will. You will get more for your money by exploring these other things than by putting your money into the fixed silo.

Mr. McCLURE. I thank the Senator for yielding, and I compliment him for his initiative in focusing the debate in the way it has now been focused, because I think it is a much more constructive discussion than simply MX or no MX.

I wish to underscore a statement the Senator made earlier, and that is that this is in no way intended to delay or defeat the decision to go forward with building the MX missiles.

Mr. COHEN. That is correct. This is designed to allow the MX to proceed on schedule.

Mr. McCLURE. I thank the Senator for his comments.

Mr. TOWER. Madam President, will the Senator yield?

Mr. COHEN. I yield to the distinguished Senator from Texas.

Mr. TOWER. I say to the Senator from Maine that he knows where my sympathies lie in the matter of MX basing.

Mr. COHEN. Texas. [Laughter.]

Mr. TOWER. I have said that we will take it in Texas if that is the optimum place. The fact is that there are other places which are better. But Texans are more patriotic than most and are prepared to put up with some things for the security of the United States that people in other parts of the United States perhaps are not willing to put up with.

I think the deceptive basing option should and must be kept alive. In the final analysis, the great weight of military and scientific judgment is that the deceptive basing mode for the ballistic missile defense system provides us the best probability of survivability of a substantial force to threaten the offensive capability of the Soviet Union.

I know that the Senator from Maine has an amendment that is similar in many respects to an amendment intended to be offered by the Senator from Georgia (Mr. NUNN). I should like to offer my good offices at this point in saying that we might get together on this, knowing that all of us are like-minded people, and see if something can be worked out so that we can bring this matter to an early resolution.

I have spoken to the Senator from Georgia, and he has said that he is willing to parley. He also said to me, "I'm just a little country lawyer." That led me to believe that any parleying done would result in favor of the Senator from Georgia.

Mr. NUNN. I assure the chairman that everything I am doing in regard to the MX is in complete accord with the chairman's original statement.

Mr. TOWER. Somehow, I thought the Senator from Georgia would say that.

Mr. NUNN. I try to follow the lead of my chairman.

Mr. TOWER. I suggest that we have a parley and see if this matter can be worked out to the satisfaction of all.

Mr. COHEN. I say to the chairman that I would welcome the use of his good offices to achieve any sort of agreement with the Senator from Georgia; because I have said, privately and publicly, that the Senator from Georgia, throughout the discussion of the MX, has had in mind only one thing, and that is the security of this country. He has acted throughout our deliberations in the committee in the best fashion to find what the facts are and what the military jurisdictions are or are not.

So I would welcome any effort we can make to achieve a balance or a compromise. We are not that far apart. There is a change in date, there is a slight change in emphasis, but not much.

Mr. STENNIS. Madam President, will the Senator yield, before the Senator from Texas leaves the floor?

Mr. COHEN. I yield.

Mr. STENNIS. Madam President, I did not hear all that the Senator from Texas said with reference to this matter, but I point out that we have come to a rather serious situation here, where we are trying to get legislation on the floor of the Senate through an amendment to an appropriations bill, a matter here that goes to the very heart, in a way, of this whole question of the MX missile and its basing mode.

We have been working on this for about 5 years, and we have not reached anything firm on it. It is very difficult.

But the President is on the verge now of starting negotiations with reference to having a more effective agreement that will be to the mutual advantage of the parties, of course, of some reduction or some limitation relative to these terrible weapons.

So there could not be anything more delicate, more difficult, and more important, and I just hope that we will not have one iota of any provision here that has any detraction from the President, the Chief Executive's ability to have the authority he needs.

There is no insinuation here that we are trying to limit him in any way.

Is what I have said in keeping with the spirit of the Senator from Maine? I feel that it is, but I just ask here in debate if that is his feeling about it.

Mr. COHEN. Madam President, let me respond to the distinguished Senator from Mississippi that this is not intended in any way to compromise the President's ability to negotiate with the Soviet Union. We all recognize he is moving into those negotiations.

I think a number of us on the committee feel that the plan as presently presented is not the wisest one from the military point of view. What we are trying to do is shift the emphasis by telling the administration and DOD that the MX missile will not have congressional support if they are going to go ahead with a fixed silo base.

That is my judgment, at least, and I certainly will not support it on that basis.

What I am trying to do is give him more of an opportunity to say, "Look, we think this amount of money should be used for those other options that you said you want to explore. Put the money into the exploration of those leaving open for final determination the hardened silo." It is not a compromise. It gives him an option that he may be eager to pursue.

Mr. STENNIS. I thank the Senator.

If I may let me address the Senator from Texas. This is a little out of order, but I did not get to hear all of his statement, as I said.

Senator TOWER stated his purpose here and that was, as I caught it now, the last part, that he thought language could be worked out here on this important point that in no way jeopardizes or detracts from the President's power, position, responsibility, and backing with reference to any conference, meeting, negotiation, or anything else, that he may have.

Mr. TOWER. Madam President, will the Senator from Maine yield to me to respond to the Senator from Mississippi?

Mr. COHEN. I yield.

Mr. TOWER. I do not believe that this amendment would seriously inhibit the President's negotiative position on strategic arms reduction talks. The whole

matter here is really to keep alive other options than simple silo stuffing which has met with a great deal of resistance here on both sides of the aisle.

I think there is some bipartisan discomfort with that particular proposal. I might note that I was probably the first Member of this body to publicly criticize the basing mode plan suggested by the President. However, I want the President to still have this option. It very well may be that ultimately the most survivable system will be one in which there is a mix of the deceptive basing mode, of hardening, and ballistic missile defense, and there are studies that are extant that indicate that this is a good and survivable plan. I think it is one that merits consideration and merits study.

I wish to see these two Senators, the Senator from Georgia and the Senator from Maine, get together because they are not very far apart.

I would not say that the Department of Defense is overjoyed with this, but I think they are prepared to live with it.

Mr. STENNIS. I see.

Mr. TOWER. And I think the important thing is that nothing be done here to jeopardize the missile itself.

This missile is ready to fly in 13 months. It is a missile we should and must have in our arsenal. But I do feel that if serious inhibitions are placed on proceeding toward the determination of a basing mode that resistance will flow to the production of the missile itself and the missile itself will be jeopardized.

I must be convinced that in both the Nunn and Cohen approach that will not be the case because I do not wish to see us so cloud the issue of basing mode that ultimately Members of this body and the House of Representatives might decide that if we cannot come to a determination on it, we should not produce the missile itself. I think that would be a sad thing indeed.

Mr. STENNIS. I do not want that to happen. I think the Senator has clarified this. I hope we can have this conference.

We have two amendments here before us now on this subject. There is a lot of merit in it to a degree, I have to say, but let us get together if we can.

I thank the Senator for yielding.

Mr. McCLURE. Mr. President, will the Senator yield for one question?

Mr. COHEN. I yield.

Mr. McCLURE. I thank the Senator for yielding and I thank the Senator from Georgia and others who are seeking recognition for allowing me to ask this question of the sponsor of the amendment.

If I may address one question to the Senator from Maine, I am a little concerned by one comment that was made by the Senator from Maine and that is that this amendment would be a signal to the administration that it is the signal that Congress is likely to oppose the MX if it is put into a hardened silo role.

Mr. COHEN. That is the ultimate decision.

In other words, it is my personal judgment if we spent $20 billion or better on an MX missile put into a silo, hardened or not, and that were the solution to the basing mode for an MX it would not receive congressional support in my judgment.

Mr. McCLURE. Let me say to the Senator from Maine for myself I might well be able to accept the thrust of the amendment before us to broaden the options in basing mode, but I would not want my position in support, if that is where I end up in support of this amendment, to be construed as the Senator from Maine has construed it that without that I would be opposed to the MX missile because I am not, and I support the MX missile. I think the issue of whether it is in a silo or in some other basing mode is the issue and I would want it not to be a predisposition of that issue but a genuine broadening of the options.

Mr. COHEN. Let me phrase it a different way. What we have been hearing from the Pentagon for the past 7 or 8 years now I suppose is that with the fixed location of our Minuteman missile force and Titan force because of the increased accuracy on the part of the Soviet missile capability those missiles are now vulnerable to a preemptive strike. It seems to me that if our response is that we are going to put a bigger, more powerful, more destructive missile in those same sites, hardened or unhardened, I could not support that as a decision because it does not give us anything. What it gives us is either a launch under warning strategy, which I reject, or it gives us a target which is more expensive, more destructive, which the Soviets might be encouraged to take out.

That to me is not a viable option.

Now, if it comes in conjunction with something else, super hardening coupled with something else, with some deceptive basing mode, either offensive missiles or defensive missiles, if it comes in combination with other things, then that is another matter.

But what I was suggesting is if all you are going to do is to stuff big missiles in existing silos without hardening and without SALT II, I would not be supporting it. I would rather go with an accelerated Trident or other options rather than putting that much money, that much technology, into a hole at the moment.

Mr. McCLURE. I might say to the Senator, if he will yield for one moment, I understand the Senator's position. However the Senator from Idaho might well have a different position if we develop something better than the hardened silo concept. But there are some advantages to the hardened silo concept worth something to us.

While I may deplore the lowering of the nuclear threshold, I do not believe we have ever said as a nation that we will accept the first strike before retaliating. I would not want this debate to indicate that we have rejected the opportunity or the option on the part of our country to respond by sending our ICBM's in the presence of an attack on our country by ICBM's from another country. I detect a little of that undercurrent here. That is a strategy we have not rejected.

But if we have rejected it, that would be a massive change of policy on the part of our country, and it would say, "We are willing to accept massive destruction in this country and then we will think about whether or not we will retaliate."

Mr. COHEN. Mr. President, if the Senator will yield——

Mr. McCLURE. I do not believe that is our position.

Mr. COHEN (continuing). That has never been rejected, never been ruled out as the principal method of defense in this country.

I would also say the language of my amendment specifically includes the superhardening as an option.

Mr. McCLURE. I understand that and I appreciate it. But I want it to be clearly understood on the part particularly of those who might misjudge our will or our determination or our capacity to respond upon attack that it does not necessarily mean we are going to wait until the surface of this country has been incinerated before we decide whether or not to push our own red button.

Mr. COHEN. That is correct.

Mr. GARN. Mr. President, will the Senator yield for one brief comment? I will not take too long. But as one who has been intimately involved with the MX for about 6 years, I do not have any serious objections to the amendment as long as it leaves the President flexibility, and I am satisfied the Senator from Maine's amendment does that.

However, I cannot totally accept the argument that going to a superhardened silo is worthless. We cannot take the time to get into a lot of detail and talk about classified information, about degrees of accuracy. There is no doubt, however, in my mind, that with a superhardened silo you do buy some additional—not a great deal, additional—survivability. It is better than what we now have because you do require them to increase their accuracy, spend a great deal of money trying to improve that accuracy, hit closer because the additional hardening requires a much more accurate warhead.

I agree that is only marginal, but the President only talked about it as an interim solution. If he talked about that as being all he said, then that is all we would do, I would not favor it. But when it is put in terms of a temporary or interim solution while we are studying additional options—and I think there are some options—and while everybody says they have all been studied, I do not think that is true.

There is some new technology, I think, that can be studied in the next year or two that may seem far out to some people now that could prove to be very promising.

So again I will not raise any serious objection to the amendment as long as it leaves the President the flexibility to study various options and come back to us with a recommendation for permanent basing.

I did want to make the one point, that superhardening as an interim solution does get some additional survivability.

Mr. COHEN. I thank the Senator.

Mr. GLENN. Madam President, will the Senator yield for a question?

Mr. COHEN. I yield.

Mr. GLENN. I am inclined to support the Senator, and for this reason: The methods for hardening to 5,000 psi have yet to be invented. So it hardly makes any sense to be planning that when we still can find no engineers around who can find how to do this yet.

This whole issue of the MX basing mode, I will not be able to participate in the discussion this evening because I have to leave shortly, but I want to bring this up tomorrow and talk about this subject because I think we are off on the wrong track when we replace a geographic location with a geographic site which has already been pinpointed, and we are not going to have them try to flure out new aim points. They already have the aim points already targeted, and when we go that route it is a mistake, and I want to discuss that and some options we should be considering, tomorrow. I cannot be doing that this evening, but I want to discuss it tomorrow. But in light of the fact that 5,000 psi hardening has not been invented, I agree with the Senator.

The PRESIDING OFFICER (Mr. D'AMATO). The Senator from Maine.

Mr. COHEN. I yield to the Senator from Indiana.

Mr. QUAYLE. I thank the Senator and I join him in cosponsoring this amendment.

I am hopeful that we can get together with the distinguished Senator from Georgia because there are only marginal differences between the two amendments. There really is no significant or substantive difference between this amendment and the potential amendment that will be offered by the Senator from Georgia, and I am hopeful we can resolve that.

Mr. President, there is no doubt about it, that there is a bipartisan dissatisfaction with the decision on the MX. This carries across both sides of the aisle. It is not this side or that side, it is bipartisan.

I suppose at this juncture we have three options: First, we can cut out all the funds for MX; second, we can stay on the same course; or, third, we can modify with flexibility the present decision.

The first option to cut out all the funds and do away with the MX at this particular time, with the sensitive negotiations going on, in my opinion, would be wrong.

The second option to just pursue the same course which we basically studied for 15 years with respect to this issue would also be wrong.

We have got to bring pressure on the administration to come up with a basing mode that is going to be acceptable, that is going to be survivable, that is going to be adopted.

The intent of this amendment is twofold. One, as far as an interim basis, we are saying that superhardened silos are wrong. We are not suggesting and we are not precluding that superhardened silos on a permanent basis, on a permanent basing mode, would be wrong. As a matter of fact, it is specifically included in the amendment.

But what is precluded is on an interim basis to go ahead and harden these silos. I want to quote the chairman of the Joint Chiefs of Staff, David Jones, on the hardening of silos. He said:

> I remain to be convinced that hardened silos would give survivability. I reserve judgment on whether it would be wise to go ahead with hardening.

Incorporated in that statement is this amendment because as an interim proposition we are not going to allow funds for research and development to be used for superhardening.

The second main point of this amendment is to accelerate the decision on the MX basing mode. Incorporated in the present bill is January 1, 1984. This accelerates it to July 1 of 1983.

The message in this amendment is clear. There is bipartisan dissatisfaction. We are modifying the decision made by the President in hopes that a better decision will be forthcoming and soon, as soon as possible.

But I believe that the course of modifying the present policy decision with a certain degree of flexibility is the proper one, and again I reiterate my hopes that we can come to an agreement, that this will not be a protracted debate, and we can vote on this matter reasonably soon.

Mr. COHEN. I yield to the Senator from Virginia.

The PRESIDING OFFICER. The Senator from Virginia.

Mr. HARRY F. BYRD, JR. I am very much inclined to vote for the amendment of the Senator from Maine and the one to be offered by the Senator from Georgia. I hope that the two can work out an amendment that will be acceptable to each of them.

I have long felt we should have a mobile missile. The problem is the basing mode, and no one has been able to come up with a basing mode on which a consensus could agree.

As I understand the proposal of the Senator from Maine, and I think the same would apply to the proposal of the Senator from Georgia, what you are seeking to do is to encourage a mobile basing mode without eliminating the possibility of going to a hardened site, am I correct in that assumption?

Mr. COHEN. That is correct. That is the intent and the language of the amendment we have offered.

There is some distinction between that and the language of the Senator from Georgia which perhaps can be resolved. But I think that is clearly the intent of the wording of the amendment we are offering.

Mr. HARRY F. BYRD, JR. I think I should say that when the committee hearings were held on this matter earlier and Secretary of Defense Weinberger explained his hardening proposal, I indicated at that time that I would go along with that concept.

But the more I think about it, the more I am included to the view expressed in the amendment offered by the Senator from Maine and the Senator from Indiana and the Senator from Georgia that it would be well to encourage the administration to continue to seek a means to go in the other direction, namely, the mobile direction, but not foreclose the option of going in the direction which the President has recommended up to this point. I assume that that is in conformity with the Senator's idea.

Mr. COHEN. That is in complete conformity with the Senator from Maine.

Mr. STEVENS. Would the Senator yield right there?

Mr. COHEN. I yield to the Senator from Alaska.

Mr. STEVENS. I have had the conversation I indicated I would have with the Secretary in the Secretary's office. And I am worried about the implication here of the amendment because it limits the $354 million. There is an addition $20 million, I am sure the Senator realizes, for long-term options. It is not available for any research concerning super hardening. But as I understand the amendment, the super hardening option would not have any funds available at all.

I think I can defend the amendment that the Senators have presented on the basis of preserving options, but a close reading of this amendment would indicate that none of the $354 million could be used for the super hardening research. That was not the Senator's intention, was it?

Mr. COHEN. I understand what the Senator's problem is. I believe it was his committee that directed how the other $20 million was going to be spent, and I certainly do not want to trespass on that.

Mr. STEVENS. That is long-term research, and we decided they ought to have that confined to there.

Now the $354 million, if you are going to be fair—and I understand the Senator has stated that is his objective, to preserve the other options, location uncertainty, the BMD, as well as super hardening—some of this money ought to be available for super hardening. And I am prepared to recommend it.

Mr. COHEN. I would suggest that we could discuss the figure during the same break that we have with Senator NUNN, Senator QUAYLE, myself and others to try to work out our language differences. We might take the Senator's question into account as far as the amount that would be spent or allowed to be spent for other options.

Mr. HEINZ addressed the Chair.

Mr. STEVENS. One other question if I may continue this. I ask the Senator from Pennsylvania about the date of July 1, 1983. It bothered me before, and it bothers me again now, after having had the conversation, because of the rate of progress as regards research. It is R. & D. And the December of 1983 date has persisted through the whole discussion.

I understand our staff has, in terms of our hearings, carried the December 1983 date through as being the earliest possible time for an acceptable decision time frame, looking to 1984, of course, as the date that was originally assumed to be the key controlling date as far as the MX deployment is concerned.

But I would urge the Senator as he discusses this matter now to look at this July 1, 1983 date. It raises questions

again about our appropriations process and whether we ought not to face the question directly as to this limitation. July 1983 is the beginning of the last quarter of a fiscal year. If you cannot meet them on their December date, at least push it into November or push it into the next fiscal year. Otherwise, we are going to be debating this thing each year now on appropriations bills when it ought to be in the December category or at least beyond October 1.

Mr. COHEN. The only difficulty is, if you are talking about July 1983, if you go by that July date you are effectively precluding Congress from doing anything in 1983. You are already in October 1, 1984. And then you are starting, the beginning of next February 1984, discussing 1985.

All we are trying to do is take expert testimony, such as Ellis, who said we can do it within the calendar year.

Mr. STEVENS. You do not see my point. If something must be done by 1983, to be reflected into the fiscal 1984 appropriations process of this committee, that means we have to have it anticipated by October of 1982. We deal with what happens in the period from October 1, 1982, to September 30, 1983, in 1982. And this pushes the impact of the decision into the previous year, not the following year.

I urge the Senator to think about putting it over into the next fiscal year. It is a fiscal year 1985 problem. That is what it really is, a fiscal 1985 problem. It should not come up in fiscal 1983.

Mr. QUAYLE. Will the Senator yield?

Mr. COHEN. I yield.

Mr. QUAYLE. I do not want to belabor this point, but my preference was to move this up even further than that. As the Senator from Maine said, General Ellis, before our subcommittee on November 12, just recently, said they could do this in a calendar year. So I do not think it is the fiscal year 1985 problem. I wish it was not. I would like to move it forward.

Mr. STEVENS. The deployment is the 1985 problem. The decision here is that the present decision must be made so that there is at least a year's time for deployment. In my opinion, you are really going to force us to inquire in September and October of 1982 what the decision is going to be in July of 1983, instead of waiting for the fiscal year that is in fact the fiscal year that deals with funding for deployment.

Mr. QUAYLE. Move it up to January 1 of 1983.

Mr. COHEN. Why do we not see what we can do with working this out with Senator NUNN and others, as far as what the date should be?

Several Senators addressed the Chair.

Mr. ANDREWS. Would the Senator yield?

Mr. COHEN. Yes.

Mr. ANDREWS. I appreciate my colleague from Maine yielding. I think it is important to recognize the timing, Mr. President, if I could point out to my friend from Alaska, the chairman of the subcommittee on which I serve. Timing is extremely important.

If we spend over $300 million to harden a bunch of silos, to put a 10-warhead missile in a fixed point because we are afraid that the Russians are targeting 3-warhead missiles in a fixed point all we do is step up the opportunity for them to take out 10 warheads at a time instead of 3 warheads at a time.

This whole MX thing borders on the silly. We are buying a Rolls Royce and we do not have a garage to park it in.

I think the amendment that my colleagues have come up with is probably the best we can do to at least point out to the administration that about the last thing we need to do is to spend tens of millions of dollars for a weapon that we do not even know where we are going to put it or how we are going to deploy it or how we are going to use it. That is what it is all about. And the sooner we find out the better off we will be.

Mr. STEVENS. If I may respond to my friend, I do not disagree. I have encouraged the activities of the sponsors to try and see if we could find a middle ground here. But $354 million for research is a lot of money. You do not crank out that research by the middle of next year. It is going to take some time, particularly when you crank in at least three more options.

They had a date of December for the hardening option. Now we are saying, "Use this money for at least three other options, but come in with a result 6 months earlier."

And I am saying that the time frame for a decision really is not until the next year, anyway. December was the earliest date they told us before. Now July is being cranked in here with research and this money will be increased when you broaden those options. I know that next year they are going to ask for more money, because they will be examining more than one option.

Mr. ANDREWS. Mr. President, if we do not tell them to get their rear in gear, if I might put it that bluntly, we are going to have multibillion dollar missiles coming off the assembly lines that will be obsolete by the time they have gotten around to figure out where to put them.

That is the concern to this Senator and I think it should be of concern to other Members of the Senate. Why start up a production line to crank out a missile you do not have a home for because you are concerned that the missiles we now have are targetable? That does not make too much sense. I would hope we could find some answers for a home for this waif before we start making many more of them.

UP AMENDMENT NO. 731

(Subsequently numbered amendment No. 646.)

(Purpose: To oppose reductions in railroad retirement benefits)

Mr. HEINZ. Mr. President, I sense there is consultation on the part of various parties, so I am going to take this opportunity to offer a perfecting amendment to the Cohen amendment, which I send to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Pennsylvania (Mr. HEINZ) proposes an unprinted amendment numbered 731 to unprinted amendment No. 730.

Mr. HEINZ. I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of the amendment add the following:

Because Congress provided in 1974 for an integrated benefit structure in the Railroad Retirement program which incorporated previously-earned benefits under Social Security in a separate part of the benefit, supported by annual appropriations;

Because last year's appropriation for payment of these so-called windfall benefits under the Railroad Retirement system was $350 million; and

Because the Senate passed on November 19 an amendment to the second continuing resolution for restoration of full funding of the Railroad Retirement so-called windfall account at an annual rate of $440 million; and

Because the House and Senate Conferees on the same second continuing resolution agreed to fund the Railroad Retirement so-called windfall account at an annual funding rate of $395 million;

Because the Railroad Retirement Board has authorized, without warning to beneficiairies, December 1 checks to beneficiairies with no so-called windfall payment; and

Because the Railroad Retirement Board is preparing a second mailing of checks to arrive around mid-December containing a separate payment of so-called windfall benefits;

Because this payment will reflect a 33% reduction in the so-called windfall benefit unless the Office of Management and Budget acts within the next 48 hours to authorize a higher benefit;

Because the lowest appropriations level approved by either House for this purpose is $350 million; and

Because Railroad retirees are now being subject to arbitrary reductions in benefits beyond any authorized by the Congress;

Therefore, it is the sense of the Senate that the windfall payment for December be made at least at the annual appropriation of $350 million, and that the Railroad Retirement Board should make no further reductions in the windfall payment pending the final decision of the Congress regarding this appropriation.

Mr. HEINZ. Let me take a moment to relax everyone on this amendment. It has nothing to do with the MX, with basing modes. It will not preclude the substitute amendment of my friend from Arkansas. It is an amendment that has to do with railroad retirement.

Now that I have explained what it is about, let me tell you why I interrupt the debate on the MX missile.

Mr. COHEN. You intend to retire the MX to the railroad. [Laughter.]

Mr. HEINZ. Mr. President, we have an emergency facing us with respect to a very large number, some 389,000, retired railroad workers nationwide. Of that 389,000 retired railroad workers nationwide, some 30,000 of this group reside in my home State of Pennsylvania.

The fact is that unless we act affirmatively on the amendment I have sent to the desk, which is a sense-of-the-Senate amendment that we want the Railroad

Retirement Board to continue to fund the so-called windfall portion of the railroad retirement benefit at no less than the level agreed to by the lowest of the two Houses on the second continuing resolution, within 48 hours the Railroad Retirement Board is going to take action that will result in a notice going out that will end up beside everybody's Christmas tree saying that all these people are going to get a 33-percent cut in benefits.

Mr. President, this is a 33-percent cut in benefit that Congress has never authorized. Indeed, Congress has authorized restoration of the full benefit. Just a few weeks ago, on November 19, this Senate adopted the amendment of the Senator from Ohio (Mr. METZENBAUM) by almost a 2-to-1 vote to have absolutely no cut in this so-called windfall railroad retirement benefit.

Before I go further, I want to explain what this windfall benefit is all about. It is really not a windfall at all. That is the name people use for it.

It is a benefit which people actually earn under the law. It was a benefit earned by railroad workers who also had covered work under social security. When the Congress saw a need to change the law back in 1974, it specifically protected the rights of individuals who were already vested under both systems.

The Government's actions toward these railroad retirees in the past few months are really a most unfair example, a bad example, of public policy. What is worse, in my judgment, is that it really represents callous disregard and insensitivity to the needs of these retirees.

Let me take a moment to review the history of this situation.

In July of 1981, these beneficiaries received a badly needed cost-of-living increase to help them keep pace with inflation. Then on October 1, without any advance warning, they received a 21-percent reduction in their so-called windfall benefit. That 21-percent reduction resulted from the creation of a separate windfall account outside the Railroad Retirement Trust Fund, and the fact that the Railroad Retirement Board anticipated that this year's appropriation would continue at last year's rate of $350 million, which was only 79 percent of the $440 million needed for full payment of the windfall benefit. In other words, a 21-percent reduction.

In December, these retirees and their families have received what I might charitably call a Christmas message from the Government. What did that Christmas message do—coming as it does right after Thanksgiving when most people, except these railroad retirement beneficiaries, are anticipating, hopefully, a holiday season with some good cheer in it? They get, instead, an unanticipated and unwelcomed, double shock. Their December 1 check contained a 100-percent—temporary, but 100 percent—reduction in the so-called windfall portion of their railroad retirement benefit. And now, unless we take action today and the Railroad Retirement Board and OMB relent within the next 48 hours, they are going to receive a reduced benefit far below the 21 percent that I talked about a minute ago. It will be a one-third reduction.

Let me say, Mr. President, that that is about as unwelcome and penurious a season's greeting that you could ever expect to have. But yet what do we have? We have at this point an unrepentant Uncle Sam, or maybe I should say an Uncle Scrooge masquerading as Uncle Sam, about to put through an unauthorized one-third cut in these benefits.

Mr. President, I defy my colleagues to provide the American people with a more telling example of fickle and arbitrary Government. The responsibility for this Christmas season fiasco in public policy lies fully with the Office of Management and Budget, as far as I can determine. What they are seeking to do is to impose a 12-percent reduction in benefits which we have never authorized.

On the contrary, what we did authorize by a vote of 61 to 34, a bipartisan vote, was to restore, at least in this body, full funding to this category of retirees, that is to say, the $440 million level.

What happened in conference was that the House and Senate conferees compromised on the issue. They split between $350 million and $440 million. They compromised at $395 million, roughly what would have amounted to about a 10- or 11-percent reduction from full funding, not a 12-percent reduction in funding.

I am sorry to say it, Mr. President, but there are people downtown, who, contrary to congressional intent, are simply moving in the opposite direction from that in which Congress has clearly indicated it is moving and intends to move.

Unless the Office of Management and Budget reverses its intentions within the next 48 hours the benefits received by these railroad retirees this Christmas will be substantially lower than in previous months.

That is why I have sent a letter to David Stockman at OMB explaining this to him and urging him in no uncertain terms to relent on this policy, and it is why I take the time of my colleagues in the midst of their debate on these other issues of importance to our national security to bring this amendment to the floor at this time.

My amendment would simply make very, very clear the sense of the Senate that the December payments to railroad retirees will not be reduced by one-third, but, rather, will be funded at no less than the lowest level previously agreed to by either body, the $350 million a year level. We will probably agree to a higher level.

Mr. President, let me make one additional observation. Just a few months ago, the administration and both Houses of Congress agreed, after a lot of debate, a lot of going back and forth, a lot of consideration, that it is bad, wrongheaded public policy to reduce the existing benefits of present retirees. That is what we decided when this body voted, just a month or so ago, to insure the continuation of the minimum benefit under social security to existing retirees. It is that principle that the House agreed on when they passed similar legislation. It represented a change from the reconciliation bill that was passed by Congress in July or August, and it represented a change by the President as well. The President said he is not going to go along with the taking away of benefits from any existing retirees.

That is the correct decision, Mr. President, and that is the essence of why I am here today, urging my colleagues to observe exactly the same principle.

That principle is that we should not single out a special group of beneficiaries—in this instance the railroad retirees—for a taking away of the benefits that they have earned, that they paid for, that are part of their compensation structure going back beyond 1974. I think that to do otherwise would be to make a totally unjustified and unfair sacrifice of our railroad retirees in the name of some false economy, to simply achieve some arbitrary percentage reduction in appropriations.

It is my view, Mr. President, that the Government has absolutely no business taking back benefits that were lawfully granted under this provision. The Government has no business pulling the rug out from under these people every few weeks. That is what we have been doing.

That is why I offer this amendment at this time, Mr. President, and I call upon my Senate colleagues to hold steadfast to their position of November 19 and to insure that we indeed have adequate and, hopefully, full funding of the railroad retirees so-called "windfall" benefit.

Mr. President, Senator D'AMATO, Senator FORD, and Senator SASSER have asked that they be added as cosponsors. I ask unanimous consent that they be so listed.

The PRESIDING OFFICER (Mr. DURENBERGER). Without objection, it is so ordered.

Mr. HEINZ. Mr. President, I ask unanimous consent that the text of my letter to the Director of the Office of Management and Budget, Mr. David Stockman, be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

SPECIAL COMMITTEE ON AGING,
Washington, D.C., December 2, 1981.

Hon. DAVID A. STOCKMAN,
Office of Management and Budget,
The Executive Office Building,
Washington, D.C.

DEAR MR. STOCKMAN: This letter expresses my strong opposition to the actions by the Office of Management and Budget to postpone and further reduce the "windfall" portion of the Railroad Retirement benefit. Such actions can only be interpreted as a totally insensitive response to the needs of nearly 400,000 beneficiaries of Railroad Retirement annuities. In addition, I believe that this reduction is entirely inconsistent with the expressed will of the Congress.

In July of this year, these beneficiaries received a badly needed cost-of-living increase to keep pace with inflation. On October 1, without advance warning, beneficiaries received a cut of 21 percent.

In response to this situation, the Senate voted on November 19 to restore full funding of the Railroad windfall benefit. In conference, a compromise was reached between the House and Senate, agreeing to only a 10 percent reduction in the benefit, or funding at a level of $395 million.

The third continuing resolution provided for funding at last year's level of $350 million. I now understand that your office has

initiated a plan to further reduce and postpone this benefit. I am now informed that the Administration is allocating to the Railroad Retirement "windfall account" only $308 million, thereby imposing a 12 percent reduction in benefits below the lowest level appropriated by Congress. In addition, retirees have just received their December benefits with the windfall benefit entirely excluded.

These are benefits which people earned under the law. They were earned by railroad workers who also had coverage under the Social Security system. Congress adopted legislation in 1974 that specifically protected the right of these individuals who were already vested under both systems.

The recent action by your office concerning the Railroad retirement windfall benefits are, in my judgment, unauthorized and perhaps illegal. I urge you to take immediate steps to reconsider this decision and restore the maximum authorized benefit to all current beneficiaries. At the very minimum, I believe that you should permit the Railroad Retirement Board to pay this benefit at the currently appropriated level of $350 million.

Your sincerely,

JOHN HEINZ,
Chairman.

Mr. HEINZ. Mr. President, I ask for the yeas and nays on my amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

RAILROAD RETIREMENT

Mr. ROBERT C. BYRD. Mr. President, I rise in support of the amendment being offered by the distinguished Senator from Pennsylvania (Mr. HEINZ). The Senate last considered the issue of railroad retirement in November. Senator METZENBAUM offered an amendment to the second 1982 continuing resolution, which would have provided for restoration of full funding of the railroad retirement so-called "windfall" account at an annual rate of $440 million. The Senate accepted that amendment. In conference, Senate conferees agreed to a somewhat lower funding figure. However, as we all know, that funding measure was vetoed by President Reagan.

There are some 400,000 retired railroad workers in the United States who, about 2 months ago, found their monthly pension checks cut by an average of $20, when a 21-percent reduction in so-called "windfall" benefits took effect.

In talking of these retirees, for the most part, we are speaking of workers who have depended upon the railroad retirement system for many years. We are speaking of a fixed group of individuals—people who were qualified both for railroad retirement and social security prior to 1974 when the Congress rewrote the railroad compensation law.

When the Congress changed the law, the Congress made a commitment to protect individuals already entitled to both railroad and social security retirement benefits. When the Congress established the separate so-called "windfall" payment benefits account in the 1974 act, it assumed that future appropriations would be adequate to honor its promise to railroad retirees.

I commend the Senator from Pennsylvania for his amendment and I am proud to add my name as a cosponsor. The Congress must never forget its commitment to honor promises of pension income to elderly Americans.

Mr. SASSER. Mr. President, I rise today to address a matter of the most pressing urgency and importance to more than 400,000 railroad retirees across the country who just yesterday received their December checks minus their dual benefit components.

There are slightly more than 1 million beneficiaries of railroad retirement. Of this group, some 400,000 are entitled to benefits due to years of employment under both social security and railroad retirement. They are entitled to these benefits through years of hard work and rightfully deserve the security and protection this annuity provides.

In 1974, the Congress passed the Railroad Retirement Act to address the large deficits incurred by the railroad retirement system trust fund. This act coordinated railroad retirement and social security benefit payments to eliminate certain duplications considered a so-called windfall for dual beneficiaries. For individuals meeting certain vesting requirements, however, the act preserved the pre-1975 dual coverage advantage, in part, by adding dual benefit payments to their annuities. Thus, employees and retirees already eligible were "grandfathered" in under this act.

Under the Omnibus Budget Reconciliation Act of 1981, the dual benefit account was separated from the main railroad retirement account and its funding depended on money appropriated for that benefit from general revenues. This was done after long deliberation and agreement from labor representatives, even though it was understood that the full value of the benefit would be vulnerable to budget cutting during the appropriations process.

For the dual benefit account to be fully funded, the level of appropriation for fiscal year 1982 would have to be $440 million. The administration, however, requested only $350 million and the railroad retirement board has been making monthly payments since October 1 on the anticipation that the $350 million level would be operative for the current fiscal year.

This level has already resulted in a 21-percent reduction in the dual benefit component portion of these checks, creating a great deal of confusion and hardship among the more than 400,000 retirees dependent upon their monthly checks. It has now been brought to my attention that due to uncertainty over the passage of the continuing resolution which expired on November 20, retirees will have the dual benefit portion of their checks delayed another 2 weeks and, therefore, have suffered a 100-percent reduction in this benefit until receipt of these supplemental checks.

Now I am also informed that the Office of Management and Budget intends to further reduce these dual benefits by an additional 12 percent in accordance with the President's September 24 across-the-board reduction requests. Such a reduction would present these retirees with further hardships in meeting their monthly obligations. The average monthly total annuity amounts to $331. With the current cutback of 21 percent in the dual benefit component, this average decreases to $311. To expect these individuals to absorb even further reductions is simply unconscionable. There is no justification for attempting to reduce Federal expenditures at the expense of those who can least afford it. These are individuals who have worked hard and long all their lives and are justly entitled to the benefits they have earned over their working lives.

I have talked with several retirees from my home State of Tennessee and have listened to their plight. I have seen the letters pouring into my office telling of similar stories of hardship and genuine fear and concern over the impact of further reductions. We are talking about elderly Americans who strive to make ends meet and ask nothing more than to enjoy the security and protection they should be afforded in their retirement years.

I would like to make it abundantly clear that it is the legislative intent of this Congress to provide the adequate funding necessary to preserve the current level of benefits under the dual benefit account. Indeed, upon consideration of the continuing resolution this Senate passed an amendment which would have restored this account to its full funding level of $440 million and in the subsequent House-Senate conference a level of $395 million was agreed to. It has never been the intention of this body to further reduce the level of funding for this account and there is little justification for subjecting it to the 12-percent across-the-board reductions called for in the President's September address.

Clearly there is no consensus among the majority to abide by these further reductions. Therefore, I would call upon the OMB to refrain from further reducing this account and would call upon the Congress to fully fund this account when we consider the continuing resolution.

Mr. METZENBAUM. Mr. President, I understand that the pending business is the Heinz amendment to the Cohen amendment.

The PRESIDING OFFICER. That is the pending question.

Mr. METZENBAUM. Mr. President, I ask the Senator from Pennsylvania if he is inclined to respond to some inquiries from the Senator from Ohio.

Mr. HEINZ. Mr. President, I will be delighted to respond to any inquiries from the Senator from Ohio.

Mr. METZENBAUM. The Senator from Pennsylvania has offered an amendment in a rather unusual manner, a sense of the Senate resolution, and the amendment is to the Cohen amendment, which has to do with the MX.

My question to the Senator from Pennsylvania is this: Is it the intent of the Senator from Pennsylvania to achieve the objective that was achieved when

the amendment of the Senator from Ohio was adopted the other day, with 34 Members of the other side voting "No" and with the Senator from Pennsylvania voting on my side? Is it the intent to achieve that objective?

Mr. HEINZ. I say to the Senator from Ohio that the purpose of this amendment is to get the Office of Management and Budget to spend money that Congress has appropriated by due process of law. I support, and will do so again, any amendment to restore the full windfall benefit. I supported the amendment of the Senator from Ohio which did that. I think it is a meritorious amendment. Indeed, I believe that is what we should do.

However, the purpose of this amendment is to take cognizance of the fact that the third continuing resolution, the stopgap, to go through December 15, is now the law of the land. While that does not meet either the funding objective of the Senator from Ohio at $440 million—or my final objective, for that matter—it funds at a level of $350 million, which is the same level as was appropriated last year.

The problem we have is that the Office of Management and Budget has told the Railroad Retirement Board not to mail out checks based on the $350 million funding level. What they have told the Railroad Retirement Board is, "Fellows, we are only giving you $308 million, not $350 million that Congress by law has authorized and appropriated."

In my judgment, what OMB is doing is certainly unauthorized and probably illegal.

I am not attempting to restore, through my amendment, the $440 million. We will have a chance to do that on another bill between now and December 15. There will be a continuing resolution or there will be an appropriation bill to which an amendment such as that will be germane.

In the next 48 hours, unless we send a loud, clear message down to Mr. Stockman, what he is going to do is authorize checks to go out in the mail and be received 2 weeks before Christmas, with this additional 12-percent cut, which we have never accepted and which we should not accept.

That is the objective of my amendment.

Mr. METZENBAUM. I understand, and I have no quarrel with the objective.

I am sorry that I learned about this amendment only 5 minutes ago, because I think we might have come up with a better way to achieve the same objective. Having said that, I am not sure that a sense-of-the-Senate resolution will achieve that objective, because it has no binding force in law. All it does is say that that is what we in the Senate think should occur, but it does not necessarily mean that it will occur.

Under those circumstances, I inquire of the Senator from Pennsylvania as to why he does not withdraw his amendment, which is merely a sense-of-the-Senate resolution, and offer an amendment that has the force of law which I am sure he would have to agree even David Stockman would understand that law is the law.

It is a fact that it may not become the law overnight because it has to go to the House of Representatives and go to conference committee. But be that as it may, a sense-of-the-Senate resolution attached to a bill is not more effective and if anything less effective than an amendment that is in legislation itself.

As the Senator well knows his amendment is in the second degree and therefore not amendable, nor can I offer a substitute for it, but it seems to me if we want to send the message—and I understand he might not want to go to the $440 million that I had that passed the Senate the other day, although I am not certain why we should not want to do that—then why do we not add this second-degree amendment and give it the force of law rather than merely that which is tantamount to a speech because a sense-of-the-Senate resolution really is nothing more than a speech except it indicates if we have more than 50 Members that it is a majority of the Senate that has so spoken but they have not enacted laws, and our business is enacting laws.

Mr. HEINZ. Mr. President, I am not going to really disagree with the Senator. I prefer something that really has the force of law, but we have a timing problem and the timing problem is that we need to send a loud and clear message today, and there is not anyone in this Chamber who expects the DOD appropriations bill to become law in the next 48 hours. Maybe we wish it would; maybe there are some people who are not going to vote for it and hope it does not. I do not know. I am going to support the bill, I think, unless someone adds a whole lot more money to it like a lot of Members on that side of the aisle were trying to do. The fact is that it is a sense-of-the-Senate amendment, and we could quite clearly define the sense-of-the-Senate amendment as an insistent demand on the part of the Senate that OMB follow the law.

But let me say this to my friend from Ohio. It is true that this is a perfecting amendment and when it is disposed of there is nothing to prevent the Senator from Ohio from offering another perfecting amendment; and the Senator from Ohio could offer a real amendment, one that actually spent money. I thought of doing that myself. But it was my judgment that it would not become law and the House of Representatives probably would not accept it as a nongermane amendment. They have much tougher germaneness rules than we do. We have, happily, practically none in situations like this. So we can debate an issue. We can bring a pertinent issue up in the Senate at any time. The House operates under different rules.

So the Senator is correct when he says I raise this issue in what we all consider to be the greatest deliberative body in the world, and I do seek to get—if possible—the support of not only 61 Members who supported the Senator's amendment, but I hope to get 100 Members of the Senate behind it, because this is a question of whether or not the Office of Management and Budget is going to obey the law of the land.

Mr. METZENBAUM. Let me ask the Senator from Pennsylvania, who is my good friend, whether or not he is in a position to assure the Members of the Senate that by passing this sense-of-the-Senate resolution the desired result will come about and that the amounts that should be spent will be spent or will the OMB then decide what they want to do with it? Is the Senator in touch with spokespersons for the OMB or for the Railroad Retirement Board and can he give us those assurances?

Mr. HEINZ. Mr. President, let me say that I cannot guarantee that anyone in this town is going to do anything the Senate wants. We are a deliberative body. We pass legislation. There have been, in the past, times when the executive branch has ignored what we have done and people in the executive branch have gotten in trouble when they do that. They are free to do it—if they want to take the burden of getting in trouble with Congress.

So I quite honestly cannot guarantee the Senator or anyone else that any law we pass is going to be fully and faithfully executed by the executive branch.

I know the Senator from Ohio on many occasions has had oversight hearings where he has just taken the administration, Republican and Democratic, over the hot coals demonstrating, I think, quite clearly that, on occasion, they were not following the intent of Congress.

I wish to make sure that we make a crystal-clear example and exhibition of the congressional intent on this matter, coming from this body, where the majority party happens to be the President's own party. This is no signal that could be ignored.

Mr. STEVENS. Mr. President, if the Senator will yield, does the Senator seek a vote on this amendment?

Mr. HEINZ. The Senator does.

Mr. STEVENS. The Senator realizes, of course, if we move to table the basic amendment this one goes with it?

Mr. HEINZ. The Senator is aware of that.

C–130H AIRCRAFT

Mr. STEVENS. Mr. President, I wish to make a record here that I believe is important to the committee and to the Senate.

We have recommended $109.5 million for the purchase of eight C–130H aircraft. That funding allowance is the same as approved by the House, but it is our committee's intention that all eight aircraft are to be procured for the Air National Guard and Air Force Reserve. That is what the request was for.

We find that there is some indication from the other body that four of these would be delivered to the Marine Corps.

This would be a highly unusual procedure of asking the Air Force to buy transports ostensibly for the Air National Guard and Air Force Reserve and then have them delivered to the Marines.

We disagree with the recommendations that have been made by the other body. The Air Guard and Reserves badly need

all eight of the air transports. That was the intent of the authorization.

We are informed that an additional $12 million would be needed to finance the modifications and split basing costs if these aircraft went partly to the Air Guard and Reserves and partly to the Marines.

We will take this matter up in conference, and it is our purpose here to discuss the matter so that the committee's recommendation to the Senate will be understood because several Members and the public have contacted our committee concerning the intention of the committee to deal with the eight C–130H aircraft. They are for the Air National Guard and for the Air Reserve.

NAVY'S UNDERGRADUATE JET FLIGHT TRAINING SYSTEM

Mr. STEVENS. Mr. President, I have discussed with the Senator from New York a question of the engineering contract that deals with the new jet flight training system, the VTXTS, and I would be happy to yield to him. I understand he has a statement he wishes to make and have my comments on that statement, is that correct?

Mr. D'AMATO. That is correct.

Mr. STEVENS. I yield to the Senator from New York.

Mr. D'AMATO. Mr. President, on Thursday, November 19, 1981, Secretary of the Navy John Lehman announced award of a $300,000 sustaining engineering contract to the team of McDonnell Douglas/British Aerospace/Sperry to begin prefull-scale development of the Navy's new undergraduate jet flight training system, VTXTS. This selection effectively ended competition for a program which will cost at least $2.1 billion.

I believe that development should be continued on a competitive basis, at least through the end of prefull-scale development. This is a major program, one which will have a 20-year life cycle cost of at least $5.5 billion. It will result in the development and procurement of approximately 300 new jet trainer aircraft for the Navy, and flight simulators, training programs, maintenance manuals, and everything else needed to operate the Navy's pilot training program after students graduate from the propellor-driven T–34C aircraft.

This system will replace the Navy's present fleet of jet trainers, which is composed of aging T–2 and TA–4 aircraft. These new aircraft will be used to train pilots to land on aircraft carriers. They must be strong enough to withstand a lifetime of carrier landings, which are best described as controlled crashes. They must be fuel-efficient, because they will receive very heavy use. They must be easy to maintain, even in the corrosive salt water environment they will face at sea onboard carriers.

In the past, when we have decided the winner of major competitions to build multibillion dollar systems, we required that competition be sustained even through full scale development. I cite as examples the A–9/A–10 flyoff and the YF–16/YF–17 flyoff. Now, the Navy has terminated the competition. I do not think this is a wise decision. It is certainly not supportive of the spirit of the many statements made in this body and by the administration on behalf of more competition in Government procurements rather than less competition.

It has been clearly established that open competition is one of the best ways to control costs and to provide a major incentive for quality work and timely completion of contract obligations. In the VTXTS program, the Senate has an unsurpassed opportunity to demonstrate a real commitment to the concept of increased reliance on competition in Government contracting. We can move from the realm of rhetoric to real control over program direction.

In the VTXTS program, prior to Secretary Lehman's announcement, there were five teams of contractors competing for the right to build this airplane for the Navy. The competitors were Rockwell, the team of Northrup and Vought, the team of Lockheed and Dassault-Dornier, the team of Grumman, Beech Aircraft and Link, and the team of McDonnell Douglas, British Aerospace and Sperry. The winning McDonnell Douglas entry is based on a heavily modified version of the existing British Aerospace jet trainer called the "Hawk."

When asked how the competitors' proposals compared, the Navy stated that they were all closely matched—no proposal was clearly superior or inferior to the others in the competition. Further, the Navy felt that there was no gross underbidding on the part of any of the competitors to "buy in." The Navy examined all bids, and made roughly the same adjustments to all to conform the contractor's proposals to the Navy's best estimates of what the competitors could in fact do if they were selected to build the airplane.

In that heated competitive environment, I am concerned that the Navy has prematurely terminated competition. I think that the selection of one contractor to go forward with the program at this point will result in a less disciplined program, one which will have a higher probability of uncontrolled cost growth and unplanned delay. The Navy states that because the program is not in the Navy's current program objective memorandum, it will have to be intensively and effectively managed to meet criticisms within the Department of the Navy and Congress so it can be funded.

While I believe that such intensive management will have beneficial effects, I do not believe it can take the place of the effects that the spur of continued competition would provide. The problem is that bureaucratic displeasure and congressional ire can be managed and contained by a well-orchestrated lobbying and Government relations campaign. A competitor is not subject to such devices. So long as a viable alternative is present, the Navy would have the very real threat of selecting another contractor to complete the system. There is nothing quite like the real possibility of the loss of the whole ball game to force a contractor to shape up and perform properly. Again, I believe we have an obligation to the taxpayers of this country to make sure that we get a dollar's worth of defense for every dollar we spend on defense. Keeping this program on a competitive basis would go a long way to proving to the people that we are serious about this, and are acting to make sure it happens.

Finally, I am concerned that insufficient attention has been paid to the fact that 43 percent of the work to be done on the program will be done overseas in Great Britain if McDonnell Douglas, British Aerospace and Sperry go forward to build the entire system. This would send almost $1 billion in aerospace business to a foreign company, to the detriment of our defense industrial base, our economy, jobs, and our balance of payments. I will not disguise the fact that I think that would be a bad mistake.

The fact that almost a billion dollars of aerospace business would be sent overseas under this award was reportedly not even a consideration in the determination of the winners in this contract competition. Now, this was a close competition. We have all become too familiar with the economic effects surrounding business decisions on plant closings. We know about ripple effects, and how many additional jobs can be lost when those manufacturing jobs are lost.

By one estimate, this program could result in more than 9,000 direct jobs in the United States, and more than 37,000 jobs overall. Can we afford to export that business? I do not think so. At the very least, we must keep one other contractor in competition for this program, so that there is a chance that he might prevail. This makes especially good sense when you realize that continued competition will produce a much better defined program, both in terms of technical risks and in terms of costs.

True, the winner now may turn out to be the winner then, too—but at least we will be able to be sure that we have a winner, not just the product of a somewhat arbitrary selection from among a crowded and closely matched field of competitors.

Further, I am assured that there was no offset agreement between the United States and Great Britain involved in this source selection. If a different contractor should finally win this competition, we would be breaking no agreements with the British.

Mr. President, I ask that the conferees the Senate appoints on H.R. 4995 seek language in the conference report which would require continued competition in this program, and would encourage the Navy to reprogram the money which would be necessary to sustain another contractor in the program at least through the end of the pre-full-scale development phase.

This report language would not require any new spending authority. It is estimated that the Navy can maintain a second contractor in this competition for less than $25 million, only a part of which would have to be obligated and expended during the current fiscal year. I strongly believe that the potential cost savings and quality improvements which would be the product of continued competition in my opinion more than justifies the relatively small expenditure involved.

I would like to pose to the distinguished Senator from Alaska the question in

terms of the kind of competition, and would it not, in his opinion, be prudent to bring up increased competition and to invest a small amount of money, some $25 million, when we are talking about a program which in its full life cycle will be more than $5 billion?

Mr. STEVENS. Mr. President, I think the Senator from New York has raised an interesting point with regard to this VTXTS program. We have discussed it previously and he has told me of his conversation with the Office of the Secretary.

I want to assure him that I will do all I can to urge the Senate conferees to insist on the language in the conference report that he seeks, and that would be language that would encourage continued competition in the program at least through the prefull-scale development phase of the bidding process and the contract-award process.

Mr. D'AMATO. I thank the Senator from Alaska. I think if we do that and are able to accomplish it, we will be saving possibly hundreds of millions of dollars by keeping this competition alive and well, so to speak, so that the American public and our armed services get the most for their dollar.

STATUS OF AMENDMENTS

Mr. STEVENS. Mr. President, there is a meeting going on off the floor on the one technical amendment dealing with the MX. But I wonder if I might inquire if there are other amendments we might take up while that drafting is going on? I have yet to see the B–1 amendment, having been ready for that battle now for 3 days, and I am hopeful that it will come up. Perhaps we should just go to third reading and not even engage in that activity, but I think that is a pious hope.

May I inquire what the amendment is of my good friend from Arkansas?

Mr. PRYOR. I might say to my good friend from Alaska that I do have an amendment which is a little more severe than the amendment offered by the distinguished Senator from Maine (Mr. COHEN) and the distinguished Senator from Indiana (Mr. QUAYLE) and, possibly, the Senator from Georgia (Mr. NUNN).

Mr. STEVENS. Is it on the same subject?

Mr. PRYOR. It is on the same subject, MX basing.

I do have another amendment I would say to my friend from Alaska dealing with sole-source and dual-source contracting by the Pentagon, and I wonder if he would like to discuss that amendment for a spell?

Mr. STEVENS. I do not feel under the circumstances of negotiations going on off the floor that we ought to deal with the Senator's amendment that would be a substitute for either the Cohen or Nunn amendment.

Mr. PRYOR. I would certainly agree with that.

Mr. STEVENS. But I do not see that there should be any disagreement to proceeding with the other amendment of the Senator if he wishes to present it at this time.

I ask unanimous consent that the pending amendment be set aside temporarily so that we might take the amendment that is to be presented by the Senator from Arkansas, with the full understanding that when that amendment is disposed of we will return to the pending amendment.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

(The remarks of Mr. PRYOR are printed after the treaty votes, by unanimous consent.)

The PRESIDING OFFICER (Mr. RUDMAN). The Chair would advise Senators that we do have an order to vote on the treaties at 4:20 p.m.

Mr. STEVENS. That is what I was going to remind the Senator and the Senate of; that we do have a vote scheduled for 4:20 on the floor for treaties.

THE TWO EXTRADITION AND TWO MUTUAL LEGAL ASSISTANCE TREATIES

Mr. PERCY. Mr. President, the Senate has before it today for its advice and consent two extradition treaties and two mutual legal assistance treaties. I know of no opposition to any of these agreements which were unanimously approved by the Committee on Foreign Relations and which have the administration's full support. Reports on each treaty have been prepared and are available to every Member at his or her desk.

Mr. President, it has long been established that the United States can demand the return from a foreign country of a fugitive only when it has an extradition treaty in force with the country where the fugitive is located. Under U.S. law, the United States can surrender a fugitive to a foreign country only on the basis of an extradition treaty (18 U.S.C. 3184). Since 1842, the United States has negotiated extradition treaties with about 90 countries. These treaties have become increasingly important in law enforcement as modern transportation has enabled criminals to operate on an international scale and to flee more easily from country to country. In an average month, the United States receives about 8 requests from treaty partners for the surrender of fugitives found in this country, and it requests the return to the United States of about 14 persons to stand trial or to serve sentences under previous convictions. The volume of extradition cases has grown substantially in recent years, and this trend is continuing.

Both the United States-Colombian and United States-Netherlands extradition treaties now before the Senate identify the offenses for which extradition will be granted, establish procedures to be followed in presenting extradition requests, enumerate exceptions to the duty to extradite, specify the evidence required to support a finding of a duty to extradite, and set forth administrative provisions for bearing costs and legal representation.

Section-by-section analysis of both extradition treaties are included in the committee reports prepared for each agreement. The analyses were provided to the committee by the U.S. delegation which negotiated the treaties and which was composed of representatives from the Departments of State and Justice.

Mr. President, the mutual legal assistance treaties recently negotiated with Colombia and the Netherlands cover mutual assistance in criminal matters and represent the third and fourth of their kind for the United States. The first was the Treaty on Mutual Assistance in Criminal Matters Between the United States and Switzerland; the second was the Treaty on Extradition and Mutual Assistance in Criminal Matters with Turkey.

One commentator writing about the Swiss treaty noted:

> The United States has shown a new pragmatic willingness to engage in concerned action in order to fill the growing need for an international practice with respect to legal assistance in criminal matters. The United States is thus moving to fulfill its obligations as a member of the world community as well as to extend the reach of its own proceedings.[1]

Many of the provisions in the new agreements derive from the Swiss and Turkish treaties.

The new treaties are intended to meet the diverse needs of the numerous enforcement agencies that may be involved in criminal proceedings. Where mutually agreeable, informal procedures will be employed to obtain evidence and/or testimony. Where informal procedures are inappropriate, formal requirements have been established through which the treaties' objectives of legal assistance can be achieved.

Both treaties will address a variety of criminal activities, including drug trafficking, fraud, the avoidance of American securities law, evasion of American taxes, and the financing of organized crime. In this context, both the Departments of State and Justice believe that mutual legal assistance treaties provide an effective mechanism for U.S. enforcement agencies seeking the assistance of foreign governments in obtaining information related to pending investigation or proceedings in the United States.

The U.S. delegation has also provided the committee with section-by-section analyses for both mutual legal assistance treaties under consideration at this time. As with the extradition treaties, the analysis of each agreement can be found in the appropriate committee reports which are available at the desk of each Senator.

Mr. President, in consideration of the strong bipartisan support for both the extradition and mutual legal assistance treaties now before this Chamber, I recommend that the Senate give its advice and consent forthwith to all of these agreements.

EXECUTIVE SESSION

TREATIES

The PRESIDING OFFICER. Under the previous order, the hour of 4:20 p.m. hav-

[1] Johnson, Paul W., "Judicial Assistance-Criminal Procedure," Harvard International Law Journal, pp. 349–364, at p. 350.

ing arrived, the Senate will now go into executive session to conduct one rollcall vote to count as four rollcall votes on the resolutions of ratification to four treaties, Executive Calendar Nos. 20, 21, 22, and 23.

The question is on agreeing to the resolutions of ratification.

On this question, the yeas and nays have been ordered and the clerk will call the roll.

The bill clerk called the roll.

Mr. STEVENS. I announce that the Senator from Arizona (Mr. GOLDWATER), and the Senator from Maryland (Mr. MATHIAS) are necessarily absent.

Mr. CRANSTON. I announce that the Senator from Nevada (Mr. CANNON), and the Senator from Arizona (Mr. DECONCINI) are necessarily absent.

I further announce that, if present and voting, the Senator from Nevada (Mr. CANNON), and the Senator from Arizona (Mr. DECONCINI) would each vote "yea."

The yeas and nays resulted—yeas 96, nays 0, as follows:

[Rollcall Vote No. 438—Treaty Doc. No. 97–7,
439—Treaty Doc. No. 97–8,
440—Treaty Doc. No. 97–11,
441—Treaty Doc. No. 97–16]

YEAS—96

Garn	Moynihan	

NOT VOTING—4

Cannon	Goldwater	Mathias
DeConcini		

The PRESIDING OFFICER. Two-thirds of the Senators present and voting having voted in the affirmative, the resolutions of ratification are agreed to.

The resolutions of ratification agreed to are as follows:

EXTRADITION TREATY WITH THE KINGDOM OF THE NETHERLANDS

Resolved (two-thirds of the Senators present concurring therein), That the Senate advise and consent to the ratification of the Treaty of Extradition Between the United States of America and the Kingdom of the Netherlands (Netherlands), signed at The Hague on June 24, 1980.

EXTRADITION TREATY WITH THE REPUBLIC OF COLOMBIA

Resolved (two-thirds of the Senators present concurring therein), That the Senate advise and consent to the ratification of the Treaty of Extradition Between the United States of America and the Republic of Colombia, signed at Washington on September 14, 1979.

MUTUAL LEGAL ASSISTANCE TREATY WITH THE REPUBLIC OF COLOMBIA

Resolved (two-thirds of the Senators present concurring therein), That the Senate advise and consent to the ratification of the Treaty of Mutual Legal Assistance Between the United States of America and the Republic of Colombia, signed at Washington on August 20, 1980.

TREATY ON MUTUAL LEGAL ASSISTANCE WITH THE KINGDOM OF THE NETHERLANDS

Resolved (two-thirds of the Senators present concurring therein), That the Senate advise and consent to the ratification of the Treaty of Mutual Legal Assistance Between the United States of America and the Kingdom of the Netherlands, together with a related exchange of notes, signed at the Hague on June 12, 1981.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the resolutions of ratification were agreed to.

Mr. COHEN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

LEGISLATIVE SESSION

The PRESIDING OFFICER. Without objection, the Senate will now return to the consideration of legislative business.

DEPARTMENT OF DEFENSE APPROPRIATIONS, 1982

The Senate continued with the consideration of the bill.

The PRESIDING OFFICER. The Senator from Arkansas.

Mr. STEVENS. Mr. President, as I understand it, the Senator from Arkansas is going to discuss his amendment which deals with the prospect of an advocate for competition at the Department of Defense. Following that, we return to the amendment that was offered by the Senator from Maine (Mr. COHEN), and following that, there is an amendment to be offered by Senator PRYOR again. Then there is one to be offered by Senator DENTON, and then one to be offered by Senator LEAHY.

So we do have a full schedule here. I hope we will be able to get some time agreements. I am more than willing to forgo the concept of a motion to table if we can get a reasonable time agreement, so that Members will know when the vote will take place.

Mr. ROBERT C. BYRD. Mr. President, will the Senator yield?

Mr. STEVENS. I yield.

Mr. ROBERT C. BYRD. Mr. President, we have not agreed to that sequence of amendments; have we?

Mr. STEVENS. Yes.

Mr. ROBERT C. BYRD. Is the order entered?

Mr. STEVENS. Yes; it was not any time agreement. It is a sequence.

Mr. ROBERT C. BYRD. All right.

Mr. STEVENS. I failed to notify the minority leader, but we did make that agreement when several Senators were seeking recognition at the same time.

The PRESIDING OFFICER. The Senate will be in order.

Mr. ROBERT C. BYRD. Mr. President, I have no quarrel with that, except that it might accommodate the Senate if, from time to time, other Senators were able to call up their amendments outside of the sequence which has been mentioned.

I am working on a time agreement on this side, and I have discussed it briefly with the manager of the bill and the majority leader. I hope we can arrive at a time agreement that will see us complete action on this measure no later than a given hour tomorrow.

However, I hope we will not sequence any other amendments at this time, because it may expedite the actions on the entire measure if we do not lock ourselves in too tightly with sequential ordering of amendments.

Mr. BAKER. Mr. President, will the Senator yield?

Mr. ROBERT C. BYRD. I yield.

Mr. BAKER. Mr. President, I agree with that. I think that now there is a good chance we can arrive at a unanimous-consent agreement for a time certain to finish action on this bill. I regret to say that I think it probably will not be tonight. But in order to get to a time certain tomorrow, we will have to work this afternoon and for a while tonight.

So I urge Senators to consider that our work is not done for this day. Negotiations will continue, and we will try to have a further announcement a little later as to a time certain for final passage.

The PRESIDING OFFICER. Under the previous order, the Senator from Arkansas is recognized.

PRICE COMPETITION AMENDMENT

Mr. PRYOR. Mr. President, I should like to discuss an amendment that I plan to submit at the proper time and proper place in the proceedings. I want to discuss a very extensive and chronic abuse of defense procurement; namely, the lack of effective and meaningful competition for the goods and services that the Department of Defense buys.

I could not, in good conscience, see a $209 billion appropriation bill with new obligational authority go through this body without at least a discussion of some $150 billion of that, which is going to be targeted for hardware purchases, operation and maintenance, and research, development, test, and evaluation, and look more critically at how all these dollars are going to be actually spent.

Today, about 70 percent—not 7, but 70 percent—of the DOD procurement dollar is awarded on a sole-source basis, where only a single supplier is involved, or on the basis of factors other than price competition. That is hard to believe, but it is true, according to the General Accounting Office. Several studies have shown that DOD could reduce the prices it pays by as much as 25 to 30 percent through greater use of competition.

Mr. President, I am not alone in expressing concern over this matter. In early November, the Committee on Governmental Affairs, under the distinguished leadership of Chairman ROTH, completed a series of hearings on the defense acquisition process. Throughout those hearings witness after witness, as well as my colleagues on the committee, lamented the absence of competition in DOD procurement.

I believe we in the Congress should translate these concerns into concrete action and commit DOD to specific goals for increasing its use of price-competitive procurement and require DOD to establish full-time advocates for competition to assure that no opportunities for obtaining competition are neglected.

Let me highlight the dimensions of the problem confronting us and the reasons why that problem exists.

TYPES AND EXTENT OF COMPETITIVE PROCUREMENT

As Senators know, Mr. President, DOD uses formal advertising and negotiation as the two basic procedures for purchasing goods and services. The Armed Services Procurement Act of 1947 requires DOD to procure by formal advertising whenever it is feasible and practical. According to the act, when a procurement is formally advertised, contracting officers should award the resultant contract without negotiation to the responsive and responsible bidder whose bid will be most advantageous to the Government, price and other factors considered.

The 1947 act also establishes 17 exceptions to the use of formal advertising, which provide DOD contracting officers with the authority to negotiate. Generally, contracting officers must develop written justifications supporting a decision to negotiate rather than to formally advertise.

While formal advertising always involves price competition, negotiated awards may be either competitive or noncompetitive. In cases where formal advertising is neither feasible nor practical, contracting officers may negotiate with two or more qualified suppliers for the best price or the best design and/or technology within acceptable price range. In the first instance, the negotiated award is price competitive; in the second, price is not the foremost consideration. In either instance the award is referred to as "competitively negotiated" since more than one potential supplier is involved. If negotiations are conducted with only a single supplier, however, the award is noncompetitive and is commonly referred to as "sole source."

Mr. President, I have prepared an exhibit which compares DOD contract awards in fiscal year 1979 by three categories: First, formally advertised with negotiated; second, competitive with noncompetitive; and third, price competitive. I ask unanimous consent to have the table that I have prepared printed in the RECORD.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

DOD CONTRACT AWARDS FOR FISCAL 1979

	Amount (billions)	Percent of total
Formally advertised negotiated awards:		
Formally advertised	$4.1	6.6
Negotiated	58.0	93.4
Total	62.1	100.0
Competitive versus noncompetitive awards:		
Formally advertised	4.1	6.6
Negotiated on basis of price	12.7	20.5
Negotiated on basis of design/technical factors	5.8	9.3
Subtotal competitive	22.6	36.4
Sole-source follow-ons to original award negotiated on basis of price or design/technical competition	10.8	17.4
Other sole source	28.7	46.2
Subtotal noncompetitive	39.5	63.6
Total competitive and noncompetitive	62.1	100.0
Extent of price competition:		
Price competitive: Formally advertised or negotiated on basis of price competition	16.8	27.1
Nonprice competitive: Negotiated on basis of design/technical competition or on sole source basis	45.3	72.9
Total	62.1	100.0

Source: GAO (PLRD-81-45, July 29, 1981).

Mr. PRYOR. Mr. President, although formal advertising is preferred by law, formally advertised awards accounted for less than 7 percent of the total $62.1 billion of DOD procurement. The remaining 93 percent represented negotiated awards.

Although the Congress has consistently advocated maximum use of competition, most of the DOD procurement dollar was awarded without competition. Of the total $62.1 billion, only 36 percent represented competitive procurements while 64 percent represented noncompetitive procurements.

When we focus on the noncompetitive awards, we see that about 17 percent of total DOD procurement represented something known as sole-source "follow-ons." In these cases, the contractor is the sole supplier by virtue of having been selected during a previous award made on the basis of price, design, or technical competition.

I want to point out, Mr. President, that by some strange logic DOD often lumps such sole-source follow-ons with competitive awards. For example, during the recent hearings of the Governmental Affairs Committee, defense officials, proclaiming their diligence in promoting competition, asserted that:

. . . The majority of our funds continue to be awarded either as a direct result of competition, or in follow-on awards where the source was competitively selected. . . .

Mr. President, such statements, by including sole-source follow-ons under the rubric of competitive procurement, defy commonsense and distort the true picture. The distinction between competition during the initial stage of a program and the lack of competition during the remaining stages—product development, full-scale production, and product support—is quite important, but is often and conveniently neglected by those who claims that defense is highly competitive.

In addition to sole-source follow-ons, we see within the noncompetitive category that the single largest chunk of the DOD procurement dollar was awarded sole source without any previous competition. These types of procurement actions accounted for about 46 percent of the total $62.1 billion.

Finally, when we focus on price competition we see that only 27 percent of the DOD procurement dollar was formally advertised or competitively negotiated on the basis of price. Over 70 percent was nonprice competitive; that is, the awards were sole source or competitively negotiated on the basis of design or technical factors.

Mr. President, these statistics demonstrating a lack of price competition in fiscal 1979 are not isolated examples. Rather, they are part of a trend. In a report issued on July 29 of this year, the General Accounting Office stated that between 1972 and 1978 the proportion of DOD awards that were price competitive declined by 8 percent. The GAO also noted several studies indicating that as much as 25 percent can be saved through competition.

Whatever the precise figure, we can be sure that the potential savings from competition are enormous. We also can be certain, based on long experience, that the lack of meaningful price competition contributes mightly to a procurement environment conducive to rapid cost escalation. As of June 1981, for instance, the estimated acquisition costs of 50 major weapon systems had escalated by an average of 118 percent over original estimates.

Procurement authorities agree that much of this escalation is attributable to the monopoly position of sole-source contractors, where there is little incentive to hold down costs. Given the administration's call for a military budget which, net of inflation, will total nearly $300 billion by 1985, we can only expect cost escalation and overruns to continue unless action is taken to inject meaningful competition in defense procurement.

REASONS FOR LACK OF COMPETITION

Mr. President, I recognize that there are circumstances under which true competition is impractical and DOD may have no alternative to sole-source procurement. For example, as a result of the 1973 oil embargo and the Federal Government's fuel allocation system, DOD had to negotiate most of its fuel purchases noncompetitively. Thus, its competitive fuel procurements dropped from 90 percent of fuel obligations in 1972 to only 45 percent in 1978.

Nevertheless, there is ample evidence that DOD is missing legitimate opportunities for maximizing price competition

and is not fully exploring competitive alternatives.

In its July 29 report, the General Accounting Office pointed out that when a proposed procurement appears to be noncompetitive, the DOD contracting officer is responsible not only for assuring that competition is not feasible, but also for taking actions to avoid subsequent noncompetitive procurements. In short, noncompetitive buying should occur only when all attempts to obtain competition have failed. Both GAO and the Office of Federal Procurement Policy have reported, however, that competitive opportunities are being missed because:

First. DOD procurement officials lack or do not take the time to develop purchase descriptions needed to invite competitive bids. This often occurs in cases of repetitive buys, such as spare parts, where the lack of a purchase description effectively precludes competition from alternative sources having the capability to meet the product or service requirements.

Second. Product specifications are written too restrictively and exceed minimum needs. This discourages competition from suppliers whose products do not exactly meet specifications but could probably meet the need in a satisfactory manner. In this regard, I am reminded of the case of Julie Research Laboratories, a small entrepreneurial firm that has sought without success over the past several years to sell calibration equipment to the Army. During our recent hearings on the defense acquisition process, it was clear from the evidence presented by the Army Inspector General that whatever the true merits of Julie's equipment, the firm was not given a full and fair opportunity to compete for Army contracts. It is ironic indeed that while DOD tells us that it believes in competition, it systematically discouraged a small and eager firm from competing in a market sorely in need of additional suppliers. How many other firms are suffering Julie's fate?

Third. Contracting officers acquiesce to the specific procurement requests of headquarters, technical personnel, or end users without performing market analyses to determine whether alternative suppliers exist. In the case of headquarters requests, the boss-employee relationship naturally inhibits or prevents contracting officers from strongly objecting to sole-source awards. In the case of technical personnel or end users, contracting officers often feel incompetent or reluctant to second-guess expert judgments about the availability or capability of potential alternatives.

Fourth. Sole source contracts are awarded in response to unsolicited proposals without justification as to why the good or service could not be obtained competitively. In some instances, contract work arising from unsolicited proposals is actually begun before a contract is signed. This practice is contrary to sound procurement procedure and makes it extremely difficult to stop work or to develop alternative sources for the good or service.

In addition to these reasons for missing competitive opportunities, I believe that DOD is not taking fullest advantage of opportunities to dual source its procurements. Under dual sourcing, annual DOD buys of a given weapon system or piece of equipment are split between two suppliers, based on the quality and cost of their performances in prior years. By cultivating two sources, dual sourcing increases competition, thereby providing suppliers with an incentive to control costs. A recent study of procurements in which DOD used dual sourcing showed that unit costs were reduced by an average of 30 percent as a result of the incentives that competition provides.

Dual sourcing also helps to broaden the defense production base. This is an important benefit considering the erosion of that base in recent years and the magnitude of the administration's proposed increases in defense spending. According to the Congressional Budget Office and other authorities, the defense buildup is likely to precipitate substantial inflation in defense costs, given the comparatively small production base over which procurement dollars can be spread.

As I noted earlier, about 17 percent of the defense procurement dollar is represented by sole-source follow-on awards. It is this type of procurement which I think is particularly ripe for dual sourcing. At a hearing last October, I asked the question of whether the Army should dual source production of the M–1 tank. Chrysler Corp., the declared winner over General Motors during an earlier competition, is today the only tank producer. The Army plans to buy more than 7,000 M–1 tanks over the next few years; many, many more will be purchased thereafter as the M–1 assumes its position as our main battle tank. Why should Chrysler retain its monopoly over M–1 production? Why must competition cease once a winner is declared?

I was pleased to see in the November 18 Wall Street Journal that the Army is asking itself these same questions. According to the Journal, the Army is studying the feasibility of dual sourcing not only M–1 tank production, but also production of the tank's turbine engine. Significantly, a major factor behind this study is the Army's concern over the rapid escalation in the tank's cost and the potential for greater cost-efficiency that dual sourcing could provide.

Mr. President, I recognize that dual sourcing may not be effective under all conditions. One must carefully weigh the additional investment needed to secure a second source of supply against the potential price reductions that competition can bring. But dual or multiple sourcing is standard commercial practice in the private sector. I am convinced that DOD has not fully explored dual sourcing opportunities in its procurement programs.

AMENDMENT PROVISIONS

Mr. President, I intend to propose an amendment to assure that DOD is committed to increased competition and no creasing the use of price-competitive opportunities.

First, the amendment would require DOD to establish and report to the Congress specific quantitative goals for increasing the use of price-competitive procurement. The goals would be expressed as percentage increases in total procurement spending to be accounted for by price competitive actions in fiscal year 1982 compared with fiscal 1981. To assure that we all understand the baseline for DOD's goals, the amendment would also require DOD to report its fiscal 1981 procurement actions by specific categories of competitive and noncompetitive awards.

Second, the amendment would require DOD to establish and report to the Congress a policy on the use of dual sourcing, including the conditions under which an analysis of the cost and benefit of dual sourcing should be performed by contracting officials and the methodology of the analysis. The amendment would also require DOD to identify those weapon system programs for which dual sourcing is currently employed.

Third, the amendment would require DOD to appoint at each of its major procurement offices an individual to serve as a fulltime advocate for competition. While present regulations in theory make each contracting officer responsible for maximizing competition, the sad reality is that there is no clear responsibility and accountability for competition and contracting officers are acquiescing to the sole-source procurement requests of headquarters, technical personnel, or end-users. They advocated correcting this condition by assuring that opportunities for competition are not lost or foreclosed by restrictive need statements, unnecessarily detailed specifications, poor procurement action, or by arbitrary agency action.

Finally, the amendment would require DOD to report to the Congress any specific actions, in addition to those required above, that will be taken in fiscal year 1982 to increase the use of price competitive procurement.

In conclusion, Mr. President, let me emphasize that we all recognize the importance of a strong national defense. An effective procurement system—one which assures that we have the military equipment and services we need, when we need them, where we need them, and at a cost we can afford—is critical to a strong defense posture. This amendment would strengthen our defense procurement because it would commit DOD to concrete action for increasing competition in procurement spending.

UP AMENDMENT NO. 732

(Purpose: To require information regarding competition in procurement)

Mr. PRYOR. Mr. President, I send the amendment to the desk.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Arkansas (Mr. PRYOR) proposes an unprinted amendment numbered 732.

Mr. PRYOR. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 61, following line 14 insert the following:

"The Secretary of Defense or his authorized agent is directed to—

"(a) Submit to the Appropriations Committees of the House and the Senate a written report which:

"(1) Disclose for each of the military services and the Department of Defense as a whole the number and dollar value of the procurement actions taken during the fiscal year ending September 30, 1981, by each of the following procurement award categories:

"(A) formally advertised;

"(B) negotiated competitively on the basis of price;

"(C) negotiated competitively on the basis of design or technical factors;

"(D) negotiated noncompetitively as follow-ons to procurements previously awarded on the basis of price, design, or technical competition; and

"(E) negotiated noncompetitively without previous price, design or technical competition;

"(2) Identifies specific percentage improvement goals to be achieved by the Department of Defense with respect to the proportion of total defense procurement expenditures to be awarded by formal advertising or by negotiation based on price competition during fiscal year 1982 compared with fiscal year 1981;

"(3) Sets forth the Department of Defense policy on the use of dual sourcing for obtaining price competition, including the circumstances under which contracting officials are required to analyze the potential benefit and cost of dual sourcing a product or service procurement and the methodology of the analysis;

"(4) Identifies those weapon system programs for which dual sourcing procurement is presently being used; and

"(5) Provides a detailed description of all other specific steps which the Department of Defense intends to implement during fiscal year 1982 to obtain increased price competition and reduce the use of noncompetitive sole-source procurement; and

"(b) Appoints at each major Department of Defense procurement office an individual to serve as a full-time advocate for competition to ensure that opportunities for price competition are not lost or foreclosed by unnecessarily detailed product or service specifications, restrictive statements of need for the product or service, poor procurement planning, or other arbitrary or inappropriate procurement office action which would have the effect of unnecessarily restricting or precluding competition for award of a contract."

Mr. PRYOR. Mr. President, I ask unanimous consent that the name of the Senator from Michigan (Mr. LEVIN) be added as a cosponsor of this amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STEVENS. Mr. President, my good friend from Arkansas and I served together on the Governmental Affairs Committee. I am certain it will be no surprise to him for me to say that this is the kind of legislation that should come from the Governmental Affairs Committee. It does create a whole new concept for the Department of Defense. It would require a new office in each procurement office, that being a full-time advocate for competition.

It is my feeling that this is legislation on an appropriations bill. It has nothing to do with any specific item that is before us in terms of a request for funding for the Department of Defense, and I make the point of order that this is an amendment which is legislation on an appropriations bill, and I ask the Senate to rule that it is.

Mr. PRYOR. Mr. President, I raise the defense at this time that this amendment is germane to the House language.

The PRESIDING OFFICER. Under rule XVI, paragraph 4, if the defense of germaneness is raised, the Chair must submit the question to the Senate for a vote.

Mr. STEVENS. Mr. President, I inquire of the Chair: A vote to sustain the point of germaneness would be an "aye" vote?

The PRESIDING OFFICER. The question will be whether or not the amendment is germane. The Senator is correct.

Mr. STEVENS. I say that my vote will be "no," because I do not believe it is germane. We should not invade the jurisdiction of individual committees. I ask the Senate to sustain the position of the committee, that this is legislation on an appropriations bill, and vote "no."

I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is, Is the amendment germane? On this question the yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Arizona (Mr. GOLDWATER) and the Senator from Maryland (Mr. MATHIAS) are necessarily absent.

Mr. CRANSTON. I announce that the Senator from Nevada (Mr. CANNON), the Senator from Arizona (Mr. DECONCINI), the Senator from Ohio (Mr. GLENN) and the Senator from New York (Mr. MOYNIHAN) are necessarily absent.

I further announce that, if present and voting, the Senator from Arizona (Mr. DECONCINI) would vote "yea."

The PRESIDING OFFICER. Is there any Senator in the Chamber wishing to vote?

The yeas and nays resulted—yeas 44, nays 50, as follows:

[Rollcall Vote No. 442 Leg.]

YEAS—44

Andrews	Eagleton	Matsunaga
Baucus	Exon	Melcher
Bentsen	Ford	Metzenbaum
Biden	Grassley	Mitchell
Boren	Hart	Nunn
Bradley	Heflin	Pell
Bumpers	Hollings	Proxmire
Burdick	Huddleston	Pryor
Byrd, Harry F., Jr.	Inouye	Randolph
Byrd, Robert C.	Jackson	Riegle
Chiles	Johnston	Sarbanes
Cranston	Kassebaum	Sasser
Dixon	Kennedy	Tsongas
Dodd	Leahy	Williams
	Levin	Zorinsky

NAYS—50

Abdnor	Danforth	Hatch
Armstrong	Denton	Hatfield
Baker	Dole	Hawkins
Boschwitz	Domenici	Hayakawa
Chafee	Durenberger	Heinz
Cochran	East	Helms
Cohen	Garn	Humphrey
D'Amato	Gorton	Jepsen
Kasten	Percy	Stennis
Laxalt	Pressler	Stevens
Long	Quayle	Symms
Lugar	Roth	Thurmond
Mattingly	Rudman	Tower
McClure	Schmitt	Wallop
Murkowski	Simpson	Warner
Nickles	Specter	Weicker
Packwood	Stafford	

NOT VOTING—6

Cannon	Glenn	Mathias
DeConcini	Goldwater	Moynihan

The PRESIDING OFFICER. On this vote, the yeas are 44 and the nays are 50. The Senate having voted the amendment is not germane, the amendment falls for that reason and the point of order of the Senator from Alaska is moot.

Mr. STEVENS addressed the Chair.

The PRESIDING OFFICER. The Senator from Alaska.

Mr. STEVENS. Mr. President, that does not have to be reconsidered, does it?

The PRESIDING OFFICER. The motion to reconsider would be in order.

Mr. STEVENS. Mr. President, I move to reconsider the vote.

Mr. McCLURE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 731

Mr. STEVENS. Mr. President, it is my understanding that there is a pending amendment in the second degree of the Senator from Pennsylvania (Mr. HEINZ) to the amendment offered by the Senator from Maine (Mr. COHEN). I ask unanimous consent that the amendment in the second degree be considered an amendment in the first degree and it be set aside until such time as the Senator from Pennsylvania calls it up.

The PRESIDING OFFICER. Is there objection?

Mr. HEINZ. Mr. President, reserving the right to object, does the Senator from Alaska intend that it be considered as offered to another part of the bill?

Mr. STEVENS. It would be my intention that it would be considered as being offered at the foot of the bill and to be called up at any time that the Senator from Pennsylvania wishes to raise it. It is a sense of the Senate resolution. It is subject to points of order. I cannot waive those now. But I will protect the Senator for his ability to raise that issue again as an independent amendment.

Mr. HEINZ. Mr. President, further reserving the right to object, at the present time this amendment is not amendable. Would the Senator be agreeable to modifying this unanimous-consent request that it be considered amendable?

Mr. STEVENS. This Senator would ask that the Senator's amendment, which presently is in the second degree, become amendable when it becomes an amendment in the first degree. But, again, as I have stated, I have been asked not to waive the points of order and I do not make that request.

Mr. HEINZ. I have no objection to that request.

Mr. ROBERT C. BYRD. Mr. President, reserving the right to object, would the distinguished Senator add me as a cosponsor?

Mr. HEINZ. Mr. President, I have no objection to the Senator from Alaska

adding my request to the minority leader's request.

Mr. ROBERT C. BYRD. I was asking the Senator from Pennsylvania if I might be added as a cosponsor.

Mr. HEINZ. Mr. President, I ask unanimous consent that the Senator from West Virginia (Mr. ROBERT C. BYRD) be added as a cosponsor.

Mr. ROBERT C. BYRD. I have no objection.

The PRESIDING OFFICER. Is there objection to modifying this amendment to make it at the end of the bill? Without objection, the entire request is so ordered.

Mr. STEVENS. Mr. President, the Senator from Massachusetts has cleared an item with the majority leader. It is a resolution. I yield to the Senator from Massachusetts.

THE MURDERS OF SIX AMERICANS IN EL SALVADOR

Mr. KENNEDY. Mr. President, I send a resolution to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The resolution will be stated by title.

The legislative clerk read as follows:

A resolution (S. Res. 250) expressing the sense of the Senate with respect to the murders of six Americans in El Salvador.

(The cosponsors are as follows: Mr. PELL, Mr. HATFIELD, Mr. DODD, Mr. CRANSTON, and Mr. TSONGAS).

The PRESIDING OFFICER. Is there objection to the present consideration of the resolution?

There being no objection, the Senate proceeded to consider the resolution.

UP AMENDMENT NO. 733

Mr. KENNEDY. Mr. President, the Senator from Illinois (Mr. PERCY) has an amendment to that resolution. I ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will state the amendment.

The legislative clerk read as follows:

The Senator from Massachusetts (Mr. KENNEDY), on behalf of the Senator from Illinois (Mr. PERCY), proposes an unprinted amendment numbered 733.

Mr. KENNEDY. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Between the second and third paragraphs of the resolution insert the following:

Welcomes the Government of El Salvador's recent request for U.S. technical assistance in carrying out these investigations.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Massachusetts (Mr. KENNEDY) on behalf of the Senator from Illinois (Mr. PERCY).

The amendment (UP No. 733) was agreed to.

Mr. CHAFEE. Mr. President, what is the resolution?

Mr. KENNEDY. Mr. President, the resolution notes that 1 year ago today there were four Catholic missionaries and two lay workers that were murdered in El Salvador. The resolution requests that the Government of El Salvador use all of the resources of that government to further the investigation into these killings and that the U.S. Government will cooperate in every way possible to see that those that were involved in this murder and assassination are brought to justice. This is the anniversary of those killings and we have seen little progress. This is a sense of Senate resolution that hopes that justice will soon be done.

Mr. CHAFEE. I ask I might be added as a cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. KENNEDY. Mr. President, today, December 2, 1981, is an anniversary; but unlike so many anniversaries, this is not a happy one. For on December 2 last year, four American Catholic women missionaries were murdered in El Salvador. These four dedicated women—Sisters Ita Ford, Maura Clarke, Dorothy Kazel, and Ms. Jean Donovan—went to El Salvador to help the common people of that country—people who have become the innocent victims of brutality and violence in that land torn by civil strife. These women gave of themselves to the people when they were alive and ultimately they, too, became victims of the fighting.

Then on January 3, two American labor representatives, Michael Hammer and Mark Perlman, were also murdered. These two were working on El Salvador's land reform program and had been sent to that country by the American Institute for Free Labor Development. They were gunned down in cold blood at the San Salvador Sheraton Hotel along with Jose Rodolfo Viera, head of El Salvador's Agrarian Reform Institute.

Mr. President, 1 year later the persons who were responsible for the murders of the missionaries have still not been brought to justice. At the time of the murders, the Carter administration called on the Salvadoran Government to immediately investigate the murders and to prosecute those responsible. I joined with many of my colleagues in this Senate in making similar appeals to the Salvadoran Government. In September I spoke with the president of El Salvador, Napoleon Duarte, who was visiting Washington, and I emphasized how important it was for his government to pursue the investigation and to bring to justice those responsible for the murders. I have been in continuing contact with the families of the missionaries, who also met with President Duarte and made their own personal appeals. Yet, the Government of El Salvador has still not taken the necessary actions.

Mr. President, all too often as time passes, the issues seem to merge together. The stark brutality, the heinous crime, and the profound grief appear to fade away. The grief may fade for those of us who did not know the missionaries and the workers personally, but the grief remains real and deep for their friends and families. The issues may merge for those who hope the world will forget; but they remain vivid for those of us who believe that justice must prevail.

For this reason, I am introducing today a resolution which expresses the sense of the Senate with respect to the murders of these six American citizens. Senators PELL, HATFIELD, DODD, CRANSTON, TSONGAS, and others are cosponsoring this resolution, which reminds the administration and the Salvadoran Government that we have not forgotten the tragic death of Americans who have sacrificed their lives in helping the people of El Salvador, and to renew our call that the Government of El Salvador complete its investigation and prosecute those responsible for the murders. I strongly urge both the Government of El Salvador and our own administration to respond to this sense of the Senate resolution.

Mr. PELL. Mr. President, as a cosponsor, I rise along with my colleague from Massachusetts to commemorate this sad and tragic event that occurred a year ago on an isolated country road in El Salvador. The brutal murders of Maryknoll Sisters Ita Ford and Maura Clarke, Ursuline Sister Dorothy Kazel, and layworker Jean Donovan by elements of the Salvadoran security forces shocked this Nation into an awareness of the senseless turmoil in the beleaguered nation of El Salvador. We hardly had time to react to the deaths of the churchwomen when a month later we received the news that two American agrarian reform specialists, Michael Hammer and Mark Perlman, were gunned down in the coffee shop of their hotel, along with the head of the Salvadoran land reform program.

Collectively as a nation, we still have not recovered from the shock of the heinous murders of these American citizens who had dedicated their lives to improving the lot of the people of El Salvador. Our shock is compounded by a collective national frustration over the Salvadoran Government's failure to bring to justice those responsible for the murders of these six Americans. We share, as a nation, the sorrow and frustration felt by the families of these valiant Americans.

The Salvadoran Government continually for this past year has been requested to take the steps necessary to finally have justice be served. We fail to understand, however, even given the problems within the Salvadoran legal system, why the Salvadoran Government, after 1 year, cannot resolve this issue given the compelling evidence against the suspects from the ranks of the security forces and the extreme right-wing.

The Salvadoran Government should regard this resolution and these statements commemorating the deaths of these fine Americans as a renewed and strong appeal for justice. The Salvadoran Government seeks the support of the American people, but that becomes a very difficult proposition while these cases go unresolved. An essential element of this support must be the Salvadoran Government's performance in seeing that justice is done—justice for the families, justice for the American people and justice for the people of El Salvador.

Mr. ZORINSKY. Mr. President, 1 year ago, we were horrified at the news that four American churchwomen were found brutally murdered on a road in El Salvador. A month later we again were stunned when two American land reform specialists were murdered at point-blank

range by a gunman in the coffee shop of their hotel. I and some of my colleagues responded to these tragic events and to the grief felt by the family members of the victims, as well as the American people, by sending letters to the Salvadoran Government and to administration officials to insure that the Salvadoran Government would bring to justice those guilty of these brutal crimes.

Today, a year and many letters, communications, congressional hearings, private conversations, and personal contacts later, these cases go unresolved. They go unresolved despite the heavy weight of evidence against prime suspects who are members of the Salvadoran security forces and members of the extreme right-wing of El Salvador. Would they go unresolved if the Salvadoran Government was doing absolutely everything possible, using every legal means, to bring these cases to a just solution?

The expressions that are being made today commemorating the deaths of these dedicated Americans who gave their lives in El Salvador should be read by the Government of El Salvador, as well as by the administration, as a sign that the people of this country have not forgotten. It should be read as a sign that the full support of the American people for the Government of El Salvador will not come until that government fulfills its obligations in bringing to justice those guilty of these murders. It should be read as a sign that the American people cannot fully support the policies of an administration that does not do everything possible to see this matter to a just solution. For the sake of the families of the victims, as well as our Nation's self-respect, those responsible for these murders must be brought to justice.

Mr. DODD. Mr. President, I rise in support of the resolution offered by my distinguished colleague from Massachusetts and I congratulate him on his efforts to keep this issue before the public.

This resolution serves to remind all of us that a year ago this month six American citizens met violent death in El Salvador. While these deaths shocked and stunned our Nation, the tragic fact is that for the people of El Salvador "death is a way of life." And in order to understand better the phenomenon of political violence in El Salvador, I want to talk briefly about the murder of the American churchwomen and about the Salvadoran military and security forces.

These forces, in my view, are living proof of Lord Acton's admonition that "power tends to corrupt and absolute power corrupts absolutely." As evidence of this, one has only to understand that the four American churchwomen who were raped and murdered on December 2, 1980 were raped and murdered by members of the Salvadoran National Guard.

In El Salvador, all of this is an open secret. The names of the guardsmen are known. They were known within 24 hours of the crimes, in other words, Salvadoran authorities know who these individuals are and they have known for a year. They know them by name, rank and serial number. Similarly, the U.S. Government knows who they are. But both the Salvadoran Government and the U.S. Government also know that the chances of the guardsmen ever being tried and prosecuted are virtually nonexistent.

Without belaboring the point, the fact of the matter is this: The Salvadoran legal system simply does not work.

So as we mark the first anniversary of this heinous crime, we regrettably must recognize that in a very real sense nothing has happened to bring those responsible before the bar of justice. And if the past is any guide to the future, nothing will happen.

To put this tragic case in broader perspective, it is necessary to multiply the violent deaths of the American churchwomen and the violent deaths of the American Labor-Land Reform experts by several thousand in order to get some idea of the level of political violence that confronts the people of El Salvador. During the last 2 years, for example, it is estimated that anywhere from 20 to 30 thousand Salvadorans have perished. The human waste and the human tragedy stagger the imagination—no less than the fact that the Salvadoran judicial system has yet to produce a single conviction for any of them.

Just as disturbing, Mr. President, is the fact that whatever the level of violent deaths actually is, all observers agree—with the sole exception of the Salvadoran military—that well over half of these deaths can be attributed to right-wing military and paramilitary elements. Some suggest that even 75 and 80 percent cannot be dismissed out of hand.

All of this suggests, Mr. President, that because of the large measure of influence which the United States has over the Government of El Salvador, it is incumbent on the Reagan administration to exercise that influence in a way that will insure strict civilian control of the Salvadoran military and security forces. Until this happens, I am convinced there will be no end to the political violence that plagues that unhappy land.

Mr. President, I hope the pending resolution will be adopted overwhelmingly.

The PRESIDING OFFICER. The question is on agreeing to the resolution.

The resolution, as amended, was agreed to.

The preamble was agreed to.

The resolution, as amended, with its preamble, reads as follows:

S. RES. 250

Whereas one year has passed since the brutal murder in El Salvador of four American missionaries in December 1980;

Whereas two American labor representatives were mercilessly slain in January 1981;

Whereas these violent acts were perpetrated against American citizens who were in El Salvador only to serve the people of that nation;

Whereas the efforts of the Government of El Salvador have so far failed to bring to justice the individuals responsible for these murders: Now, therefore, be it

Resolved, That the Senate:

Expresses its deep concern over the failure of the Government of El Salvador to bring to justice those responsible for the murders of the six Americans;

Urges the Government of El Salvador to use every legal means available to bring about a just and expeditious resolution of these cases;

Welcomes the Government of El Salvador's recent request for U.S. technical assistance in carrying out these investigations.

Urges the Administration to press for such a just and expeditious resolution.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. KENNEDY. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

DEPARTMENT OF DEFENSE APPROPRIATIONS, 1982

The Senate resumed consideration of the bill.

Mr. STEVENS. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. STEVENS. As a result of moving the amendment of the Senator from Pennsylvania to another place in the bill, the amendment in the first degree of Senator COHEN is now the pending amendment, is that correct?

The PRESIDING OFFICER. The Senator is correct.

Mr. STEVENS. Mr. President, it is my hope that the Members of the Senate will listen to this amendment. It has been worked out on, I think, a very admirable, bipartisan basis. I commend the Senator from Maine (Mr. COHEN) and the Senator from Georgia (Mr. NUNN) and all those who have worked on this matter.

Again I can state that I have been in touch with the Secretary and with Dr. DeLauer. I cannot say that they are overjoyed at the direction of this amendment, but I think they understand the reasoning behind it. I do believe the Senate will be very interested in the proposal that is to be made now to the Senate.

Mr. COHEN addressed the Chair.

The PRESIDING OFFICER. The Senator from Maine.

UP AMENDMENT NO. 734

(Purpose: To limit the use of funds for MX basing)

Mr. COHEN. Mr. President, I send a perfecting amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER (Mr. SPECTER). The clerk will state the amendment.

The legislative clerk read as follows:

The Senator from Maine (Mr. COHEN), for himself, Mr. NUNN, Mr. QUAYLE, and Mr. RUDMAN, proposes an unprinted amendment numbered 734 as a perfecting amendment to unprinted amendment numbered 730.

On amendment UP-730, in the first line, strike all after the word "which" and insert the following: "$334,000,000 shall be available only for Research and Development related to initial deployment of the MX missile in non-superhardened existing silos in a manner compatible with a permanent basing mode which could include the addition to existing silos of ballistic missile defense, the provision of location uncertainty for offensive missiles and defensive systems, and superhardening and subsequent deployment in a permanent basing mode to be recommended to the Congress by the Secretary of Defense no later than July 1, 1983."

Mr. COHEN. Mr. President, I will just say a few words and then yield to my colleague, the Senator from Georgia (Mr. NUNN).

This amendment has been the result of an effort made between Senator NUNN, Senator QUAYLE, Senator RUDMAN, myself, and others to arrive at a consensus in terms of what this Senate feels the objective is of providing for an interim and long-term basing mode for the MX missile. This language was arrived at to accommodate the objections raised by Senator STEVENS and also I think would give added emphasis to the points that will be made in a few moments by my colleague Senator NUNN.

Essentially, what we are saying with this amendment is that the Senate wants the administration to go forward with the completion of the MX missile on schedule, without delay, but that, in the interim, rather than using the bulk of the money, some $334 million, solely for R. & D. on hardening of silos in a land-based mode, what we would be doing would be to tell, in essence, the administration that we want a broadening of their investigation to mobility, BMD, ballistic missile defense, and any of the others the administration is now willing to consider.

We want the administration to go forward with the principal consideration of those, leaving open the option ultimately of having a hardened silo but only if it is in connection with some mobility or some deceptive mode.

That, in essence, I think is what the Senator from Georgia has expressed a desire to achieve. I believe it is a consensus on this side of the aisle.

With that, Mr. President, I yield to the Senator from Georgia for any comments he would care to make in connection with the amendment.

The PRESIDING OFFICER. The Senator from Georgia.

Mr. NUNN. Mr. President, on this issue I did not have an opportunity to voice my general opinion a few minutes ago when the dialog was going on, so I will take just a few moments by way of background before discussing the specific amendment.

Let me first commend the Senator from Maine for what I think is a most important step taken in the Senate in consideration of this appropriation bill because this step is going to send a very strong signal on the basing mode of the MX.

The issue on the MX is one of survival, survival of the missile, and also survival of strategic stability in the world.

In my view, the President has come forward with several initiatives in the strategic field which should be commended. I will address these subjects in more detail tomorrow, but certainly before saying anything negative, I want to commend the President for taking the initiatives on the so-called communication, command; control (C–3). The C–3 initiatives are stabilizing and increase survival. I think they add to the overall deterrence as well as stability.

I also say the same thing about the President's initiative on the Trident II (D–5) missile program. It adds to stability as well as survivability.

With those positive comments, let me say that I think the proposal to put the MX in fixed superhardened silos is the most ill-advised and ill-conceived portion of the President's strategic program. I have been very much concerned about that basing mode and remain so.

It also raises serious questions about expending over $5.6 billion for what I would call self-deception. The experts who have testified before the Armed Services Committee, and I am sure other committees have had similar testimony, agree that the Soviets today have the combination of yield and accuracy necessary to overcome the levels of hardening contemplated. The MX simply is not survivable in existing silos, whether they are hardened or unhardened. This fact is confirmed by every expert witness who has testified, and it includes also not only governmental witnesses but also knowledgeable outside witnesses, including the Air Force and our intelligence community. The one exception to this testimony is the Secretary of Defense, and I must hastily add that is an important exception because he has made the final decision here. He is the only exception I have found to this testimony that an MX missile in a fixed, superhardened silo is vulnerable and not survivable.

There is considerable doubt in my mind about the wisdom of proceeding with an MX program at all if we cannot, at some point, come up with a reasonable opportunity for survivability of the missile. It has now been established by the Department of Defense, on at least a preliminary estimate, that hardening as they envision it will cost about $5.6 billion for 40 missiles, which is what we call the maximum hardness option. It is my strongly held view that this expenditure and this hardening will not provide any additional survivability unless it is done in connection with some form of mobility, some form of deception, or some form of ballistic missile defense.

So this hardening option the President has proposed in the initial stages, and it is still the President's proposal, in my view, raises serious questions, not only about the survivability of the MX missile, but even more importantly about the overall strategic deterrence and about the survival of some form of stability in the international nuclear equation.

I have been unable to find one scintilla of evidence or analysis which supports the opinion of the Secretary of Defense on this subject.

Mr. President, I ask unanimous consent that a letter and an official DOD point paper on the MX silo hardening, which includes the cost estimates, be printed in the RECORD at this point.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

OFFICE OF THE UNDER
SECRETARY OF DEFENSE,
Washington, D.C., November 18, 1981.

Hon. SAM NUNN,
U.S. Senate,
Washington, D.C.

DEAR SENATOR NUNN: In the Armed Services Committee hearing of 27 October 1981, you asked me if we yet had any figures or studies indicating the degree of hardening of Minuteman or Titan silos that would be achievable and the cost of that hardening. I regret not having provided you this information sooner, but we have been working with the Air Force to obtain cost figures that we could defend in the manner you expect. The attached paper presents such information for your consideration.

Again, I am sorry for the delay and I hope this input will be useful to you.

Sincerely,

JAMES P. WADE, Jr.,
Principal Deputy.

M–X SILO HARDENING

Air Force has developed options to fulfill guidance—

18 M–X in Superhard Titan II silos;
36 M–X in Superhard Titan II silos;
40 M–X in Superhard Minuteman silos;
Basing costs vary (FY 82 $).

[Dollar amounts in millions]

System	Titan		Minuteman
Option	18	36	40
Cost:			
R.D.T. & E.	$2.8	$2.8	$2.1
Production	2.5	3.6	2.0
MCP	.9	1.4	1.5
Total	6.2	7.8	5.6

Higher costs for Titan II Options due to the need for additional command and control equipment and, in the 36 case, duplication of facilities as more than one location is required.

Three basic Minuteman programs have been considered—

Reconstruction of silos for maximum hardness;

Reconstruction of silos for about the same hardness level as existing Minuteman solo;

An austere program which does not involve reconstruction and results in lower hardness levels for those silos in which M–X would be deployed.

Basing cost.

	Austere program	Minimum hardness program	Maximum hardness program
R. & D.	1.6	1.9	2.1
Procurement:			
Silos	.7	.9	1.1
Off-site	.5	.7	.9
Construction:			
Silos	.03	.3	.6
Off-site	.87	.9	.9
Basing subtotal	3.7	4.7	5.6
Total program [1]	17.5	18.5	19.4
Per silo cost (millions):			
Silo procurement	17.5	22.5	26.8
Silo construction	.7	7.3	15.8
On-site total	18.2	29.8	42.6

[1] Includes $13.8 billion for 100 operational missiles.

Mr. NUNN. Mr. President, getting to the question of stability, since the MX system would certainly pose some serious threat to the Soviet's large ICBM force, I think we have to ask the question about Soviet perceptions. Would the Soviets believe, if we combine the command, control, and communications improvements, with an MX deployment in a vulnerable position—and I think we have to look at that combination—if we do that, the crucial question I have is whether the Soviets will conclude that this Nation has gone to a policy of launch on attack.

I do not believe that is the goal of this administration. We have always had the option of launching under attack and no

one has ever excluded that. But to go to a policy of launch on attack, or even to have a program that implies we are going to that kind of policy, I think has most significant ramifications in terms of stability.

If the Soviets do perceive that—and I believe the amendment of the Senator from Maine in which I have joined, will go a long way toward showing that this Senate does not believe that should be our position—if we were to be perceived as to be moving in that direction, then the question has to be asked, would the Soviets then shift to a similar launch on attack posture themselves and thus dramatically lower the nuclear threshold? Would an accidental nuclear war become more likely without a survivable MX system?

The answers to these questions have to be addressed. We have asked these questions in unclassified sessions with several different experts. Dr. William Perry, former Under Secretary of Defense directly addressed these questions. I want to quote from this testimony before the committee in answer to my question about the consequences of putting the MX in a nonsurvivable mode, whether it is an open or a hardened silo. That was the question. In reply to that question, Dr. Perry stated:

We would be doing nothing, in effect, different from what the Soviets have already done, which is putting a big, high yield, accurate missile in a relatively unprotected silo. It would seem to me that they cannot conclude anything about our motives any different from what we might conclude about theirs. There would be symmetry in the situation.

Continuing the quotation:

My concern with that is if we have this very accurate, very threatening missile in unprotected silos, and if they do not go to a survivable system themselves—

And those are key words, if they do not go to a survivable system themselves—"then that simply increases the hair trigger on both sides."

Dr. Perry goes on to say:

I am more worried about their side because that now means that if there is some ambiguous message that gets into that warning center and they feel they are going to lose what to them is more than three-fourths of their strategic forces in an attack, then that puts a hair trigger and I do not know how good their warning system is.

Continuing the quote:

I do not know how good their assessment center is. I don't have that much confidence in our own from the point of view of occasional false alarms.

Continuing the quote, and I think this is one of the most important statements that has been made before our committee on the whole question of the MX and the basing mode:

I have lived through some false alarms in our system and in each case we had the luxury of being able to ride out the false alarms because we knew our system. First of all, our ICBM's were not susceptible to attack and, secondly, even if they were, we still had the bulk of our forces in submarines and bombers. So we were able to ride out the false alarms in our own system. I am very concerned about putting them in a position where they will feel that they don't have that luxury when I don't know how reliable their computers are and how susceptible they will be to sending out false alarms.

Mr. President, to put it in language that I think people can understand—and admittedly, this is an oversimplification—what Dr. Perry is saying, as I interpret it—and this is not a quote from him, I make that clear. He is saying that if we go to a position that is perceived by the Soviets as being launch on attack—that is, we do not protect our hard target missiles and render them at least to some degree vulnerable—and if then, they decide that they are going to do the same thing, that they are going to leave their missiles in a vulnerable position, we have together—and make no mistake about this—the Soviets led off in this overall equation. But together, we have lowered the nuclear threshold. We have placed a hair trigger on the nuclear forces of the United States and the Soviet Union.

No longer would we be in a position of simply worrying about computer failure in this country and the flight of geese into radar coverage in this country. We shall have to start worrying, if that scenario were to unfold, about computer failure in the Soviet Union and about geese flying over the Soviet Union.

So, Mr. President, this is not a matter of small consequence. I went on to pose a question to Dr. Perry about the nonsurvivable ICBM's on both sides, if that would not involve both countries in a situation where we have lowered the nuclear threshold. He responded in the affirmative.

Mr. President, I shall not take much more time. I did want to give background on this. I think that, to put it in a proper context, we can back up to October of 1980, before we had all of this debate about the MX basing mode, and this was at the time the MX was going to be put into what we believed at that time was a relatively invulnerable position. In a letter to me dated October 20, 1980, Gen. Richard Ellis, former Strategic Air Command commander, provided the following description about what is destabilizing in the strategic area. I think we all need to realize that this letter was written long before this debate, it was written at a time when the MX was going to be put in a survivable mode. Let us hear what General Ellis said at that time.

Of course, at that time, he was comparing continuing the Minuteman force in the vulnerable position or going to a mobile deceptive MX system. I quote from Gen. Richard Ellis, SAC commander:

The most destabilizing strategic situation that can be devised is one in which a major weapons system of a superpower could be destroyed in a surprise attack by another superpower. To use such a vulnerable system before it was destroyed might then become an attractive military option. For this reason, the Soviets could consider a vulnerable Minuteman force as a first-strike, use-it-or-lose-it system, since it could not survive an all-out attack.

The MX—

Again in the context of October 20, 1980—

on the other hand will be able to ride out a Soviet attack. Therefore, it is both a less tempting and less threatening element in the United States force.

Mr. President, the MX is no longer in that position unless we are able to persuade the administration to change the announced programs. I know that that is not going to come all at once.

I do not pretend that this amendment will absolutely require that, because it is still a matter of the administration making, themselves, that kind of decision. But what this amendment will do that Senator COHEN and I and Senator QUAYLE and others have carefully structured is that it will send a strong signal that whatever R. & D. is expended, that is fenced in in this amendment—and it is the largest portion of the R. & D. for this system—that money will have to be spent in a way that is compatible with mobility, with deception, or with a BMD defense. It makes it plain, as I see it, that the U.S. Senate is not satisfied with the President's proposal on superhardening or on putting missiles in a fixed silo absent—and this is the key—absent a plan, a basing mode plan that has the elements of deception or mobility or a BMD defense, or some combination thereof.

So, Mr. President, that is the essence of the amendment as I understand it. I am delighted to join with Senator COHEN and Senator QUAYLE in what I think is a very important step by the Senate.

Mr. McCLURE. Mr. President, will the Senator from Georgia yield for a question?

Mr. NUNN. I am glad to yield.

Mr. McCLURE. Mr. President, the Senator from Georgia, at one point in the conversation, suggested that we do not want to indicate that we had adopted a policy to retaliate on attack.

Mr. NUNN. Correct.

Mr. McCLURE. The English language is sometimes a strange language to communicate in, because oftentimes, we assume that if it is not one thing, it must be the opposite of the same thing.

Mr. NUNN. Mr. President, I hope I made it plain that we have never rejected the option—the option—of possibly, under conceivable circumstances, launching before our missiles were destroyed. I know this is the Senator's question, but there is a tremendous difference between having a policy that indicates that to the world and having that as an option, which I think all people concerned would agree would be a very difficult option to implement.

Mr. McCLURE. I appreciate the Senator's response, Mr. President, but to make it abundantly clear, if I may, it is not that we have adopted a policy not to retaliate in the event of attack or to fire on attack?

Mr. NUNN. I would not want to answer that question with a yes or no, because my understanding is that our whole strategic system has been designed to avoid having to be forced into a policy position of launching under attack. I would hope that we would continue to have our systems design including but not limited to the MX in a way that does not force us into that policy. But it is my understanding that every Secretary of Defense, including the previous Secretary and this Secretary of Defense, has made

it clear that we would not foreclose the option of taking that step under some conceivable circumstances.

Mr. McCLURE. Mr. President, if I could rephrase that so that at least my own understanding is clear, is the Senator saying that we are not by any means, in this action being taken here today, adopting a policy of fire on attack——

Mr. NUNN. Absolutely.

Mr. McCLURE. But equally, we are not now articulating a policy of the opposite, that says we will not retaliate or fire on attack? That is still an option which is open to us to exercise within the realms of our technological capacity as well as the judgments that we would have to make at that time.

Mr. NUNN. Again, Mr. President, I would prefer, and I am not avoiding the Senator's question, but this is such an important area that I prefer to put it in my own words. What I would say is that I do not believe the President or the Secretary of Defense are going to a launch-under-attack policy, even if this amendment is not passed. I believe that the perception of this program, however, could very well lead one to conclude that combining the C–3 improvements with the vulnerable position of the MX could lead one to believe that we are changing our policy.

It has been my interpretation of the policy of the country for many years and it is my continuing interpretation that we design our systems, we set forth our overall strategic plan in a way that does not force us to move into a launch-on-attack policy; but every Secretary of Defense has made it plain that we do not and in some circumstances, in a preemptive way, preclude that as an option. I must say that it is a very, very difficult and a very, very tenuous option and I would not want the word to go out that we are moving toward a launch-on-attack policy.

Mr. McCLURE. Mr. President, I thank the Senator for yielding. I understand the care with which he has stated his position. I should like to be equally careful in stating mine that I do not think we have ever had a policy that said we will not launch on attack. We have tried to adopt systems and defensive capabilities as well as offensive capabilities that will allow us a different option; and that we indeed hope to be able to maintain that. It is my——

Mr. NUNN. We have never had a policy that precluded that option under some conceivable circumstances, but I think every Secretary of Defense has informed every President that that would be a very difficult option to implement.

Mr. McCLURE. Yes. I certainly do not disagree.

I think the only area where the Senator from Georgia and the Senator from Idaho might have any disagreement on this particular issue is as to what is the measurable change and what is brought about in terms of perceptions.

The real difficulty we have today is that our ability to avoid a launch-on attack is compounded by the survivability question, and that survivability question is brought on not by our own actions at the current time but by the actions of the Soviet Union in developing more powerful weapons that reduce our ability to survive the initial attack.

I agree with the Senator from Georgia that we want to reassert our capacity to survive even under the increased capacity of the Soviet Union, so that we do not have to be faced with that choice. That is the thrust of the amendment. I do not disagree with that thrust at all.

However, I do not want to send the wrong signals, that somehow what we are doing is anything other than a response to the fact that the Russians have already increased their capacity to destroy our counteroffensive capabilities. Certainly, to the extent that we put a stronger, more potent, more threatening weapon in a silo, it may induce the Russians to be more concerned about it and, therefore, more likely to affect their own perception of attack.

But the real destabilizing question, the thing that has brought into question whether our weapons are survivable, is the increased capacity of the Soviet missile structure.

Mr. NUNN. The Senator is correct in the statement about the cause of the beginning of this. The Soviets have deployed systems that have enough megatonnage and increasingly enough accuracy to put our own land-based ICBM systems in threat.

There is an important point: If we should go to a launch-on attack as a policy, we have to worry about our computer failures and our false alarms, and that is bad enough. But if the Soviets should go to a launch-on attack as a policy, then we have to worry about their false alarms and their computers. I think all of us in this world would be much better served if both powers tried to design their forces so as to minimize the chance of miscalculation.

I see the amendment of the Senator from Maine as reaffirming the longstanding and existing policy. I do not see this as in any way changing the policy. I see it as reaffirming it, and I see it as a step toward minimizing any perceptions that might go out that a policy itself is being changed.

Mr. COHEN. Mr. President, will the Senator yield?

Mr. NUNN. I yield.

Mr. COHEN. As I understand the Senator from Georgia, he is saying that if we, in fact, go forward with the MX in a fixed silo, a hardened silo, with nothing more than that, what we are doing is either adopting the policy which the Senator from Idaho has suggested or we are perceived as having done that. In either case, it does not matter, in terms of the ultimate danger posed to both countries.

But that will do one of two things. It will either convey the impression to the Soviets that we have gone to that policy, thereby lowering the threshold, thereby tightening the grip on the trigger, or it will force them into a deceptive base mode of their own. That is the chance we take.

We may go to an MX system which has the capability of taking out their fixed silos, and that may force them into submarines, adopting a different strategy with respect to their own equivalent of Triad. It may force them into a system for their SS–18's. But it may do what the Senator is suggesting—that is, tightening the finger on the hair trigger—and that is a posture which is frightening to both sides. I think we are trying to avoid that by saying that whatever mode is adopted in the long run, it should be combined with some method of deception, something other than having a large, powerful, destructive missile in a very vulnerable silo.

Mr. NUNN. I agree completely with that statement. The Senator has summed it up very well.

Mr. McCLURE. I do not disagree at all. I wish the Soviet Union had been that concerned about our perceptions when they greatly increased the capacity of their ICBM's to knock out our ability to retaliate.

Mr. NUNN. I agree. The Soviets started it. As Dr. Perry said, what we are doing is moving to the same form of symmetry, but both of us together, if we are not very careful, are lowering the nuclear threshold.

Mr. COHEN. Mr. President, I ask unanimous consent to have the names of Senator MATTINGLY and Senator KASTEN added as cosponsors of the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. COHEN. Mr. President, I ask for the yeas and nays on the amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. GARN. Mr. President, I will not oppose this amendment. However, I do not think it is necessary. I think we are drifting far, far away to one part of the very complex and very complete strategic alternatives that the President sent to us.

I should like to go back a little, so that we do not lose sight of the problem—a little history on the MX. For one reason or another, I have lived with it and never spent as much time on any other issue since I have been in the Senate. For 6 years, I have been living with MX.

In 1975, it was very apparent to many people that there was a growing missile gap at that time. A lot of people did not believe that. The window of vulnerability was being talked about at that time. The MX was being discussed, from underground railroads to you name it. There were all sorts of alternatives.

I felt very strongly at that time, 6 years ago, that there was no single best alternative and that as long as we tried to find one that would suddenly, in one fell stroke, solve all the problems of vulnerability with the Soviet Union, we would not find it.

So I went to the White House in the summer of 1976 and said to President Ford: "I understand the problems of deciding on a basing mode. It is difficult. But, for heaven's sakes, decide to build the missile."

In 1967, we made a unilateral decision that we would deploy no more ICBM's than 1,054—553 Minuteman II, 447 Minuteman III, and 54 Titans. Now we have 53 Titans to their 1,053. The Soviet Union had about 500 missiles at that time. We

unilaterally stopped, and they continued to build. In 1981, we still have 1,053, and they have more than 1,600.

So, unilateral restraint has not conditioned them to make any concessions at all or to pull back. Those are all the silos we have. We still have a Minuteman II, a Minuteman III, and Titan.

Three years ago, we closed down the only ICBM production line in the entire free world, while the Soviet Union continues to operate four, and while they build the SS–16, SS–17, SS–18, SS–19, and SS–20 for Europe. The SS–18 has 10 warheads; the 19 has 7; and the 17 has 4. We still have a Minuteman II with three.

So, for a change, we have been arguing about a replacement while they have built four, and they have three or four more in advanced stages of development; and we are still arguing about an MX, one replacement.

So I thought that President Ford should at least decide to build some missiles. Let us get on with the missile while we take years, if necessary, to decide on the basing mode. He decided not to decide on the B–1 that summer and to wait until after the election of November 1976, and also on the MX, assuming that he would be elected. He was not elected.

President Carter came into office and canceled the B–1, cut off one leg of the triad, and left us with the B–52. He took 3 years to decide whether or not to complete the missile.

So now we have gone all these years without making any decisions.

If anybody had told me in 1975 that 6 years later we would still be debating MX and what to do with it, while the Soviets continue to build all these missiles, I would have said:

No. Congress would not be that irresponsible. It simply would not sit back and let the Soviets do this year after year, while we to try to pick one perfect method for deploying it.

So in 1977 as a member of the Armed Services Committee we put in report language that required President Carter or requested that he make a decision as soon as possible.

In 1978 there was an amendment that they make a decision by September 30, 1978. The House of Representatives ruined that amendment by putting a barn door amendment to it that if they could not decide by September 30 every month they could report to Senator STENNIS why they had not, and so they did. We got a letter from Secretary Brown every month saying, "These are the reasons we have not yet made a decision."

So when they finally did they picked the most expensive Rube Goldberg vulnerable system that it was possible to pick, 4,600 holes in the desert, 200 missiles. Let us hide them from the Soviet. Do not worry about that they can build more warheads by two than any shelter we can build.

Here we have gone through all of these years, at least 6 years that I have been involved in it, starting and stopping and arguing about how we should base it, and there is one major point I wish to make without regard to any of this debate today, and I am certainly not going to get back involved in debating various basing modes on this day, but it is the importance of not hindering the development of that missile while we still try and find some viable way to deploy it; otherwise, the problem just gets worse and worse. So that missile should be built. It should have been under construction a long time ago. It is one compared to three or four or five or six that the Soviet Union is building.

So I hope none of my colleagues with their differences of opinion on basing modes or how it should be deployed will make the mistake of in any way hindering the development of the missile itself.

The final point I wish to make about why I feel that this amendment is unnecessary, although I am not going to object to it, is I think we are missing the point that we finally have a President who addressed the whole spectrum of strategic.

Senator NUNN said it well: CQ, command, control, and communications, the D5 missile for the Trident and a whole range of options, and no one seemed particularly interested to look at the broadness of his strategic package.

All we have heard about is MX and B–1 like nothing else existed. Maybe they should learn a little bit about command, control, and communications. I do not read about the D5 missile, the improved accuracy, and the improved capability of our sea-based force. We should read something besides B–1 and MX. There is a broad ranging proposal that is the best one I have seen since I have been in the Senate from any President, Republican or Democratic, to address the whole broad range rather than saying an MX will deter the Soviet Union by itself, or a submarine by itself, or a B–1 by itself.

We need that broad cross section of deterrence to keep the Soviets from attacking.

The original concept of a triad, I think, is still workable and we need to preserve those legs of the triad on the theory that the Soviet Union could not possibly attack all three at the same time, nor could they defend against all three. As long as we keep those three legs of the triad strong I do not think they will dare attack us as they would if we continue to weaken, if we do not have the B–1, if we do not have the MX in some form.

So my point is this: I will vote for the amendment that is before us, but I am saying that everyone seems to forget that there is a broad range, and before the press runs out of here and says this is a repudiation of the President's program, which I expect from a lot of them, look at the broad range of what he has offered that is not even controversial and remember the fact that he did not say that this was a permanent basing mode for MX. If it was, if we were being told that the solution is simply to put it in hardened silos, period, I would not be supporting it. It is an interim temporary recommendation while we once again attempt to make a permanent dicision and there are some new alternatives that have not been studied that I think merit further study before a final basing decision is made.

The President did talk about BMD. He did talk about deep base, deep underground, and others. So this amendment, the way it has been worked out, essentially says continue to look at all of them, not just concentrate one one, and that is fine, because I think that is the President's intention all along, and I think that is what his message said.

That is the only reason I say I think it is unnecessary. If you want to firm up the President and say study these alternatives for a permanent basing mode, but I want to make it very clear it was a temporary recommendation, stress the importance of getting on with the MX missile after all these years while the Soviets have built so much and recognize that there is no one single solution, that we must have a broad variety of all of these areas that the Senator from Georgia has commended the President for focusing on the entire program and not just one part of it.

Mr. COHEN. Mr. President, will the Senator yield?

Mr. GARN. I am happy to yield to the Senator from Maine.

Mr. COHEN. I will not disagree with anything he said today, and I think Senator NUNN agrees that the President should be commended for the entire package.

In line with what the Senator said, this amendment does not delay the missile. It keeps it going on schedule. Even more importantly it accelerates it because we, as the Senator, wish to see something done. We actually accelerated the time for the ultimate determination to be made from 1984 to July 1, 1983. So we wish to see it move along and actually wish to see it faster.

Mr. GARN. I understand. As an author of the amendment to try to get the decision made in 1977 and 1978, I understand that part of it. I am not averse to speeding it up. I just wanted to make clear the magnitude of the President's proposal, the broad scope, and the fact that this was only an interim recommendation from him anyway and that is essentially what this amendment is saying, go ahead and do what you told us you would do. We want a permanent basing mode as soon as possible. This is in essence what the Senator is saying.

Mr. COHEN. That is right. This is not repudiation by any means of the President's proposal.

Mr. SCHMITT. Mr. President, will the Senator yield?

Mr. GARN. I am happy to yield to the Senator from New Mexico.

Mr. SCHMITT. Mr. President, the Senator from Utah has emphasized an extremely important point in drawing the attention of the Senate to the President's overall program. The President did make an MX decision. He made a number of decisions relative to strategic policy and as the Senator from Utah has indicated, it is a comprehensive policy.

There is a piece here or there that I might argue with him about around the table but the overall policy is the most comprehensive strategic policy this Nation has had in a long, long time.

Mr. President. I ask unanimous consent to have printed in the RECORD the fact sheets related to the entire policy

that has been provided by the administration.

There being no objection, the fact sheets were ordered to be printed in the RECORD, as follows:

[Schmitt Fact Sheet]

THE REAGAN STRATEGIC PROGRAM

OVERVIEW

Introduction

Over the past few months, we have developed a comprehensive plan for revitalizing our strategic deterrent.

This program will end the relative decline of U.S. strategic capabilities and will put the United States in a position to reshape the U.S.-Soviet strategic competition in the years ahead.

Objectives of program

The Reagan program will, within the next four to eight years, redress the most serious weaknesses in our current posture.

Communications and control systems will be improved to make sure we could communicate with our strategic forces, even after a nuclear attack.

Our TRIAD of land-based ballistic missiles, bombers, and sea-based missiles will be strengthened and modernized as soon as possible, ending long-standing delays in some of these programs.

The Reagan program will determine, to a large extent, U.S. strategic capabilities into the next century. Not since the Eisenhower years has an Administration proposed a nuclear program of such breadth and scope. We have used this unique opportunity to mold a strategic force that will meet the objectives of our strategy and serve as a coherent instrument of national policy.

The Reagan program will create a deterrent to Soviet action against us that is far more secure and stable than exists today.

The Reagan program will increase Soviet incentives to negotiate genuine arms reductions. And, if we must, the proposed program will put us in a good position to strengthen our forces further in response to unconstrained growth in Soviet weapons.

Five elements of program

There are five mutually reinforcing elements of the Reagan program:

Improvements in communications and control systems;

Modernization of strategic bombers;

Deployment of new submarine-launched missiles;

A step-by-step plan to improve the strength and accuracy of new land-based missiles, and to reduce their vulnerability; and

Improvements in strategic defenses.

Each of these elements will be discussed in more detail in the following pages.

Capabilities and costs of program

The Reagan program stresses survivability and endurance. Compared with today's forces, we will, by 1990, roughly double the number of U.S. strategic weapons that could survive a Soviet nuclear attack on our country. We will be able to communicate with these forces during an attack, immediately following an attack, and, if necessary, for extended periods afterwards. These improvements will greatly strengthen deterrence of nuclear war by denying the Soviets any realistic prospects, however they may define them, of gaining an advantage by initiating the use of nuclear weapons.

The Reagan strategic program is affordable; it fits within the fiscal guidelines announced recently by the President. In the early 1960's, when we built many of the nuclear forces that still exist today, the U.S. spent over 20% of the total defense budget on strategic forces. Now, as we modernize our entire arsenal, we anticipate spending less than 15% of the defense budget on strategic forces in each of the next five years. To help fund new initiatives, some obsolescent forces will be retired, with little effect on overall capabilities. Thus, we plan to modernize strategic forces and still meet our other commitments, including strengthening the Rapid Deployment Force, enhancing conventional and theater nuclear capabilities in Europe, expanding our naval and air power worldwide, and ensuring that our armed forces have an adequate supply of well-trained men and women.

THE REAGAN PROGRAM FOR COMMUNICATIONS AND CONTROLS SYSTEMS

DESCRIPTION

We will improve the survivability, performance, and coverage of radars and satellites used to warn us of a Soviet missile attack and to assess its size and scope.

Mobile ground terminals for processing data from our warning satellites will be deployed, and the satellites themselves will be upgraded to improve survivability.

Warning satellites and ground-based radars will be improved to give better estimates of the size and objectives of a Soviet missile attack.

Additional PAVE PAWS surveillance radars will be deployed to improve coverage of potential Soviet submarine operating areas to the southeast and southwest of the United States.

We plan to upgrade the survivability and capability of command centers that would direct U.S. strategic forces during a nuclear war.

E-4B airborne command posts will be deployed to serve the National Command Authority in time of war.

EC-135 airborne command posts serving military commanders will be hardened against nuclear effects and will be equipped with upgraded satellite and very low frequency/low frequency communications.

We will deploy survivable communications that link command centers with all three legs of the TRIAD.

Very low frequency/low frequency communications receivers will be developed and installed on strategic bombers to ensure their reception of orders.

We will upgrade communications to deployed submarines.

A new satellite communications system will be developed providing extremely high frequency communication channels that would ensure two-way communications between commanders and forces.

We will initiate a vigorous and comprehensive R&D program leading to a communications and control system that would endure for an extended period beyond the first nuclear attack.

REASONS FOR PROGRAM

Strategic communications and control systems are needed to ensure that we could employ our nuclear forces effectively, which is essential to a credible deterrent.

Timely warning would be needed to ensure survivability of our alert forces; assessment of the attack would be needed to select an appropriate U.S. response.

Mobile command centers that could survive an initial attack would be needed to ensure that we have the means to direct a retaliation, even if our fixed command centers were destroyed.

Survivable communications links would be needed to ensure the reliable dissemination of orders to our ICBMs, bombers, and submarines.

Over the past decade, we have not modernized communications and control systems fast enough. As a result, these systems are not as survivable as we would like, and they could not operate reliably over an extended period after a Soviet attack, if that proved to be necessary.

The Reagan program will significantly improve the survivability and endurance of strategic communications and control systems. These improved systems will be as strong as the modernized forces they support.

THE REAGAN BOMBER PROGRAM

DESCRIPTION

We plan to develop a variant of the B-1 bomber and deploy 100 aircraft. The first squadron of B-1s will be operational in 1986.

We will continue a vigorous R&D program for an Advanced Technology Bomber (the so-called "stealth" aircraft). This bomber, under current plans, will be deployed in the 1990s.

Newer B-52s (G and H models) will be modified to carry cruise missiles. Selected aircraft will be modernized to provide added protection against the effects of nuclear explosions (particularly electromagnetic pulse effects) and to improve their ability to survive against Soviet air defenses (by installation of additional electronic countermeasures equipment.)

Older B-52s (D model) will be retired in 1982 and 1983.

Over 3000 cruise missiles will be deployed on B-52Gs, B-52Hs and B-1s. The first squadron of cruise missile-equipped aircraft (B-52Gs) will be operational in 1982.

Existing KC-135 aerial tankers will be outfitted with new engines to increase airborne refueling capabilities.

REASONS FOR TWO TYPES OF NEW BOMBERS

There is a general consensus on the need for new strategic bombers. The only issues are which bombers to build and when.

The previous Administration planned to rely on B-52s in the 1980s and to develop the Advanced Technology Bomber for the 1990s. This represented a willingness to accept risks associated with an aging and potentially vulnerable B-52 force, and risks associated with the uncertain schedule and unproven capabilities of the Advanced Technology Bomber.

The Reagan Administration believes the B-1 is necessary to bolster our strategic forces during the critical 1980s, and the Advanced Technology Bomber is needed to provide high confidence that our bombers will be able to penetrate Soviet air defenses into the next century.

The U.S. must depend heavily on bombers (and sea-based forces) in the 1980s while we take steps to strengthen our land-based missiles. We can't afford to wait until the 1990s for a new bomber.

The B-1 will be available in significant numbers by 1987 in accordance with the Congressional mandate; the Advanced Technology Bomber will not be available until the 1990s.

Building the B-1 will allow time to develop an Advanced Technology Bomber that really works. There are currently technical and operational uncertainties about the Advanced Technology Bomber. We believe these uncertainties will be resolved during development and that the Advanced Technology Bomber will be a very effective aircraft when ultimately deployed. Without the B-1, however, there would be pressures to accelerate the Advanced Technology Bomber, which would increase program risks and possibly result in a less capable aircraft being deployed.

Building two bombers will stimulate competition and give the Defense Department the flexibility to adjust bomber procurement in accordance with any changes in estimates of the cost and effectiveness of the two aircraft.

The B-1 will be able to penetrate Soviet defenses initially and will make a good cruise missile carrier and conventional bomber after the Advanced Technology Bomber is deployed and all B-52s are retired in the 1990s. If we did not build the B-1 now, we

would have to start development of another aircraft in the late 1980s or early 1990s to replace B–52s as cruise missile carriers. Thus, over the long run, we would not save much money, and we would postpone once more the deployment of a needed modernization program.

THE REAGAN PROGRAM FOR SEA-BASED FORCES

DESCRIPTION

We plan to continue construction of Trident ballistic missile submarines at a steady rate of one per year, including one submarine in 1981 (the contract is under negotiation), one submarine in 1982 (partially funded by Congress in the FY 82 budget, the remainder will be funded in the FY 83 budget), and one submarine per year in 1983 to 1987.

We will develop a larger and more accurate, sea-launched ballistic missile—known as the Trident II or D–5 missile—for deployment on Trident submarines beginning in 1989.

We will deploy several hundred nuclear-armed sea-launched cruise missiles on general purpose submarines beginning in 1984.

REASONS FOR PROGRAM

Sea-based forces currently represent the most survivable leg of our strategic TRIAD. The Reagan program expands and further strengthens these forces.

The new D–5 missile will carry more warheads and/or larger ones than current C–4 submarine-launched missiles, nearly doubling the capability of each Trident submarine. By increasing the payload of each Trident, we will be able to avoid a reduction in sea-based capabilities when large numbers of existing Poseidon submarines reach the end of their service lives and must be retired in the 1990s.

The new D–5 missile will also have much better accuracy than current sea-based missiles. This will allow us to use sea-launched missiles to attack any target in the Soviet Union, including their missile silos.

To deploy highly accurate nuclear warheads at sea in the near term, we plan to put cruise missiles on existing attack submarines. These missiles will be particularly valuable as a strategic reserve force, a key part of our deterrent posture. Deployment of nuclear sea-launched cruise missiles to strengthen our strategic reserve and to deter the use of nuclear weapons against our naval forces worldwide, does not diminish the critical need to deploy Ground-Launched Cruise Missiles and the Pershing II ballistic missile to counter the massive Soviet build-up of theater nuclear forces in Europe.

THE REAGAN STEP-BY-STEP APPROACH TO ICBM MODERNIZATION

DESCRIPTION

The so-called Multiple Protective Shelter basing scheme for the MX missile will be cancelled.

We will continue to develop MX and deploy at least 100 missiles.

We will pursue R&D on three promising long-term basing options for MX. The development programs will be structured to allow us to select for deployment one or more of these options by 1984.

Continuous Airborne Patrol Aircraft. A survivable long-endurance aircraft that could launch MX.

Ballistic Missile Defense. Active defense of land-based MX missiles.

Deep Underground Basing. Deployment of MX in survivable locations deep underground.

In the near term, we will deploy a limited number of MX missiles, as soon as possible, in TITAN or MINUTEMAN silos that will be reconstructed for much greater hardness to nuclear effects.

Although specific base locations are still under review, the most likely site for the initial MX deployment is an existing TITAN base.

All aging TITAN missiles will be deactivated as soon as possible.

REASONS FOR CHANGING THE MX PROGRAM

The previous Administration planned to conceal MX by moving the missiles among thousands of relatively soft shelters in Utah and Nevada (Multiple Protective Shelter basing). This scheme has serious military drawbacks and does not solve the basic problem, which is the current vulnerability of the MINUTEMAN and TITAN force.

A program to deploy 100 MX in 1,000 shelters would not be survivable against today's threat, much less the Soviet forces that are likely to be deployed in the mid-1980s.

By the same token, a program to deploy 200 MX missiles in 4600 shelters has only one significant difference from the 100 in 1000 plan: it is more expensive (but no more survivable). The more shelters or holes we build, the more Soviet missiles will be built. They can build missiles as fast as we can build shelters, at about the same cost to both countries.

Any ground-based scheme ultimately would require a ballistic missile defense for survivability. But, today, ballistic missile defense technology is not at the stage where it could provide an adequate defense against Soviet missiles. For the future, we are not yet sure how well ballistic missile defenses will work; what they will cost; how Soviet ballistic missile defenses—which would almost certainly be deployed in response to any U.S. missile defense system—would affect U.S. and Allied offensive capabilities; and what would be the political ramifications of altering the ABM Treaty.

While it is not the determining factor, it should be noted that Multiple Protective Shelter basing has strong environmental opponents who would use every available tactic, and there are many, to delay MX deployment.

We believe there are promising alternative basing modes for MX, and vigorous R&D programs will be initiated on three possibilities. We are hopeful that one or more of these alternatives will give far greater survivability than Multiple Protective Shelter basing. We plan to choose among these long-term basing options as soon as sufficient technical information becomes available, and in any event, no later than 1984.

The MX missile itself will be ready in 1986, well ahead of its long-term basing. Meanwhile, initial deployment in existing ICBM silos is the only way to avoid delaying MX. We cannot afford to put off MX, a much stronger and more accurate missile than MINUTEMAN, and continue the decade-long pattern of postponement, vacillation, and delay. Early deployment of MX will break the Soviet monopoly on prompt counter-ICBM capabilities.

While not a long-term solution, reconstructing silos (by adding more steel and concrete to help withstand nuclear explosions) would force the Soviets to develop more accurate missiles and might well keep them from achieving a high confidence counter-MX capability until the late 1980s, by which time we will have a better system.

THE REAGAN PROGRAM FOR STRATEGIC DEFENSE

DESCRIPTION

We plan to upgrade, in coordination with Canada, the North American air surveillance network. The plan will include some combination of new over-the-horizon backscatter (OTH–B) radars and improved versions of the ground radars that exist today.

We will replace five squadrons of aging F–106 interceptors with new F–15s.

We plan to buy at least six additional AWACS airborne surveillance aircraft for North American air defense to augment ground-based radars in peacetime and to provide surveillance and control interceptors in wartime.

We will continue to pursue an operational anti-satellite system.

Research and development on ballistic missile defense will be vigorously pursued.

As discussed under ICBM modernization, we will expand ballistic missile defense R&D for active defense of land-based missiles.

We will develop technologies for space-based missile defense.

An expanded, cost effective, civil defense program will be developed in coordination with the Federal Emergency Management Agency.

We will pursue other related programs and objectives.

REASONS FOR PROGRAM

We have virtually ignored strategic defense systems for over a decade. As a result, we have large gaps in the North American air defense warning network; our strategic air defense interceptors are obsolete; and our anti-satellite and ballistic missile defense programs have lagged behind the Soviets.

The Reagan program ends these years of neglect. We have taken the first steps toward restoring credible strategic defensive forces. In the years ahead, we plan to continue our review of strategic defense to determine what additional steps may be needed

Mr. SCHMITT. Mr. President, I believe the Senator from Utah would agree that that will add some balance to the discussion we might have had up until now.

In the context of the MX discussion, it is important to note that first there is a decision to produce the MX missile. The Senator from Utah mentioned that the deciding began in 1975, I think. The actual initial planning for MX began in 1960, for crying out loud, and then there was a significant movement in the direction of follow-on to the Minuteman in the mid-1960's.

The Senator may also recall as a footnote that it only took us I believe 30 months to produce and begin deployment of the Minuteman system.

It is now 21 years and it will be I guess 26 years before we reach the IOC of this particular missile system. That is unbelievable. If one wonders why we are having trouble doing anything defensively for ourselves and the free world it is because somehow we lost track of how to get anything accomplished.

Mr. President, it is clear that there has been a decision to produce the MX missile and, second, a decision on an interim basis to base this missile in existing silos until such time as another permanent basing mode is determined.

Right, now, Mr. President, the Soviet Union must be very concerned, and must begin the allocation of resources based on a variety of deployment schemes any one of which, or several of which, the United States may select. I think that that in itself is a positive outcome of the President's strategic policy.

We not only get a relatively new, only 26-year-old, missile system coming on line, although significantly improved over the earlier concepts obviously, but we will have a number of options to ex-

ercise. I hope we exercise several of those options because each one of them requires a different response on the part of the Soviet Union. Unfortunately, I find we continue to put attributes of strategic policy, our own attributes of strategic policy, on the Soviet Union rather than looking at the reality of what is driving their policy.

The Soviet Union is, as the Senator from Idaho indicated, forcing the United States in the direction of considering a launch-on-warning far more than we ever have in the past. It is their improvements not only in accuracy but in total missile capability that have degraded the effectiveness of our deterrent force.

In addition, the production of the MX provides us with a new booster system, an important new booster system, that will have other applications besides those under discussion here today.

By initially basing the MX in silos rather than multiple protective shelters, the MPS mode of deployment, a great deal of money is saved, money that could be used for missile defense and for a variety of other defense and deterrent purposes.

An emphasis, Mr. President, on missile defense begins a very, very important movement, philosophical movement, in our strategic policy; namely, a movement away from a policy based on mutual assured destruction of the past toward a much more rational and much more moral policy of assured protection, not here but now clearly visible on the horizon.

This protection not only would cover our military assets, but also our human and economic assets through the technology that would be developed along such a path.

Clearly related to the decision, the strategic decision, of the President, as has been indicated here this afternoon, is the President's decision to allow for increased expenditures for command, control, and communications, the so-called C^3 functions of defense, and to make this a far more vital aspect of our national defense than we have allowed it to be in the recent past.

Mr. President, while superhardening does not seem to this Senator to make a great deal of sense in the total context of the President's strategic policy, funding for studying this alternative and its potential benefits, including whatever it forces the Soviet Union to do with regard to planning and allocation of their resources, should not be precluded. As I interpret the amendment offered by the Senators from Maine and Georgia, it does not preclude that consideration. If I thought it did, I would have to oppose the amendment because I think it would, in fact, undercut certain aspects of the strategic policy articulated by the President.

Mr. President, finally, I think it is impossible to over-emphasize the importance of beginning the systematic allocation of resources for the protection of the defense and economic and human assets of the United States. BMD, so-called ballistic missile defense research and development, is just a small part of what should be done. It must be linked to a wide variety of technological advances in communications, in control, in command systems, in detection systems, as well as moving toward a much more advanced overlay style system. This overlay system will, in part, if not entirely, on the development of directed energy weapons, both airborne and spaceborne, that will eventually offer the free world and all of mankind the option of making these missiles of mass destruction obsolete.

I hope we all recognize in the President's strategic policy which I have introduced into the record in the form of fact sheets, that we do now have a clear option to move along the path of protection and of eventually making large proportions of these weapons of mass destruction obsolete and, therefore, unnecessary.

Mr. President, to summarize arguments in favor of most aspects of the President's policy, arguments put forth by the Senator from Delaware (Mr. ROTH) and myself to the President September 25, 1981, I ask unanimous consent that our letter to the President be printed in the RECORD, and also a more general discussion of these issues in the form of an op-ed piece authored by myself and Senator ROTH published in the Washington Star—I think we would remember the Washington Star—on June 18, 1981.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
Washington, D.C., September 25, 1981.

The PRESIDENT,
The White House,
Washington, D.C.

DEAR MR. PRESIDENT: On July 2, we wrote to you expressing our concern about the Multiple Protective Shelter (MPS) basing mode for the MX missile and proposing an alternative "strategic program" addressing U.S. defense needs for the 1980's. In light of your recent decision to cut-back on the growth of the defense budget over the next three years, we urge you to once again consider our silo-basing proposal as an alternative to any MPS basing mode for the MX missile.

In the previous letter we noted that the basing debate itself has drawn attention from the need to define the best overall strategic defense policy for this country. That strategic policy will not be served well by deployment of the MX missile in an MPS basing mode if, at the same time, cuts are made in vital related programs such as command, control, and communications (C^3) programs. Nor will that policy be served well if we delay pursuing programs which will move U.S. policy from one based on Mutual Assured Destruction (MAD) to a policy based on defending our military, economic, and human resources.

The key elements in our proposal are as follows:

1. Complete the R&D and production of the MX missile as a necessary addition to our strategic arsenal.

2. Base 200 MX missiles in converted Minuteman and Titan silos. This would result in a net increase of 1,800 deployed re-entry vehicles of greater accuracy, with full operational capability by 1986—4 years ahead of MX/MPS.

3. Protect one field of MX missiles with a low altitude ABM defense, within the ABM Treaty limitations. While such a defense will not be fully effective, it will increase the survivability of those MX missiles, provide us with operational experience with an ABM system, allow us a capability to expand the ABM system quickly should the Soviets decide to breakout of the Treaty, and signal the Soviets that we are prepared to proceed with ballistic missile defense. In addition, R&D on non-nuclear overlay ABM defenses should be accelerated.

4. Commit adequate funding of the Trident II (D-5) SLBM so that its projected schedule is maintained.

5. Accelerate a number of other strategic programs such as Minuteman upgrades, early warning upgrades, C^3 upgrades, improved navigational programs, etc.

Not emphasized in our previous letter, but of increasing importance, is the value of the MX missile in any land based deployment as part of a total "launch on warning" system. In concert with improved space-based attack warning systems and ground-based attack warning systems and ground-based attack verification analysis, the increased boost capability of the MX permits consideration of launching warheads to orbit if an attack has been launched against us—in effect, a fail-safe mechanism. Once the Soviets believe we can and will implement a launch on warning capability, the window of vulnerability will be slammed shut.

Together with other ongoing weapons programs, such as deployment of large numbers of cruise missiles and R&D on space-based lasers, we believe that this approach will serve our strategic requirements well into the 1990's. This proposal will also save over $15 billion between now and FY 1987 while deploying other important weapon systems earlier than currently planned. Much of the savings occurs in the FY 1983 to 1985 time frame.

At this time the case for any MPS basing mode is not convincing, public opinion is opposed to it, and the cost is too high, especially within the context of a balanced budget. We believe that our proposal would be supported by the Congress because it addresses our vulnerability earlier than other alternatives, saves money, and puts more strategic weapons in the field. Moreover, by adequately funding R&D for future, non-nuclear space-based defenses, this proposal brings closer the day when weapons of mass destruction may become obsolete. Finally, by demonstrating a real commitment to a strong defense now, it encourages the Soviets to consider real weapons reductions in arms control negotiations.

Thank you for your continued efforts to insure our national security and for your consideration of our proposal. We are at your disposal to discuss these maters further if you so desire.

Sincerely,

WILLIAM V. ROTH, JR.,
HARRISON H. SCHMITT,
U.S. Senators.

A BETTER WAY TO DEFEND OURSELVES

(By HARRISON H. SCHMITT and WILLIAM V. ROTH)

The Reagan administration and the Congress must solve the problem of our strategic military vulnerability. For the first time in history, the threat of a successful first strike against our missile forces holds our foreign policy hostage to Soviet ambition.

The Carter administration's solution was to deploy 200 MX missiles in 4,600 Multiple Protective Shelters (MPS) in Utah and Nevada. This six to nine thousand mile so-called "race track" basing system is an ill-considered scheme of monstrous economic and societal proportions, and of questionable technical validity.

The staggering cost will preclude development of more promising state-of-art strategic weapons needed to ensure peace and security.

A consensus has emerged in this country

to strengthen N.S. national defenses. But the days when we could afford to spend almost limitless amounts on defense are behind us. Every dollar spent must buy the maximum real military capability, and must be weighed against its long term impact on the economy.

The U.S. needs a new strategic policy for the rest of this century, not continued reliance on weapons of mass destruction and the strategic policies of the last two decades.

We must begin moving away from the doctrine of Mutually Assured Destruction (MAD) and begin defending our freedom. In brief, we must take advantage of America's technological superiority to leap-frog the Soviet Union and develop strategic weapons that will make weapons of mass destruction obsolete.

SAFETY IN DIVERSIFICATION

Although achieving this goal will take years, we must begin now by concentrating on two areas: defenses against ballistic missile attack and diversification of our own strategic threat to the Soviet Union.

Allocating $40 to $50 billion at a minimum for the MPS basing of the MX missile will divert budget resources from these urgent tasks.

The immediate issue is how to make a sufficient number of U.S. ICBMs invulnerable to a first strike. Only ICBMs can be successfully used against hardened Soviet missile sites (as opposed to population or economic targets.) But the 1,000 silo-based Minuteman missiles—the core of U.S. hard-target retaliatory forces—are now too vulnerable to a pre-emptive strike to present an effective deterrent, largely because of the now highly accurate Soviet ICBMs targeted against them. MX missiles deployed in 4,600 shelters by the early 1990's will be similarly vulnerable (in the absence, of course, of enforceable limitations on the growth of Soviet missile forces.)

The answer to this dilemma is to begin work on Anti Ballistic (ABMs) to protect our fixed silo fields, and to place more capable missiles, such as the MX with 10 MIRVED warheads, in those or new silos. Even a limited, low altitude ABM system could protect enough missiles to assure sufficient retaliatory capability to deter a Soviet first-strike. At the same time, we should accelerate work on a more sophisticated nonnuclear intercept system, such as lasers, to stop incoming missiles out in space or soon after launch. Fortunately, the technology base is in hand for such systems.

As the second element of a new strategy, we should accelerate diversification of our means of retaliation. Besides relying on a combination of land-based MX and Minutemen missiles, we should speed up the development and deployment of the Trident II submarine-launched missile, which will be the first sea-based ICBM capable of destroying the hardened Soviet ICBM force. We should also proceed with development and deployment of sea, air, and land-based cruise missiles. These weapons are relatively inexpensive, mobile (hard to detect and destroy), and available technology can make them highly accurate.

A number of other programs that take advantage of U.S. technological superiority are also important. For example, we should pursue our superiority in space. Space-based defenses offer the potential for the U.S. to "gain the high ground"—not to base offensive weapons of mass destruction, but to enhance our defenses against weapons of mass destruction. Examples are early warning satellites to provide our decision makers with more time to react and reliable satellite communications for submarines.

Technology is our margin of superiority over the Soviets in strategic systems. We ignore it at the peril of ourselves and mankind. Economically, MPS basing of the MX would require the expenditure of tens of billions of dollars in 1983 and 1984 at precisely the time when other absolutely necessary defense expenditures must be made and the total federal budget must be brought into balance. In effect, MPS basing would imprison the defense budget and a balanced total budget.

The program we propose offers numerous advantages:

By using existing silo fields and protecting them with ABMs, we announce that the U.S. no longer accepts the MAD doctrine of annihilating innocents as our only deterrent philosophy. By deploying a hard target capability at sea, we move weapons of mass destruction further away from our people and our territory, and add immeasurably to deterrence.

The Soviets cannot find and target our submarines in the open ocean with any real assurance of success;—by diversifying the threat we present to the USSR (land-and-sea-based ICBMs, and sea-, air-, and ground launched cruise missiles), we force the Soviets to bear a greater economic burden by spending billions of dollars on an array of inherently expensive defenses; and—by presenting the Soviet Union with these dilemmas, and the U.S. willingness to do what is necessary for its own defense and that of its friends, we will, more than any wishful thinking, bring them to the conference table to talk about real arms control.

SAME OR FEWER DOLLARS

This program to correct our strategic vulnerability and regain the initiative can be pursued with the same or fewer dollars than would be expended for the proposed MPS basing scheme.

Many of the programs outlined are already planned for the 1980's, but at funding levels that are far too low to be successful. The astronomical cost of an MPS would force delay or postponement of many of these systems.

The United States defense and public sector budget cannot afford to be held hostage to such a plan. We cannot afford to find ourselves more vulnerable to Soviet threats at the end of the '80s than we are now. Moreover, the taxpayer should not have to accept such unnecesary expenditures.

Mr. SCHMITT. I thank the Senator from Utah for his courtesy and the Senator from Alaska for allowing me to proceed.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The Senator from Michigan.

Mr. STEVENS. Mr. President, will the Senator yield for a tactical question?

Mr. SCHMITT. I am happy to yield to the Senator.

Mr. STEVENS. Mr. President, the Senator from Arkansas has an amendment that would prevent any money for interim deployment. The Senator from Maine and others here have this amendment we are discussing now.

I wonder if it is possible that we have the discussion on the amendment of the Senator from Arkansas—as he points out his discussion would be about the same matter—and get an agreement when we might be able to vote first on the modified Cohen amendment. It is the Cohen-Nunn amendment, is it not?

Mr. COHEN. That is correct.

Mr. STEVENS. Then if that is agreed to I would then, as I told my good friend, move to table his amendment. If it is not agreed to we would have an up-and-down vote on his amendment at that time. Is there any problem with that?

Mr. COHEN. I have no problem.

Mr. STEVENS. Mr. President, will the Senator inform me how much longer he might be involved in this discussion?

Mr. COHEN. I have no further requests for time. Senator NUNN, do you have any objection?

Mr. NUNN. That sounds reasonable to me. I am agreeable to handling it that way.

Mr. STEVENS. I am just trying to facilitate this.

Mr. NUNN. Will the Senator get into the debate on the Pryor amendment now and the Nunn amendment?

Mr. STEVENS. We have debate on the Pryor amendment now, let the Senator from Arkansas describe what his amendment is, and get an order that it be in order to discuss that now and then we would have back-to-back votes on the Cohen amendment and then, if necessary, on the Pryor amendment.

Mr. GARN. Mr. President, reserving the right to object, and I will not, I would simply make the point before we do that that the Senator from New Mexico waited patiently over and over again through several of us speaking, so I would not object, Senator STEVENS, if the Senator from New Mexico could finish his remarks, and then I think we would be happy to do that. But he simply has waited for a long, long time, deferred to me, to Senator MCCLURE and many others, and I just would not object if he could finish his remarks and then we would be happy to proceed along the lines stated by the Senator.

Mr. STEVENS. I did not have any intention of interrupting for the purpose of asking a unanimous-consent agreement. I just wanted to see if it was possible. I shall clear it, and I thank the Senator from New Mexico, who had the floor, for yielding to me.

Mr. LEVIN. I wonder, Mr. President, if I could ask the Senators from Maine and Georgia—the Senator from Georgia is within earshot—to clarify their amendment for me.

Let me repeat, I am wondering if the Senator from Maine, Mr. President, might be willing to clarify this amendment for me, and I also ask the question of the Senator from Georgia and, in fact, let me ask the Senator from Georgia first: Is it your intention in this amendment to stop the expenditure of these funds, these identified funds, for research and development of a super-hardened silo basing mode, these funds that are identified?

Mr. NUNN. Is the Senator posing that question to the Senator from Georgia or the Senator from Maine?

Mr. LEVIN. I would like both of the Senators to answer it because I, frankly, am uncertain. I heard the Senator from Georgia indicate this is a change from the President's program. I heard the Senator from Maine say that it is not in any way a change from the President's program.

Mr. COHEN. If the Senator would yield, I think I said a repudiation of the President's program. It does, in fact, work a change. Does the Senator want to know exactly what the change is?

Mr. LEVIN. I would like to frame a question, because I think I heard both

Senators speak on it. My question is this: Can this money be spent to harden those silos, for R. & D. for silo hardening? That is my question.

Mr. COHEN. Of the $334 million, the answer is no.

Mr. LEVIN. Now, I wonder if the Senator from Georgia agrees with that. I hear the Senator from Illinois saying he does not agree with that interpretation. I am not sure what this language means. But I would like to be sure from both prime cosponsors here that this money cannot be used for R. & D. to harden silos. Would the Senator from Georgia agree with the Senator from Maine on that point?

Mr. NUNN. That is correct.

Mr. LEVIN. Why can we not just say that real nice and simply in this amendment.

Mr. NUNN. Has the Senator from Michigan tried to get a majority vote on an amendment around here?

Mr. LEVIN. Yes, I have. Not with a lot of luck, but I have.

Mr. NUNN. You have to negotiate language that sometimes becomes rather complex in order to get everyone on board an amendment. I think this is what this one has gone through.

Mr. LEVIN. I appreciate that. I have negotiated some language myself. But I do not think we want to obfuscate the intent of the two Senators here.

Mr. COHEN. First of all, there is no intent to obfuscate. The Senator from Alaska raised the point. This amendment does not preclude the administration from doing R. & D. to deal with the possibility of long-term hardening of silos, provided it is in conjunction with the point the Senator from Georgia has raised, some mobility, some deception. That has never been our intention to preclude that. What we have said is that of this $334 million, that money will be spent on these other options.

Now, there is still money available in the appropriations bill to explore Big Bird. There is still money to explore deep basing. There is still some $20 million to explore R. & D. for hardening if, in fact, that becomes a long-term proposal of the administration.

We have clearly, I think, expressed that as our intent to allow that. But what we are saying is of this $334 million that will be used, that is the bulk of the money on the other options.

Mr. LEVIN. I thank the Senator from Maine. Let me ask another question.

The President has announced an interim program of R. & D. to hardened silos. He called it an interim program. Let us use that. It is as good a word as I know.

As I understand the Senator from Maine, his amendment, and the Senator from Georgia, this money cannot be spent on R. & D. on that interim program of hardened silos? Is that correct?

Mr. COHEN. That money that is specified, $334 million, that is correct.

Mr. LEVIN. That is the money which was in this bill for that purpose in the President's program.

Mr. COHEN. There was more money in the budget.

Mr. LEVIN. Any other money?

Mr. COHEN. I was just saying there is another $20 million that can be used for R. & D. purposes, not for military construction in this bill, for long-term R. & D., with a go for that ultimate solution. That is correct.

Mr. LEVIN. My words were: On the President's interim program, not on the long-term program. My words were: Is there any other money in this bill that the Senator from Maine knows about for the President's interim program, R. & D. money for fixed silos?

Mr. COHEN. Not to my knowledge.

Mr. STEVENS. Will the Senator yield?

Mr. COHEN. I am happy to yield to the Senator from Alaska.

Mr. STEVENS. There is an additional $20 million there that can be used on interim if they wished to do so related to the R. & D. for hardening.

Mr. LEVIN. That would be on the interim program on fixed silos, is that correct?

Mr. STEVENS. Right.

Mr. LEVIN. Is my understanding, therefore, correct that the money which is being prohibited for that purpose constitutes $334 million of $354 million?

Mr. COHEN. That is correct.

Mr. LEVIN. And I am wondering if the Senator from Georgia would agree with that.

Mr. STEVENS. It is $375 million, and that is already earmarked $21 million for long term.

Mr. LEVIN. I thank the Senator from Alaska. But I am talking about the interim program. In all my questions, I think I have tried to make clear that we are talking about the President's interim program for R. & D. on fixed silos.

Mr. NUNN. I would say to the Senator from Michigan that what we are attempting to do here is send a strong signal to the administration that we want any interim program to really, in effect, merge with the permanent program, at least in the planning stage, so that any kind of hardening or any kind of fixed silo location on the MX will be compatible with deception, mobility and/or a BMD defense. It is a compatibility thing.

If the Senator is asking the question, though, whether there is any money here that can be used for superhardening, the answer is that a large portion, a great large portion, $334 million out of $354 million, is fenced in as I have described it. There is $20 million that is not fenced in that could conceivably be used by the administration any way they would desire.

Now, one of the difficulties here is, of course, determining how much money would it really take to do the R. & D. on a fixed silo or a superhardened silo. We have never gotten from the administration a breakdown of how much of this money was going to be used on a superhardened silo. But I would say to the Senator that I would submit it would be very difficult for them to proceed very far with $20 million for that purpose.

Mr. LEVIN. I will try to restate it as clearly as I know how, because I do think we ought to know what we are doing. I think this is the most critical program and I think we ought to be clear. I know the problems of working out an agreement and I appreciate them. I am not trying to upset them.

What the Senator from Georgia, as I understand it, is saying is that we have fenced in, in this amendment, the Senator has fenced in in this amendment $334 million of the approximately $354 million that was in this budget at the President's request for an interim program of fixed silos, hardening fixed silos.

Mr. COHEN. If the Senator would yield, that is not precisely correct: $354 million in the President's interim program was principally focused upon the fixed silo, but then the less included options were explored, the BMD and the other things. What we have tried to do is say you will spend that $334 million on the other options. So the President's program originally had the option, as well, but the principal focus of the President was on the fixed silo, with an ability to move to others. We said, "No, we want the others in first, the $334 million. You have the option of ultimately going to the fixed silo." We changed the emphasis.

Mr. LEVIN. I understand that. I heard the Senator when he introduced the amendment. It is not just changing the emphasis, you are prohibiting flat out the use of $334 million for R. & D. on this interim hardening of these fixed silos. Is that correct?

Mr. COHEN. Yes.

Mr. LEVIN. I understand from the last answer from the Senator from Georgia that that is correct. Am I correct in saying that was the Senator's statement?

Mr. NUNN. I apologize to the Senator. I was listening to another conversation. I will have to ask him to repeat that question. I know that is an inconvenience.

Mr. LEVIN. I am not sure that I could, so I think I will settle for the statement from the Senator from Maine.

Mr. DIXON addressed the Chair.

Mr. LEVIN. I have one other question, and then I will be happy to yield to my friend from Illinois.

Is it the intention of the sponsors of this amendment that the money be spent in a way which is compatible with arms control agreements entered into by the United States?

(Mr. SYMMS assumed the chair.)

Mr. NUNN. I can answer that question. As the Senator from Michigan knows, I raised that point in the Armed Services Committee. I was concerned, and I remain concerned, that the administration's plan to go to superhardening on these silos would possibly violate SALT I and SALT II. We had testimony on that from the head of the Strategic Air Command. We were supposed to get some answers back from the administration on that. That question was posed to the Secretary of Defense in open session, as I recall it, and he said that in his opinion it did not. But, again, as in the instance of hardening, he did not give us anything to back that up.

So where we are on that subject is that we have the head of the Strategic Air Command saying that in his opinion it

would require some renegotiation of SALT I and SALT II if we went to a hardening of the Minuteman silos. This amendment does not touch that subject. This amendment was not designed to touch that subject. That is another bag of worms. And I in no way believe that this amendment touches that subject.

But it remains a matter of concern to the Senator from Georgia, not only from the point of view of a possible violation by the United States, but even more importantly, that provision that limits the size of the launches and adjustment to launch missiles and launchers and, by implication, silos.

That provision was inserted by us, the United States, as a way to moderate the Soviet overall thrust in the very significantly and fast-moving modernization program. In other words, that provision was placed in SALT I and SALT II, as I understand it, for our benefit. So it gives me concern.

I know the Senator from Maine would agree that this amendment does not affect that question one way or the other, except I would say this amendment does discourage going to superhard silos on an interim basis. It takes away most of the money that could be used for that purpose so in that sense indirectly it makes that event less likely on an interim basis.

Mr. LEVIN. Mr. President, I want to try to phrase a question to both Senators at the same time so I can get an answer. I think we have come most of the way in clarifying the one issue, but I want to pin it down a little more. Until then, I yield the floor.

The PRESIDING OFFICER. The Senator from Illinois.

Mr. DIXON. May I say, Mr. President, in response to the distinguished Senator from Michigan earnestly as I know how, that I must say that I do not draw the same conclusion as my distinguished friends, the Senator from Maine and the Senator from Georgia, concerning what this amendment does. I think this amendment is better than the bill in its present form, but I think this amendment is a good example of the practice we engage in too often here, of dealing with unprinted amendments on matters of the greatest importance to the country when we do not understand what the amendment does.

I have the amendment in my hand. Here is what I think the amendment does: Instead of permitting the appropriation of $354 million to harden those silos, it says, "You shall have $334 million for research and development." That is true.

Here is what it says: "Shall be available only for research and development related to the initial deployment of the MX missile in non-superhardened existing silos in a manner compatible with the permanent basing mode." That is all right initially.

Then it says, "which could include" and then it names several things. What is one of the things it names? "Super hardening and subsequent deployment in a permanent basing mode," and so forth, to be recommended to the Congress on July 1, 1983.

I say to you that while I congratulate the Senators who offered this amendment on at least saying we should study other things, mobility and a variety of other things, that this does, in fact, say that the administration, if it wants to go forward, can go forward with the super hardening of the silos as presently planned.

Mr. NUNN. Will the Senator yield?

Mr. DIXON. I do yield.

Mr. NUNN. The Senator is correct. The term super hardening is used at the end, but you have to read that in connection with mobility and deception. I have no objection to R. & D. being done, although I am very dubious about the results of it. I have no objection to R. & D. being done on a long-term basing mode that would include superhardening, mobility, deception, and BMD as a package. I do vigorously object to an interim super hardening kind of solution. The two are quite different.

There was a proposal that would have involved superhardening and mobility and deception as a long-term permanent solution.

This is designed carefully not to preclude that.

Mr. DIXON. But may I say to my distinguished friend, and this is a matter of where honorable people disagree with what the amendment says—again I suggest that the unprinted amendment is the wrong way to approach this serious problem—I would suggest as a lawyer that this is written in the disjunctive sense which could include several different alternative things, one of which is superhardening in subsequent deployment in a permanent basing mode.

Mr. NUNN. The Senator has to read the words "permanent basing mode" in front of that and you have to read the superhardening after the words "permanent basing mode." The superhardening goes with the permanent basing mode but it also goes with mobility and deception and BMD and defense. But you are correct that these funds are not prevented from being used for long-term permanent basing modes that would include as one of its elements superhardening.

Mr. DIXON. May I simply say that I think that the amendment of the Senator from Arkansas that simply takes out the $354 million all together is a better proposal to this problem in sending the proper message.

Mr. NUNN. If the Senator will yield, I want to make it clear that the $334 million cannot be used for superhardening. It can only be used for non-super-hardening silos. This is all R. & D. We are not talking about any construction at all. We are talking about research.

Mr. DIXON. I understand that. But the question of the Senator from Michigan was about R. & D. He said it could be used for R. & D. I say it can be used for R. & D. That is the only point I want to clarify here.

Mr. NUNN. It can be used for R. & D. on non-super-hardened silos but that non-super-hardened silo has to be compatible with a long-term basing mode that could include mobility and also include deception and BMD and superhardening. The object here is to prevent an interim superhardening. I think that is what the amendment does. That is what it is to do. But it is not to preclude long-term superhardening in the event that is deemed to be compatible with mobility, deception, and BMD. This money cannot be used for R. & D. on super hardening, this $334 million. The $20 million could be.

Mr. LEVIN. Will the Senator from Georgia yield for one more attempt? I wonder if I can have the attention of the Senator from Maine also. I think I can phrase the question properly.

Is it a correct interpretation of the amendment to say that it flatly prohibits the expenditure of any of the $334 million on R. & D. on superhardened silos as a part of any interim program prior to July 1, 1983.

Mr. NUNN. The Senator is correct.

Mr. COHEN. It is for during the fiscal year. July 1, 1983.

Mr. LEVIN. The Senator from Maine would agree with this, with that modification?

Mr. COHEN. I do.

Mr. LEVIN. I thank the Senator.

Mr. PRYOR. Mr. President, I would like to ask a couple of questions in a moment, but first I would like to make a short statement, if I might, to inform my colleagues that either sometime this evening or perhaps in the morning, whatever the time situation might become, I do plan to offer a substitute amendment to the Cohen-Nunn amendment. My amendment, I can guarantee my colleagues, is going to be a very, very simple amendment to understand because it takes away all of the $354 million for the interim basing mode.

Mr. COHEN. Will the Senator now tell me whether it will be a printed or unprinted amendment, to satisfy my curiosity?

Mr. PRYOR. To satisfy the Senator's curiosity, I think it will be a printed amendment by that time, but it will be so simple, it will not have to be printed. I can guarantee that.

Mr. NUNN. Will the Senator yield for just 10 seconds?

Mr. PRYOR. I am happy to yield.

Mr. NUNN. Mr. President, in answer to the question Senator LEVIN posed, I did not pay careful enough attention to his tables because he put 1983 in there. Senator COHEN asked for this fiscal year. I am informed by usually reliable staff that this money is available for obligation for a period of 2 years. That is up to September 30, 1983. That is the nature of an R. & D. account.

Does the Senator from Maine agree with that, that Air Force R. & D. title V is available for obligation to September 30, 1983?

Mr. COHEN. It can be obligated to then, Mr. President.

Mr. NUNN. So that would be the answer.

Mr. DOLE. This amendment is of particular interest to me and to the people of Kansas, because of the possibility of the MX being based in the Titan silos in the Wichita area. While I do not think we know yet what the most desirable basing mode for the MX should be, this

amendment, as I understand it, does leave open all the options for MX basing, including super hardening of Titan silos if that turns out to be the best long-term decision. It may be helpful to encourage, as this amendment does, looking hard at other options earlier than has been planned.

UNANIMOUS-CONSENT AGREEMENT

Mr. BAKER. Mr. President, will the Senator permit me to interrupt for a brief moment?

Mr. PRYOR. I would be proud to yield.

Mr. BAKER. Mr. President, I am advised that we have now cleared on both sides of the aisle a unanimous-consent agreement to vote at 7 o'clock on the Cohen perfecting amendment to the underlying Cohen first-degree amendment. If that is correct and if the minority leader is prepared to put that request at this time, I am prepared to do so.

Mr. ROBERT C. BYRD. Yes, Mr. President.

Mr. BAKER. Mr. President, I ask unanimous consent that a vote in relation to the Cohen perfecting amendment occur not later than 7 p.m. and that the time between now and 7 p.m. be equally divided between the author of the amendment and the minority leader.

Mr. PRYOR. Reserving the right to object, Mr. President, if the majority leader would answer a question, please: Am I correct in saying that my substitute amendment would then be the amendment first in order when we proceed in session tomorrow?

Mr. BAKER. Mr. President, I do not believe I am in a position to answer that question.

The PRESIDING OFFICER. Are there any objections?

Mr. LEVIN. Reserving the right to object, Mr. President.

Mr. PRYOR. May I rephrase that question? After the disposition——

The PRESIDING OFFICER. If the Senator will suspend, the Chair states that the order was that the Senator from Arkansas will be recognized after the disposition of the first-degree Cohen amendment. We are talking about the second-degree amendment—the majority leader is asking for unanimous consent on the second-degree Cohen amendment.

Mr. PRYOR. Mr. President, I am simply asking this at this time. Could I ask unanimous consent—I shall not do this unless both leaders agree—that my substitute amendment be made the first order of business after the disposition of the Cohen amendment?

Mr. BAKER. Mr. President, I think there is no misunderstanding as to the intent of the parties. Let me put this unanimous-consent request and ask the special attention of the author of the amendment as well as the distinguished Senator from Arkansas.

I ask unanimous consent that the previous order be modified as follows: That the Senator from Arkansas be recognized for the purpose of calling up a substitute amendment to the Cohen first-degree amendment immediately after the disposition of the perfecting Cohen amendment which is now pending.

The PRESIDING OFFICER. Is there objection?

Mr. ROBERT C. BYRD. Reserving the right to object, and I personally do not object, Mr. President, I want the distinguished Senator from Arkansas to know that this will allow another perfecting amendment in the second degree to come in ahead of his substitute and be voted on ahead of his substitute. Is that agreeable with him?

Mr. PRYOR. I do not think that would interfere in any way. I just want to protect myself and protect those colleagues who have cosigned my amendment with me and make certain that we get a vote on this amendment. I hope actually that it can be an up or down vote, but we do not need to go into that issue at the moment.

Mr. ROBERT C. BYRD. Further reserving the right to object, Mr. President, the Senator would not be guaranteed that he would get a vote on his substitute before the amendment in the first degree, however, because it is a perfecting amendment.

Mr. PRYOR. That is satisfactory.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I further ask unanimous consent that the vote on the Cohen perfecting amendment now pending occur at not later than 7 p.m.; that the time between now and 7 p.m. be divided equally between the author of the amendment and the distinguished minority leader or his designee, and that the control of the time be in the usual form.

Mr. ROBERT C. BYRD. Mr. President, reserving the right to object, and I shall not, it is my understanding that the distinguished majority leader has reference to the amendment in the second degree.

Mr. BAKER. Yes, Mr. President, it is a perfecting amendment, which would be a second-degree amendment.

The PRESIDING OFFICER. Is there objection? Hearing none, it is so ordered.

Mr. BAKER. I thank all Senators.

The PRESIDING OFFICER. Who yields time?

Mr. ROBERT C. BYRD. Mr. President, I have the control of the time on this side. I yield such time as he may desire from the time I control to the distinguished Senator from Arkansas.

Mr. PRYOR. I thank the minority leader. I was just going to make one or two points, Mr. President. Those one or two points simply relate to where we are with regard to the MX missile at this point.

Mr. President, we are talking here, and I am not talking against the amendment offered by the Senator from Maine and the Senator from Georgia because, frankly, I think this amendment probably, as my colleague from Illinois and other colleagues have expressed this evening, makes a bad situation a little bit better. I do think that the amendment I shall offer tomorrow, striking the $354 million from the basing mode system, the interim basing mode, is our best choice.

First, I feel strongly that what we are really talking about with the Cohen-Nunn amendment is a continuing resolution, another continuing resolution, this time not on the budget, but a continuing resolution on the MX missile program. We are operating in a period of nondecision, one nondecision after another.

Mr. President, we have been studying and working on the MX missile for the past decade. We have spent almost $4 billion—not $4 million, $4 billion—studying how to build and where to put the MX missile. We are still not much farther along tonight, 10 years later, or 12 or 13 years later, than we were when we started on the MX missile program. It is a situation that I find deplorable. It is a situation which I hope that the U.S. Senate and the House of Representatives will take under consideration to the extent that we will remove this basing mode funding. If we need to, if we want to come back in the spring with a supplemental, when we have some answers to these questions that we are going to be raising in the next several hours of this debate, then let us come back with a supplemental.

What we are doing here, Mr. President, is, once again, trying to buy the illusion of strength in spending some $354 million—for what? For additional studies. That is what it is all about.

In all due respect to my colleague from Georgia, my colleague from Maine, and those others who support this position—and I might even end up supporting that position if it comes to that—I can only say to my friends, and I am not going to speak more than just a few moments because we do have a short period of time before the vote, we are talking about $354 million for additional studies. We are talking about the fact that we are still spending for the MPS study $750,000 each day for work that is not being performed because of the October 2 decision made by the President. That is the crazy, insane situation that we find ourselves in at this point, at this juncture, at this late hour, before Christmas, trying to go home and trying to somehow or other limp feebly along and make a decision, this evening or tomorrow, that is going to commit us 30 years in the future with regard to our global nuclear policy. That is exactly what we are doing, Mr. President.

We have just completed a study on the MPS system that cost $900 million. As I said, those expenditures are still going forward.

We are just continuing, if I may say this, trying to find a way in these last remaining hours of this session to show to the American people that at least we are doing something. What that something is, appears to me to be, that we are going to spend another $354 million to add to the already $4 billion that we have spent on the MX missile program.

What we are also going to end up doing, I am very afraid, Mr. President—and I do not know exactly what this amendment does. I know my friend from Illinois has raised some good objections and some justifiable concerns. But I have a fear that unless we take some position in the next several hours on the basing mode of the MX missile, we are going to be putting our most valuable missile in our most vulnerable positions. To me, that is the danger of having this debate at this time. That is why I will attempt, at the proper time, to remove the entire

$354 million for the interim basing mode system, as announced by the President on October 2.

Let us take time. Let us take the opportunity we have to take this money out of the budget. If we need to, we can come back in the spring with a supplemental, after we have looked at this matter.

Only 60 days ago, on October 2, the President made this momentous and historic decision. We have not had time to study it. The Chairman of the Joint Chiefs of Staff and the Secretary of Defense are in open disagreement about this matter today. We find that before committee after committee and session after session and witness after witness. Even the Secretary of the Air Force, who is charged with deployment of this MX program, did not even know of this decision until it was made.

That is the type of atmosphere in which this decision was made. That is the type of environment we have created for ourselves.

It is exactly the reason why we have no business committing 1 cent to a system of basing an MX missile until we have better answers, until we have at least a consensus among those individuals who are in charge of these programs.

Mr. DIXON addressed the Chair.

The PRESIDING OFFICER. Who yields time? Time is controlled by the Senator from Maine and the minority leader.

Mr. PRYOR. Mr. President, if I am not mistaken, the minority leader yielded me as much time as necessary. I will be glad to yield to the Senator from Illinois.

Mr. DIXON. Mr. President, I congratulate the Senator from Arkansas on his remarks, which I share.

I support the MX missile. I think hardening of the silos in permanent basing modes, as presently contemplated, invites disaster and is a terrible mistake.

I believe the Senator from Arkansas is taking the right approach in striking the $354 million from this bill. That is the proper message to send to the administration and to the country.

This amendment, in my view, will permit the continuation of research and development on the question of permanent hardening and subsequent deployment in a permanent basing mode of these MX missiles, and I consider that to be a serious mistake.

Having said all that, I think the amendment by the Senator from Maine and the Senator from Georgia is a profound improvement over the present bill, for the simple reason that it sends a message to the administration and encourages additional research and development in other areas for other basing modes. For that reason, I will vote for this amendment. But the proper vote, in my view, will be on the subsequent amendment by the Senator from Arkansas to strike the $354 million from this bill.

Mr. PRYOR. Mr. President, I yield 1 minute to the Senator from Pennsylvania.

Mr. HEINZ. I thank the Senator from Arkansas for yielding.

Mr. President, earlier today, I offered an amendment, which is still pending, to require that the Senate express itself on the issue of the so-called windfall benefits under railroad retirement. I temporarily withheld pressing that amendment because I have been in touch and am having negotiations with Dave Stockman, the Director of the Office of Management and Budget.

Approximately 5 minutes ago, I got off the telephone after speaking with Mr. Stockman, and I am happy to report to my colleagues that Mr. Stockman has agreed to continue to fund the so-called windfall benefit of railroad retirees at the authorized congressional level of $350 million. That is what is in our third continuing resolution, the one that runs through December 15.

I think this represents a very significant concession on the part of OMB.

I do not know if I can say that it made Mr. Stockman change his mind, but it certainly sharpened the focus of debate on the issue, and I think it did something. But it is a favorable decision on an issue that otherwise would have resulted in a penurious Christmas for our railroad retirees.

Mr. STENNIS addressed the Chair.

The PRESIDING OFFICER. Who yields time?

Mr. PRYOR. I yield to the Senator from Mississippi.

Mr. STENNIS. I thank the Senator.

Mr. President, I raised the point here earlier about this language. It is one of the most important provisions and one of the most sensitive provisions of the entire bill, that part of the bill that includes the missiles—the MX and matters that go with it.

I am proud of the language that has been worked out here, and I commend the authors of it. It strengthens the bill. It certainly does not impair the President's position or anything like that, and I will support the amendment.

I will say a few words now with reference to the proposal that is to follow, to take the money out of the bill.

Mr. President, this matter has been before us for several years, as the Senator from Arkansas has said. He made an excellent statement. But we are not going to find certainty and sufficiency in everything going smoothly and well in connection with any of these missiles. It is the most difficult thing we have to deal with in the military program, and it is the most expensive item we have to deal with.

The PRESIDING OFFICER. Will the Senator suspend?

All time for the minority has expired. Does the Senator from Maine yield some time?

Mr. COHEN. I yield 1 minute.

Mr. STENNIS. Mr. President, we should not expect perfection. We should not expect anything but trial and error, and stop and start, and do it over again.

This matter must move forward this year, as I see it. We have taken a lot of time, have spent many years on it. There is no complete answer now.

Again, the talks are coming up, where there must not be the slightest disturbance of the President's position and his backing.

I feel certain that valuable time would be lost should we strike out this money. We would find ourselves no better off, but worse off. I hope that, on the second vote, the amendment will be defeated and the money will be left in the bill.

I thank the Senator for yielding time to me.

The PRESIDING OFFICER. The Senator from Maine.

Mr. COHEN. Mr. President, I yield back the remainder of my time.

The PRESIDING OFFICER. All time having expired, the question is on agreeing to the second-degree amendment.

Mr. ROBERT C. BYRD. Mr. President, will the Senator yield me some time?

Mr. COHEN. I withhold the yielding back of my time.

The PRESIDING OFFICER. The Senator has 10 minutes remaining.

Mr. ROBERT C. BYRD. Mr. President, I thank the distinguished Senator for yielding time to me.

Mr. COHEN. How much time does the distinguished minority leader wish?

Mr. ROBERT C. BYRD. As much as I may require, if the Senator will allow me.

Mr. COHEN. If it is not the full 10 minutes.

Mr. ROBERT C. BYRD. Mr. President, I do not think it will be the full 10 minutes. I thank the Senator.

The PRESIDING OFFICER. The Senator from West Virginia is recognized.

Mr. ROBERT C. BYRD. Mr. President, I have had called to my attention a wire service item from United Press. It reads as follows:

> The Senate Republicans today foiled two more Democratic attempts led by Senator Ernest Hollings to shift another $225 million away from the $2.4 billion requested by Reagan for the strategic bomber. The Senate today voted 54 to 36 to shelve amendments to use $77 million to restore reductions in the active forces of the Army and Air Force and killed 55 to 36 a $14 million proposal to buy more ammunition for the Army.
>
> The amendments are part of a group of 15 that seek to delete the B–1 funds by reallocating them to other defense programs.

Mr. President, this is an inaccurate statement. Not one of the amendments that have been called up thus far by Democrats seeks to shift funds away from the B–1. Not a single amendment seeks to do that.

The amendments have been called up thus far for the most part are add-on amendments. They are:

Mr. LEVIN's amendment on yesterday adding funds for procurement of four KC10A aircraft for the Air Force; my own amendment yesterday seeking to add funding for Stealth; the Hollings amendment today adding funding for procurement of ammunition for the Army; the Hollings amendment adding funding for restoration of the end strength reductions in Army and Air Force; and the Glenn amendment restoring the full amount requested for the Navy steaming hours program.

Not one of these amendments sought to shift funds away from the B–1 bomber. All of these are add-on amendments.

And I wish that the press would take note of that so there would be a better understanding among the press and around the country as to what we are attempting to do here.

The press may have gotten its misinformation from a letter which was sent to Senators, signed by Mr. HOLLINGS and Mr. LEVIN, calling attention to an amendment which they expected to call up at some point reallocating a portion of the B–1 bomber funding to a number of items listed in the letter, but that amendment has not been called up yet. That amendment which would reallocate funds from the B–1 to other programs, I repeat, has not yet been called up.

All of the amendments that have been called up have been separate and independent of that amendment. They have been add-on amendments; and let me say again for the record clearly that as far as amendments called up by Democrats thus far, not one would reallocate funds from the B–1 program.

I also understand that NBC has just reported:

> Democrats spent the day beating their heads against the wall with amendment after amendment to take money from the B–1 bomber for various other defense functions.

That, again, is an inaccuracy, and I want the record to show it. No one single amendment has been called up by Democrats today or yesterday to take money from the B–1 bomber. I do not know what may come later but not one amendment thus far called up by Democrats would have taken one thin dime, 10 cents, from the B–1 bomber.

I thank the distinguished Senator for yielding.

Mr. COHEN. I yield back the remainder of my time.

The PRESIDING OFFICER. The question is on the second-degree amendment offered by the Senator from Maine.

Mr. NUNN. Mr. President, is there going to be a unanimous-consent proposal made relating to when a vote will come on the Pryor amendment? It would be my hope that the Pryor amendment could be a separate amendment so that the Cohen-Nunn-Quayle amendment, as modified, if it is modified, would be disposed of tonight.

Is there going to be a unanimous-consent request that the Pryor amendment be voted on tomorrow at a certain time? Does the Senator propose that?

Mr. PRYOR. I might respond to my friend from Georgia that I wish to inquire from the leadership if it would be in keeping and according to the schedule that we proceed to vote as planned with the Nunn-Cohen amendment this evening and that tomorrow as a separate amendment, as an amendment to the bill itself, that I might propose my amendment and ask unanimous consent that it may be made the first order of business following the leadership and special order announcements et cetera? Would that be proper or would there be objection?

Mr. GARN. I cannot speak for the leadership. Senator BAKER is not here. I had informal discussions with the Senator from Arkansas. Those of us who are here working on the floor at this time have no objection to that procedure with one exception. We woud like a time certain to vote or a time agreement in the morning on the Pryor amendment. We would have preferred to have cleared up this portion of the bill this evening, both the Cohen and the Pryor amendments. I think that could be worked out if we could agree to some type of time agreement in the morning, a time certain to vote on the Pryor amendment.

Mr. ROBERT C. BYRD. Mr. President, I suggest that my friend wait until Mr. BAKER or Mr. STEVENS is in the Chamber.

The PRESIDING OFFICER. Does the Senator from Maine wish to yield further time?

Mr. COHEN. Mr. President, I yield back the remainder of my time.

The PRESIDING OFFICER. All time having been yielded back the question now occurs on the second degree amendment offered by Mr. COHEN.

Mr. LEVIN. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. LEVIN. Mr. President, it would be simple from everyone's point of view if we are going to vote separately on the Cohen-Nunn amendment that we vote it by voice vote on the second-degree amendment and then have the rollcall after that is adopted.

Mr. McCLURE. Mr. President, we do not have that agreement yet.

Mr. LEVIN. Otherwise we will have two rollcalls.

Mr. NUNN. I suggest we reverse that procedure, that we vote on the amendment we now have which is the second amendment which is a substitute and then we voice vote, if it is agreeable, the Cohen amendment as perfected.

Mr. LEVIN. Mr. President, I ask my friend from Georgia this question: Would we be voting, in that effect, on the substance or perfecting first degree or second, because many of us might want to do that and then vote against it as perfected? I think there could be a difference. Would it not be simpler to voice vote the second-degree amendment and then as a perfecting amendment having been accepted have the rollcall on the first-degree amendment as perfected?

Mr. COHEN addressed the Chair.

Mr. LEVIN. Mr. President, the leader is back.

Mr. COHEN. We could have a vote as ordered on the perfecting amendment and have the rollcall tonight depending on what agreement is arrived at with the Senator from Arkansas whether we are going to have a time certain tomorrow; otherwise, I suggest we are going to stay in session tonight so it will not make much difference.

In the meantime, I ask unanimous consent that Senator D'AMATO be added as a cosponsor to the perfecting amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LEVIN. Mr. President, I am not sure we avoid the rollcall by disposing of this amendment tonight. I suggest we voice vote the perfecting amendment and then have the rollcall on the first-degree amendment as perfected. I think that is the clearer rollcall. I simply suggested that to the sponsors, and they did not want to make it until the majority leader was on the floor.

Mr. BAKER. Mr. President, as I understand it, there is sentiment in the Senate that we should vitiate the order which requires a rollcall vote not later than 7 o'clock on the perfecting amendment of Senator COHEN, and instead we should continue debate on the perfecting amendment.

SEVERAL SENATORS. No. No.

Mr. LEVIN. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The Chair will state that the hour of 7 o'clock——

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the vote at 7 o'clock be temporarily suspended.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER addressed the Chair.

The PRESIDING OFFICER. The majority leader.

Mr. STENNIS. Point of order, Mr. President.

The PRESIDING OFFICER. The majority leader is recognized.

Mr. BAKER. Mr. President, I would ask the Senator from Mississippi to withhold.

Mr. STENNIS. I withhold.

Mr. BAKER. Mr. President, I ask unanimous consent that at the conclusion of this request two rollcalls occur back to back, the first of 15 minutes, the second of 10 minutes. The first rollcall will be a rollcall vote on the perfecting amendment by the Senator from Maine (Mr. COHEN) to his underlying first-degree amendment, to be followed immediately by a vote 10 minutes in length on the underlying first-degree amendment.

RECESS UNTIL 9 A.M. TOMORROW

I further ask unanimous consent, Mr. President, that when the Senate completes its business today it stand in recess until the hour of 9 a.m. tomorrow.

ORDER FOR RECOGNITION OF SENATOR PRYOR TO OFFER HIS AMENDMENT ON TOMORROW; RESUME CONSIDERATION OF H.R. 4995, AND TIME-LIMITATION AGREEMENT

After the recognition of the two leaders under the standing order, and any morning business that may be transacted, but in any event at 9:30 a.m., the Senate resume consideration of the Department of Defense appropriations bill, at which time the Chair will recognize the Senator from Arkansas (Mr. PRYOR) for the purpose of offering an amendment, which will be in order, and which deals with the MX missile; and that on that amendment there be an hour time limitation to be equally divided and controlled in the usual form, and with a vote thereon to occur not later than 10:30 a.m. on tomorrow.

The PRESIDING OFFICER. Is there objection?

Mr. ROBERT C. BYRD. Mr. President, reserving the right to object——

Mr. BAKER. To make sure I stated it correctly, the vote will be in relation to

the amendment of the Senator from Arkansas.

The PRESIDING OFFICER. Is there objection?

Mr. ROBERT C. BYRD. Mr. President, reserving the right to object, I do not object on condition that the first rollcall last only 15 minutes. I believe Senator HOLLINGS has to catch a plane, and I would like to have him vote on the second rollcall.

Mr. BAKER. Yes, we will abide by the limitation of time on the first amendment.

The PRESIDING OFFICER. Hearing no objection, it is so ordered.

Does the Senator wish to ask for the yeas and nays?

Mr. BAKER. Mr. President, I ask unanimous consent that it be in order with one showing of seconds to ask for the yeas and nays.

The PRESIDING OFFICER. We have a sufficient second on the second-degree amendment.

Mr. BAKER. Then I ask for the yeas and nays on the first-degree amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. BAKER. Is the Senator from Arkansas willing to get the yeas and nays on his amendment at this time?

Mr. PRYOR. Yes.

Mr. BAKER. I ask that it be in order to ask for the yeas and nays on the Pryor amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

ROLLCALL VOTE ON UP AMENDMENT NO. 734

The PRESIDING OFFICER. The question is on agreeing to the amendment (UP No. 734) of the Senator from Maine. The yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from New York (Mr. D'AMATO) and the Senator from Arizona (Mr. GOLDWATER) are necessarily absent.

I further announce that, if present and voting, the Senator from New York (Mr. D'AMATO) would vote "yea."

Mr. CRANSTON. I announce that the Senator from Nevada (Mr. CANNON), the Senator from Arizona (Mr. DECONCINI), the Senator from Ohio (Mr. GLENN), and the Senator from New York (Mr. MOYNIHAN) are necessarily absent.

I further announce that, if present and voting, the Senator from Nevada (Mr. CANNON) and the Senator from Arizona (Mr. DECONCINI) would each vote "yea."

The PRESIDING OFFICER (Mr. WARNER). Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 90, nays 4, as follows:

[Rollcall Vote No. 443 Leg.]

YEAS—90

Abdnor	Boschwitz	Chiles
Andrews	Bradley	Cochran
Armstrong	Bumpers	Cohen
Baker	Burdick	Cranston
Baucus	Byrd, Harry F., Jr.	Danforth
Bentsen	Byrd, Robert C.	Denton

NOT VOTING—6

Cannon	DeConcini	Goldwater
D'Amato	Glenn	Moynihan

So Mr. COHEN's amendment (UP No. 734) was agreed to.

Mr. BAKER. Mr. President, I move to reconsider the vote on the perfecting amendment.

Mr. COHEN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The majority leader is recognized.

Mr. BAKER. Mr. President, while Members are on the floor if I could have their attention for a moment, another rollcall vote is scheduled to occur immediately. I have some indication that there may be no need for a rollcall vote. I ask unanimous consent that the order for the rollcall vote on the first-degree amendment be vitiated.

The PRESIDING OFFICER. Is there objection?

Mr. NUNN. Reserving the right to object, and I will not object, I was reserving the right of the Senator from Michigan.

I have no objection.

Mr. BAKER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I withdraw my request.

ROLLCALL VOTE ON UP AMENDMENT NO. 730

The PRESIDING OFFICER. The question recurs on the first-degree amendment. The yeas and nays have been ordered and the clerk will call the roll.

Mr. BAKER. Mr. President, there will be no further rollcall votes tonight.

The legislative clerk proceeded to call the roll.

Mr. STEVENS. I announce that the Senator from New York (Mr. D'AMATO) and the Senator from Arizona (Mr. GOLDWATER) are necessarily absent.

I further announce that, if present and voting, the Senator from New York (Mr. D'AMATO) would vote "yea."

Mr. CRANSTON. I announce that the Senator from Nevada (Mr. CANNON), the Senator from Arizona (Mr. DECONCINI), the Senator from Ohio (Mr. GLENN), and the Senator from New York (Mr. MOYNIHAN) are necessarily absent.

I further announce that, if present and voting, the Senator from Nevada (Mr. CANNON) and the Senator from Arizona (Mr. DECONCINI) would each vote "yea."

The PRESIDING OFFICER. Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 90, nays 4, as follows:

[Rollcall Vote No. 444 Leg.]

NOT VOTING—6

Cannon	DeConcini	Goldwater
D'Amato	Glenn	Moynihan

So Mr. COHEN's amendment (UP No. 730), as amended, was agreed to.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. McCLURE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 735

(Purpose: To permit multi-year Army procurement of the UH-60A Black Hawk helicopter)

Mr. STEVENS. Mr. President, I send an amendment to the desk.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Alaska (Mr. STEVENS) proposes an unprinted amendment numbered 735:

On page 15, line 23, after "$1,940,900,000" insert: , of which $545,200,000 shall be available for purchase of UH-60A Black Hawk aircraft under a multiyear contract, subject to the requirements of section 2306(h) of Public Law 97-86.

Mr. STEVENS. Mr. President, there has been a misunderstanding. I thought it had been cleared. I withdraw the amendment.

I will state that it is an amendment I intend to offer tomorrow morning to put the Black Hawk helicopter procurement contract on a multiyear basis. We have ascertained that doing so would save $81 million.

Because of the circumstances, we have been requested to do this since the bill came from committee. I am in error. I thought it had been cleared. I apologize to the Chair.

The PRESIDING OFFICER. The amendment is withdrawn.

Mr. TOWER. Mr. President, I wish to take this opportunity to commend members of the Senate Appropriations Committee who voted favorably to report this appropriations bill. I particularly want to commend my distinguished colleague from Alaska, Senator STEVENS, who by deeds and not just words has demonstrated his unequivocal commitment to revitalizing our military forces. Indeed, the Appropriations Subcommittee on Defense, which Senator STEVENS chairs, recommended appropriations for fiscal year 1982 which are approximately $7.6 billion above the President's October request and well above the amount authorized by Congress in the fiscal year 1982 Department of Defense authorization bill.

Mr. President, as I previously indicated, this appropriations bill recommends funding for a number of programs in amounts which exceed the amounts authorized by Congress in the fiscal year 1982 defense authorization bill. Although I intend to vote in favor of this appropriations bill, I want to make it clear that this should not be construed as a waiver of title 10, section 138 of the United States Code which prohibits the Secretary of Defense from obligating or expending any funds for specified accounts unless such funds have received specific congressional authorization. As a practical matter, I do not think this will be a significant issue once the conferees have completed their negotiations. Nonetheless, since there are certain disparities between the level of funding provided in the defense authorization bill and that provided in this defense appropriations bill, I did not feel that I could let this matter go without some comment.

Mr. President, approval of this appropriations bill marks the first significant step in a series of steps which must be taken so that we may at least assure ourselves of military parity with the Soviet Union. Our military readiness and force modernization needs have been seriously neglected for over a decade. Unfortunately, there is a long leadtime involved in getting the much needed ships, tanks, ammunition levels, and spare parts to our operational units. Therefore, even with the increase in defense spending provided in this appropriations bill, it will take several years before this investment will result in a meaningful improvement to our defense capabilities. For this reason, it is imperative that we delay no longer the painful but yet essential action required to revitalize our military forces.

Mr. President, let me remind my colleagues that there were two central themes to President Reagan's successful campaign which were endorsed by the American people on November 4, namely, a revitalization of our economy and a restoration of our military capabilities. I am confident that both of these objectives are achievable and that one need not be sacrified to achieve the other. It is true that the American people are depending on this administration to demonstrate a meaningful improvement in general economic conditions by 1984 and I am confident that the administration—with the courageous assistance of this Congress—will be able to demonstrate such improvements. Nonetheless, even if the President were to fall slightly short of his economic recovery objectives, as long as he is able to demonstrate significant positive trends, the President will have the continued support of the American people.

On the other hand, Mr. President, the American people will not and should not be as patient when it comes to a matter as vitally important as national security. The primary role of the President is to provide for the national security of this Nation. More than ever before, the American people understand the volatile geopolitical situation in which we find ourselves and the importance of having a strong and credible military capability. They will not and should not be as tolerant of this President or this Congress if we compromise the security of the Nation by failing to accomplish the defense recovery program that we promised during the 1980 campaign. I. therefore, urge my colleagues to support this appropriations bill as one of many legislative initiatives which we will be required to take to live up to this mandate of the American people.

Mr. GLENN. Mr. President, will the distinguished manager of the bill yield for some questions relative to the provision of essential firefighting and security services on Department of Defense installations?

Mr. STEVENS. I am happy to yield.

Mr. GLENN. I would like to inquire whether the committee has given any consideration to measures to constrain the contracting out of essential firefighting and security services on military installations so that we can take steps to insure that such contracting is not only cost effective but also in the best interests of national security?

Mr. STEVENS. There have been no hearings on such a moratorium, though as the Senator from Ohio is aware, an amendment to that effect lost on a very narrow division vote in the other body when H.R. 4995 was under consideration by the House of Representatives.

Mr. GLENN. That is correct. The vote was 83 to 85 and some rather interesting points were made during that short debate. They are points that I believe should be carefully considered, not only by the Senate, but also by the Department of Defense and the Office of Management and Budget in the interest of prudence and readiness of our Armed Forces. Perhaps foremost among these considerations is the potential for disruption of essential defense activities.

In early 1978, just such a disruption occurred at the Hunters Point Naval Shipyard in California, where a labor dispute between the 10-man local of the Firefighters Union and the contractor supplying firefighting services to the yard resulted in an almost complete shutdown of the Hunters Point Shipyard for a period of 2 weeks. As we have recently had impressed upon us, Federal employees are not free to withhold their services in similar circumstances. There are other considerations as well. Among these are the assurance that, as comparisons are made between in-house and contracted work, we do, in each instance, insure that all factors and all costs are considered, including collateral work which is very frequently done by federally employed personnel. Overseeing arresting gear used in aircraft landings is one example. Another example is preventive work, to guard against incidence of fire destruction or theft.

Mr. President, I have been given an estimate of $72 million a year as the cost of placing a moratorium on contracting out these essential services. Now, $72 million is nothing to sneeze at. On the other hand it is a sum that could pale into insignificance should there be a serious, untimely disruption of our defense capability. I, for one, do not object to contracting out Government services when that policy makes sense, when it is prudent, and when it is cost effective. Nor am I now proposing an amendment to halt the practice, but only asking the committee if there can be assurance of hearings on this subject before we go through another appropriations cycle.

Mr. STEVENS. I believe the Senator's points are well made, and I would like to give him that assurance. As chairman of the Subcommittee on Defense Appropriations and of the Subcommittee on Civil Service, Post Office, and General Services, I believe I can give assurance that this important matter will be aired in the coming months.

Mr. GLENN. I thank the Senator from Alaska.

ALASKA NATURAL GAS TRANSPORTATION SYSTEM

Mr. STEVENS. The President's proposed waiver of law would waive the President's decision to include the Prudhoe Bay gas conditioning plant in the Alaska natural gas transportation system. Although the plant would become part of the ANGTS, the waiver also provides that the variable rate of return specified by the decision will not apply to the plant. Why should not a variable return mechanism, such as the incentive rate of return mechanism developed for the Alaska pipeline segment, be applied to the plant?

Mr. McCLURE. A serious and lengthy regulatory delay could result from developing such an incentive mechanism for the plant. It took almost 2 years of proceedings before the Federal Energy Regulatory Commission to fashion an incentive rate of return mechanism for the pipeline facilities that was satisfactory to the project sponsors, potential investors and the Commission. A similar 2-year delay in developing an

incentive/penalty mechanism for the plant would add costs to the project which ultimately must be passed on to consumers. Therefore, it is our intention that the allowable rate of return for the plant be established as quickly as possible under existing law without the IROR requirement.

Mr. STEVENS. The variable return mechanism was developed for the pipeline as an incentive to control costs. Will not such an incentive be necessary for the plant too?

Mr. MURKOWSKI. The risk of cost overruns is not as great for the plant as it is for the Alaska pipeline segment. The plant will be constructed at a single location where the producers have been building facilities for more than 8 years. Much is already known about construction at Prudhoe Bay. Conversely, the pipeline will be constructed along a 745-mile route in Alaska through varying topography and soil conditions. Risks associated with constructing the plant are also reduced, because significant components of the plant will be prefabricated in the lower 48 States and shipped to Alaska for final assembly.

Thus, an incentive-penalty mechanism should not be a necessary incentive to control costs for the plant and, by causing regulatory delay, would actually increase the cost to consumers. The sponsors of the plant will still be held accountable for cost overruns. The Office of the Federal Inspector will review the costs of the plant and may disallow from inclusion in consumers' rates any costs found to have been imprudent. This review of prudency of costs will be a powerful incentive to control plant costs.

Mr. STEVENS. The proposed waiver of law authorizes the FERC to approve tariffs that will allow purchasers of Alaskan gas to pass through to their customers the ANGTS costs that have been billed to them. What assurances exist that distribution company customers of the pipeline companies purchasing Alaskan gas and transporting it through the ANGTS will be able to recover the charges they paid for Alaskan gas from their customers?

Mr. McCLURE. Recovery of all ANGTS costs from the ultimate consumer of gas is a matter for Federal action. Thus, once the FERC has approved ANGTS sponsor and shipper tariffs pursuant to the proposed waiver of law and the Natural Gas Act, ANGTS charges should be passed through to the ultimate consumer of Alaskan gas.

Mr. STEVENS. The President's proposed waiver of law will preclude FERC from modifying prior orders or tariffs, but only to the extent such modifications otherwise would prevent: First, the ANGTS sponsors from servicing debt and paying actual operation and maintenance expenses and current taxes; and second, the shippers from paying ANGTS transportation charges. How would the waiver affect the tariff to be approved by the Canadian National Energy Board for the Canadian segment of the ANGTS?

Mr. McCLURE. Before construction of the ANGTS can commence, the FERC must approve the U.S. ANGTS sponsor tariffs governing the recovery of ANGTS transportation charges from Alaskan gas shippers, and shipper tariffs governing the flowthrough of the ANGTS transportation charges to customers served by the shippers. In Canada, the National Energy Board must approve a tariff governing recovery of the Canadian ANGTS transportation charges from Alaskan gas shippers.

While FERC will not formally approve the NEB-approved Canadian ANGTS sponsor tariff, it must review and approve the shipper tariffs by which the shippers will flowthrough the NEB-approved Canadian ANGTS transportation charges. Thus, the waiver would preclude FERC from modifying the prior FERC-approved shipper tariffs in any manner that would prevent the shippers from flowing through all ANGTS transportation charges, including those assessed under an NEB-approved tariff. However, notwithstanding this limitation on the FERC's modification power, U.S. consumers would remain fully protected with respect to Canadian transportation charges.

In this respect, three points should be emphasized:

First, the rates, charges, and conditions of service for Canadian natural gas pipeline companies, like those of U.S. pipeline companies, are required by law to be "just and reasonable," as well as nondiscriminatory.

Second, the Agreement on Principles, which was consummated between our two countries for the specific purpose of the ANGTS, expressly declares that all charges and authorizations for the ANGTS "will be just and reasonable and apply to the pipeline in the same nondiscriminatory manner as to any other similar pipeline."

Finally, the Transit Hydrocarbon Pipeline Treaty between Canada and the United States prohibits any interference with throughput in the ANGTS or any discriminatory treatment with respect to taxes or other monetary charges.

Mr. STEVENS. The President's proposed waiver would include the Prudhoe Bay gas conditioning plant within the ANGTS and subject the plant to the terms and conditions of the President's 1977 decision, except for the incentive rate of return condition. Why is it not necessary to waive the other terms and conditions of that decision as they would apply to the gas conditioning plant?

Mr. McCLURE. The Office of the Federal Inspector is charged with the responsibility of enforcing the terms and conditions of the 1977 decision. Many of those terms and conditions do not require specific Federal inspector approval before construction can commence. Instead they merely require review, for example, of management plans, cost and schedule control techniques, construction design, quality control procedures, and so on. This review should not be time consuming and the Federal inspector has the flexibility to tailor his procedures to assure that all review is done in a time frame consistent with the project sponsors' construction schedule.

Mr. STEVENS. I understand that the proposed waiver would waive section 7 of the Natural Gas Act to the extent it could be construed to require formal evidentiary hearings at the FERC on ANGTS and ANGTS-related regulatory approvals. What is the purpose of this waiver?

Mr. McCLURE. My colleague is correct in his understanding. The purpose of this waiver is simply to grant the FERC the flexibility to expedite the issuance of regulatory approvals necessary for the completion of the ANGTS. The ANGTS has already been the subject of extensive hearings at the FERC and its predecessor, the Federal Power Commission. There will be no formal evidentiary hearings unless FERC determines them to be necessary to resolve remaining issues. Hopefully, there will not be such a need since such hearings would only serve to prolong the issuance of approvals without improving the decisionmaking process. Such delay will only add costs to the project, which will be borne by gas consumers in their rates. This waiver will allow the FERC freedom to utilize less formal procedures, such as notice with opportunity for written comment, to resolve all remaining issues as soon as practicable.

Mr. STEVENS. Will interested persons still be able to make their views known to the Commission?

Mr. McCLURE. Yes; the waiver in no way prejudices the rights of interested persons to participate fully in the proceedings established by the FERC to issue ANGST and ANGST-related approvals. It should be pointed out that in less formal proceedings, such as notice and comment, an opportunity is provided for interested persons to come in and make their views known. I would also add that many of the ANGST approvals, including establishment of the IROR, have already been issued pursuant to notice and comment procedures.

NUCLEAR DANGER

Mr. GLENN. Mr. President, this morning's Washington Post contains a very thoughtful op-ed piece by Jessica Tuchman Mathews concerning the serious weakening of U.S. nonproliferation policy over the past 10 months. As Ms. Mathews pointed out, and as I myself emphasized in my opening remarks at a recent hearing held by the Subcommittee on Energy, Nuclear Proliferation, and Governmental Processes, the erosion of our nonproliferation efforts has been manifest in numerous instances and has already resulted in diminished resolve on the part of other nuclear suppliers in their efforts to help curb the spread of nuclear weapons. And it has encouraged countries like Mexico to believe that they will be able to purchase sensitive nuclear technology in the international nuclear marketplace, technology which in recent years was thought to have been effectively embargoed by supplier agreement.

One point of disagreement with Ms. Mathews, however, is that in my view the first serious test of U.S. nonproliferation resolve since passage of the 1978 Non-Proliferation Act (NNPA) was not the recent action on the sale of F–16's to Pakistan, but the Carter administration's decision in the summer of 1980 to ship nuclear fuel to India even though that

nation did not meet the terms of the NNPA. Ms. Mathews had left the Carter administration before this. We failed that test, in my view, and our weakened posture on this vital issue began with that episode, and continues today, and I add that I think her statement, which I shall ask unanimous consent to have printed in the RECORD, very well spells out the situation that we are in today.

Mr. President, I ask unanimous consent to have printed in the RECORD the article to which I have made reference.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

LETTING NUCLEAR DANGER SPREAD

(By Jessica Tuchman Mathews)

The Nuclear Regulatory Commission's resounding vote of no-confidence this week in the international system of safeguards on which trade in nuclear technology is premised is but the latest in a series of events and policy shifts that has all but wiped out American non-proliferation policy.

As one who once had a hand in helping to formulate that policy during part of the Carter administration, I have watched with awe the rapidity with which the dismantling has taken place.

The erosion began last spring in a close vote by the Senate Foreign Relations Committee approving an administration request to permit a large new assistance program for Pakistan by waiving the law that prohibits assistance to a country trying to make nuclear weapons. The vote attracted little attention at the time, yet it was a significant milestone: in the first test of its own sanctions against nuclear proliferation, the United States was choosing to ignore them.

By the time the waiver reached the Senate floor a few weeks ago, there was no remaining doubt that Pakistan is aggressively pursuing every possible technical route to building a bomb. It may be ready to stage a nuclear explosion in one year.

Nevertheless, the full Senate chose not to vote on the wisdom of the waiver. Sen. John Glenn (D-Ohio), trying to redraw the line he had helped write into law a few years ago, offered an amendment requiring termination of American aid if Pakistan went all the way and actually detonated a nuclear bomb. But the message that was conveyed that evening to Pakistan, and who knows how many other interested governments, was not that the amendment had passed—which it had, just—but rather that nearly half the Senate—45 members—had voted against it, in the name of preserving "flexibility" for the president. The flexibility in this case is the flexibility to do nothing—as this country did when India exploded its bomb in 1974.

Meanwhile Israel had bombed Iraq's research reactor. The International Atomic Energy Agency's response was not to investigate why Iraq, despite having no commercial nuclear facilities, was stockpiling hundreds of tons of uranium ore. Nor did it or any other group consider intelligence findings that Iraq was indeed pursuing a nuclear capability, despite having renounced the right to do so by signing the Non-Proliferation Treaty. Instead the IAEA called on its members to offer Iraq "emergency assistance" to rebuild the destroyed reactor.

France, Iraq's original supplier, responded. Discussions between France and Iraq have been under way since last summer. American officials are apparently not privy to the terms being negotiated, especially whether the new reactor will be as inexplicably large for its asserted "research" purpose as the old one was, or whether this time France will insist that the reactor not be fueled with highly enriched, weapons-usable uranium.

France's recent agreement with South Africa does not offer much ground for optimism. The United States has been trying for years to get South Africa to accept safeguards on its nuclear facilities. Its leverage was the supply of fuel rods for South Africa's first power reactors scheduled for completion next year. But American law requires that South Africa first accept safeguards. Suddenly, in mid-November, it was announced that the reactor would be loaded on schedule with fuel rods made in France, and without safeguards. The action took American officials complete by surprise, cutting the ground out from under the U.S. government's position.

A few years ago, the nuclear supplier nations agreed to an informal moratorium on the transfer of reprocessing and enrichment plants—facilities that produce material that is directly usable in bombs. This year, for the first time since that agreement, a non-nuclear weapons state—Mexico—has invited bids for the construction of power reactors and let it be known that it wants "advanced technology"—enrichment and reprocessing—to be part of the deal. The suppliers' responses will be a major test of how much, or how little, is left of the will to slow nuclear proliferation. The outlook is clouded by the administration's recently announced willingness to transfer classified enrichment technology to Australia, making it all the harder to say no to others.

Several other thresholds have been quietly crossed. In extending an agreement that allows U.S.-supplied fuel to be reprocessed in Japan's pilot reprocessing plant, the administration, without prior congressional consultation, dropped two key provisions of earlier versions. One of these dealt with whether reprocessing plants, because they provide direct access to weapons-usable materials, can ever be effectively safeguarded. The other retained U.S. control over Japan's use of the separated plutonium.

U.S. negotiators, unable to find acceptable conditions for ending nuclear cooperation with India, are reportedly considering major concessions. The United States wants international safeguards to continue to be applied to the used fuel (containing more than a ton of plutonium) it has supplied to India over 18 years. India has refused, and is reportedly considering a unilateral renunciation of the agreement and its attendant safeguards. To avoid that damaging precedent U.S. negotiators may allow India to reprocess the U.S.-supplied fuel.

The Reagan administration let it be known from the outset that it planned a dramatic "shift in emphasis" from the Carter non-proliferation policy. It would emphasize American leverage as a "reliable nuclear supplier" rather than trying to restrict access to sensitive nuclear technologies. But leverage is only leverage if one is prepared to use it. The administration's easy acceptance of Pakistan's nuclear bomb program and many subsequent decisions signaled clearly that it was more interested in encouraging nuclear trade. The message was picked up not only by potential proliferators but also by other suppliers—France, especially—that had reluctantly gone along with earlier U.S. insistence on a tough non-proliferation policy. Congress, overwhelmed with other concerns, failed to respond. The result has been a frighteningly swift unraveling of the containment net that had been slowly stitched together in the seven years since India's nuclear explosion shocked the world. No one knows where it will end or what it will now take to stop the process.

TRIBUTE TO THOMAS P. SIMPSON OF SOUTH CAROLINA

Mr. THURMOND. Mr. President, today I wish to pay tribute to Thomas P. "Tommy" Simpson, a man who has been described as the only person in South Carolina to hold the office of U.S. attorney three times.

Tommy Simpson is retiring as an assistant U.S. attorney, and I join with many other South Carolinians in praising him as an honest, effective public servant who has made many fine contributions to the law.

During his 30 years of Government work, he was appointed to be acting U.S. attorney three times. Most recently, following the death of Thomas Lydon, he served as acting U.S. attorney before current U.S. Attorney Henry McMaster assumed office in April.

It is particularly significant that Tommy Simpson has been honored with the unveiling of his portrait, to be hung at a suitable location in Columbia. Young attorneys, especially, can look at that picture and reflect on the record of Thomas Simpson, as well as emulate the sacrifice and dedication that he brought to his profession.

He is truly a great man. I salute him on his retirement as an assistant U.S. attorney, and I join his wide range of friends and colleagues in wishing him well during his future years of work and service.

Mr. President, I ask unanimous consent that two articles on Mr. Simpson and his distinguished career—one appearing in the Charleston News and Courier and the other appearing in the Columbia State—be printed in the RECORD at the conclusion of my remarks.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the Charleston News and Courier, Nov. 8, 1981]

RETIRED ASSISTANT U.S. ATTORNEY SIMPSON WILL BE HONORED TODAY

(By Jeff Watkins)

Tommy Simpson, a friend says, is the only man ever in South Carolina to hold the office of U.S. Attorney three times and lose it each time.

It would be an appropriate corollary then, that when his retirement as an assistant U.S. attorney came, he couldn't even do that right.

Thomas P. Simpson 55, officially retired on Oct. 3, but at that time he was preparing the government's case against millionaire Alan Schafer and others in a wide-ranging voting fraud case in Dillon County. He was appointed as a special assistant to continue the prosecution.

Although Schafer pleaded guilty to conspiracy and mail fraud charges on Oct. 12, Simpon's involvement does not end there. Simpson will represent the government at Schafer's pending sentencing as well as argue selected cases on appeal.

In the 30 years he worked for the government in Charleston and Columbia, Simpson was thrice judicially appointed to head the U.S. Attorney's office.

He served as interim chief during the period John K. Grisso retired from office and successor Mark Buyck was sworn in. Simpson was again appointed to take over after Buyck retired, and he ran the office for three months before Tom Lydon took over. Following Lydon's untimely death and before the arrival of current U.S. Attorney Henry Dargan McMaster in April, Simpson ran the office again.

"I didn't want the job full time," Simpson said recently. "I enjoyed courtroom trial work. The job of United States Attorney is so demanding from an administrative view-

point. There's too much time devoted to that and no time available for trial work.

"But I wouldn't be presumptuous enough to assume I had the political clout (for a presidential appointment) anyway," Simpson added. "Besides, I consider it a greater honor to be appointed by the court before whom I practice."

Although Simpson may not enjoy the political clout required to get the job, and although he still hasn't finished his work for the government, his friends, co-workers and admirers will honor him today at the federal courthouse in Columbia and at a reception afterward.

A significant part of the court ceremonies will be the hanging of his portrait in the courthouse, whose rooms and corridors are normally reserved for portraits of judges and the like. Rarely has a lawyer, especially one still practicing, been so honored.

But conversations with some of those who know Simpson and have worked with him may explain.

"He's the consummate trial lawyer," said McMaster, Simpson's current boss. "There's no way to put a value on the contributions Tommy Simpson's made to the law. There are a lot of excellent lawyers in this office, and they're good because they learned at the side of Tommy Simpson.

"I can't tell you how comfortable it was that, when something major came up, whatever it was, Tommy Simpson was back in his office available to handle it. We're going to miss him, but we're looking forward to the time when he's on the other side. He plays hard, but he plays by the rules and he's honorable, and it's always a pleasure to go into a case knowing that," McMaster said.

Co-workers will tell you that, in the last 15 years, Simpson had a hand or played the prominent role in every major case the office handled. Three state senators, a former state representative, a federal highway administrator, county councilmen, law enforcement officers and public officials have had the bad luck to have Simpson on the prosecuting team.

Obviously, not all his defendants were public officials. Among his most celebrated defendants were members of the notorious Dawson Gang, who robbed 60-plus banks in five southeastern states, including 12 banks in upper South Carolina.

During the mid-1970s, Simpson used seven trials to convict 18 of 19 suspected Dawson Gang members. Those convicted received sentences ranging from 20 to 40 years' imprisonment.

Concerning the number of public officials being convicted in this state, Simpson dismisses the suggestion that perhaps there are just more crooked officials here.

"I think we've been more aggressive in that area," he said. "I don't think South Carolina's got more. We just channeled our resources in that direction. But we're also talking about a career prosecutor compared to one who stays home one or two years like in some districts.

"Back when I started, the cases we handled primarily were illegal moonshine, car cases, check cases, a few bank robberies and an occasional embezzlement. We may have had more cases in number, but they were much simpler to prosecute. Conspiracy cases were unusual back then—you may have two or three lawyers working on one. Today you might have three, four, five conspiracy cases going on all the time.

"Cases are much more complicated, the investigations take longer. Narcotics lawyers are specialists today. You can't take a kid right out of law school like they do in other districts—look at their conviction rates," Simpson said.

The U.S. Attorney's office in South Carolina boasts a longevity rate better than any other comparable district, Simpson said, and he credited not only the U.S. attorneys but the U.S. senators instrumental in their selection—Strom Thurmond, a Republican, and Ernest F. Hollings, a Democrat.

"They haven't played politics with the office," he said. "They've allowed the U.S. attorneys to appoint assistants based on merit, not on politics. And I've never had a U.S. attorney that I worked for prosecute a case because of politics or did not prosecute a case because of politics—that's never been a consideration."

Born and raised in Columbia, Simpson, one of four sons, came from a modest background. He lost both his parents to disease by the time he was nine. An aunt took the family in, and on afternoons after school Simpson worked in her grocery store. Before school he delivered The State newspapers to neighborhood doorsteps. Later he jerked soda for John Campbell, now S.C. Secretary of State.

"I've worked since I was seven years old," he said.

His education at the University of South Carolina was interrupted by a stint in the Army. He returned to college and decided to seek a law degree, partly because "after working in that grocery store, sales I didn't want to be in."

He married his college sweetheart, Tommy Lou Thompson, in 1951, about the same time he and another young lawyer opened up a private practice in Chester.

While visiting with a friend on the Isle of Palms, he was approached about clerking for federal judge Ashton Williams, and took the job, moving his family to the Low country. Three years later, in 1956, former classmate Arthur Howe, then an assistant U.S. attorney, offered Simpson a job in that office, which he accepted.

A year after that, Simpson's first major case all but dropped into his lap. While flying over Florence County, a Strategic Air Command bomber accidentally dropped an unarmed nuclear warhead, creating an incident of international proportions.

Simpson was dispatched to litigate the incident on the government's behalf.

"Tommy handled it magnificently," recalled Howe, one of Charleston's most prominent attorneys. "But we had a helluva time getting him to come back home, he became so fascinated with all that nuclear stuff. It was hard to get him back to try a little ol' bootlegging case."

Howe and Simpson collaborated on a case in Horry County in which blacks were beaten by sheriff's deputies. The government prosecutors were able to prove the officers were members of the Ku Klux Klan, and were successful in breaking up the Klan's strength in Horry.

During the last 10 years, Simpson has been teamed often with fellow assistant Lionel Lofton of Charleston. Actually, Lofton was to have joined Simpson in the Alan Schafer case, but major cases of his own—most notably involving former Berkeley County Sheriff James W. Rogers and former North Charleston Police Chief Linwood E. Simmons—prevented Lofton from participating. It was to have been their first trial together since 1978, when former state Rep. J. Sidi Limehouse III was convicted of smuggling marijuana.

Lofton jokes about Simpson's inability to hold on to the U.S. attorney's job, but in a serious vein Lofton reflected, "Tommy has given this office stability. He will be difficult to replace. He could have left anytime after a few years and made a much better income level. But he looked upon this job as a public service and the government should be glad that he did."

Simpson will be going into private practice with the Columbia law firm of King, Vernon and Gambrell. The scheme, of course, is to lighten his workload, spend more time with his family in Chapin, fish and play golf.

Three things are certain: Tommy Simpson will be involved in the big case; the fish on the other end of the pole don't have a chance; and the golf scores will come honestly.

[From the State (Columbia, S.C.), Nov. 4, 1981]

U.S. ATTORNEY TO "HANG" IN FEDERAL COURTHOUSE

(By Jack L. Truluck)

Columbia's largest federal courtroom was crowded Friday as attorneys and friends heaped praise on assistant U.S. District Attorney Thomas P. "Tommy" Simpson and unveiled a portrait of him that will hang in the federal courthouse.

The special court term to honor Simpson was presided over by Chief U.S. District Court Judge Charles E. Simons Jr., who recalled that Simpson had assisted him when he was a new judge.

Simpson, 55, retired as first assistant U.S. District Attorney in early October, but remained as a special prosecutor to finish prosecuting voter fraud cases, which grew out of a Dillon primary in June 1980. All of the 29 people charged in the case either were convicted or pleaded guilty in federal court.

At Friday's special court term Simpson was given awards from the FBI, the Secret Service, the Drug Enforcement Administration, the Internal Revenue Service, the U.S. Marshal's service and the Department of Agriculture.

Simons told the crowded courtroom that "no person is indispensable," but that Simpson is one of the "most-nearly indispensable people" he knows. He said "even defendants had to realize" that Simpson was "able, fair and fearless."

Simpson became an assistant district attorney in 1956 . . .

He has received numerous honors during his career with the government and in 1976 was one of 16 people to receive the Director's Award from the Justcie Department.

The award is given for exceptional and distinguished service as an assistant U.S. District Attorney.

U.S. District Court Judge Robert Hemphill said there are "thousands of people here in spirit—Tommy Simpson people."

Longtime friends and associates Arthur Howe and Lionel Lofton also praised Simpson's career with the Justice Department.

U.S. District Attorney Henry Dargan McMaster also said Simpson's work, character and dedication had brought credit to his position.

Simpson, in a brief talk after the accolades, said he had been asked why he was retiring. He pointed to an infant grandson, who seemed unimpressed with the ceremony, and said, "You've heard him, there he is."

Simpson said he has become associated with the firm, King, Vernon and Gambrell and that he "looks forward to that association."

Among the many cases Simpson has prosecuted, one of the better known is the "Dawson Gang," a group of bank robbers that had operated throughout the Southeast.

In seven Dawson Gang trials, Simpson convicted 18 of 19 suspected members.

A Chapin resident, Simpson was law clerk for the late U.S. District Judge Ashton Williams from 1953 to 1956.

Simpson has headed the district attorney's office on three occasions, but has always expressed a preference for courtroom trial work.

One of four sons, Simpson was born and raised in Columbia.

In 1951 he married his college sweetheart, Tommy Lou Thompson, about the same time he and another young lawyer opened up a practice in Chester.

He has three daughters, a son-in-law, a grandson, and said he is expecting another grandchild, soon.

TELEVISION DOCUMENTARY ON THE KGB

Mr. THURMOND. Mr. President, recently, I was informed that a 2-hour documentary entitled "The KGB Connection," which details the activities of the Soviet intelligence service in the United States, has been withheld from audiences in this country.

The American Broadcasting Co. purchased the viewing rights to this film, but opted not to air it. I regret this decision, because I believe that the content of this documentary is of interest and importance to the American public.

U.S. citizens have a right to be informed about the reality of Soviet espionage and covert action in our country. So little is publicly known about this subject that this film would be a valuable source of information on the threat of Soviet-bloc intelligence.

As a Member of the Senate, I have recently joined with other Senators in urging ABC News to reconsider its decision not to air "The KGB Connection."

The broadcasting of this film should be openly welcomed by all concerned citizens. I personally would consider it to be a courageous and patriotic gesture by ABC.

Mr. President, I urge my colleagues who have not yet done so to publicly voice their displeasure over the decision not to air this film. I also ask unanimous consent that a column by the distinguished commentator, William F. Buckley, which reviews this documentary and the decision not to show it on the ABC network, be printed in the RECORD at the end of my remarks.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the National Review, Nov. 13, 1981]

THE DOCUMENTARY THEY WON'T SHOW

(By Wm. F. Buckley, Jr.)

NEW YORK.—A few years ago a team of young producers in Canada released a series on the use by the CIA of foreign installations for the purpose of doing the CIA's business. The response was sensational, making the front pages of the Daily Worker. Norfolk Communications, later joined by Kitson Vincent, another enterprising Canadian, then decided to do a documentary on the machinations of the KGB, about which they knew little, and were surprised at the almost nonchalant attention given that agency in one or another government document.

What emerged is the most powerful two-hour documentary on the subject of underground Soviet atcivity ever put together. It was shown in Canada and received sensational notices. The Detroit News, bringing in the Canadian signal, called it "powerful," depicting the "real world of Soviet espionage in this continent." Variety called it a "riveting documentary," "carefully researched and intriguing." It has been shown (twice) in Sweden, and will be shown throughout Europe. The problem is that the producers can't get it shown in the United States. One hears endlessly about the suppressions brought on by the Moral Majority. Well, the Moral Majority has no objection to the KGB Connections: An Investigation into Soviet Operations in North America. What goes on?

ABC put up one-third of the money for the production, in return for the option to show part of it in the United States. The option time came—and went. An official from CBS showed interest in it—but there followed a lesion of interest. NBC seemed to be interested not at all.

Now, The KGB Connections would be gripping film-fare if it were discussing the means by which the Spartans undermined the Athenians during the Peloponnesian War. But its involvement with real people, existing situations, and ongoing threats elevates it to more than mere television drama. It is the story of a huge, and hugely successful, offensive against the Free World. It is a Sears Roebuck catalogue of the devices, stratagems, techniques used by the Soviet Union and by its dupes and agents to affect policy, and to commit subversion.

The directors bring extraordinary material, for the first time, to the screen. Here is Hede Massing, one-time wife of Soviet agent Gerhardt Eisler, calmly, intelligently, and even coquettishly discussing her role as a Soviet agent, her knowledge of Alger Hiss within a Soviet cell. Nathaniel Weyl is there also, recalling Alger Hiss. The use of vanity, sex, money, blackmail is discussed, not fictitiously, but through interviews with defectors. You see them on the screen. You see the results of their machinations. In some cases their faces are blanked out, to give them protection.

Castro and his agents make considerable appearances; and we learn of the uses of the United Nations, whose most prominent recent defector calmly estimates the extent to which the Secretariat is penetrated by the KGB. There are wonderful scenes of the Soviet Embassy in Washington, and of its aerial contrivances by which conversations are picked up and recorded. The Soviets held out for high land in Washington, on which to perch their new embassy—the better to intercept the airwaves. By contrast the United States, which labored for a generation for space in Moscow to replace a dilapidated structure, was given territory in a sort of swampland. At this moment there are two trials going on in which espionage for the Soviet Union is alleged. None of this would surprise anyone who had seen, and reflected on, this remarkable documentary.

Why doesn't Mr. Norman Lear, the famous producer who is so exercised by the intimidations of the far Right, come out and sponsor the viewing of this illuminating documentary? But Mr. Lear has been silent on the matter. Why? Because only Archie Bunker believes in the reality of Soviet subversion? Mr. Benjamin Stein wrote a most remarkable book about Hollywood, The View from Sunset Boulevard, in which he mused on its monolithic position on social issues. All businessmen and generals are evil, all investigative reporters and freedom-fighters are good: but not, one gathers, investigative reporters who are curious about the past and present activity of the Communist brotherhood, or fighters who fight other than for the freedom of North Vietnam, unimpeded, to tyrannize over South Vietnam.

The KGB Connections is so striking a drama, so thoroughly newsworthy, so legitimately entertaining, that its absence from the television screen is prima-facie evidence that, after all, it is true—we don't have full freedom of the press.

THE NO. 1 CLEMSON UNIVERSITY FOOTBALL TEAM

Mr. THURMOND. Mr. President, it is a great day today for Clemson University, my alma mater in my home State, which has captured the No. 1 college football ranking compiled by the Associated Press and United Press International.

I remember Coach Danny Ford, when the Clemson Tigers were ranked 19th in the Nation back on September 22, saying that "if we just keep winning football games then everything else will take care of itself." How prophetic he was. When Clemson survived its 11th test by beating the University of South Carolina recently, Ford's team stood as one of only two with perfect records.

Coach Ford is to be commended for his expertise, determination, and coaching skill as are his able assistants. Athletic Director Bill McClellan is to be praised for his deep personal interest in his athletes and his high professional standards. Also, tribute must be paid to Clemson president Bill Atchley—a man who has made great strides for Clemson and its athletic program.

No matter how Clemson fares in the future, its football fans can look back on this past season and perhaps say of the 1981 Tigers, as has been said of champions of another era, "this was their finest hour."

More important than anything else, I believe, is the spirit and inspiration exhibited by the individual Clemson team players. They went into the season as underdogs. Or, at least, that is what some of the experts said. But if there was a single player who felt overawed in the presence of favored teams earlier in the season, they hid it well from their opponents and the spectators.

The 1981 Clemson players provide a fine example of courage, determination, craftsmanship—attributes that make championship teams.

Mr. President, I ask unanimous consent that a copy of an article in The (Columbia, S.C.) State of December 2, be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

AT LAST, TIGERS ARE TOP CATS

(By Will Lester)

CLEMSON.—Cold rain and the ABC television network dampened spirits slightly, but Clemson Tiger football fans saw a lifelong dream realized Tuesday.

For the first time in the university's football history, the Tigers were named the number one college football team in the nation by the Associated Press and United Press International wire services.

The announcement came at 6:30 a.m., and five minutes later, a fan stepped out of his house near the school and fired a gun four times into the air.

At the campus cafeteria, pep committee member Jane Robelot cajoled sleepy students to line up in front of a "number one" banner for a photo by a visiting newspaper photographer.

Clemson University, a school of 11,800 students nestled in the Blue Ridge foothills, has never been atop the heap in college football in the 46-year history of the wire service polls, but finished sixth in 1978. The Tigers must now defeat Nebraska in the Orange Bowl before claiming the championship.

On a drizzly December morning, there were few other outward signs on campus of the news, which had been expected ever since Pittsburgh stumbled against Penn State Saturday. But many Clemson fans had already celebrated Sunday and Monday nights after learning of Pitt's loss.

But at the taverns in downtown Clemson Monday night, some fans were rejoicing at the team's vault into national prominence.

Tiger enthusiasts crowded into the Sloan Street Tavern to drink beer and celebrate life at the top. Ginna Field, a freshman, said

she had never followed football until she came to Clemson, but now she's dedicated.

"People are so psyched to be number one," she said. "They've been wearing a lot of orange to class, having more parties and putting a lot of toilet paper in the trees. There's been a shortage since the beginning of the year."

Melissa Barlow said she's happy to be on top so she can brag, particularly to "rude" Georgia Bulldog fans.

Two middle-age men from the nearby town of Central were clearly ecstatic about Clemson's success. Fifty-one-year-old Ramsay Clayton, a bear of a man with white hair and a two-day beard, said the ranking was welcome news to his mother, 77-year-old Rachel Clayton.

"She's been pulling for them all her life," said Clayton. "Three years ago she said she'd like to see Clemson number one before she died. You should have seen the smile on my mother's face when I told her Clemson would be number one. I went up and got her heart pills for her. She told me she never thought she'd live to see it."

Clayton, like many other fans, thought ABC had it in for Clemson.

"When I was in the Marine Corps, the other guys thought Southerners were a bunch of stupid SOBs," he said. "The North's trying to ram it down our throats 'cause they think we're stupid. You're not guilty until you're proven guilty."

Clayton said he thinks the fanatic following of Clemson's athletic programs is more dedicated than most.

"People in this part of the country—if they have $4, they'll give $2 to see Clemson play, spend $1 on gas and worry about what they'll eat afterward. We got U-nity."

That unity is bound to grow as other honors begin to roll in for the Clemson Tigers. Team officials also learned that linebacker Jeff Davis had been named Atlantic Coast Conference player of the year and quarterback Homer Jordan finished second.

Davis, a Greensboro, N.C. native, said he never expected the Tigers to finish first nationally, but hoped the team would compete for an ACC title.

"Clemsons' program is on the upswing; there's a lot of opportunity," he said. "It feels good when you're on top of teams like Southern Cal and Alabama. It feels good as long as we keep it in the right perspective."

Coach Danny Ford, in his third full season at the helm, was excited Tuesday about the news, but was already looking ahead to next year.

"We'll have an excellent recruiting year," said Ford, who was headed out to recruit for next year. "But seven other folks haven't had good luck with the number one spot."

SAUDI ACTIONS SINCE THE AWACS SALE

Mr. PELL. Mr. President, one of the principal arguments employed by the administration in favor of selling AWACS and F–15 enhancement equipment to Saudi Arabia was that the sale would strengthen the willingness of Saudi Arabia to work with the United States in areas of interest to us in the Middle East. But let us look at the record of Saudi actions since October 28, when the resolution of disapproval was defeated in the Senate.

First, the very next day, October 29, Saudi Arabia raised the price of its oil by $2 per barrel to a new level of $34 per barrel. This new figure is almost triple what the OPEC price was in 1978 when we first agreed to sell F–15 aircraft to Saudi Arabia. Some friend.

Second, on November 10, Saudi Arabia gave the PLO over $28 million. Some of that money will undoubtedly be used by the PLO to continue its military build up in Lebanon and directly undercuts the so-called helpful role that Saudi Arabia played in arranging for the ceasefire in Lebanon. Some friend.

Third, also on November 10, Saudi Arabia's foreign minister attacked Oman for participating with the United States in the military exercise "Bright Star." One week earlier, Oman was pressured by the Saudis to request the United States to reduce the size and scope of its participation in this Persian Gulf exercise. Some friend.

Fourth, just today, there is a report in the Washington Post that Saudi Arabia and other Persian Gulf Arab States have offered Oman $1.2 billion in aid if Oman agrees to cancel an agreement allowing the United States access to its military facilities. Some friend.

Mr. President, these actions are evidence that we cannot count on Saudi Arabia to help advance U.S. interests. The Senate, and the American people, were clearly deluded into believing that the AWACS package would increase Saudi friendship and support for U.S. objectives.

THE RETIREMENT OF SENATOR HARRY F. BYRD, JR.

Mr. DODD. Mr. President, yesterday's Washington Post carried a story that Senator HARRY F. BYRD, JR., of Virginia will not seek reelection when his current term expires next year. Characteristically, Senator BYRD had already sent each of us a personal note informing us of his decision.

That gesture was emblematic of the courtesy which the senior Senator from Virginia routinely shows to his colleagues.

In the House of Representatives in which I recently served decorum dictated that the refer to a male colleague as "the Gentleman." Here in the Senate, of course, it is customary to speak of a colleague as "a good friend."

In the case of HARRY BYRD both expressions are apt descriptions not simply idle conventions. Thoughtfulness, cordiality, graciousness, and good will—the qualities of a gentleman and friend—have been HARRY BYRD's consistent trademarks here in the Senate.

In addition, the sense of personal dignity which informed all of his actions helped preserve and enhance the dignity of the institution of the Senate as a whole.

One cannot help but notice, Mr. President, that Senator BYRD's retirement will close an era as well as an individual career. For virtually half a century a man named HARRY BYRD has represented the Old Dominion in the U.S. Senate. Whoever succeeds the senior Senator will be hard pressed to match the love of Virginia's history and traditions and institutions that were so integral a part of HARRY F. BYRD's service to his State.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Saunders, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Acting President pro tempore laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, which were referred as indicated:

EC–2295. A communication from the Comptroller General of the United States, transmitting, pursuant to law, a report on the President's second special message for fiscal year 1982; pursuant to the order of January 30, 1975, referred jointly to the Committee on Appropriations, the Committee on the Budget, the Committee on Agriculture, Nutrition, and Forestry, the Committee on Armed Services, the Committee on Labor and Human Resources, the Committee on Banking, Housing, and Urban Affairs, the Committee on Energy and Natural Resources, the Committee on Governmental Affairs, the Committee on the Judiciary, the Committee on Foreign Relations, the Committee on Environment and Public Works, and the Committee on Commerce, Science, and Transportation.

EC–2296. A communication from the Comptroller General of the United States, transmitting, pursuant to law, a report on the President's third special message for fiscal year 1982; pursuant to the order of January 30, 1975, referred jointly to the Committee on Appropriations, the Committee on the Budget, the Committee on Armed Services, the Committee on Agriculture, Nutrition, and Forestry, the Committee on Commerce, Science, and Transportation, the Committee on Energy and Natural Resources, the Committee on Banking, Housing, and Urban Affairs, the Committee on Finance, the Committee on Veterans' Affairs, the Select Committee on Indian Affairs, the Committee on Environment and Public Works, the Committee on the Judiciary, the Committee on Labor and Human Resources, and the Committee on Small Business.

EC–2297. A communication from the Principal Deputy Assistant Secretary of Defense (Comptroller), transmitting, pursuant to law, notice that no use was made of certain military construction funds for certain purposes for the period April 1 through September 30, 1981; to the Committee on Appropriations.

EC–2298. A communication from the Director of the Defense Security Assistance Agency, transmitting, pursuant to law, a report on the Department of the Navy's proposed letter of offer to Japan for defense articles estimated to cost in excess of $25 million; to the Committee on Armed Services.

EC–2299. A communication from the Secretary of Defense, transmitting, pursuant to law, a report on the activities of the audit, inspection, and investigative units of the Department of Defense for the 6-month pe-

riod ended September 30, 1981; to the Committee on Armed Services.

EC–2300. A communication from the Assistant Secretary of the Army (Installations, Logistics, and Financial Management), transmitting, pursuant to law, a report on a study with respect to converting the nutritional care activity at Fitzsimons Army Medical Center, Colo., and the decision that performance under contract is the most cost-effective method of accomplishment; to the Committee on Armed Services.

EC–2301. A communication from the Assistant Secretary of the Army (Installations, Logistics, and Financial Management, transmitting, pursuant to law, a report on the study with respect to converting the transportation motor pool activity at Fort Carson, Colo., and the decision that performance under contract is the most cost-effective method of accomplishment; to the Committee on Armed Services.

EC–2302. A communication from the Assistant Secretary of the Army (Installations, Logistics, and Financial Management), transmitting, pursuant to law, a report on a study with respect to converting the dry cleaning activity at Fort Carson, Colo., and the decision that performance under contract is the most cost-effective method of accomplishment; to the Committee on Armed Services.

EC–2303. A communication from the Assistant Secretary of the Army (Installations, Logistics, and Financial Management), transmitting, pursuant to law, notice of the discovery and disposal of a suspected chemical agent at Fort Polk, La.; to the Committee on Armed Services.

EC–2304. A communication from the General Counsel of the Department of Energy, transmitting, pursuant to law, notices of meetings related to the International Energy Program; to the Committee on Energy and Natural Resources.

EC–2305. A communication from the Secretary of the Interior, transmitting, pursuant to law, a report on a proposed transfer of land; to the Committee on Energy and Natural Resources.

EC–2306. A communication from the Director of Policy, Planning, and Analysis, Department of Energy, transmitting, pursuant to law, a report on the economic impact of energy actions for July 1, 1980 through June 30, 1981; to the Committee on Energy and Natural Resources.

EC–2307. A communication from the General Counsel of the Department of Energy, transmitting, a draft of proposed legislation to extend the expiration date of section 252 of the Energy Policy and Conservation Act; to the Committee on Energy and Natural Resources.

EC–2308. A communication from the U.S. Trade Representative, transmitting a draft of proposed legislation to amend section 2 of the International Coffee Agreement Act of 1980 (the act); to the Committee on Finance.

EC–2309. A communication from the Acting Secretary of Transportation, transmitting, pursuant to law, a report on contracts awarded under 10 U.S.C. 2304(a)(11) for the period April 1, 1981 through September 30, 1981; to the Committee on Governmental Affairs.

EC–2310. A communication from the Comptroller General of the United States, transmitting, pursuant to law, a report on the need for a systematic management approach to congressional reporting requirements; to the Committee on Governmental Affairs.

EC–2311. A communication from the Comptroller General of the United States, transmitting, pursuant to law, a list of reports issued by the General Accounting Office; to the Committee on Governmental Affairs.

EC–2312. A communication from the Secretary of the Department of Education, transmitting, pursuant to law, the Report to Congress on the Feasibility and the Desirability of Alternative Measures of Comparability; to the Committee on Labor and Human Resources.

EC–2313. A communication from the Assistant Secretary for Administration of the Department of Housing and Urban Development, transmitting, pursuant to law, a report of the Department's intention to establish a new Privacy Act system of records; to the Committee on Governmental Affairs.

EC–2314. A communication from the Secretary of the Department of Labor transmitting, pursuant to law, the Semiannual Report of the Inspector General for the period April 1, 1981, through September 30, 1981; to the Committee on Labor and Human Resources.

PETITIONS AND MEMORIALS

The following petitions and memorials were laid before the Senate and were referred or ordered to lie on the table as indicated:

POM–626. A petition from a citizen of Dubberly, La., relating to America's national defenses; to the Committee on Armed Services.

POM–627. A petition from a citizen of Brookline, Mass., urging the Congress to prohibit use of American tax dollars for the South West Africa People's Organization; to the Committee on Foreign Relations.

POM–628. A petition from a citizen of Aregibo, Puerto Rico, urging rejection of "the Gay Bill of Rights"; to the Committee on the Judiciary.

POM–629. A joint resolution adopted by the Assembly of the State of Ohio; to the Committee on the Judiciary.

"JOINT RESOLUTION

"Be it resolved by the General Assembly of the State of Ohio:

"Whereas, The members of the 114th General Assembly of Ohio are aware that Mobil Corporation has commenced a tender offer for Marathon Oil Company, an Ohio-based company; and

"Whereas, Marathon Oil Company employs almost 5,000 people in Ohio, with an annual payroll in Ohio in excess of $90 million; has an investment in fixed assets in Ohio of $134 million; paid in excess of $14 million in taxes in Ohio in 1980; and is Ohio's fifth largest corporation; and

"Whereas, Marathon Oil Company is a vital and irreplaceable reliable source of supply of gasoline and petroleum products to hundreds of independent, small business marketers in Ohio and elsewhere; and

"Whereas, Marathon Oil Company is a highly competitive marketer of low-cost gasoline and petroleum products through its Speedway, Gastown, Bonded and Cheker outlets in Ohio; and

"Whereas, Mobil Corporation does not sell any significant quantity of low-cost gasoline and petroleum products and has consistently refused to supply gasoline and petroleum products to low-cost, independent marketers in Ohio and elsewhere; and

"Whereas, Independent marketers and Marathon's low-cost outlets are a vital competitive force in Ohio and elsewhere; and

"Whereas, Marathon Oil Company is a major and irreplaceable supplier of petroleum and petroleum products to agricultural markets in Ohio and elsewhere, supplying 4400 farm accounts and Ohio's largest agricultural co-operative; and

"Whereas, Mobil Corporation does not supply such markets; and

"Whereas, Mobil Corporation and Marathon Oil Company are direct competitors in the sale of various petroleum products and services in Ohio and elsewhere; and

"Whereas, The acquisition of Marathon Oil Company by Mobil Corporation will have severe anti-competitive effects on consumers in Ohio and elsewhere; and

"Whereas, The attempted acquisition of Marathon Oil Company by Mobil Corporation raises serious concerns under the antitrust laws of the United States and the State of Ohio; now therefore be it

"Resolved, That we, the members of the 114th General Assembly, in adopting this Resolution, strongly urge and memorialize the Attorney General of the United States and the Federal Trade Commission to act forthwith under the antitrust laws of the United States to enjoin the takeover of Marathon Oil Company by Mobil Corporation pending full exploration of these serious issues; and be it further

"Resolved, That the Clerk of the Senate transmit duly authenticated copies of this Resolution to the Attorney General of the United States and to the Chairman and members of the Federal Trade Commission."

POM–630. A petition from a citizen of Lowell, Mass., urging support of S. 613, to help end union violence in America; to the Committee on Labor and Human Resources.

POM–631. A petition from a citizen of Mobile, Ala., urging support of S. 613, to help end union violence in America; to the Committee on Labor and Human Resources.

POM–632. A petition from a citizen of Honolulu, Hawaii, urging support of S. 613, to help end union violence in America; to the Committee on Labor and Human Resources.

POM–633. A petition from a citizen of Nampa, Ind., urging support of S. 613, to help end union violence in America; to the Committee on Labor and Human Resources.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. DOLE, from the Committee on Finance, without amendment:

S. Res. 238. A resolution to retain the deductibility from personal taxes of interest paid on residential mortgages.

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. McCLURE, from the Committee on Energy and Natural Resources:

Vernon R. Wiggins, of Alaska, to be Federal Cochairman of the Alaska Land Use Council;

Pedro A. Sanjuan, of the District of Columbia, to be an Assistant Secretary of the Interior;

Janet J. McCoy, of Oregon, to be High Commissioner of the Trust Territory of the Pacific Islands.

(The above nominations from the Committee on Energy and Natural Resources were reported with the recommendation that they be confirmed, subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

By Mr. DOLE, from the Committee on Finance:

Jules G. Korner III, of Maryland, to be a Judge of the United States Tax Court for a term expiring fifteen years after he takes office;

Perry Shields, of Tennessee, to be a Judge of the United States Tax Court for a term expiring fifteen years after he takes office;

Meade Whitaker, of Michigan, to be a

Judge of the United States Tax Court for a term expiring fifteen years after he takes office.

REREFERRAL OF A BILL—S. 1855

Mr. STEVENS. Mr. President, I ask unanimous consent that S. 1855, a bill to amend the Internal Revenue Code, be rereferred from the Committee on the Judiciary to the Committee on Finance.

The PRESIDING OFFICER. Without objection, it is so ordered.

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. SPECTER:

S. 1899. A bill to amend the Federal Election Campaign Act of 1971 to reform campaign financing and for other purposes; to the Committee on Rules and Administration.

By Mr. EXON:

S.J. Res. 131. A joint resolution designating "National Theatre Week"; to the Committee on the Judiciary.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. SPECTER:

S. 1899. A bill to amend the Federal Election Campaign Act of 1971 to reform campaign financing and for other purposes; to the Committee on Rules and Administration.

FEDERAL ELECTION REFORM ACT OF 1981

Mr. SPECTER. Mr. President, I have introduced a bill, S. 1899, to streamline and reform the Federal Election Campaign Act.

This bill has five titles, as follows:

Title I provides for reform of the regulation of Presidential campaigns, including elimination of the State-by-State limitations, elimination of the fundraising exemption, and allows a $1,000 contribution in-kind in the Presidential general election.

Title II provides for reduction in the recordkeeping and reporting requirements, while insuring that the public continues to receive the information it needs on how campaigns raise and spend their funds. This title increases the threshold for reporting for candidates and political committees, significantly reduces recordkeeping requirements, eliminates the requirement that candidates file reports with their Secretary of State—but requires the FEC to forward a copy to the Secretary of State—and reduces the reporting requirements for certain categories of receipts and disbursements which do not significantly enhance public disclosure.

Title III raises the contribution limitations roughly in conformance to the projected cost of living increase between 1974 and 1984. This title also closes the loophole in existing law whereby there are no contribution limitations on draft committees.

Title IV provides for the streamlining of the Federal Election Commission, including a single point of entry for all Federal disclosure reports, a part-time Commission, and clarification of the role of the Commissioners and Executive Director and General Counsel. This title also requires the Commission to periodically and on a timely preelection basis compile summary statistics for public consumption, sets specific timeframes for the initiation of enforcement actions, streamlines nonfiling actions against multicandidate committees, provides for a comprehensive review of FEC regulations every 2 years, sets forth timeframes for completion of Presidential audits, provides for random audits of multicandidate committees, and contains certain other provisions streamlining the administration of the law.

Title V contains several miscellaneous provisions, including requiring disclosure by draft committee—thus overturning a recent court decision exempting those committees from disclosure—and allowing trade associations to continue to solicit corporations until the permission is revoked.

This bill remedies and responds to the numerous, justifiable criticisms of the FECA, while maintaining in every respect the basic thrust of the reforms which were enacted in the past decade.

The legislation which I am introducing today has been drafted by Mr. William P. Loughrey, my legislative administrator. Mr. Loughrey served as deputy staff director of the Federal Election Commission for 3 years immediately before joining my staff, has worked for over 8 years with the Federal Election Campaign Act, and has extensive knowledge on the interworkings of the Federal Election Commission. In formulating this legislation, I have sought to use Mr. Loughrey's experience to correct some of the operating deficiencies of the statute and to bring his practical experience to bear on this important subject with these proposed reforms in the existing legislation.

Mr. President, I ask that a summary of the bill be printed in the RECORD.

There being no objection, the summary was printed in the RECORD, as follows:

SUMMARY

The title of the Bill is the Federal Election Reform and Deregulation Act of 1981.

Title I of the bill contains those provisions relating to presidential campaigns.

Section 101 permits general election campaigns to accept contributions in-kind up to $1,000 provided that any such contribution in excess of $500 is disclosed.

The original purpose of the Presidential Election Campaign Fund was to free candidates of the duties, responsibilities and obligations of raising private campaign funds for presidential general elections. It was not the intent of this legislation to curb grassroots activities or prohibit day-to-day activities in support of the presidential campaigns.

While the Presidential Election Campaign Fund Act has been successful in eliminating the need for private fundraising and many of the negative aspects of private fundraising, the Act has apparently curbed grassroots and other forms of desirable activities. For example, if an individual wishes to provide a typewriter, telephone, or xerox machine or other thing of value to a campaign, the Act generally prohibits this activity unless it is reimbursed by the campaign. (Certain types of contributions in-kind are exempt from the definition of contribution by 2 U.S.C. 431(8)(B)). Since presidential general election campaigns find that the most effective use of funds is for advertising and get-out-the-vote activities, there are little or no funds budgeted for these types of grassroots activities. Thus, volunteers and other supporters of the candidates frequently find that they are unable to undertake many types of activities on behalf of the candidate.

This exemption would enable these individuals and organizations to undertake limited activities on behalf of a presidential candidate provided that such activities do not include providing cash, currency, personal checks, loans, advances and other comparable items which may be deposited as money. This exemption would not extend to sham transactions, such as where a campaign were to accept the use of a typewriter or artwork and sell the typewriter or artwork on the open market, using the funds obtained in the transaction in connection with the campaign. This exemption should encompass the vast majority of grassroots and day-to-day type activities where individuals and organizations may use their own property and other things of value in conjunction with volunteer activities.

Campaigns will be required to disclose any such contributions in-kind which exceed $500, but there is no requirement that these campaigns keep records or set a value on contributions in-kind of less than $500 (See Section 502). Requiring campaigns to set a value on these types of activities would be inhibitory and counterproductive. It is expected that campaigns, volunteers, and other persons would use a rule of reason in evaluating contributions in-kind.

The total value of contributions in-kind provided to a presidential general election campaign by one individual or organization under this Section may not exceed $1,000.

The principle involved here is comparable to that in existing law. A wide number of activities are exempted from the definition of contribution under the current law, including food and beverages up to $1,000, travel expenses up to $1,000, the use of real or personal property up to $1,000, and numerous activities of State and local party committees. This provision would make a more comprehensive exclusion to the definition of contribution for purposes of the Presidential Election Campaign Fund Act because under that law all contributions to campaigns receiving full public funding are prohibited by law. This exclusion is in addition to any exemption contained in 2 U.S.C. 431(8). These contributions in-kind would not count toward the overall expenditure limitations.

Exempting a broader range of contributions in-kind from the definition of contribution would encourage volunteer activities. This exemption also would not subject the candidates to the duties, responsibilities and alleged abuses involved in private fundraising. Permitting contributions of cash, currency and other monies would divert funds from political party committees and result in the reversion to private fundraising which is contrary to the purposes of the Act.

Section 102 of the bill eliminates the state-by-state expenditure limitations. The original goal of the state-by-state limitations was to serve the well-intended purposes of preventing candidates from (1) spending an exorbitant amount of funds in any one State in order to gain an early lead in the presidential race, (2) using up all or almost all of their overall limitation in the early primary states, and (3) unnecesarily influencing the voters in a State by expenditures of large sums of money.

While this goal is certainly laudable, it resulted in a regulatory nightmare and over-regulation of presidential campaigns. In order to determine whether an expenditure must be attributed to a State expenditure

limitation, every campaign must keep a detailed accounting of each expenditure so that the Federal Election Commission can determine whether that expenditure should be attributed to a State limitation. Campaigns which keep detailed records are penalized, because the FEC is better able to determine when national overhead and general administrative expenses are attributable to the state-by-state limitation.

In the 1980 campaign, there were huge variances in the percentage of total expenditures attributed to the States by various candidates. Expenditures attributable to these limits ranged from as low as 8 percent for one campaign to as high as over 65 percent for another. Thus, it is increasingly obvious that these limitations are not enforceable and only serve to over-regulate campaigns. While the state-by-state limitations were enacted to serve a good purpose, it is clear that this goal is not obtainable without seriously over-burdening presidential campaigns.

Section 103 eliminates the legal and accounting exemption for presidential campaigns receiving public funds. The original purpose of this provision was also laudable—to allow legal and accounting services to be exempted from the contribution and expenditure limitations. However, this provision has imposed complicated allocations and other requirements on presidential campaigns. For example, these campaigns have been required to keep detailed records of the time which campaign workers spend on legal and accounting services versus other campaign functions. In eliminating this exemption, this bill would increase the overall expenditure limitation to allow campaigns to fund these activities (See Section 105). Thus, this bill would eliminate the complicated allocation and recordkeeping requirements without reducing the resources or amount of funds available to campaigns.

Section 104 of the bill eliminates the 20 percent exemption from the expenditure limitation for fundraising expenses. This provision serves little purpose since all campaigns have been able to classify at least 20 percent of their expenditures as fundraising expenses. As a practical matter, it is almost impossible to differentiate between most general campaign expenses and fundraising expenses. This provision requires presidential campaigns to set up a complicated allocation system to differentiate between so-called "fundraising expenses" and other general campaign expenses. To compensate for what would otherwise be a 20 percent reduction in the overall limitation, the overall expenditure limitation is raised in Section 105.

Section 105 of the bill increases the overall expenditure limitation in presidential primaries from $10 million to $15 million and in the presidential general election from $20 to $21 million. This limitation would continue to be indexed by the cost-of-living adjustment using the base period of 1974. These increases in the limitations would compensate for the elimination of the legal and accounting services and fundraising exemptions.

In addition, it would increase the basic limitation by approximately $2 million in the primaries. During both the 1976 and 1980 campaigns, several candidates and their authorized committees had to significantly curtail their activities during the last few weeks of the campaign to remain within the limitation. This increase would provide these campaigns with additional flexibility without jeopardizing the rationale for the overall expenditure limitation. While additional increases in this limitation may be desirable, it is doubtful that sufficient political sentiment exists within the Congress to significantly raise this limitation.

Section 106 requires the Commission to establish a pattern and practice of failure to maintain adequate documentation or records in order to require repayment of public funds. Under current practice, the Commission requires repayment of funds to the Treasury if the campaign fails to maintain adequate documentation or records for expenditures. There is no direct indication in the legislative history or the statute that Congress intended the Commission to require such payment. On the other hand, there needs to be an accountability for public funds and no campaign should be able to conceal wrong-doing or illegal activities by simply failing to maintain adequate documentation of expenditures.

Thus, this provision requires the Commission to use the enforcement procedure, which is the procedure it must use to levy a civil penalty, in order to require any repayment. Further, the Commission must establish a pattern and practice of failure to maintain such documentation. This provision recognizes that campaigns, by necessity, are frequently loosely run and many times are unable to maintain the high levels of recordkeeping and documentation maintained by more stable and on-going organizations and most recipients of government funds. This provision should also help clarify the current problem, whereby it is questionable whether the Commission has the authority to require repayment in conjunction with the Title 2 enforcement procedure when it uncovers payments and expenditures for which no adequate documentation was maintained.

Section 107 of the bill would allow presidential candidates who have received public funds but who become inactive to file quarterly rather than monthly reports. Additional authority provided for in this bill would also allow the Commission to waive other reporting requirements. (See Section 409).

Section 108 requires that all repayments be credited to the Presidential Election Campaign Fund so that dollars checked off by taxpayers for the Fund do not indirectly end up in the general fund. Under current law, repayments under the Presidential Election Campaign Fund Act, but not the Primary Matching Payment Account Act, are deposited in the general fund of the Treasury.

Section 109 makes technical changes to the law by making consistent the definition of "qualified campaign expense" in both Chapters 95 and 96. The definition contained in Chapter 96 is incorporated into Chapter 95. In addition, the definition of "qualified campaign expense" is clarified to indicate that it incorporates the "coattails provision" of 2 U.S.C. 431(8)(B)(xi).

Title II contains those various provisions relating to reductions in the burdens of recordkeeping and reporting.

Section 201 increases the threshold for the triggering of the reporting requirements for candidates and their authorized committees from $5,000 to $10,000. This threshold was originally enacted in the 1979 Amendments on an experimental basis. Since it worked well for the 1980 election, the threshold is increased from $5,000 to $10,000.

Section 202 increases the thresholds for the triggering of the reporting requirements for a political committee. Since the enactment of the law in 1971, the threshold for reporting by political committees has been $1,000 (except that in the 1979 Amendments the triggering amount was eliminated for separate segregated funds and increased to $5,000 in certain instances for political party committees). Since passage of the 1971 law, the rate of inflation has increased rapidly, causing many additional smaller organizations to trigger reporting or reduce federal activity. Even though there has been a loosening of other requirements in the law, the threshold for reporting by political committees has remained at $1,000 and decreased in some circumstances. In particular, the requirement that separate segregated funds report when they have any activity at all is particularly burdensome to many small corporations, trade associations and labor unions who must report to the FEC when they make only small contributions to Federal candidates, including on occasions when they simply buy tickets for fundraising dinners and other campaign events. Other separate segregated funds and political committees simply refrain from federal activity, thus being discouraged from even minimal participation in the Federal process.

Section 202 increases the threshold of reporting from $1,000 to $2,500 for political committees in general, sets the threshold for reporting for the separate segregated funds at $1,000, and in the case of State and local political party committees making certain types of exempted contributions and expenditures, the threshold is increased from $5,000 to $10,000. While these increases may not remove substantial numbers of committees from the reporting requirements, there are currently a large number of committees which do not participate at all or only up to the threshold which will be able to participate to a greater extent under these proposed provisions.

Section 203 increases the recordkeeping threshold for contributions from $50 to $100. This is consistent with the overall goal of reducing the recordkeeping requirements on committees. This section also makes other changes consistent with raising the threshold from $50 to $100 and $200 to $500.

Section 204 revises the current law which provides recordkeeping for every disbursement and provides for recordkeeping for those disbursements in excess of $100. Current requirements are onerous and burdensome and do not reflect the realities of the campaign. Setting the threshold at $100 would be consistent with the $100 recordkeeping threshold on the contribution side.

Section 205 clarifies the application of the best efforts test, particularly in those instances where a campaign may not be able to determine if it originally requested the information. Under current law, a campaign may solicit funds in a variety of ways. If the campaign fails to request contributor information for each solicitation, then it must make an additional written request for the information in all instances where the campaign cannot demonstrate that it originally asked for the information. For example, if all contributions are sent to a single mail box and some of them are the result of a television solicitation where it is not practicable to ask for the contributor information, then the campaign may be required to ask for this information for all persons who did not supply it, including those persons who contributed as a result of some other form of solicitation. Instead, the campaign would only be required to make an additional request if their written solicitations did not ask for this information. This test more closely parallels the practical realities of the political campaign. In the case of expenditures, one written request should be made for any missing information.

Section 206 increases the disclosure threshold for refunds, rebates and other offsets for operating expenses and dividends, interest and other receipts.

Section 207 would eliminate the requirement that campaigns aggregate all disbursements for purposes of the reporting requirements. This is consistent with the setting of a threshold for recordkeeping for disbursements of $100. In addition, many campaigns expend substantial time and effort in aggregating expenditures when little use is made of this data. Since there are a wide variety of systems for aggregating and classifying expenditures, this data is of relatively

little use for statistical purposes. All contributions or transfers to candidates and authorized committees will still be required to be reported.

Section 208 raises the threshold for independent expenditure reporting from $250 to $1,000. Very little use is made of the information generated by the requirement to disclose independent expenditures greater than $250 but less than $1,000. This provision would eliminate the necessity for these persons to file disclosure reports with the FEC.

Section 209 eliminates the requirement that each committee file a copy of its report with the Secretary of State. Instead, it requires the Commission to forward copies of all reports and statements, along with pertinent indices, to the appropriate State officer. The appropriate State officer is defined to mean: all States in the case of presidential candidates and political party and PAC committees receiving contributions or making expenditures aggregating in excess of $100,000, the State in which a House or Senate candidate seeks election for House and Senate campaigns, and for all other committees the State in which the committee is headquartered. The Secretary of State (or equivalent State officer) is required to perform the same duties and responsibilities as in the current law, except that the Secretary is not required to compile and maintain a current list of all reports and statements since indices will be provided by the Commission. There are authorized for purposes of carrying out this section $500,000 for Fiscal Year 1982. The amounts authorized to be appropriated under this section are less than the actual cost to candidates and committees who currently file these reports with the Secretary of State.

Title III includes various modifications in the limitations on contributions.

Section 301 changes the current $1,000 per-election limitation on individual contributors to $2,500. Since enactment of the contribution limitations in 1974, there have been significant increases in the cost of living, but no increases in the limitations. While increasing the limitations will not generally result in a significant increase in funds available to campaigns (approximately a 2–5 percent increase for House races, 5–12 percent for Senate races, and 15–30 percent for Presidential races), as a matter of equity the contribution limitation should be adjusted to account for inflation. Suggestions to further increase the limitation do not appear to merit enactment, because such increases would not provide significant additional funds to campaigns and the giving of multiple contributions through spouses and children or through various employees or officers of a corporation or other organization might result in the appearance of undue influence.

Section 302. The aggregate limitation on the amount which an individual can give to all Federal candidates and committees is increased from $25,000 to $50,000. While this will not generate significant additional funds for Federal campaigns (less than 1 percent additional funds), it will make an appropriate adjustment for inflation.

Section 303 sets forth a limitation on contributions to individuals, organizations, or other groups and persons who seek to draft candidates for Federal office. A recent court decision found that the limitations on contributions do not apply to organizations and individuals which seek to draft someone for Federal office. This amendment would reverse that court decision and impose a $5,000 limitation on contributions to these committees. This is comparable to the $5,000 limitation which would be imposed on candidates and authorized committees.

Title IV contains certain provisions for streamlining the Federal Election Commission.

Section 401 established the Commission as the sole point of entry for all disclosure documents filed by federal committees. Under existing law, a ludicrous system exists whereby Federal candidates and committees file with three separate entities, the FEC, the Clerk of the House, and the Secretary of the Senate. This obviously creates considerable confusion and duplication of effort. A single point of entry would eliminate any confusion about where candidates and committees are to file reports. It would assist committee treasurers by having one office with which to file, correspond and ask questions.

At present, conflicts may arise when more than one office sends materials, makes requests for additional information and answers questions relating to the interpretation of the law. A single point of entry should also reduce the cost to the Federal Government of maintaining 3 different offices, especially in the area of personnel, equipment and data processing. Under existing law, the Commission has authority to prepare and publish lists of non-filers. It is extremely difficult to ascertain who has and has not filed when reports may have been filed at or are in transit to two or more different offices. Separate points of entry also make it difficult for the Commission to track responses to compliance notices. Many responses and/or amendments may not be received by the Commission in a timely manner, even though they were sent on time by the candidate or the Committee. The delay in transmittal between to offices sometimes leads the Commission to believe that candidates and committees are not in compliance. A single point of entry would eliminate this confusion.

Section 402 of the bill sets forth several structural changes in the Commission. The Commissioners are made part-time, the Clerk of the House and Secretary of the Senate are removed from the Commission, and an Executive Director is substituted for the general counsel and staff director. The Executive Director may appoint a General Counsel to represent the Commission in court and provide legal advice. Commissioner pay is at level IV of the Executive Schedule but may not exceed $20,000 per calendar year. Under the existing structure, the Commission is essentially administered by eight separate entities—six commissioners, the staff director and the general counsel. These officers have not worked out their roles between each other and have not been successful in establishing an arrangement which would allow for the smooth functioning of the Commission.

In order to facilitate the overall administration of this law, an Executive Director is proposed to administer the Commission's staff and budget, and handle other functions of a chief executive officer. The Commission will still retain all its powers to act on advisory opinions, regulations, enforcement matters and other similar policymaking decisions. This change will establish for the Commissioners an appropriate role in the decisionmaking process. Under existing law, the Commissioners have read the delegation of authorities provision in an overly broad matter. Instead of delegating the relevant administrative duties and responsibilities to an Executive Officer, the Commission has attempted to become involved in the day-to-day operations of the staff and the Commission. This has proven to be inefficient and ineffective. Also, making the Commissioners part-time, and limiting their compensation of $20,000 will require them to assume a role of chief policymakers rather than administrators. The Commissioners will need to incorporate a strict conflict of interest test into the Commission's written rules of conduct in order to avoid conflicts of interest since they are no longer full-time.

Each Commissioner will be provided with one GS–12 staff assistant to assist in the carrying out of his or her responsibilities. Salary levels of current employees are not to be affected by this provision. Appointment of the staff will no longer require the approval of the Commission, but the Commission will continue to have appointment authority over the Executive Director. If the Commission is sufficiently dissatisfied with the appointments of the Executive Director, it has the authority to terminate him or her. This section also eliminates the provision requiring the Commission to avail itself of other agencies and departments of the United States. As a practical matter, this provision has proven to be unworkable and all other agencies and departments require reimbursement on a cost basis, thus making use of this provision inefficient from the viewpoint of the Commission.

Section 403 sets forth a new requirement that the Commission periodically publish statistical analyses of candidates and committees which file reports and statements with it. The Commission currently provides the press and the public with Reports on Financial Activity which set forth comprehensive statistical analyses of these candidates and committees. However, these reports are not always provided on a timely pre-election basis and are sometimes not available until long after the election. The intent of this provision is to require the Commission to produce the RFA in its full scope, including data on candidate loans, contributions, and debts and obligations, on a timely basis. A deadline of June 30th of the year after the election is set for the production of a comprehensive report. It is intended that this report will cover all reports and statements filed by candidates and committees prior to February 16th. This provision is also intended to change the Commission's focus from that of enforcement of relatively insignificant violations of the Act to public disclosure of major and significant campaign financing trends and patterns.

Section 404 sets forth a specific time frame for enforcement actions taken by the Commission and substitutes a letter of inquiry for the current formal finding of "reason to believe". The letter of inquiry must be sent within 45 days of receipt of a complaint or within 90 days of information ascertained in the normal course of carrying out its supervisory responsibilities. Probable cause must be found within 100 days of the letter of inquiry or notification of an investigation and a civil suit instituted within 120 days of finding probable cause. Time spent on delaying tactics by the respondent will not count towards these time frames. If no action is taken during these time frames, then the Commission may not proceed further, except to close the case.

The Commission has taken over four years to complete some investigations. In other instances, there have been considerable delays on the part of the Commission in processing enforcement actions. In the case of election law, it is particularly impotrant that all such matters be processed as expeditiously as possible, particularly because matters concluded long after the election will have a diminishing, if not an insignificant impact. These time frames will require the Commission to limit and focus its enforcement efforts. In addition, in the event the Commission is unable to process an action within the time frame required, it still has the option of referring the matter to the Department of Justice. Setting these time frames will greatly expedite the processing of these actions and obviate the need to eliminate the Commission's civil enforcement authority or transfer this authority to the Department of Justice. Similar Congressional action to limit the

time frame for Commission response, such as the limitations on time to respond to an advisory opinion request, have in the past proved very successful.

Section 405 permits the Commission to levy a civil penalty of up to $10,000 against any multicandidate committee which does not file a disclosure report without going through the normal enforcement procedures. Currently substantial numbers of these committees are not filing these reports and the Commission does not have the resources to pursue more than a small number of these violations. For these committees, there is presently a small chance of receiving any sanction at all for these serious violations, unlike authorized committees which are subject to greater press scrutiny and complaints by opposing candidates.

Section 406 sets forth a time frame for a comprehensive review of the Commission's regulations and forms. In recent years, the Commission's regulations have become outdated and do not contain a major portion of the Commission's policy decisions, advisory opinions, and other administrative actions which significantly impact on candidates and committees. Further, campaign treasurers do not have a central reliable body of information on how to comply with the law and must rely on hundrdes of opinions, regulations, hundreds of enforcement actions and voluminous amounts of other materials. This provision will require the Commission to conduct a comprehensive review prior to June 30th of the year following the election and provides for public comment on any proposed change.

Section 407 requires the Commission to make the results of its audits of presidential candidates publicly available within certain time frames. For general election candidates, these results must be made available by July 31st of the year following the election. For primary candidates, the results must be made available by March 31st of the year after the convention. The Commission vastly improved its performance with regard to the timeliness of its release of presidential audits for the 1980 election. This provision is intended to ensure that the Commission continues to improve its performance and that each office within the Commission continues to meet established deadlines. The statutory deadlines should expedite this process.

Section 408 allows the Commission to conduct audits of nonparty multicandidate committees on a randon basis. Prior to the 1979 amendments when the Commission was prohibited from conducting any random audits, the Commission's previous audits of these committees found that over 7 percent of the funds raised by these committees were raised improperly. Thus, between $1 and $12 million in funds raised by these committees each election cycle are raised improperly.

Section 409 gives the Commission the power to waive any recordkeeping or reporting requirements by prescribing a rule or regulation of general applicability in accordance with the procedures set forth in the statute. In the past, the Commission has been unable to waive many of the cumbersome recordkeeping and reporting requirements in the statute, because it lacked this general authority, This provision would eliminate any possible bar to the submission of a regulation of general applicability to waive any recordkeeping and reporting requirement in this Act (the Commission may have this authority implicitly under current law). It is expected that the Commission would utilize this general waiver authority in conjunction with the requirement that it conduct a comprehensive review of its regulations at the conclusion of each 2-year election cycle (See Section 406). Examples of where this general waiver authority would be helpful include: (1) a candidate's principal campaign committee existing solely to extinguish debts from a previous campaign could be permitted to file an annual report, if the candidate is not currently seeking election, and (2) the principal campaign committee of a candidate for the office of President could be waived from filing pre- and post-general election reports if the candidate is no longer actively seeking election.

Section 410 reduces the period for legislative review of Commission regulations from 30 legislative days to 15 legislative days and conforms the definition of legislative days in Title 26 to that contained in Title 2.

Section 411 would provide the Commission with a revolving fund. Atlhough the FEC charges fees for certain publications and copies of documents provided to the public upon request, none of the monies collected are paid to the FEC for costs that have been incurred. Instead, the money is transferred to the U.S. Treasury. Thus, there is little financial incentive for the FEC to encourage the sale and use of the reports filed with it. A revolving fund would provide this incentive and would allow the FEC to recover its costs.

Section 412 would eliminate the prohibition on the Commission issuing opinions of an advisory nature, except through the advisory opinion process. The current statutes prevent the Commission from issuing any form of guidance or advice to candidates or committees except through the advisory opinion and regulation process. Both of these procedures are cumbersome and take considerable time. The Commission should have additional flexibility to answer the questions and problems posed by candidates and committees in a more expeditious fashion. This section also reduces the public comment period for advisory opinion requests received immediately before the election from 10 to 5 days. This will assist the Commission in answering opinion requests within the 20-day time period.

Section 413 eliminates the Commission's annual report in accordance with the President's recent dictate to eliminate as many government publications as possible. The elimination of the annual report should save the Commission approximately $5,000–$10,000 a year.

Section 414 would exempt the Commission from the requirements of the Regulatory Flexibility Act and certain requirements of the Privacy Act of 1974. None of the Commission's regulations have a significant impact on small businesses due to the nature of the Commission's jurisdiction, which mainly extends to political committees. The Commission is required to assert that its regulations will have no impact on small businesses, when in fact these businesses are not within the jurisdiction of the Commission. A far simpler solution would be to exempt the Commission from these requirements. The Commission should also be exempted from its duties to comply with the accounting requirements of 5 U.S.C. 552a(c) to the extent that the section requires an accounting of all disclosures maintained on the public record. The Commission has a reading room to which members of the general public may come and inspect microfilm copies of public reports. Placing such documents on the public record is a routine use of such materials. An exemption from the accounting requirements would not contravene the principles of the Privacy Act since the individuals involved are those running for office or contributing to candidates for federal office. Congress has determined that in this situation the public need to know the financial activities of political committees and contributors outweighs any privacy interests such individuals may have in this area.

Title V contains miscellaneous provisions for streamlining the Federal Election Campaign Act.

Section 501 amends the definition of political committee to clarify that committees and other organizations which attempt to draft an individual to run for federal office are subject to the recordkeeping and reporting requirements of the FECA. A recent court decision has suggested that these committees may not be subject to the reporting and recordkeeping requirements in the law. This provision would eliminate any doubt as to their applicability.

Section 502 would eliminate the need to set a value on contributions in-kind of less than $500. Under current law, campaign treasurers and other campaign workers may spend considerable time setting a value on various, relatively small contributions in-kind to a political committee. This provision would set a de minimus or safe harbor rule whereby contributions in-kind would not be subject to the recordkeeping, valuation, and reporting requirements in the Act. In determining whether an individual or group has made contributions in-kind aggregating over $1,000, a treasurer can keep a list of such contributions in-kind and use his or her best judgment in determining whether the threshold has been met or exceeded. This would be an application of the rule of reason.

Section 503 clarifies the application of the earmarked contribution provision. Section 441a(a)(8) currently states that contributions made on behalf of a candidate to an intermediary conduit shall be considered contributions to the candidate by the original donor. This provision would amend the statute to make it applicable to contributions earmarked to political committees.

Section 504 changes current law, whereby the political action committees of trade associations must obtain the separate and specific approval of each member corporation to solicit their stockholders and executive and administrative personnel. Some trade associations have thousands of members and it is a considerable burden to obtain approval for solicitation every year. The one-year limitation will be eliminated by this provision and the trade association will be allowed to solicit until the corporation revokes its approval. If a corporation revokes its approval, another trade association may not be approved for solicitation purposes until the following year.

Section 505 makes a technical amendment to title 26.

Section 506 makes the bill effective 90 days after enactment, except for provisions relating to the structure of the Commission will not take effect until May 1, 1985, so that existing parties will not be affected and there will be a transition period to make the changes required by this bill.

ADDITIONAL COSPONSORS

S. 234

At the request of Mr. HATCH, the Senator from North Dakota (Mr. BURDICK), the Senator from West Virginia (Mr. RANDOLPH), the Senator from Iowa (Mr. JEPSEN), the Senator from Georgia (Mr. NUNN), the Senator from Wisconsin (Mr. KASTEN), the Senator from Ohio (Mr. METZENBAUM), and the Senator from Arkansas (Mr. PRYOR) were added as cosponsors of S. 234, a bill to amend the Public Health Service Act to encourage the establishment of home health programs and to amend the Social Security Act to provide expanded coverage of home health services under the medicare and medicaid programs.

S. 1498

At the request of Mrs. KASSEBAUM, the Senator from Ohio (Mr. METZENBAUM), the Senator from South Carolina (Mr. HOLLINGS), the Senator from Delaware

(Mr. ROTH), the Senator from Michigan (Mr. RIEGLE), and the Senator from Georgia (Mr. NUNN) were added as cosponsors of S. 1498, a bill to establish an office in the National Institutes of Health to assist in the development of drugs for diseases and conditions of low incidence.

S. 1595

At the request of Mr. INOUYE, the Senator from Connecticut (Mr. WEICKER), the Senator from New Jersey (Mr. WILLIAMS), and the Senator from Montana (Mr. BAUCUS) were added as cosponsors of S. 1595, a bill to provide for the designation of income tax payments to the U.S. Olympic Development Fund.

S. 1698

At the request of Mr. DENTON, the Senator from Georgia (Mr. MATTINGLY), the Senator from Oregon (Mr. HATFIELD), and the Senator from Indiana (Mr. LUGAR) were added as cosponsors of S. 1698, a bill to amend the Immigration and Nationality Act to provide preferential treatment in the admission of certain children of U.S. Armed Forces personnel.

S. 1724

At the request of Mr. ROTH, the Senator from Georgia (Mr. MATTINGLY) was added as a cosponsor of S. 1724, a bill to amend the Federal Employees' Compensation Act, and for other purposes.

S. 1770

At the request of Mr. INOUYE, the Senator from Montana (Mr. MELCHER), the Senator from Pennsylvania (Mr. SPECTER), and the Senator from New Jersey (Mr. WILLIAMS) were added as cosponsors of S. 1770, a bill to direct the Secretary of the Department of Transportation to conduct an independent study to determine the adequacy of certain industry practices and Federal Aviation Administration rules and regulations, and for other purposes.

S. 1780

At the request of Mr. ROTH, the Senator from Utah (Mr. GARN) was added as a cosponsor of S. 1780, a bill to provide civil penalties for false claims and statements made to the United States, to recipients of property, services, or money from the United States, or to parties to contracts with the United States, and for other purposes.

S. 1879

At the request of Mrs. KASSEBAUM, the Senator from Oklahoma (Mr. BOREN), the Senator from Iowa (Mr. JEPSEN), and the Senator from South Dakota (Mr. PRESSLER) were added as cosponsors of S. 1879, a bill to amend the Milwaukee Railroad Reconstructing Act and the Rock Island Transition and Employee Assistance Act to facilitate the purchase of lines of bankrupt carriers to provide for continued rail and for other purposes.

S. 1881

At the request of Mr. SASSER, the Senator from Virginia (Mr. HARRY F. BYRD, JR.), the Senator from Delaware (Mr. ROTH), and the Senator from Oklahoma (Mr. BOREN) were added as cosponsors of S. 1881, a bill to provide for the issuance of a commemorative stamp to honor the dedication of the Vietnam Veterans Memorial.

S. 1892

At the request of Mr. HART, the Senator from Connecticut (Mr. WEICKER) was added as a cosponsor of S. 1892, a bill to prohibit the U.S. Government from importing oil extracted in Libya.

S. 1896

At the request of Mr. BUMPERS, the Senator from Georgia (Mr. NUNN), the Senator from Nebraska (Mr. EXON), the Senator from Ohio (Mr. METZENBAUM), the Senator from North Dakota (Mr. BURDICK), the Senator from Arkansas (Mr. PRYOR), and the Senator from Colorado (Mr. HART) were added as cosponsors of S. 1896, a bill to amend the Internal Revenue Code of 1954 to repeal the special leasing provisions enacted by the Economic Recovery Tax Act of 1981.

SENATE JOINT RESOLUTION 121

At the request of Mr. CHAFEE, the Senator from Illinois (Mr. PERCY), the Senator from Minnesota (Mr. DURENBERGER), the Senator from Maine (Mr. COHEN), the Senator from Minnesota (Mr. BOSCHWITZ), and the Senator from Washington (Mr. GORTON) were added as cosponsors of Senate Joint Resolution 121, a joint resolution to provide for the designation of the year 1982 as the "Bicentennial Year of the American Bald Eagle" and the designation of June 20, 1982, as "National Bald Eagle Day."

SENATE JOINT RESOLUTION 130

At the request of Mr. WARNER, the Senator from Illinois (Mr. PERCY), the Senator from New Jersey (Mr. WILLIAMS), the Senator from Iowa (Mr. GRASSLEY), the Senator from Louisiana (Mr. JOHNSTON), the Senator from Alabama (Mr. DENTON), the Senator from Georgia (Mr. NUNN), and the Senator from North Carolina (Mr. EAST) were added as cosponsors of Senate Joint Resolution 130, a joint resolution designating February 22, 1982, the 250th anniversary of the birth of George Washington, a "Day of National Celebration."

SENATE RESOLUTION 238

At the request of Mr. BENTSEN, the Senator from North Dakota (Mr. BURDICK), the Senator from Wyoming (Mr. WALLOP), and the Senator from Pennsylvania (Mr. HEINZ) were added as cosponsors of Senate Resolution 238, a resolution to retain the deductibility from personal taxes of interest paid on residential mortgages.

At the request of Mr. DOLE, the Senator from Missouri (Mr. DANFORTH), the Senator from Maine (Mr. MITCHELL), and his name were added as cosponsors of Senate Resolution 238, supra.

AMENDMENT NO. 639

At the request of Mr. GLENN, the Senator from Michigan (Mr. LEVIN), the Senator from Delaware (Mr. BIDEN), the Senator from Washington (Mr. JACKSON), the Senator from Georgia (Mr. NUNN), the Senator from Arkansas (Mr. PRYOR), the Senator from Kentucky (Mr. FORD), the Senator from Florida (Mr. CHILES), the Senator from Arkansas (Mr. BUMPERS), the Senator from Colorado (Mr. HART), the Senator from West Virginia (Mr. ROBERT C. BYRD), and the Senator from South Carolina (Mr. HOLLINGS) were added as cosponsors of amendment No. 639 proposed to H.R. 4995, a bill making appropriations for the Department of Defense for the fiscal year ending September 30, 1982, and for other purposes.

AMENDMENT NO. 643

At the request of Mr. HOLLINGS, the Senator from Maine (Mr. MITCHELL), the Senator from Michigan (Mr. LEVIN), the Senator from Arkansas (Mr. BUMPERS), the Senator from West Virginia (Mr. ROBERT C. BYRD), and the Senator from Ohio (Mr. GLENN) were added as cosponsors of amendment No. 643 proposed to H.R. 4995, a bill making appropriations for the Department of Defense for the fiscal year ending September 30, 1982, and for other purposes.

AMENDMENT NO. 644

At the request of Mr. HOLLINGS, the Senator from Maine (Mr. MITCHELL), the Senator from Michigan (Mr. LEVIN), the Senator from Arkansas (Mr. BUMPERS), the Senator from Alabama (Mr. HEFLIN), the Senator from Georgia (Mr. NUNN), the Senator from West Virginia (Mr. ROBERT C. BYRD), and the Senator from Ohio (Mr. GLENN) were added as cosponsors of amendment No. 644 proposed to H.R. 4995, a bill making appropriations for the Department of Defense for the fiscal year ending September 30, 1982, and for other purposes.

AMENDMENT NO. 646

At the request of Mr. HEINZ, the Senator from Tennessee (Mr. SASSER), and the Senator from Kentucky (Mr. FORD) were added as cosponsors of amendment No. 646 proposed to H.R. 4995, a bill making appropriations for the Department of Defense for the fiscal year ending September 30, 1982, and for other purposes.

SENATE RESOLUTION 250—RESOLUTION RELATING TO THE MURDER OF SIX AMERICANS IN EL SALVADOR

Mr. KENNEDY (for himself, Mr. PELL, Mr. HATFIELD, Mr. DODD, Mr. CRANSTON, Mr. TSONGAS, and Mr. CHAFEE) submitted the following resolution; which was considered, amended, and agreed to, as follows:

S. RES. 250

Whereas one year has passed since the brutal murder in El Salvador of four American missionaries in December 1980;

Whereas two American labor representatives were mercilessly slain in January 1981;

Whereas these violent acts were perpetrated against American citizens who were in El Salvador only to serve the people of that nation;

Whereas the efforts of the Government of El Salvador have so far failed to bring to justice the individuals responsible for these murders: Now, therefore, be it

Resolved, That the Senate:

Expresses its deep concern over the failure of the Government of El Salvador to bring to justice those responsible for the murders of the six Americans;

Urges the Government of El Salvador to use every legal means available to bring about a just and expeditious resolution of these cases;

Welcomes the Government of El Salvador's recent request for U.S. technical assistance in carrying out these investigations.

Urges the Administration to press for such a just and expeditious resolution.

AMENDMENTS SUBMITTED FOR PRINTING

IMMIGRATION EFFICIENCY ACT

AMENDMENT NO. 645

(Ordered to be printed and to lie on the table.)

Mr. MATHIAS submitted an amendment intended to be proposed by him to the bill (H.R. 4327) to amend the Immigration and Nationality Act, and for other purposes.

RETURN OF STUDENTS AFTER COMPLETION OF THEIR EDUCATION

Mr. MATHIAS. Mr. President, I send to the desk an amendment to H.R. 4327, the immigration efficiency bill, that would correct an injustice in current law that works a tremendous emotional hardship on the children of people who work in this country for international organizations, such as the World Bank and the International Monetary Fund.

I want the record to show that I am fully supportive of H.R. 4327, and I urge its enactment as quickly as possible. We could insure its enactment if we were to adopt my amendment and send the bill back to the House without further amendment. I understand that the House is prepared to act expeditiously to get the bill to the President as quickly as possible, since time is of the essence.

Present immigration laws require that these children return to their parents' country after they complete their education, or if their parents die or retire. This is so even if they have spent most of their lives in the United States. Many of these children think of themselves as Americans and think of America as their home. The homeland of their parents is just another foreign country, and they often do not speak its language. I think we should reconsider our policy of forcing them to leave this country and return to an unfamiliar homeland, when they may have no family or friends there and will never make the adjustment successfully.

In the past few years I have seen many tragic cases with families broken apart by the operation of this unduly harsh law. Let me share with you some of these cases. A man who works for the International Monetary Fund in Washington, D.C., wrote me last year saying:

My daughter . . . (now 21) entered the United States . . . at age 9. She was in the Montgomery County Public Schools, but incompatibility of programs prevented her from getting into a university in the United Kingdom. She is now in her senior year at college in Oregon, and she will graduate in December. What is she to do then? We have no relatives to speak of in the United Kingdom, and I would not know how to advise her to find a job there. Officials say that she should marry an American, but this is unreasonable.

And listen to this story from a concerned parent:

All three of my sons (aged 19, 17, 14) have been here for 11½ years and lost their original national identity through the education process. They no longer speak or read Mandarin Chinese. They act and think as Americans. They face an uncertain future, and this causes all of us great heartache.

A troubled mother writes:

My daughter is now a freshman at the University of Virginia. Her father, who was Iraqi, is now deceased. She was born in Egypt, but has an Iraqi passport. She has no one in Iraq; she cannot live with my elderly parents in Egypt; she cannot live by herself in Egypt (culturally, it is simply not done); and she cannot remain legally in the United States. She has lived for over 17 years in this country.

While this provision of the law works particular hardships on children, it also causes emotional distress to adults who have over the years made the United States their real home while working for these international organizations. When employment with an international organization located in the United States ceases because of death or retirement, widows, widowers, and retired employees are, like their children, forced to leave the United States—no matter how long they've lived here.

The amendment I submit today would make it possible for employees of international organizations and their immediate families to remain in the United States, but only after many, many years of service and residence in the United States. I think such a law would serve the best interest of the United States, the international organizations, and the men, women, and children who live here.

United Nations Secretary-General Kurt Waldheim wrote to me last year and told me that a decision by the U.S. Government to extend such a privilege would represent ". . . yet another expression of the . . . humanitarian traditions of this great country."

My amendment would confer special immigration status on widows, widowers, retirees, and children who have resided in the United States for many years, should they seek such status.

In 1979, I introduced a bill—S. 1566—that was very similar to my amendment. That bill was incorporated into the larger Immigration and Naturalization Efficiency Act, S. 1763, and was favorably reported to the Senate floor by the Judiciary Committee. On the House side, the Immigration Subcommittee adopted a provision of the omnibus bill that dealt with the same issue as my bill, but it was dropped on the House floor because of procedural objections. I regret that the press of business during the last days of the 96th Congress prevented us from taking final action on these bills, but I am encouraged by the fact that the failure of action was prompted primarily by procedural problems not related to the substance of my amendment.

This year we are all trying again. My amendment would lighten the great emotional burden that now weighs on both the parents and children who have become "Americanized". I urge its speedy adoption by my colleagues, and I urge quick action on the larger bill. I ask unanimous consent that the text of my amendment be printed in the RECORD immediately following my remarks.

There being no objection, the amendment was ordered to be printed in the RECORD, as follows:

AMENDMENT No. 645

On page 30, of the engrossed Act, between lines 2 and 3, insert the following:

SEC. 20. (a) Subsection (a)(15)(G) of section 101 of the Immigration and Nationality Act (8 U.S.C. 1101) is amended by adding at the end thereof the following new clause:

"(vi) an alien who, as an officer or employee of any such international organization, has resided in the United States for a period of, or periods aggregating, at least ten years preceding the date of his retirement from the employ of such international organization, and the members of his immediate family;".

(b) Subsection (a)(27) of section 101 of the Immigration and Nationality Act (8 U.S.C. 1101) is amended—

(1) by striking out "or" at the end of subparagraph (F);

(2) by striking out the period at the end of subparagraph (G) and inserting in lieu thereof a semicolon and "or"; and

(3) by inserting after subparagraph (G) the following new subparagrah:

"(H) an immigrant—

"(i) who is an unmarried son or daughter of an officer or employee of an international organization entitled to enjoy privileges, exemptions, and immunities as an international organization under the International Organizations Immunities Act (59 Stat. 669) and who—

"(I) is not more than twenty-five years of age on the date of application for admission to the United States, and who has resided in the United States as a member of the immediate family of such officer or employee for a period of, or periods aggregating at least seven years between the ages of five and twenty-one, or at least ten years, or

"(II) is at least twenty-six years of age on the date of application for admission to the United States, who, before attaining twenty-six years of age, has resided in the United States as a member of the immediate family of such officer or employee for a period of, or periods aggregating, at least seven years between the ages of five and twenty-one, or at least ten years, and who applies for admission to the United States not later than six months after the date of the enactment of this subparagraph; or

"(ii) who is the surviving spouse of a deceased officer or employee of such an international organization, and who has resided in the United States as a spouse of such an officer or employee for a period of, or periods aggregating, ten years preceding the death of such officer or employee, and who applies for admission to the United States not later than one year after the death of such officer or employee or six months after the date of the enactment of this subparagraph, whichever is later; or

"(iii) who, as an officer or employee of any such international organization, has resided in the United States for a period of, or periods aggregating, at least fifteen years preceding the date of his retirement from the employ of such organization and who applies for admission to the United States not later than one year after such date or six months after the date of the enactment of this subparagraph, whichever is later; or

"(iv) who is the spouse or unmarried son or daughter of a retired officer or employee described in clause (iii), or the unmarried son or daughter of a surviving spouse described in clause (ii), accompanying (or intending to join) such retired officer or employee or surviving spouse as a member of his immediate family.".

On page 30 of the engrossed Act, line 3, strike out "Sec. 20." and insert in lieu thereof "Sec. 21.".

DEPARTMENT OF DEFENSE APPROPRIATION, 1982

AMENDMENT NO. 646

(Ordered to be printed.)

Mr. HEINZ (for himself, Mr. ROBERT C. BYRD, Mr. D'AMATO, Mr. FORD, and Mr. SASSER) proposed an amendment to the

bill (H.R. 4995) making appropriations for the Department of Defense for the fiscal year ending September 30, 1982, and for other purposes.

AMENDMENT NO. 647

(Ordered to be printed and to lie on the table.)

Mr. STEVENS submitted an amendment intended to be proposed by him to the bill H.R. 4995, supra.

AUTHORITY FOR COMMITTEES TO MEET

COMMITTEE ON ENERGY AND NATURAL RESOURCES

Mr. STEVENS. Mr. President, I ask unanimous consent that the Committee on Energy and Natural Resources be authorized to meet during the session of the Senate on Wednesday, December 2, until 12 noon, to hold a business meeting to discuss pending calendar business.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON ENVIRONMENT AND PUBLIC WORKS

Mr. STEVENS. Mr. President, I ask unanimous consent that the Committee on Environment and Public Works be authorized to meet during the session of the Senate on Wednesday, December 2, to hold a markup hearing on S. 1692, the ports development bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON ENERGY AND MINERAL RESOURCES

Mr. McCLURE. Mr. President, I ask unanimous consent that the Subcommittee on Energy and Mineral Resources of the Committee on Energy and Natural Resources be authorized to meet during the session on Thursday, December 3, at 9:30 a.m., to hold an oversight hearing on coal exports.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENTS

ADDRESS BY SENATOR CHILES BEFORE THE WHITE HOUSE CONFERENCE ON AGING

o Mr. HEINZ. Mr. President, as chairman of the Special Committee on Aging, I am privileged to serve with Senator LAWTON CHILES as our ranking member. Senator CHILES served as the previous chairman of the special committee and took a leading role in calling the attention of the Congress and the public to the serious problems faced by the social security system and to the opportunities that encouraging continued employment of older workers could foster.

Two days ago Senator CHILES addressed the White House Conference on Aging. I would like to call the attention of my colleagues to his remarks, which are focused upon the four issues of social security, health care costs, crime, and employment. I ask that the text of his speech be printed in the RECORD.

The speech follows:

ADDRESS BY U.S. SENATOR LAWTON CHILES

Thank you. I am honored to be here with the distinguished group of citizens. I'd like to welcome you all to Washington from many different regions of the country. Each of you is part of a beautiful quilt—our Nation. I congratulate you on being selected to participate in this crucial conference—and I commend you for your leadership.

During the next few days, you will be the decisionmakers. Your recommendations will be taken seriously. And, I know that the process you go through will be watched carefully and reported on by the press.

I take very seriously this opportunity to share with you some of my own thoughts and concerns. I would like to take what may be a different approach than that taken by others who will address you.

I believe there has been a tendency by a lot of us to concentrate on listing the problems of older people with little or no mention of their potential. As a result the American public tends to view the older population as dependent and therefore a growing problem. This is such a misconception . . . we know that the majority of the older people in the United States are not dependent.

I am reminded of the comic strip Pogo that I used to read. The possum used to stand in the swamp and tell his friends, "We have met the enemy, and they are us!" We spend so much time concentrating on the problems of ten to twenty percent of the elderly that we lead the public to believe that all of our older Americans are the same.

I want to emphasize strongly that in no way am I suggesting that we ignore the ten to twenty percent who have problems. But I am gravely concerned that the other eighty percent will be overlooked, if you only concentrate your recommendations on the defendant. What expectations are we as a nation to have for, with, or about this other group of twenty-five to thirty million older persons?

My home State has the highest percentage of older persons in the nation . . . now approaching thirty percent of the population. Therefore, I get amused at times listening to people talking about "Can you imagine what it is going to be like in this country in the year 2030 when the percentage of elderly reaches twenty percent?" I don't have to imagine it, we have already passed it! And I am happy to report that we do not have inter-generational warfare or other such terrible occurrences.

Most of the issues brought to me by our more mature population in Florida are much the same as for the younger and middle aged populations. They are concerned about inflation, crime, energy costs, health care costs, unemployment, and the future of social security. I believe that if this country does not come to grips with these issues, not only will we do great harm to the general population, we will continue to force large numbers of our older population out of the independent group into the dependent group.

If I may be permitted a bad pun a few days after Thanksgiving . . . I'd like to talk turkey with you—about four of these issues which represent basic economic and personal security for all older Americans:

Social security—health care—crime—and a new national policy on work and retirement.

SOCIAL SECURITY

There is one overriding issue which—to my way of thinking—should hold the full attention fo every single delegate and observer to this White House Conference on Aging—and that is social security.

Just as issues of income security were the key subjects during your community and State meetings while you were preparing for this national conference—making sure we preserve the solvency of social security has been a key isue in this session of Congress.

It has not been "business as usual" this year here in Washington. Almost all legislative activity—in one way or another—has been directed toward spending cuts and achieving a balanced budget. I would venture to say that there is no one in this country who has not been aware of this fact.

I feel that it has been extremely unfortunate that the most important issue of maintaining the very integrity of the social security system has been snatched up and thrown into this budget cuttinag web.

We should not have had a crisis, but we almost did.

The facts are that—for some time, long before this year—we knew that some adjustments in social security would be needed to get the system over a tight spot expected in 1985 or 1986. There were a number of things we could do without much disruption.

I proposed a combination of interfund borrowing and a gradual phasing out—for future beneficiaries only—of the student and minimum benefit programs. Others have also wanted to temporarily add some general revenues to the system to get over this short term hump.

The numbers showed that interfund borrowing—that is, allowing the retirement fund to temporarily borrow from surpluses in the disability and health insurance funds—could come very near to taking care of the problem entirely. And I personally felt that social security could no longer sustain some of the additional benefits which had been added in later years—such as benefits for college students and the part of the minimum benefit which goes to workers who have paid little into social security.

As it happens, Congress has pretty much reached agreement on this kind of a solution to the—quote, unquote—crisis.

But we haven't gotten there easily.

Someone decided that this situation in social security could be used to cut the Federal budget. This administration sent Congress a proposal to cut social security benefits for everyone—and in amounts which were much more than necessary to take care of the problem.

Congress—and the Nation—soon made it clear that it would not agree to use social security to balance the budget.

But the climate was set. And it has been a battle all year over what we did agree on.

How to handle the minimum benefit, for instance.

There is a big difference between chopping off that social securtiy minimum benefit for those who have been receiving this small amount for years—and deleting it in the future for those who have not yet retired.

The President wanted to cut it immediately for everyone. Many of us in Congress wanted to make sure that it was phased out only in the future.

The President's proposal won—every time we voted on the issue—even though the House and the Senate and even the President have now had a change of mind.

We—and thousands of elderly—never would have had to go through all this if social security had not been forced into that budget cutting process.

But, the solution to the problem is at hand. And once a final agreement on this short term solution is signed into law—it is my hope we will never have to address social security in such a crisis atmosphere again.

And this brings me to my major message to you today:

Congress will have to address it again—and I fear we will be forced to do it in another crisis atmosphere unless this White House Conference takes the leadership now.

My personal goal is to help us all face, as early as possible, the bigger—and really difficult—social security problem coming in thirty years.

That is when the so-called baby boom generation will begin to retire. And that is

when the lower birth rates we now have in this country will result in fewer active workers paying social security taxes.

As the social security system operates now, it simply will not be able to support this large a change in the age makeup of the population. When social security began, there were forty two active workers paying social security taxes to support every one retired worker. Today that ratio is about three to one. In thirty years it is expected to be about two to one.

We cannot escape this. No matter what happens to the economy—no matter how we may change our lifestyles—no matter who is elected President—those numbers are not going to change. The people are already here.

Does that mean that we eventually abandon the social security system? National opinion polls now show that two thirds of today's younger workers seem to think we will. That is unthinkable to me—and I am sure it is to you.

So, what are our options? When I consider this, my first thought is that no matter what adjustment we make—we have to decide right away. Too many people make life-time plans based on social security expectations to allow us to make any major changes without long and careful planning. The longer we have—as a nation—to prepare, the better chance we have of not hurting anyone.

Second, I consider the options we have to meet this challenge. I see three: (1) to reduce benefits, (2) to raise taxes paid by workers, or (3) to delay retirement.

Benefit cuts would have to be large—and taking such action would undermine the basic economic security that social security represents for retired workers.

And I just don't believe that workers could support much larger tax increases on top of those already coming.

So I chose the third option: to gradually phase in a three year increase in the retirement age from sixty five to sixty eight. By doing this a month at a time, beginning in the year 2000, the baby boom retirement bulge could be leveled out enough to meet benefit requirements.

But my own decision to make this proposal—and I must admit it has not been the most popular thing I have ever proposed—was not just based on numbers. I have talked to all the national experts—and to thousands of my own constituents—and I know that more and more people want to work beyond the age of sixty-five. So I also think that this direction is the most positive one we could take.

I am not asking this White House Conference on Aging to ratify this particular proposal. I have given you some of my own reasons for thinking we should move in that direction—you may have other perspectives.

But I am asking this conference to take a stand on this issue.

If you don't, I am afraid that we as a nation will have lost whatever chance we have to come to any timely agreement on strategies for change.

This conference is important. You have influence. There will not be another one for ten years—or there may not be another one at all. It seems clear now that this Congress and this administration may never agree on a way to make sure that social security—basic economic security for all retired workers in this country—is there for your children and grandchildren.

If you, as a group, do not take a stand—I am afraid no one will until it is too late.

HEALTH CARE COSTS

I know that is not the most welcome message. But I have another tough issue of immediate concern—another one which we all must face together. Finding a way to control the inflation in health care costs.

Last year this Nation spent two hundred and fifty billion dollars on health care. Ten years ago it was seventy five billion.

Ten years ago, medicare paid seven and one half billion dollars to hospitals and doctors for services received by medicare beneficiaries. Last year that amount was forty billion dollars.

That is a huge amount of money—but even so, it is less than half of what older Americans pay for medical care. Medicare actually only ends up paying for about forty percent of the total cost of health care for the elderly.

You all know who pays the rest. Some of it comes from other health insurance plans—but most of it comes right out of your own pockets. As long as the cost of health care continues to rise so rapidly, the amount you personally pay will go up too.

The biggest costs are in hospitals. When we drafted legislation to slow down hospital costs two years ago, we kind of got sidetracked by the hospitals. They told us they could hold down their cost increases to about three percent per year on a voluntary basis. But it looks like this year's increase alone is going to be about nineteen percent. I'm not sure what happened to the voluntary program. This is one area where I believe we should look again.

Now, I will admit that we have a problem here in Washington. It is a lot easier for us to look for ways to cut costs by slashing payments—and denying services—than it is to look for ways to cut costs through better services and better service delivery.

But I am convinced this can be done—and you can prod us into doing it.

For instance, we need to put much more emphasis on preventive health care—especially in medicare. And I believe very strongly that we should also concentrate on providing more home care and more outpatient services—rather than continue to rely so heavily on institutional care.

I have watched the support for home care programs grow in Congress in recent years. It has been gratifying to see the changes in medicare and medicaid which we have achieved just in the last two years. The time is right for further action—especially in the States—and I hope this White House conference will become known for its recommendations in home and community care.

COMMUNITY SECURITY

I would like to turn to a third issue which a recent poll revealed as a high concern of many elderly—crime.

Street crime has risen sharply in this country. I know it affects the elderly—because I have heard terrible stories of elderly people barricading themselves in their homes—afraid to go out. Studies show that more than half of our Nation's elderly are afraid of being targets for physical assault and robbery.

I am concerned that not enough is being done to combat this crime, and I have introduced legislation to change this. But combatting crime itself will not alone solve the problems for those elderly who are afraid and isolated.

The problem is rooted in negative attitudes toward the elderly by too many of our young. Many children today don't have the contact with their grandparents and other older people that you and I had when we were growing up. It is too easy for them to view the elderly, especially in large cities, as easy targets. And the vicious circle draws tighter when these elderly isolate themselves even more.

That is just one reason why I believe it is so important to strive for a society where the young and the old have much more positive exposure to one another. I hope you agree with me and will keep this principle in mind in all you do at this conference.

OLDER WORKER POLICY

So far, I know I haven't delivered much good news. I warned you that I wanted to talk to you about issue areas that I thought those of us in Congress would have to face in the very near future.

But there is one more very positive issue I would like to raise. I believe it is the most important challenge we face as a nation. It stands on its own—but it also offers part of the solution to the social security problem I discussed earlier:

I hope and dream that the 1980's will be the decade of the older worker.

A time when our society finally realizes that what older Americans want most is to continue to make major contributions—when we finally decide that we can no longer waste needed skills and talents.

When we prohibit retirement based solely on age—at any age. When we work actively with employers to help them develop new job opportunities for older workers. When we provide incentives to business and industry to retain and hire older workers. When we get rid of the social security earnings limitation. When we create new opportunities for full involvement through community service and voluntarism.

There is a lot of work that needs to be done. And the country is going to need more older workers. That's something that business and private industry must acknowledge and begin to face squarely.

Back when I first decided to run for public office, one of my closest friends recommended that I not run a negative campaign. He pointed out that it might be easy to fall into the trap of talking about what was wrong with my opponent and all the bad things he had done. Instead he suggested that I concentrate on positive aspects in the campaign, what potential there was to bring about favorable results and how I felt I could help in that process. I took his advice, and it was sound. As you move this week toward a recommended "aging policy" for this great country for the next ten years, I would offer that same advice to you. Pull out the positives, use your potential and that of the millions you represent. Set forth achievable goals, and program enhancements using the potential that exists and will exist as you are joined by millions of others over the next ten years.

You have the talent—the means—and, most important, the influence—to solve these problems.

Over the last forty or so years, we have put into place programs at the Federal, State, and local levels which enable our aging population to look forward to remaining independent in their communities. I have no apologies, or regrets for my support and sponsorship of such programs. I pledge to you my intent to continue to do so, and I look forward to receiving your recommendations.●

THE WHITE HOUSE CONFERENCE ON AGING

● Mr. TSONGAS. Mr. President, currently representatives from all over the Nation are meeting here in Washington for the White House Conference on Aging. They are gathering to discuss the needs of our elderly population. They are discussing the Nation's responsibilities to its older citizens. They are highlighting the contributions the elderly have made and continue to make to our great Nation. They are identifying the changing roles of senior citizens in all walks of American life.

These citizens have gathered in good faith. They have come in earnest to educate and to learn. If we open our eyes and our ears we will have a glimpse of the future. If we are fortunate, we will

be a part of that future. But if it is to be the kind of future we want we must broaden and expand our views of the aging process. We must realistically assess the functions and the value of all our citizens.

We frequently hear references to the demographic shift that is taking place in our society. But while this shift is a well-known fact and the statistics are popular to quote, I question if we are taking it as seriously as we should. For television and newspaper ads are saturated with images of young people wearing designer jeans; while a growing segment of our population marches on towards old age. And the commercial image of aging reflect less and less the true picture of growing old in America.

Are we as a nation really preparing for the changes that are taking place in our society, particularly concerning aging? Are we cognizant of the lifestyles, the working lifestyles, that many of our senior citizens are opting for or are being forced into? Are we, as legislators working to meet the challenges presented to us by our elderly population? Are we encouraging them to rise to their fullest potential regardless of their age? I wonder.

I submit for the record an op-ed article which appeared in the Washington Post on November 30, written by Delia Kuhn. Ms. Kuhn succinctly addresses and identifies many of the deficiencies in current thinking on the expanding elderly work force. It is a timely piece and it is a practical attempt to connect our past images of growing old and the realities being faced by our senior citizens today.

If we do not begin to rationally reevaluate and redefine aging and the role of the elderly in our Nation it will be too late. We must act now, compassionately rising to the challenges of today and tomorrow.

The article follows:

OLD?

(By Delia Kuhn)

"Oh you're not old" is the instinctive response if you are getting along in years and allude to the fact. It's as though you are being assured "you're not dirty." But if you are not "old," then what are you? You are "elderly," you are "a senior citizen," you are—heaven forgive us—"mature," an honorable word that used to be reserved for those of all ages who earned it. Occasionally, someone is "older."

Has our language been robbed of a decent word? "Old" still has its uses. We are permitted old wine, old silver and china, old carpets and old furniture, to all of which age still adds value. And we can enjoy old pets, which suggest love. The ancient and honorable word has but one human use: the poor can be "old." Lacking so much else, they have at least that possession.

In his "New Dictionary of Quotations," published when he was 62, H. L. Mencken tells us that Horace, just before he died at 57, lamented that "Waning years steal from us our pleasures one by one; they have already snatched away my jokes, my loves, my revellings and my play."

Since Mencken, life expectancy has grown considerably, chiefly among females. A crude reminder greeted a shipload of American tourists not long ago. Arriving in Manila Bay, they rated a front-page story: "Yesterday the SS Carolina docked in Manila. On board are six hundred American widows whose husbands died of heart attacks while earning the money to make their trip possible."

The idea that old people might become a serious public responsibility and an attractive market for private enterprise dawned in the '30s and burgeoned in the '60s. In the public sector, it created Social Security and Medicare; it shared in poverty programs, such as welfare and food stamps. In the private area, it spawned national membership organizations, old age communities, insurance schemes, small "senior citizen" privileges, countless group tours, television programs. The working session of a third White House conference on aging begins today.

A whole literature is targeted at the "elderly," specifically at the well-heeled. One series of pamphlets is called "Action for Independent Maturity." Start with You and Your new retirement home. Next, You and Your money, You and Your health, You and Your social life—elderly gentlemen have "friends," elderly ladies "dates." Finally, You and Your funeral. These publications block your view of the outside world. There is only one place to look—inward. Is this what you want?

Simone de Beauvoir disposes of this question in her angry book, "The Coming of Age." She recommends "a fairly committed, fairly justified life so that one may go on in the same path even when all illusions have vanished and one's zeal for life has died away."

To warn against an obsession with personal concerns is not to suggest that money is a bad thing. Millions of old people slide into real poverty when they "retire." Must they retire? We Americans are a working people. Leisure has not been a part of our basic culture. Can they afford to retire? Will they become a burden? What would they do?

Do I hate my work? If so, I'll try and change it. What are the chances of getting another job at 60? Forced retirement, with or without pensions, legal at 70, is spreading. Its victims find they have less money, less status, less interest in life. Taxpayers are discovering that they will have to support more and more old people who could be working. When irate stockholders rally against forced retirement, it will be good news.

Must the old be tossed into idleness and poverty so that young people can work? "It is simply not true that there is enough work in the United States," writes Dr. Robert N. Butler, a leading social scientist, in his excellent book, "Why Survive?" "The truth is that our need for goods and social services requires an expanded work force." Butler is for "loosening up our lives," now rigidly programmed into education for youth, work for middle life, idleness for old age. Learning, work and leisure must be available throughout life, he says. Work is, at any age, a deeply rooted and ancient source of community with the human race.

Another hold on life, perhaps even more essential to a tolerable old age, is love. But as families disperse, old people have less chance of remaining physically and emotionally involved with their own kin. And so it is perhaps lucky for the old that they need to love, even more than they need to be loved. Work and love keep alive one's affinity with the human race.

Leonard Woolf, 89, spoke for many of us: "I cannot disengage myself from the real world; I cannot completely resign myself to fate. It is in the pit of my stomach as well as in the cooler regions of my brain that I feel and think about what I see happening in the human ant-heap around me, the historical and political events that seem to me to make the difference between a good life and a bad, between civilization and barbarism."●

THE WEATHERIZATION PROGRAM IN VERMONT

● Mr. LEAHY. Mr. President, I wish to submit for the RECORD a statement lauding the efforts of six employees of Southeastern Vermont Community Action, Inc. SEVCA), who are weatherizing the homes of Vermonters without pay because of budget restrictions.

I share with my colleagues in the Senate an example of dedication to public service which is seldom seen today. After being on a salary for 11 months, six employees of SEVCA are working without pay to continue a weatherization program for Vermonters. They are not being paid, put they should be.

The weatherization program has been plagued by budget cuts and funding problems at the Federal and State levels. The Department of Energy will not release weatherization moneys until January 1, 1982, and the department of social welfare refuses to release funds pending the final decision on the Health and Human Services budget. Consequently, as the cold December winds blow across Vermont, the money available to pay these men evaporates.

SEVCA has weatherized 331 homes so far this year, but it has also been forced to lay off 11 of its 22 workers. Now more men have been laid off, but they continue to work because they know how vital weatherization programs are to Vermonters. They know what budget cuts really mean. They know that people who cannot afford to stay warm will be cold and that their survival may even be threatened.

The contribution that these men are making is to be admired and appreciated by all Americans. Their efforts dramatize a problem which is becoming all too familiar—the underfunding of necessary programs. Their actions exemplify the spirit which has made me proud to represent Vermont in the U.S. Senate and their dedication should be an inspiration to us all.●

RETIREMENT OF LIEUTENANT GENERAL PIXLEY, SURGEON GENERAL

● Mr. DIXON. Mr. President, at this time I would like to bring to the attention of the Senate the retirement of Lt. Gen. Charles Pixley, M.D. as surgeon general of the U.S. Army. On December 31, 1981, Lieutenant General Pixley will retire from 35 years of meritorious service to the Army and to his country. In the latter stages of his career, Dr. Pixley has taken upon himself very important responsibilities and fulfilled them as only a man of his great knowledge, patience, and most of all ability, could.

From February 1973 through August 1975, Dr. Pixley served as Director of Health Care Operations for the Army to the surgeon general, and with his direction and oversight many important programs vital to quality health care in the Army were instituted and carried out. Such things as quality assurance standards for hospitals, clinics, and regional laboratories became workable systems, as were alcohol and drug abuse prevention, patient administration and biostatistics, and medical international contingencies and operations programs.

After his tenure with health care operations, Dr. Pixley was named com-

mander of the William Beaumont Army Medical Center, in September 1975. With this job, he was charged with the arduous task of administrating a $28 million budget, 3,000 staff personnel, and 13 fully accredited graduate medical programs. As commander of WBAMC, Dr. Pixley achieved numerous professional advances which resulted in a magnification of the William Beaumont's facility's reputation as a teaching hospital, which was a definite positive show of Dr. Pixley's great administrative and medical capabilities. After proving his abilities at WBAMC, he was named superintendent of the academy of health services, U.S. Army.

Then, in October 1977, Dr. Pixley dedicatedly and selflessly accepted the position of most importance and responsibility in U.S. Army medicine: Surgeon General of the Army. This job brings great responsibility and requires utmost dedication and perseverance. As Surgeon General, Dr. Pixley was charged with the oversight of the worldwide health care of the U.S. Army, a budget of $1.5 billion and the technical supervision of more than 89,000 medical professionals, allied health care providers, paramedics, and administrators. As he had done in every other position he had held in Army medicine, Dr. Pixley proved himself true to the task. He continues in this capacity, and will up to the point of his retirement on December 30.

General Pixley's brilliant military record and dedicated devotion in the service of his country represent significant achievements in the most cherished tradition of the U.S. Army, and reflect distinct credit upon him and the Army Medical Department. On behalf of the U.S. Senate I would like to thank Lt. Gen. Charles Pixley for his many years of superior service to the Army, to medicine, and to our country.●

A FINE CELEBRATION OF THE IRISH

● Mr. MOYNIHAN. Mr. President, the American Irish have much history to celebrate, and it is for good reason that the American Irish Historical Society has been gathering for 84 years to take note of those proud traditions. This year's annual banquet was especially grand as the society elected to honor the President of the United States with its highest honor, the Medal of the American Irish Historical Society.

Two Presidents that evening delivered memorable addresses which I should wish to share with my colleagues. The first came from the master of the occasion, my dear friend Dr. Kevin M. Cahill, the president-general of the society. His remarks were succinct, but profound, sensitive, and insightful.

The other speech came from an American similarly proud of his Irish ancestry and who was the honored guest of the evening—Ronald Reagan. The President's address delighted an appreciative audience as he spoke sentimentally of his family's heritage.

Mr. President, knowing that my colleagues will enjoy both these speeches, I ask that the remarks of President Reagan and President-General Cahill from the evening of November 6, 1981, be printed at this point in the RECORD.

The speeches follow:

AMERICAN IRISH HISTORICAL SOCIETY ADDRESS

(By K. M. Cahill, M.D.)

Mr. President; Your Eminence, Cardinal Cooke; as a personal representative of the Prime Minister of Ireland we have with us Special Advisor to the Government, Mr. Alexis Fitzgerald and Mrs. Fitzgerald; representing our sister cultural societies in Ireland, Sir John and Lady Galvin, Frank and Eily Patterson of whom you shall hear shortly, previous Medalists and Presidents of our Society, Fellow members and your guests, Ladies and Gentlemen:

DREAMS, REALITY, TRADITION

Eighty five years ago a group of immigrant realists gathered, unheralded, in a cold Boston hotel room, and dreamed, not of the ancient past, but of a better future—for America and Ireland, and they began the tradition that we experience once again this evening.

Out of steerage and fear and poverty they determined that the annual meeting of this Society should be held at a banquet, much like the Pilgrims celebrated their arrival in America—and their survival in a strange new land—with a feast of Thanksgiving. So, If we are able to dine tonight on five gourmet courses we do so as the descendants of those who taught us to share our bounty, and enjoy—with food and drink—the land that is ours.

Our Founders were obviously dreamers, and I suspect they would not be surprised to find us here on this great night. The Irish immigrant worked hard to see his dreams become reality—there are few ditches in this city he didn't dig, and the train tracks and canals that opened this nation were lubricated with American-Irish sweat and determination. But those men and women left behind—even in the throes of their poverty—dream-like cathedrals so the rest of the community would know of their faith and their heritage. From the dreams of the frightened hordes that fled the Irish Potato famine in 1845 came that great Irish expression of trust and confidence that epitomizes New York, the church of our beloved Cardinal, St. Patrick's Cathedral.

Today our dreams continue. I once courted my wife with the lovely lines of Yeats:

"Had I the heavens embroidered clothes,
Enwrought with the golden and silver light,
The blue and the dim and the dark clothes
Of night and light and the half light,
I would spread the clothes under your feet.
But I, being poor, have only my dreams.
I have spread my dreams under your feet
Tread softly, because you tread on my dreams."

We still dream—as did our immigrant ancestors—of an even better life for our children, of an America that fulfills her potential for all, particularly for the poor and oppressed who bear the burden our fathers and mothers fought against. We dream of an Ireland in peace and prosperity, as American descendants of those who dreamed and worked so hard we have a tradition, and indeed an obligation, to help end the pain and suffering that now scars a land the Founders of this Society asked us not to forget.

I have spoken briefly of dreams, reality and tradition. I have fulfilled my mandate to deliver, once again, the required address by the President-General to this Society's annual banquet.

I suspect that I have inherited some of the well-known Celtic need to communicate, and if you feel I have rambled on a bit may I remind you that the records of our Society contain annual reports by my predecessors that clearly lived up to the highest expectations of an oral culture, for at least one speech I know went on for several hours. But I equally suspect you came not to hear further details of our activities, and besides I have tried to summarize these in the Introduction to our annal book the Recorder.

You came to join me in honoring an American of Irish extraction who holds the highest office in our land. My version of his biography is in your Recorder, and need not be repeated now, but the Ballypooreen origins, and the rise from a humble home in Tampico to the White House is both the dream and the reality this Society celebrates.

It is a privilege to bestow on Ronald Wilson Reagan, President of the United States of America, our highest award, the Medal of the American Irish History Society.

REMARKS OF THE PRESIDENT AT THE EIGHTY-FOURTH ANNUAL DINNER OF THE AMERICAN IRISH HISTORICAL SOCIETY

The PRESIDENT. Thank you. Thank you very much.

Dr. Cahill, I thank you and all those who are responsible for this great honor. And I want to say that I happen to know that there is one among us here who has known also today the same joy and even greater, if possible, that I could feel, and that is Dr. Cahill himself who this morning was presented by Cardinal Cooke on behalf of the Pope the Grand Cross Pro Merito Melitensi (Applause.) He is the first American to ever receive this award (Applause.).

Your Eminence, the other clergy here at the head table, the other distinguished guests, and one in particular that I might pick out and mention, Teddy Gleason of the International Longshoremen's Association (applause). And I mention him because on Sunday he is going to celebrate the 42nd anniversary of his 39th birthday. (Applause.)

Teddy, I have found that for some time it makes it much easier to greet each one of these annual occasions.

But I do thank you very much. There is the legend in Ireland of the happy Colleen of Ballisodare who lived among the wee people, the tiny people for seven years and then when she came home discovered that she had no toes. She had danced them off. I feel happy enough when I get home tonight I am going to count mine. (Laughter.)

Nancy is sorry that she could not be here, and so am I. She sent her warm regards and her regrets. Unfortunately, the last trip into town she picked up the bug.

Now, I am happy to say that is not a situation for me like the two sons of Ireland who were in the pub one evening and one asked the other about his wife. And he said, "Oh, she's terribly sick." He said, "She's terribly ill." And the other one says, "Oh, I'm sorry to hear that." But he said, "Is there any danger?" But he said, "No. She's too weak to be dangerous anymore". (Laughter.)

A writer for the Irish press who was based in Washington, a correspondent for the press there, stated to me the other day—or stated the other day about me that I have only recently developed a pride in my Irish heritage or background and that up till now I have had an apathy about it. Well, let me correct the record. That is not so. I have been troubled until fairly recently about a lack of knowledge about my father's history.

My father was orphaned at age six. He knew very little about his family history. And so I grew up knowing nothing more beyond him than an old photograph, a single photo that he had of his mother and father and no knowledge of that family history. But somehow a funny thing happened to me on the way to Washington (Laughter.) When I changed my line of work about a year ago. It seemed that I became of a certain interest to people in Ireland who very kindly began to fill me in. And so I have learned that my great grandfather took off from the village

of Bally Poreen in County Tipperary to come to America. And that isn't the limit to all that I have learned about that.

Some years ago when I was just beginning in Hollywood in the motion picture business, I had been sentenced for the few years I'd been there to movies that the studio didn't want good, it wanted them Thursday (Laughter.)

And then came that opportunity that every actor asks for or hopes for and that was a picture that was going to be made and the biography of the late Knute Rockne, the great immortal coach of Notre Dame. Pat O'Brien was to play Rockne. And there was a part in there that from my own experience as a sports announcer I had long dreamed of, the part of George Gip. And generously Pat O'Brien, who was then a star at the studio, held out his hand to a young aspiring actor, and I played Gip. Pat playing Rockne, he himself will say, was the high point of his theatrical career. My playing the Gip opened the door to stardom and a better kind of picture.

I've been asked at times what's it like to see yourself in the old movies, the re-runs on t.v.? It's like looking at a son you never knew you had. (Laughter) But I found out in learning about my own heritage, going back to Bally Poreen, that believe it or not what a small world it is, Pat O'Brien's family came from Bally Poreen. (Applause.)

But I've been filled in much more since. An historian has informed me that our family was one of the four tribes of Tara and from the year 200 until about 900 A.D., they defended the only pass through the Slieve Bloom Mountains, they held it for all those centuries and adopted the motto, "The Hills forever." And that too is strange because for the better part of nine months now, I've been saying much the same thing, only in the singular, "The Hill forever." (Applause.) Capitol Hill, that is. (Laughter.)

I do remember my father telling me once when I was a boy, and with great pride he said to me, "The Irish are the only people in the country in America that built the jails and then filled them." (Laughter.) I was a little perturbed even then at that tender age because at the sound of pride in his voice and from the way I had been raised, I couldn't quite understand why that was something to be proud of until I then later learned, which he had never explained to me, that he was referring to the fact that the overwhelming majority of men wearing the blue of the police department in America were of Irish descent. (Applause.)

You know, those weren't the only jobs that were open to the Irish. Back in the high day of Vaudeville, long before sound pictures drove it out, there were, very popular in this country, comedians who would reach great stardom in Vaudeville with a broad German accent. German comedians coming on "Ach and himmel Sie der."

What is little known in show business is that almost without exception, they were Irish. Their wit and humor that made them comedians they came by naturally and honestly. I was on a mission to England for our government some ten years ago. I should say to Europe, to several countries and finally wound up and the last country was Ireland.

On the last day in Ireland I was taken to Cashell Rock. I didn't know at that time that it is only 25 miles from Bally Poreen. But I do know that the young Irish guide who was showing us around the ruins of the ancient cathedral there on the rock finally took us to the little cemetery. We walked with great interest and looked at those ancient tombstones and the inscriptions.

And then we came to one and the inscription said: "Remember me as you pass by, for as you are, so once was I. But as I am, you too will be, so be content to follow me." That was too much for the Irish wit and humor of someone who came after because underneath was scratched: "To follow you I am content, I wish I knew which way you went." (Applause and laughter.)

But the Irish, like many, a great many of the people and like my grandfather, great-grandfather, were driven to the new world by famine and by tragedies of other kinds. The Irish, they built the railroads, they opened the West wearing the blue and gold of the United States cavalry. There was John L. Sullivan, the heavyweight champion of the world, writers like Eugene O'Neill, clergy like Cardinal Cooke, and even—(applause)—physicians to the Pope like Dr. Cahill. (Applause.)

And it goes all the way back in our history. George Washington said, "When our friendless standard was first unfurled, who were the strangers who first mustered around our staff, and when it reeled in the fight, who more brilliantly sustained it than Erin's generous sons?" (Applause.)

And a century and a half later, who else than George M. Cohan would write of the Grand Old Flag, the Stars and Stripes and Yankee Doodle Dandy, with the line, I'm a real live nephew of my Uncle Sam." There must have been a devine plan that brought to this blessed land people from every corner of the earth and here, those people kept their love for the land of their origin at the same time that they pledged their love and loyalty to this new land, this great melting pot. They worked for it, they fought for it, and yes, they died for it. And none more bravely than Erin's generous sons.

Tragedy, as I've said, very often was the impetus that sent many to America. Today, as it's been said here already tonight, there is tragedy again in the Emerald Isle. The Cardinal prayed and His Holiness plead for peace when he visited Ireland. I think we all should pray that responsible leaders on both sides and the governments of the United Kingdom and the Republic of Ireland can bring peace to that beautiful Isle once again. (Applause.)

Once again, we can join John Locke in saying, "Oh, Ireland, isn't it grand you look like a bride in her rich adornment. And with all the penned up love in my heart, I bid you top of the morning." (Applause.)

No, I have no apathy, no feeling at all. I am just so grateful that among the other things that happened when I was allowed to move into public housing (laughter)—I had a chance finally to learn of the very rich heritage that my father had left me. And I can only say once again, with heartfelt thanks, I wear this and take it home, with a feeling of great honor, and say something that I know to all of you is as familiar as "top of the morning" or anything else. That is, "May the road rise beneath your feet, the sun shine warm upon your face, and the wind be always at your back. And may God, until we meet again, hold you in the hollow of his hand."

Thank you. (Applause.)●

S. 842 AND ALASKA LANDS

● Mr. TSONGAS. Mr. President, I am sure that my colleagues remember well the struggle which this body engaged in during the last Congress over the ultimate resolution of the Alaska National Interest Lands Conservation Act. While many have hailed this act, and deservedly so, as our Nation's greatest conservation legislation in this century, I am sure my colleagues will remember that the bill was in fact a bipartisan compromise.

That compromise was not easily achieved. It took place over a period of weeks, during which virtually every boundary of every conservation unit, as well as the difficult problems of energy exploration and development, mining access, future transportation routes, sport and subsistence hunting, State and Native land selection, and the survival of the southeast Alaska timber industry were closely examined.

In no other area of the Alaska lands bill was compromise more difficult for each side than in the case of the Forest Service wilderness proposals in southeast Alaska's Tongass National Forest. Here conservationists ardently fought for wilderness areas which have become familiar names: Admiralty Island, Misty Fjords, West Chichagof, and Strikine-LeConte. On the other side were the important considerations of providing for a stable timber industry in Alaska. The compromise did not come easily, but it was approved overwhelmingly by the Senate.

Now there is a major threat to the national forests and their wilderness resources. It is the so-called nationwide "release" legislation. In this Chamber, it is represented as S. 842, the so-called "RARE II Review Act of 1981." This bill has many flaws which I will not discuss today.

Central to it, however, is a provision prohibiting any national forest wilderness review and directing the Forest Service toward nonwilderness management of Forest Service lands in 40 States. Beyond amending the National Forest Management Act and the Resources Planning Act to accomplish that end, it amends three wilderness/"release" laws passed by the Congress last year, one of which is the Alaska Lands Act.

The compromise reached in H.R. 39, the Alaska Lands Act, provided for approximately 5½-million acres of wilderness on the Tongass National Forest. This was less than the amount recommended by the administration, and it was far less than the amount contained in the bill first passed by the House and in the wilderness amendment which was offered by myself and Senators ROTH and McGOVERN last year.

The compromise resulted in wilderness exclusions for mining in Misty Fjords and Admiralty Island, an exclusion from the Admiralty Island National Monument for the Shee Atika Native Corp., drawing back the wilderness boundary of the West Chichagof-Yakobi for timber purposes, and the deletion of the Karta and Duncan Canal wilderness proposals from the legislation in order to insure that the timber volumes of the Tongass National Forest would be high enough to provide for steady employment in the local timber industry.

And that was not all. To satisfy those who were concerned about the health of the industry, we added section 705. It provides an authorization that the Secretary of the Treasury "shall make available to the Secretary of Agriculture a sum of at least $40 million annually, or as much as the Secretary of Agriculture finds is necessary to maintain the timber supply from the Tongass National Forest to dependent industry at a rate of 4,500,000,000 board feet measure per decade. Such sums will be drawn from receipts

of oil, gas, timber, coal and other natural resources collected by the Secretary of Agriculture and the Secretary of the Interior, notwithstanding any other law provided for the distribution of such receipts."

Beyond this, the Secretary was authorized and directed to establish a special program of "insured or guranteed loans to the purchasers of national forest materials in Alaska to assist such purchasers in the acquisition of equipment and the implementation of new technologies which lead to the utilization of wood products which might not otherwise be utilized." The Secretary may determine the eligibility requirements for those loans, and the conditions of the loans. To carry out the loan program, there was an additional authorization of $5 million directly from national forest funds receipts to be placed in a special revolving fund.

This is not all. To see that the timber industry in southeast Alaska is able to thrive, the Secretary of Agriculture was directed to prepare and transmit a study of opportunities to increase timber yields on the national forest system lands in Alaska. Section 706 provides that the Secretary of Agriculture shall monitor the timber supply and report annually thereon to the Committee on Energy and Natural Resources and its counterpart in the other body. And if at any time after the enactment of the law, the Secretary finds the available land base in the Tongass National Forest is inadequate to maintain the timber supply at a rate of 450 million board feet per year, he will inform the Congress.

Furthermore, it provides that 5 years from the December 1981 date of enactment, and every 2 years thereafter, the Secretary shall review and report to the Congress on the status of the Tongass National Forest and that this report should include the timber harvest levels in the forest since enactment and the impact of wilderness designation on the timber, fishing, and tourism of southeast Alaska.

But even this unprecedented assurance to the timber industry was not all. In addition, we include in the Alaska Lands Act a provision called the "release clause" (sec. 708) which effectively guarantees that wilderness advocates cannot delay the implementation of the RARE II review or the Tongass National Forest land management plan through dilatory lawsuits. This language which was urged on me by my colleagues from across the aisle was the same as that which also was incorporated in the Colorado wilderness bill last year and which was first incorporated in the California wilderness bill passed by the House in 1980.

Those bills set a standard for handling wilderness in RARE II release on national forest lands throughout the country. It was at the insistence of my colleagues that we included it in this compromise to give the timber industry in southeast Alaska the same assurances that the timber industry in the lower 48 negotiated following the completion of RARE II wilderness legislation. The same release provision was subsequently incorporated in a New Mexico wilderness bill which passed the Senate and the House and was signed by President Carter in December.

Now, my colleagues should be aware that the so-called "RARE II Review Act of 1981," S. 842, would be the first major amendment to the Alaska National Interest Lands Conservation Act. It would provide that, in addition to all of the other privileges, guarantees and funding assurance for the timber industry in Alaska, the Forest Service may never again consider wilderness in its land use plans for even 1 acre of the Tongass National Forest or the Chugach National Forest, notwithstanding any other provision of law.

S. 842 as introduced is not explicit on this point. But it is there nonetheless. It is explicit in the companion measure introduced in the House, H.R. 4047. And it is provided for in the comments which the Reagan administration has sent to Chairman MCCLURE in his consideration of this bill in the Energy Committee. Let me quote to you from Secretary Block's letter of June 25:

> It is our understanding that S. 842 would not modify or amend in any way the designations or the boundaries of any wilderness legislation previously enacted. However, the bill would apparently supersede the so-called release language included in certain of the legislation enacted by the 96th Congress to provide for permanent release. We believe it would be desirable to incorporate appropriate language in the bill to clarify this point, and provide for the same release of all the nonwilderness RARE II areas.

The language is:

> SEC. 5. The Congress determines and directs that:
>
> (a) National Forest System lands (1) not identified by section 3 as Lands Recommended For Wilderness or (2) not identified by section 3 as Lands Requiring Further Planning, including certain lands heretofore in primitive areas and wilderness study areas, and (3) not heretofore specifically designated by Act of Congress as wilderness or Intended Wilderness under the Alpine Lakes Area Management Act of 1976, shall, notwithstanding any other provision of law including section 708 of the Alaska National Interest Lands Conservation Act (94 Stat. 2371, 2421), section 104 of the Act of December 19, 1980 (94 Stat. 3221, 3224), and section 107 of the Act of December 22, 1980 (94 Stat. 3265, 3270), be managed for multiple uses other than wilderness, unless otherwise directed by Act of Congress, and shall be deemed, for purposes of all present and future land management plans, and associated environmental impact statements, required for such lands by the Forest and Rangeland Renewable Resources Planning Act of 1974, as amended by the National Forest Management Act of 1976, to have been given adequate consideration of the suitability of such lands for inclusion in the National Wilderness Preservation System.

There can be no doubt about the intended purpose of this bill. It would override any law which stands in its way. It would mandate that there could never again be any consideration of wilderness by professional foresters most capable of making such reviews. Furthermore, the Alaska Lands Act would be overridden on this most divisive compromise point.

I do not believe it is wise to reopen the Alaska lands debate at this time. Are we ready to take a major amendment to the most difficult portion of the Alaska National Interest Lands Conservation Act less than 1 year after having worked out the compromise? Or, will we see whether the provisions that we wrote for the timber industry are adequate?

I, for one, do not believe any more needs to be given to the timber industry in Alaska. I stand ready to defend that act against such a major amendment. And it is my sincere belief that my colleagues from both sides of the aisle who participated in the compromise and who ultimately supported this package last Congress will continue to support it this year. If the southeast Alaska issue is reopened, it will not again be easily closed.●

HENRY PILLARD

● Mr. DIXON. Mr. President, I would like to call to the attention of my colleagues the splendid work done in my State—but for the benefit of young athletes from all over the world—by a gentleman named Henry Pillard.

Henry Pillard is the coach of wrestling at the Joliet Community College, in Will County, Ill. In that capacity, over a number of years, he has done particularly well what many teachers do: He has instilled in young people the values of hard work and honorable competition that are of such importance in helping them complete the difficult passage into adulthood.

In addition to that work, which has been of so much value to his local community, Henry Pillard has made a great contribution to the world of international amateur athletics, and to the ability of U.S. athletes to compete in that world.

Since 1977, the Amateur Athletic Union has held, and Henry Pillard has directed, the Joliet International AAU Wrestling Tournament.

It has come to be accepted as the premier international wrestling event held within the United States, and it brings top quality wrestlers from all over the world to Joliet to compete against our own wrestlers.

Those in the wrestling community are agreed that this opportunity to compete annually against the world's best wrestlers has made a great contribution toward improving the quality of American wrestling.

And in 1980, when the United States did not compete in the summer Olympic games, the Joliet International Tournament served as something of a surrogate event for American wrestlers, allowing them to compete at least once in that year with the best wrestlers from around the world.

Mr. President, in a comparatively short period of time, Henry Pillard has contributed a great deal to many people through his direction of this competition.

To the athletes, of course, and to the followers of amateur wrestling; to his own school, by elevating it to a position of considerable respect within the athletic community; and to the citizens of Joliet, many of whom open their homes

to accommodate the athletes of many nations who come to that town once a year.

The value of this cultural and athletic exchange cannot be underestimated, and so today I commend to my colleagues the efforts of Mr. Pillard and congratulate him on a job well done.●

A PLEA TO CEASE PERSECUTION OF ANDREI SAKHAROV AND HIS FAMILY

● Mr. MOYNIHAN. Mr. President, this morning's New York Times contains a letter to the editor authored by Lipman Bers, Davies professor of mathematics at Columbia University and signed by 24 members of the National Academy of Sciences—11 of whom are Nobel laureates. This letter, eloquent in its simplicity, is a plea to the leaders of the Soviet Union that they cease their persecution of Andrei Sakharov and his family.

The news from Gorky is no better today than it was last week. Dr. Sakharov and his wife continue their hunger strike with firm resolve. And with each passing day Dr. Sakharov's health is further imperiled. It would be so simple for the Soviets to bring this tragic matter to an acceptable conclusion. They need only permit an exit visa for one young woman in Moscow; they need only permit an anguished girl her basic human right. Mr. President, I ask that Professor Bers' letter to the editor be printed in the RECORD.

The letter follows:

THE SOVIET STATE VERSUS ONE COUPLE

To the Editor: We are deeply concerned about our admired colleague Andrei Sakharov, who, together with his wife, has declared a hunger strike in the Soviet Union.

This extreme act shows how desperate the Sakharovs are about the fate of Yelizaveta Alekseyeva, who is betrothed to Mrs. Sakharov's son Aleksei Semyonov. (Yelizaveta was, in fact, married by proxy to Mr. Semyonov in Montana last June.) Semyonov lives in Massachusetts, and Yelizaveta was refused permission to emigrate. The Sakharovs feel that Yelizaveta's life is being ruined in order to punish them.

What possible harm to the Soviet state could result from this young woman's emigration? We appeal to the Soviet authorities to let her go.

This appeal is being signed by me on my own behalf and on behalf of the following members of the National Academy of Sciences [the first 11 of whom are Nobel laureates]:

Nicolaas Bloembergen, Owen Chamberlain, Val L. Fitch, Paul J. Flory, Donald Glaser, Sheldon Glashow, Robert Hofstadter, Edwin McMillan, Burton Richter, Samuel C. C. Ting, George Wald, James D. Bjorken, Sidney D. Drell, Samuel Ellenberg, Herman Feshbach, Thomas Gold, Leon M. Lederman, Joaquin M. Luttinger. Herbert E. Robbins, Malvin A. Ruderman, Edwin E. Salpeter, Victor Weisskopf, John A. Wheeler, Chien-Shiung Wu.●

NOTICE OF DETERMINATION BY THE SELECT COMMITTEE ON ETHICS

● Mr. WALLOP. Mr. President, it is required by paragraph 4 of rule 35 that I place in the RECORD this notice of a Senate employee who proposes to participate in a program, the principal objective of which is educational, sponsored by a foreign government or a foreign educational or charitable organization involving travel to a foreign country paid for by that foreign government or organization.

The Select Committee on Ethics has received a request for a determination under rule 35 which would permit Ms. Margaret Berlin, of the staff of Senator DOLE, to participate in a program sponsored by a foreign educational organization, Tamkang University in Taipei, Taiwan, from November 23 to December 2, 1981.

The committee has determined that participation by Ms. Berlin in the program in Taiwan, at the expense of Tamkang University, to discuss the political and legislative systems of the United States and Taiwan, is in the interests of the Senate and the United States.●

OLDER AMERICANS

● Mr. CHILES. Mr. President, I wish to share with my colleagues the recent address given by Senator HEINZ, the distinguished chairman of the Senate Special Committee on Aging, to the 1981 White House Conference on Aging. Senator HEINZ provided to the conference valuable insights on the challenges it faces in formulating policy recommendations to improve the lives and well-being of our older citizens. These are challenges the Congress faces as well and I believe that every Senator will benefit from a reading of Senator HEINZ' remarks. He points out that we must deal with difficult and perplexing questions in terms of the future of social security and the delivery of quality and cost-effective health care. I am also very pleased to note the Senator's emphasis on the important role the older American should and must play in continuing to contribute to our society and economy.

Mr. President, I ask that the text of Senator HEINZ' speech be printed in the RECORD.

The text follows:

SPEECH BY SENATOR JOHN HEINZ

It is a privilege to share this podium with not one, but two former colleagues, Dick Schweiker and my former House Colleague, with whom I worked so long and hard to create the House Select Committee, CLAUDE PEPPER. And it is a high honor, indeed, to address this great conference. The 1981 White House Conference on Aging could not convene at a more critical time, and the issues you must address are far more difficult than those that confronted your predecessor conferences.

The 1961 and 1971 White House Conference on Aging produced dramatic change on behalf of our elderly. The 1961 conference addressed urgent basic needs and resulted in the creation of two major programs to improve health care for older men and women. Today, 95 out of every 100 older Americans benefit from Medicare and some 4 million older people with low incomes benefit from Medicaid.

The 1971 conference looked beyond basic survival needs and urged services to strengthen the independence of older people in the home and community. The result, in part, was The Older Americans Act Amendments of 1973 vastly strengthening services and the addition of Title XX services to the Social Security Act. In vesting virtually all service delivery responsibilitites with States and local government, the initiatives of the 1971 Conference were years ahead of their time.

These Conferences literally pioneered public policy for older Americans. You are expected to chart no less ambitious a course, but you are here in much more difficult circumstances.

1961 and 1971 were times of relative economic plenty. Inflation was minimal. The labor force was growing and better paid each year. Productivity was increasing at 3 percent annually. The American standard of living was increasing each and every year. And it was politically popular, as well as morally right, to ensure that every American received a reasonable share of that real economic growth.

Today, we face a more hostile world. We have experienced no real growth for the last five years. We have just experienced for the third time in the last two years interest rates of over 20 percent, with all the unemployment and hardship that this implies. And we are in the midst of a deep recession.

And yet today, as this White House Conference on Aging begins, I want to suggest to you that this Conference perhaps holds the key to both the material and spiritual revitilization of America.

I believe you will agree that the central challenge to this Conference is not just to ensure economic security or adequate health care or housing services—important as these are—but to recommend and embrace policies designed to endow older men and women with more genuine opportunities for self-fulfillment.

Let me explain why I believe that meeting this challenge is the key to realizing a better America. Everyone here is aware that the age distribution of the population will be shifting dramatically over the coming decades. The financial difficulties social security faces in the future are a direct result of the expected larger percentage of older persons in our population. But the aging of our population alone does not fully define the challenge. First, we must understand the implications of these changes for our continued economic well being.

Our standard of living is the product of the number of people in the workforce times what the economists call "productivity" or "out-put per man hour," and then divided by our population.

The population of the U.S. is expected to increase 15 million in this decade and 10 million in the 1990s.

So the only way we can maintain or increase our standard of living, without unprecedented increases in productivity, is to continue to increase the size of our workforce. The largest single group of people in our workforce, comprising about 70 percent of those with jobs, are those who are 44 years of age or younger.

The striking fact is, that by the end of this decade, that group will stop growing and actually start declining in actual numbers.

What that means is that we, as a nation, will continue to grow and prosper in the next decade only if able bodied, healthy Americans, who today are in their late forties or fifties or even early sixties, have the opportunity and incentive to work and to fully and freely participate in our society.

I suggest, therefore, that the ability of this Conference to promote the greatest use of the talents, skills and experience of this future group of older persons will be vital to our Nation's continued standard of living—and our efforts to maintain and improve upon all we have tried to do for people.

The Special Committee on Aging has made a particular effort to examine the full implications of this significant change in many critical areas of public policy affecting the elderly.

As Chairman of the Special Committee, I have directed our efforts into three areas that I believe will be of special interest to this Conference.

First, and foremost, is economic security. When we speak of self fulfillment or increasing areas of choice for the elderly in the future, we cannot forget the role economic security plays in making choice possible. Through Social Security, we have established a solid foundation for young and old alike to achieve economic security in their later years. To assure these choices remain for the future, the basic benefit structure of Social Security must be maintained.

In the short run, Social Security has run into financing difficulty because the economy has failed to continue to grow. In the long run, a mounting deficit is expected because Social Security will have to support a higher proportion of retired persons on a smaller base of contributing workers.

I suggest that this Conference must be willing to face squarely all serious proposals for a solution. According to the conventional wisdom, there are three basic options—none necessarily exclusive of the other—but nonetheless only three: increase payroll taxes, reduce benefits, or finance the deficit through general revenues. None of these options are popular.

For example, some suggest financing the OASI deficit out of general revenues. But the problem is that we have no surplus of general revenues, only deficits. Sadly, we have had budget deficits in each of the last 12 years and in 23 out of the past 25 years. And the future outlook is no better. Any proposal along these lines must take these realities into account.

We need to look beyond the conventional wisdom for new and better ideas.

For example, a different approach to controlling Social Security costs is the Social Security Option Account, where all workers would continue to pay Social Security taxes, but those who chose to reduce their future Social Security benefits could contribute a portion of their wages to an IRA-type of Social Security Option Account. The results would be less future payments, the same revenues and a fiscally sounder trust fund.

There may, undoubtedly, be other and better options. We look to the wisdom of this Conference to make the kind of recommendations that will help us restore fiscal stability and confidence in the social security system.

The second issue of major concern is health care. Despite the vast improvements that have resulted from Medicare and Medicaid, many elderly people cannot afford the care they require—or they are unable to obtain the level of care they need. The health care system must be reformed to make it more responsive and less costly.

We must deal more creatively with the problem of cost. The cost of Medicare is doubling every four years, not because older people are getting more care or better care, but because the price of the same care has risen dramatically. Some people suggest that the way to hold down health care costs is to simply ask the elderly to pay a larger and larger share of the cost. Such simplistic suggestions will do virtually nothing to halt the runaway inflation in health care, but will penalize the poorest and should be rejected. Instead, we need to find effective means to thoroughly reform the health care system in a way that improves consumer choice and provides the incentive for the efficient delivery of quality health care.

One way to do this is by permitting Medicare to pay the cost of enrollment in Health Maintenance Organizations and other prepaid health plans that offer the same or better benefits as Medicare, but at no more or lower costs.

The other major health care issue of the future we must address is long term care. Public and private spending on Long Term Care was $10 billion in 1975 and rose to nearly $21 billion in 1980. It is expected to double again by 1985.

In part, our present reimbursement policies under Medicaid have produced a system that too often results in institutional placement that is unnecessary, expensive and which isolates people from their families and communities.

As this Conference examines more suitable delivery systems for continued care of the elderly in their homes, I hope you will look carefully at what we call "Title XXI," the proposed legislation to amend the Social Security Act to open up new options in Long Term Care.

I also hope you will give consideration to something I personally favor, namely, providing tax credits to families who care for chronically ill members at home.

Our health care system needs restructuring to provide alternatives and choices. It must become more responsive to the unique needs of our expanding older population. Restraining spiraling costs will help end the threat to the future of these important programs, and begin a new chapter of hope for older Americans.

The third major issue is the need to expand employment opportunities for older people. As I mentioned earlier, our failure to do so will not only jeopardize the financial underpinnings of the Social Security system, but strikes at our standard of living and our way of life.

Part of the employment problem is that we are plagued by barriers which discourage and deny older men and women the opportunity to continue working, such as age discrimination, mandatory retirement and inflexible employment practices.

We must strengthen our resolve to shatter these barriers. We must alter negative attitudes. And we must provide increased incentives for continued employment of those who today would normally retire.

We have witnessed the success of the Senior Community Services Employment Project under the Older Americans Act. We must move that successful concept into the private sector as well. Business, large and small, must be educated to see older workers for the valuable resource they are. They must be encouraged to expand options for older workers, including second career and retraining programs, job sharing, and part-time and flexi-time work schedules.

Finally, we must provide incentives to employees to continue to work. For example, the Social Security earnings limitation, as it stands today, represents an unfair and needless deterrent to older workers. Another incentive would be to substantially increase the "delayed retirement credit" by, say, doubling it to around 6 percent.

In sum, what I urge you to emphasize are strategies of choice, opportunity and self-fulfillment that will empower older Americans to act on their own behalf. Our society needs the talents, skills, and experience that older Americans want to contribute; to ignore this is to impoverish ourselves, young and old alike.

At the same time, we must make a commitment to be an equally difficult task. That is to destroy the stereotype that older people are somehow a burdensome, dependent, unproductive segment of our society.

How did we, as a Nation, allow this stereotype to develop? In the world of work, we have propagated the myth based on early retirement plans designed to make way for younger workers, and thereby fostered a view of all Americans, as they approach 60 or 65, as non-productive and not useful.

In the home, our increased mobility has divided families geographically, too often leaving older persons isolated and viewed as a burden rather than an integral and valuable part of an extended family.

And, in the political arena, I believe there are too many politicians who want the elderly to feel dependent on their largesse.

To be honest about it, my fear is that too many of our older people have accepted and internalized these attitudes.

More than 150 years ago, Daniel Webster said:

"Let us develop the resources of our land, call forth its powers, build up its institutions, promote all its greatest interests, and see whether we may also, in our day and generation perform something worthy to be remembered."

I believe this Conference has the opportunity to perform something worthy to be remembered.

I believe that now is the time, once and for all, to shatter the hideous and debilitating stereotype of ageism that creeps into every facet of our lives.

In your collective efforts at this great Conference, I urge you to give particular emphasis to altering this attitude. For it is the perpetuation of this myth that has denied older Americans a meaningful role in contributing to the greatness of this Nation. And has denied to this Nation a rich and irreplaceable human resource.

The dreams and aspirations of older Americans have been and continue to be those of our country. It is the great challenge to this Conference to translate those hopes into a national agenda.

It is my hope that when the next White House Conference on Aging convenes in 1991, the participants will see the 1980's as a decade of decisive action which enabled older Americans to realize and claim their full measure of America's dream.●

BUDGET CUTS

● Mr. HART. Mr. President, on September 23, 1981, I introduced legislation, S. 1655, to reduce the business tax deduction for meals and entertainment by 30 percent and earmark the savings for the school lunch program. Unfortunately, the Senate rejected this proposal when offered as an amendment 3 days later.

The case for this proposal was very strong in September. But it is even stronger now.

It is now estimated that 466 schools around the country have withdrawn from the national school lunch program despite the administration's assurances that this would not occur. According to Mr. Hoagland, former administrator of the Food and Nutrition Service, schools are now serving 2.8 million fewer meals this year than in 1980. This represents an 11-percent decline in the total average of daily meals served.

I have received letters from around the country describing the harsh impact of these cuts and warning that any further cutbacks will force even more schools to withdraw. In Boulder County, Colo., for example, participation is down 15 to 20 percent, substantially increasing the cost of each meal. This school district, like hundreds of others around the country, is on the verge of discontinuing its school lunch program.

Mr. President, schoolchildren do not, and never will have the political influence of corporate America. They do not

vote, and they are not represented by well-monied lobbyists. Yet, over 40 national organizations, representing educators, consumers, labor, and nutritionists have now publicly endorsed S. 1655. Together, these groups represent well over 5 million Americans. This list includes:

Agricultural Marketing Project.
American Federation of State, County and Municipal Employees (AFSCME).
Americans for Democratic Action (ADA).
Association for Community Organizations for Reform Now (ACORN).
Bread for the World.
Bridge, Inc.
Center for Community Change.
Center for Science and the Public Interest (CSPI).
The Children's Foundation.
Communication Workers of America.
Community Nutrition Institute.
Congress Watch.
Consumer Coalition for Health.
Consumer Federation of America.
Consumer's Union.
The Cooperative League of America.
Delta Sigma Theta Sorority.

United Cement, Lime, Gypsum and Allied Workers International Union, AFL–CIO.
Department of Human Welfare, United Methodist Church.
United Telegraph Workers, AFL–CIO.
Women's Legal Defense Fund.
World Hunger Education Service.
Women, U.S.A.

Congress established the national school lunch program in 1946 with an explicit commitment to "safeguard the health and well-being of the Nation's children." After 35 years, that commitment is now in serious jeopardy. This year, for the first time, we have seen regulations proposed to compromise the nutritional value of school lunches in the name of cost-savings. As we all know, the public outcry forced the administration to withdraw those proposals. Now, as the President reviews a second set of revised school lunch standards, we must be clear that we cannot accept any compromise of our longstanding commitment to our children's nutrition.

My proposal represents a simple, rational way to restore full funding to the school lunch program without having any impact on the Federal budget. There are many arguments in behalf of S. 1655, but the strongest is simply that our children's lunches should take priority over fancy business meals and corporate football tickets.

Mr. President, school teachers probably know more about the importance of adequately nourished students than we, as legislators, ever will. The November issue of the National Education Association Reporter includes an excellent article about the school lunch crisis. I commend this article to my colleagues and ask that it be reprinted in the RECORD at this point.

The article follows:

FEDERAL BUDGET CUTS TAKE A BITE OUT OF CHILD NUTRITION

The facts and figures vary from district to district, but the general picture looks the same. NEA members in schools across the country report that school lunch prices have soared this fall to make up for the sharp drop in federal subsidies, and that fewer students are buying.

Unable to make ends meet, schools in Seattle, Washington; North Platte, Nebraska; and Pulaski County, Arkansas, were among the first of several hundred to drop out of the national school lunch program altogether. Many more will follow in the months ahead if today's bleak trend continues.

Flossie Henderson, a Normandy, Missouri, language arts teacher, says, "School lunches at our junior high went from 50 cents last September to 95 cents this fall. The portions have been cut too—and the students aren't buying."

Reports from Ohio, Pennsylvania, and other states indicate that participation in the hot lunch program has declined in many schools from 60 percent of all students last year to less than 10 percent this year.

What's behind this growing crisis are the recent federal budget cuts—cuts that sliced deeper into school lunch subsidies than into most other federal programs. Congress cut the child nutrition budget by one-third—which was less than the Reagan Administration had requested.

Earlier reductions, effective last January, had raised the maximum student charge for reduced-price lunches from 10 cents to 20 cents. This September it doubled again, to 40 cents.

What's more, families have to be poorer now than they did last year for their children to qualify for the reduced price. This means that many students who bought a 10-cent lunch last fall are expected to pay full price—75 cents or more—this year.

The federal government is also requiring a lower family income than before for students to be eligible for free lunches. These changes are forcing thousands of "working poor" families out of the school lunch program. And the October 1 cuts in food stamp allotments make it unlikely that they will be able to make up the lost nutrition either at home or in bag lunches.

Free and reduced-price milk, which has been available to all schoolchildren since 1954, is now limited to those schools not participating in the school lunch or breakfast program.

Most severely cut have been the subsidies for full-price lunches. In a time of rising food and labor costs and tight state and local budgets, many schools' food service programs were already running deficits last year. The lower subsidies leave schools with little choice but to raise the lunch price—or drop out of the program.

A year ago the price of school lunch for paying students averaged about 60 cents nationally. That average has risen by 25 cents this fall, with some high schols now charging as much as $1.50.

Hiking prices, districts know, is counterproductive. The rule of thumb is that for each penny the price goes up, student participation drops by 1 percent. Virginia's affluent Fairfax County raised prices by 15 cents in September; 19 percent of the paying students stopped buying.

As higher prices drive paying students out of the program, school food services will lose their traditional economies of scale—escalating their costs still further and making bankruptcy a real possibility.

The Administration's emphasis on ending "handouts" for middle-class students while targeting school lunch subsidies toward the "truly needy" ignores two basic facts. First, the National School Lunch Program has always been an across-the-board nutrition program, not a welfare program. And second, even the lowest-income students will be deprived of their free lunches unless they attend a school that can afford to continue operating a lunch program!

A recent National School Boards Association sampling of two school districts in each state found 28 percent were planning to eliminate their lunch programs entirely, 33 percent were limiting menus, and 25 percent anticipated closing some kitchens.

In September the U.S. Department of Agriculture (USDA) offered a "solution" for districts financially squeezed by the federal cuts; simply let schools serve cheaper meals! Congress had told USDA to review existing regulations with an eye toward finding ways to save districts money "without impairing the nutritional value of the meals."

But in its proposed new regulations, USDA ignored the myriad possible ways to reduce equipment, manpower, storage, planning, and other management costs that equal the cost of food. USDA addressed itself only to paring food costs—the one budget item where trimming directly penalizes kids.

To qualify for subsidies under the National School Lunch Program, lunches must provide one-third of the Recommended Dietary Allowance (RDA) for protein and 11 vitamins and minerals—a goal not always met even in good times, according to a recent General Accounting Office study. The effect of USDA's proposed new regulations would have been to cut this requirement to one-fourth of the RDA.

The more ludicrous of the proposals—such as allowing ketchup and pickle relish to count as vegetables, and cake or cookies to count as bread—drew outrage from the press and general public. "We know that balancing the budget won't be easy," one newspaper editorialized, "but surely the nation—awash in government-supported surpluses of grain and dairy products—can afford a full glass of milk and a whole piece of bread for every child."

In comments filed with the Agriculture Department, NEA's Office of Government Relations urged that the regulations be withdrawn or substantially revised. "Teachers are in a unique position to know the effects of nutrition on children in their daily activities," the comments stated. "They know that undernourished children in the classroom are less alert, slower to learn, less productive, and more prone to behavioral problems."

The Administration relented after three weeks and ordered the proposed rules withdrawn. NEA hailed the decision but termed it at best a limited victory, pending the outcome of further USDA review.

The school lunch program is still in jeopardy, NEA President Willard McGuire warned, calling the drastic cuts in federal funding "a tragic retreat from our country's traditional concern for the welfare of its youth."

That retreat is ironic in light of the Reagan Administration's emphasis on building up America's national defense. Congress cre-

ated the National School Lunch Program in 1946 as "a measure of national security." The program was a direct response to the high incidence of nutrition-related health problems that had kept young men out of military service in World War II.

Its secondary purpose was to stabilize farm prices through government purchase of agricultural surpluses (the school lunch subsidy remains a combination of cash reimbursements and surplus commodities).

The U.S. has grown to depend on this locally administered national program to nourish its young people. As of this spring, some 94,000 schools were participating, serving 27 million lunches a day, of which 55 percent were full price, 7 percent were reduced price, and 38 percent were free.

The school lunch program—one of the most successful nutrition programs in the world—has enjoyed bipartisan congressional support for years, partly because it benefits children across the board, in every congressional district. As many teachers have discovered, even children from more affluent homes are not always well nourished.

Federal funding levels remained fairly low until about 10 years ago, when free and reduced-price programs became mandatory, and the school breakfast program was created. The breakfast program which served about 3.5 million children in 30,000 schools last spring, has now been hit with federal subsidy reductions similar to those that have devastated school lunch. Because it is a smaller program, affecting fewer students, the breakfast program is an even more likely target for shutdown at the local level.

Cafeteria workers will be among those hardest hit as students and entire schools drop out of the national lunch program. Many school kitchen employees are among the "working poor" who seem to be bearing the brunt of the federal cutbacks on so many other fronts as well.

Estimates are that for every 100 meals lost, one job is eliminated. The layoffs have already started.

The Littleton, Colorado, school district, for example, has begun serving simple lunches wrapped in paper two days a week and has cut 28 food service positions. Other districts in Colorado and elsewhere are experimenting with centralization—cooking at one site and then transporting lunches to surrounding schools. Many other districts report switching to convenience-food programs with disposable utensils.

Schools that opt out of the National School Lunch Program and start offering à la carte meals are not required to feed students who can't afford to pay full freight.

With fewer students participating in the school lunch program, teachers nationwide can already see the results. "We have a lot of kids who got their one balanced meal of the day in the school lunch," reports Delavan, Wisconsin, high school social studies teacher Bob Fitzsimmons. "Without it, a lot of them aren't getting the proper nutrition, and it makes it more difficult to teach them."

Reports from Maine and elsewhere indicate that many children who bring bag lunches are now eating them before school—in lieu of their discontinued breakfast program. They then face the rest of the day with no meal.

Students going through a school day on an empty stomach have a hard time caring about English literature, or fractions. Baltimore County, Maryland, elementary art teacher Shirley Aldinger points to yet another result of the federal subsidy cuts: "Cafeterias are starting to sell sugared drinks, potato chips, and other junk food again, to supplement their revenues. This garbage has a real negative effect on kids' behavior."

While billed as "saving tax dollars," the cutbacks may actually cost the government money in the long run. Hungry, malnourished students do less well in school, achieve lower levels of employability, are more likely to end up on welfare, and have higher health care costs later on.

In many ways, attractively priced school meal programs are more essential now than ever, due to—

Inflation, which is making it harder and harder for many families to provide children with nutritious meals.

The ever-increasing number of families with two working parents, whose schedules sometimes preclude cooking breakfast at home or packing well balanced bag lunches.

The infrequency of students going home for lunch, because of distance or the absence of a parent at home during the day.

The lack of models other than the school lunch for teaching children healthy eating habits.

The fact that most lunch foods commercially available—and heavily advertised—to children tend to be high in calories, fat, sugar, and salt but low in nutritional value.

Under strong pressure from the soft drink and food lobbies and from proponents of simplifying federal regulations, USDA has indicated it may relax its monitoring of the sale of competing "junk food" in school cafeterias and vending machines during lunch hours. Any limits on school sales would then be left up to state and local authorities.

The school lunch crisis could become still worse. In his late-September address to the nation, the President indicated he would like Congress to cut yet another half-billion dollars from the lunch program this year, wiping out the remaining subsidy for paying students.

While the administration busily takes food off the plates of schoolchildren in order to balance the federal budget, government subsidies for tobacco, sugar, and many other commodities remain firmly in place.●

AMBASSADOR BROCK ON NEGOTIATIONS ON SERVICES

● Mr. INOUYE. Mr. President, the United States is the world's leading exporter of services, or "invisibles." This sector consists of economic outputs which are primarily intangible, deriving their main value from intellectual capital or labor factors.

The United States has become a service sector economy, with approximately 72 percent of total nonfarm labor employed in services and 66 percent of the gross national product generated by service industries. Productivity in the service sector is also growing faster than in manufacturing and helps to curb the inflationary pressures in our economy.

This sector is the most dynamic part of our international trade. Even though our merchandise trade has lagged within recent years as foreign countries have surpassed us in many manufacturing industries and as energy prices have skyrocketed, services enabled us last year to enjoy a surplus in our balance of payments.

According to the latest figures produced by the Committee on Invisible Exports in London, the United States accounted for 20 percent of total world trade in services, but even this significant share is slowly and steadily declining.

Our success in the export of services has been hampered by the growth of barriers, some of which are due to foreign countries' industrial regulation but others of which are the result of protectionist actions designed to shield domestic industries or enhance their firms' competitiveness. The Office of the U.S. Trade Representative has compiled an inventory of trade barriers in the service sector, but even this list is incomplete since barriers are erected daily.

It is my hope that this issue can be placed on the agenda of the Ministerial Meeting of the GATT, which is scheduled for autumn of next year. It is important that foreign nations realize that the U.S. Government is seriously determined to reduce service sector protectionism bilaterally and multilaterally.

The failure to solve the imbalance that has grown up in the international trade in services could very well lead to our taking reciprocal actions against countries which do not grant us the same kind of commercial opportunities in their markets that their firms enjoy in ours.

Recently Dun's Business Month printed an interview with U.S. Trade Representative Ambassador William Brock about the international trade in services. Ambassador Brock has provided commendable leadership in raising this issue in international fora and with foreign government. I ask that the article be printed in the RECORD.

The article follows:

U.S. DRIVE TO HIKE TRADE IN SERVICES

While the United States may be becoming less and less competitive in manufactured goods, it has a marked edge in the selling of such services as banking, insurance and technical advice. The problem is that many of our trading partners have erected many nontariff barriers to service imports, which make it extremely difficult for U.S. firms to do business. That's why Ambassador Bill Brock, President Ronald Reagan's Cabinet-level Special Trade Representative, has made reducing barriers to the export of services his top priority.

Brock, 50, was chairman of the Republican Party prior to his appointment to the top trade job last January. Previously, he had been a Senator and a Congressman from Tennessee. In this discussion with Executive Editor Gerald R. Rosen, Brock cites some of the difficulties the Administration faces in breaking down these barriers.

Many people in the banking, insurance, engineering and other service fields contend that the barriers to the export of services are far greater than they are to the export of goods. What's your view?

They're right. But I'm not so sure that all of these barriers are intentional. Some of them have evolved because of the way business is conducted in various countries. Nevertheless, it's abundantly clear that the barriers to services are not only serious but growing. And that's of enormous concern to me.

What particularly bothers you?

The fact that the United States is a service economy. Two-thirds of our employment is in services. And, most important, we have an enormous lead over most nations in virtually all service areas. So barriers to service exports can seriously hamper our international trade position.

Hasn't the problem of barriers to services been discussed and negotiated in the many trade agreements that the United States has signed during the post-World War II era?

The answer is no, incredible as that may seem.

Why not?

In our international negotiations, we have always dealt with trade as if it were something tangible, like an apple, an orange or a pair of shoes, and we haven't considered the reality that trade in services is just as important—if not more so—than trade in goods.

Wasn't the issue raised in the many years of negotiations that led to the much-heralded 1979 Trade Agreements Act?

There was some discussion. But, in the end, very little was done.

Since the landmark 1979 Trade Act is now law, what do you propose to do about the services issue?

In the 10 months this Administration has been in office, we have tried to change attitudes about the services issue and get some discussion going. We have raised the question with the OECD (Organization For Economic Cooperation and Development), the GATT (General Agreement on Tariffs and Trade) and the European Economic Community to prepare them and us for the complicated discussions that must lie ahead.

What has been the reaction of our trading partners?

There was almost no reaction early on. Few of them had focused on the problem and they did not realize the extent of it. But things are changing. I raised the issue at the OECD ministerial meeting in Paris a few months ago and for the first time the Japanese government endorsed the initiative and was supportive. That's an enormous and important change.

Is there support from any other major nation?

The British also are in favor of addressing the services issue. After all, it's in their interest. They are very competent in many of these fields.

What about the French?

Let's say the French tend to be a bit difficult on these issues.

Is there any interest on the part of the Third World?

A great deal. Take South Korea. Most people don't think of the Koreans as being engaged in services. But the fact is that they are deeply involved in construction and engineering. There are Korean construction firms all over the Middle East. And doing a very effective job, I might add.

Could you cite a major barrier to the export of some typical services?

One of the biggest is the fact that so many services—banking and insurance, for example—are regulated by government, and properly so, I might add. This often makes it very difficult for a foreign company to get through the bureaucratic maze.

Is this a problem for foreigners seeking to do business here?

It can be. Take the insurance business, which is regulated by the states. That means that there are fifty jurisdictions that a foreign firm must cope with.

What do you tell our trading partners when they complain?

I don't accept it as an excuse. If they can sell insurance in Africa, they can figure out how to do it in California. It's just a matter of making the effort.

Do you foresee another major trade agreements act that will deal with the services issue?

Frankly, I don't. I think that we will have to deal with our major trading partners on a bilateral basis. It will take years, but I hope to accomplish a great deal on this front by the time this Administration leaves office.●

THE WORLD CRISIS: THE TASK FACING THE UNITED STATES

● Mr. HELMS. Mr. President, on October 8, before the highly knowledgeable audience of the District of Columbia Chapter, Military Order of the World Wars, Dr. Charles H. Malik, one of the world's great classical scholars, gave a most illuminating address on the current world situation and what is required of the United States in meeting it successfully.

One of the contructive points made by Dr. Malik as the "key to world peace" was the reunification of Germany.

Another was the Monroe Doctrine concerning which he stated that America "seems to have forgotten" it.

A third was the necessity for restoring the "balance of power" in Europe as "a vital pillar of world peace".

Mr. President, I would stress that Dr. Malik speaks with the background of a vast professional, scholarly, and governmental experience. Because the previously indicated address should be of unusual interest to the Senate and executive branch, especially members and officials engaged in the formulation of U.S. foreign policy, I ask that it be printed in the RECORD.

The address follows:

THE WORLD CRISIS: THE TASK FACING THE UNITED STATES

(By Charles Malik)

The Jacques Maritain Distinguished Professor of Moral and Political Philosophy at The Catholic University of America, in Washington, D.C.; Distinguished Professor of Philosophy, Emeritus, at the American University of Beirut, Lebanon; former President of the General Assembly, the Security Council and the Economic and Social Council of the United Nations, and former Chairman of the Human Rights Commission of the United Nations; former Foreign Minister of Lebanon and Ambassador of Lebanon in the United States.

At the meeting of the Military Order of the World Wars (District of Columbia Chapter), at the Army-Navy Club, Washington, D.C., on October 8, 1981, at 12:00 noon.

In matters of the highest moment, especially when events are in process of formation, one can put forward in public discourse only fundamental propositions. The cutting edge of detail must be left to private consideration. I shall here in general abide by this rule, and that in the briefest possible terms.

I

Over the long haul China is the most important issue. China was penetrated spiritually three times in her history: by Buddhism from the South, by Islam from the West, and by Marxism from the North across the steppes of Siberia. The latest penetration appears to be the more far-reaching of the three. Which proves that despite her wall China is not impenetrable nor self-sufficient spiritually. In her very stagnation China has always been searching. Some timid people have excused their ineffectiveness so far on the ground that China is a world apart and had better be left alone. Nobody is ever left alone, especially today, and if you do not step forth and fill the spiritual vacuum somebody else will. The West with all its spiritual and material riches can only blame itself if China lives today under the banner of Marx, that misshapen version of the West. Beyond economic and political relations, beyond the exigencies of world geopolitical balance, which could, and doubtless will, change from generation to generation, the mind of China must be opened to the authentic values of the West, the values of freedom, man and the spirit. This is one of the most pressing tasks of those who really care about the ultimate things. There is a most fateful race already in progress between Marx and the values of freedom so far as the soul of China is concerned. In this race Marx could turn out to be a mere passing veneer.

II

At present the interests and ambitions of the Soviet Union in Europe, Asia, the Middle East, Africa and Latin America pose greater danger of friction and clash with the West than do the interests and ambitions of China in those regions. Only the argument of strength, militarily, economically and above all morally, here makes a dent; only prudent fearlessness and unwavering fundamental conviction here avail. Short of satisfactory agreement on disarmament, adequate, massive preparedness becomes imperative. Such preparedness, far from meaning necessarily war, should serve as a restraint on inordinate ambition and a deterrent to war.

You may control existing armaments, you may dismantle them altogether, but what you cannot control is the inventiveness of the human mind. How can any armaments agreement prevent the several million scientists and technicians in the Soviet Union and the several million scientists and technicians in the United States and Europe from thinking, researching, experimenting, inventing in total secrecy? And one crucial discovery or invention thus arrived at could render obsolete enough of the existing critical devices to alter the world balance of forces substantially overnight. Because of the transcendental importance of creative research I would increase the appropriations for research and development fivefold, for the future will be determined, materially and militarily, by theoretical research more than else.

The ultimate issue therefore is not arms control, but how to touch and change the heart, the spirit, the will, the fundamental attitude from suspicion to trust, from hatred to love, so that the heart and will then will themselves control and direct the inventiveness of the mind. The state of the heart and will between nations submits to totally different laws from what obtains in devising the most secure defense systems and negotiating the most ironclad disarmament pacts. And only when a community of heart and purpose is established on the basis of mutual respect between the Soviet Union and the West can you trust what is going on in secret in the thinking and inventing of the mind, and can you then really feel secure. But man is seen differently, human destiny is understood differently, the purposes and values of existence are interpreted differently, between the two worlds. We thus see here again that the real ultimate rub is spiritual and not political or material.

To aid in the promotion of understanding and trust contacts should never be discontinued, cultural exchanges should be maintained, economic agreements mutually advantageous should be pursued, and if they weary you with their patience and forensic ability you should outweary them yourselves.

III

In Asia, so far as the proper world balance that conduces to peace is concerned, China and Japan are crucial. You may not blame the Japanese because they are industrious and ingenious; far from murmuring against them because they more than stood their ground in world competition, the West should admire and emulate them.

In Africa, Ethiopia has not received the attention it deserves, nor may the superlative strategic importance of South Africa be overlooked despite the country's grave internal problems. Every country is plagued with its own quota of such problems, and no country and no people can unhypocritically cast stones on others in these matters. The one thing needful here is not to be squeamish—for any reason—in letting South Africa fulfill its proper role in world strategy, and to foil any attempt by adversaries to exploit the internal difficulties of that country for their own advantage. International existence is full of such national holes.

IV

The balance of power in Europe remains a vital pillar of world peace. Review all history and you will find that this has always been the case. There can be no peace in the world, there can be no security for the United States, if Europe should drift into such a state of vulnerability as to have to become

neutralized. The neutralization of Europe is but a preclude to its absorption by the East. No matter what role allurements or fears or failures or sheer human folly may play in this extremely delicate, but absolutely fateful affair, I believe the Atlantic community will either hang together or hang apart. The principal burden of Winston Churchill's Iron Curtain speech in Fulton, Missouri in 1946 was the impossibility of lasting world peace so long as Europe remains partitioned between the Soviet Union and the West. The crux of the partition of Europe is the partition of Germany. Two Germanys at the heart of Europe can never mean except perpetual discord and instability in the old continent. If European unity is an indispensable key to world peace, as Churchill asserted, the key to that key is the unification of Germany. Finally, of all possible abandonments, in the past and in the present, history would never forgive the United States if at this juncture the United States should for any reason abandon the people of Poland.

V

On Latin America I will only relate one story. A man in Europe who knows the game of power politics very well told me once: "I have stopped reading all American magazines!" I said: "Why?" He said: "I will resume reading them only after Cuba is liberated!" America seems to have forgotten the Monroe Doctrine. People elsewhere find it unbelievable, nay even worse than unbelievable, that America, with all her resources, material and moral, allowed Marxism-Leninism to take root at her doorstep, and from there to spread in Latin America and elsewhere throughout the world.

VI

The United Nations is called all sorts of names today. A respected writer has recently called it "a monument to imbecility," "an exercise in hypocrisy," "a gaudy realm of make-believe," "a dumbshow and a mummery." Some truth there may be in all this. But the United Nations was not so at the beginning, and for the first fifteen years of its life. What happened, then? Whatever happened, the United Nations was, and is, a free-for-all. In any contest in a free-for-all the loser is simply outsmarted. Let a fully grounded and honest investigation be made, and you will find that there was no inherent reason why in this match the United States should have been tripped up by its adversaries.

VII

On the Middle East I wish to make eight observations in the tersest possible terms:

(1) The one stable feature of all countries in the Middle East is the essential instability of every one of them. Only sixty years ago none of these states existed as it is today, and even during this short period innumerable has been the turmoil that each one of them has sustained; and nobody knows how they will look like, I will not say sixty, but ten or twenty years hence. The ultimate ground for this instability is something to be gone into separately. Part of this ground is the astounding fact that the endemic problem of minorities has never been honestly faced, let alone acknowledged, by the leadership of those countries. But the problem of minorities is itself grounded in the deeper problem of essential historical discontinuity. In the Middle East where history itself started, history is broken up again and again. These two, essential historical discontinuity and therefore essential instability, determine everything in the Middle East. Enormous practical consequences from the point of view of fundamental policy, flow from this observation.

(2) I do not see how the present chaos in Iran is not going to be taken full advantage of by the Soviet Union. Propinquity, both in terms of place and of culture, between Iran and the realms immediately to the North, places the United States and the West in general at a decided disadvantage as to who is going to have the upper hand, politically and culturally, in that country in the future. These are ultimate facts for which the United States need not blame itself: it can only ponder them to see how they may be surmounted.

(3) The Middle East is much more communistically softened up and infiltrated than wishful thinkers in the West know or imagine. Your greatest handicap so far has been that you deal for the most part with governments and individual leaders but not with peoples. Nor, I am afraid, can you help that. You will be amazed to find out what the peoples, the masses, in the Middle East think. Nor may you take comfort from the thought that the prevailing native ideology is anti-communist; this is not true. The character and magnitude of this problem has not been fully comprehended. I wonder if ever the Government of the United States made a serious study of the kind of literature being read daily by the youth of the Middle East and Latin America. The mind of these peoples is being impregnated, not with your values of man and freedom, but with some of the darkest impulses in human nature, and with promptings of hatred hailing from your sworn enemies. Where the mind of youth is turning—this would be a principal concern of all high statesmanship today.

(4) Now that Iran's future is doubtful and perhaps out of control, and the entire area heavily infiltrated, the Eastern Mediterranean emerges as more vital for the defense of the Middle East than ever before. The Gulf can only be secure if its rear, the Eastern Mediterranean, is secure. To hold the Middle East, or as much of it as possible, the Near East must first be held. But a significant gap yawns in the Eastern Mediterranean, consisting of Syria and—by partial extension—Lebanon. Policy should now concentrate on how to close that gap. Nor may the numerous defaults of the past with respect to Africa be repeated now in the North, with all the swirling going on these days about Egypt and the Sudan.

(5) Lebanon is a sick country. It cannot heal itself. An expert physician is needed from outside. The United States has been sympathetic and has helped considerably, but the patient is still lying on his bed and his condition is still critical. The sickness is not yet unto death but it could become so. Many countries have disappeared, and so the question arises: Why should Lebanon be saved? Because great stakes are involved in the death of the patient. First, because an independent and sovereign state would disappear, being absorbed or partitioned by its neighbors, and that would upset the political and moral balance in the Middle East. Second, because the only free, open, democratic and genuinely pluralist society in the Middle East, the society of Lebanon, would be assimilated into the norm of Middle Eastern societies which are neither open nor free nor democratic nor pluralist, and that is not exactly in the best interests of the free world. And third, because the only free and secure Christian community in the Middle East, which has always been in communion at once with Rome and Constantinople, and has managed to preserve, more or less, its freedom and integrity for centuries, would perish, a loss wholly not foreordained. If only people would stop to ponder responsibly and calmly these three fateful stakes—the perishing of a state, the perishing of a unique society, and the perishing of a unique community—I am confident they would be set on fire to try to save Lebanon. What is needed now, in a most urgent manner, is that the abundant good will that has been displayed so far from many sides, especially in the United States, Canada, the Vatican, Latin America, France, Saudi Arabia, and elsewhere, first be coordinated, and then translated into resolute policy bearing immediate fruit, lest the patient die.

(6) The Palestinian question should be addressed: Everybody agrees on that. But there is no agreement on how it may be resolved. If the universe of discourse with its hackneyed cliches which have prevailed so far should be persisted in, then I'm afraid there is no resolution to this question. But if you consider that in the great land bridge stretching between Asia Minor and the Valley of the Nile five peoples (the Syrians, the Lebanese, the Jordanians, the Palestinians and the Israelis), four states (Syria, Lebanon, Jordan and Israel), and three great world religions (Judaism, Christianity and Islam), coexist, and that it is an absolute historical necessity for all these peoples, states and religions to live and interact with one another under some order of peace in this one land bridge—if only you keep this picture firm in mind, then great vistas of hope, precisely with respect to the Palestinian question, and not only with respect to that question, would trace themselves on the horizon of your thought.

(7) It is vital that the friendly relations that have always obtained between the United States and Saudi Arabia since the days of the great Abdul-Aziz and the great Faysal be maintained and strengthened. Nor must any wedge be allowed, for any reason, to be driven between the two governments and peoples. And this not only in the interests of the two countries, but of the entire area and world peace.

(8) Every single problem and condition in the Middle East today, every single prospect in that area, is unfathomably complicated by the subtle or open clash between Washington and Moscow. Let nobody think that he can negotiate with anybody in the Middle East as though Moscow were absent. Moscow disposes of eyes and ears and hands in relation to every country or movement or development and every decision to be taken in the Middle East. Moscow seeks actively to be in on every such decision. And when she is excluded, she will at once plan to retaliate somehow somewhere, whether in the country itself affected by the decision or elsewhere.

VIII

If a billion Chinese are now required to study the English language for eight years, and if that language has become the lingua franca of all mankind—an event that never happened before to any language—can the English-speaking peoples measure the infinite responsibilities before God and history that fall upon their noble tongue, as to the spiritual and moral and intellectual values, and the kind of hope, that that language should convey to the entire world? You have no idea what is required of you to see to it that the English language, your language, fast becoming the universal language of mankind, be charged today with the right kind of message, in terms of fundamental ideas, moral values and intimations of beauty and grace.

Ladies and gentlemen, I should be ashamed of myself if I stopped here. I should be unworthy of you if I stopped here. I should be unworthy of the truth.

And what is the truth? The truth is that the principal task facing America is the internal one. I have no doubt that, having regard to America's immense material, technological, political and moral resources, America will, in time and in her own free way, put its economic house in order. The same for her defense requirements.

It is her intellectual, moral and spiritual house on which I want to dwell for a moment.

I respectfully say to the media: For God's sake, have pity on the infirmities of human nature; you appear to be bent on titillating and taking advantage of them. I am thinking in particular of the so-called "sexual revolution" and of man's insatiable craving for

comforts and things. Far from helping to liberate man, sex could destroy Western civilization. The tragedy here is that the victims, once firmly held in bondage, would not be able to help themselves. They would keep silent about the collapse, or rationalize it, or even contribute to it, and that against their better judgment. I trace this scourge for the most part to the cult of Freud.

The family is in deep trouble. But for obvious reasons one cannot talk much about it. And yet it is always exactly the things that for obvious reasons one cannot talk much about that are the most important things. May I beg you to do something about the family—for your sakes, for the sake of your civilization, for the sake of the world, because so much these days depends upon your example. And if you can do nothing, at least pray that God intervene.

Many cultures abroad have been suffering for centuries from trouble both in the family and in matters sexual. The example of family decay and sexual laxity in the West is not helping them at all. They tell the West in their heart: You see, you are catching up with us! What should be the case is for you to be able to tell them: When will you catch up with us, in matters, not only material and technological, but intellectual, moral, spiritual?

The life of community and fellowship, without which stability of character cannot form, must somehow be restored despite the havoc wrought by technological civilization.

The university and the school are in trouble, whether or not they acknowledge it. The radical divorce of intellect from character, of mind from spirit, of reason from faith, of efficiency from virtue, of the excellence of idea and technique from the perfection of the total human person, of the use of thought from the being of the thinker—this too can destroy Western civilization. The secularism, relativism, rationalism, scientism, humanism of the university must somehow be addressed and redressed. Nothing above, nothing beyond, nothing other than, mind and man?

Cynics, operators, manipulators, balancers, abound everywhere. I do not fear the cynics, but I fear them when they start practicing their cynicism on themselves. And must the balancers and manipulators be allowed to carry on their craft with no attention being paid by them to the quality of what they balance and manipuate?

x

I doubt that policy makers in the United States have given serious thought to the kind of intellectual fare being fed into the minds of the youth of the world, including the youth of America. I doubt that they devoted one single long week end to going exclusively and exhaustively into the kind of philosophy, of outlook, of fundamental attitude that is being proclaimed and promoted in the media and in the halls of learning of the great universities. But on this philosophy, outlook and attitude, more than on any politics and any economics, depends the future of mankind.

It should not be said by some competent judge a hundred years from now that exactly when youth was avid for the truth—the truth of man, the truth of freedom, the truth of destiny—Western civilization was weighed in the balance and found wanting. And this when you possess the truth in abundance more than any civilization, now and in the past!

You cannot allow the mind of youth to be so vacant as to fall a prey to the predatory wiles of the enemies of God, freedom and man. But that is alas exactly what is happening.

Can a civilization that sums up in its own being at its best the Greek passion for reason and knowledge, the Roman attachment to justice, law and order, the Judaic self-dedication to the One True God, the Christian event of sacrificial love and mercy, and the distinctive zest, and adventure, and discovery, and sense of freedom, and individual independence and initiative, and boundless confidence, and perpetual search, so far garnered from the great American experience—can such a civilization fear anything except the erosion of its faith in itself? Fill the mind of youth with half the truth you already possess, and then go home and sleep in peace. But why should you stop at only half—why don't you go all the way and fill it with the whole?

He will inherit the earth, or better earth still, who believes in something true and eternal. He is worthy of survival, and more than mere survival, who is prepared to share with others the eternal he believes. But he must really believe to be able really to share. Nor can you share with anybody anything over which you stammer. Your belief must ring in your minds, in your deeds, in your life, in your society. The ultimate crisis today is one of faith—faith in the basic values of the great positive tradition. If only you really believe what you already fundamentally are, you will move mountains.

Culturally, intellectually, spiritually, existentially, you have behind you four thousand years of cumulative tradition—not just two hundred years. In wealth and scope, in light and truth, and in creativity, there is nothing like it in all history. It measures, weighs and judges all other traditions. And if others venture to judge it, they will soon discover that they are judging it by its own norms.

I say you have this tradition "behind you"; the truth is that you have it "before you"; because what is constitutionally at your base is already before you for the having.

And what has this tradition yielded, in terms of worth and value and meaning and being? It has yielded fundamentally six things: man and freedom, truth and law, spirit and love. Man in his essential dignity; freedom as the end of all endeavor; truth as something there to be ardently sought and securely grasped; law as above the caprice of men; spirit as wholly underivable either from the slime of matter or the compulsion of circumstance; and love in the dictum, God is love.

These eternal values must be rediscovered, rebelieved, reloved, reappropriated, relived, reaffirmed, reproclaimed. There is no progress away from them: There is only perpetual return to them. They are all integral to the deepest and most lasting in your tradition. They are already you and you are already they. Therefore it is supremely true to say: Be only what you at your most authentic already are.●

GENERAL REVENUE FINANCING

● Mr. DOLE. Mr. President, I applaud the action of the White House Conference on Aging Committee on Economic Well-Being in going on record overwhelmingly against the general fund financing of social security. I believe that general fund financing of this most important social program is equally unpopular in the Congress. Furthermore, there is almost no support for it on the Finance Committee and, I understand, little if any among members of the Ways and Means Committee.

General revenue financing of social security has been considered and rejected since the program was enacted in 1935. It would unlink benefits from the workers' earnings and tax payments. It would obscure individual taxes and make the cost of the program more difficult to control. Public confidence in the system could well be eroded, rather than enhanced.

Under the current system, most workers perceive their benefits as a matter of right acquired by the payroll taxes deducted from their paychecks. The "earned" character of the benefits and the "earned right" to those benefits are basic principles on which the social security system was founded and in large measure account for the support of the American public for this program.

Introducing general revenue financing into social security would weaken the longstanding tie between what a worker earns and the benefit he receives and would run the risk of weakening workers' acceptance of the system.

General revenue financing of part or all of social security could also have the undesirable effect of leading to means testing of benefits. The nature of the program may be changed radically from a social insurance program to a welfare-based program.

The payroll tax method of financing social security has long been associated with a commitment of fiscal responsibility.

To this point, Congress has always had the determination—in fact has required itself by virtue of the payroll tax—to look at the cost side, as well as the benefit side of the equation whenever social security matters have been considered. This fact is a cornerstone of the fiscal soundness of the system.

Using general revenues to alleviate either the short- or long-term social security financing problems would be a grevious and potentially costly mistake. General revenues translate into higher taxes or increased deficits. Such an approach is simply not responsible at this point. It threatens the character of the benefits and undercuts the sense of fiscal discipline with which we must act to restore and maintain the integrity of our social security system.

Another point which must be made is that there are no general revenues available. Social security expenditures already account for 28 percent of all Federal expenditures. Allowing even limited infusions of general revenues will increase that percentage and further expand that portion of the budget considered untouchable and uncontrollable.●

NATIONAL ADOPTION WEEK

● Mr. METZENBAUM. Mr. President, November 22 marked the first day of National Adoption Week—a week that is designed to promote adoption as a positive and loving way of building families.

Mr. President, the act of adopting a child is, indeed, a very wonderful thing. Nothing is quite as precious as the love of a family. And certainly, there is nothing quite as wonderful as a family that willingly opens its arms to a homeless child, to feed, care for, and love that child, a child that otherwise might well go through life never knowing the love of parents and siblings. Those of us who have known that kind of feeling—and most of us are fortunate to have known it—cannot imagine having that void in our lives. In my opinion, any family that takes into its home an adopted child and extends that kind of

unconditional love has conducted one of the most humane acts possible.

Mr. President, each year thousands of unplanned pregnancies result in babies who are put up for adoption. Although the Government has not kept statistics since 1975, recent reports place the number of adoptions at around 100,000 per year. In fact, the number of adoptions has declined steadily in this country since 1970 when a record 175,000 children were adopted. And since 1960, the number of children in foster care has doubled to approximately 500,000. Earlier this year, the New York Times reported that fewer than 20 percent of the children available for legal adoption in New York's publicly assisted agencies were actually placed. The Washington Post reported that the District of Columbia's foster care system is overburdened and understaffed.

In July, I sponsored legislation designed to encourage families to adopt children by permitting adoptive families to claim the costs of adoption as a tax deduction. My legislation takes note of the fact that at least 20 major companies have in recent years begun to assist their employees with the costs incurred in adopting children. IBM, for example, has had an adoption assistance program since 1972, and has averaged approximately 350 to 400 claims per year. Another major company, the Smithkline Corp., paid employees $400 per adoption at the time it began its program. It now pays $1,000 and intends to increase the amount until it equals the cost of a normal obstetric delivery.

The issue here, Mr. President, is providing homeless children with homes. Yet presently, we have a tax code that actually discourages families from adoption. Adoption assistance is considered regular income for tax purposes, and so companies providing it must incur the costs of social security taxes and an extra paperwork burden. That should not be—and my bill corrects the inequity by excluding adoption benefits from employees income.

Mr. President, I ask that an article on adoption in Business Week be printed in the RECORD. And I also ask that all Members of the Senate join with me in recognizing National Adoption Week, and that we all commit ourselves to a new national policy of encouraging families to take into their homes adopted children.

The article follows:

WHEN COMPANIES HELP PAY FOR ADOPTION

An increasing number of companies provide employees with benefits to help them adopt children—just as they provide maternity benefits. But the Internal Revenue Service regards these benefits as taxable income. Now an effort is being made in Congress to have them treated as nontaxable on the grounds that present IRS policy discriminates against adoptive parents.

Three bills are pending in the Senate to make certain adoption expenses deductible, and one of them, sponsored by Senator Howard Metzenbaum (D-Ohio), would also exempt employee benefits. The Treasury adamantly opposes the measures, but employee-benefit officials from industry say they are overdue.

"To subject this benefit to the income tax unfairly penalizes people who are merely try to create loving families," said Robert B. Bogart, managing director, corporate human resources, American Can Co., in testimony on Oct. 16 before the Senate subcommittee on taxation. The Greenwich (Conn.) company recently added an adoption benefit, effective in 1982, that will pay up to $2,000 for each adoption of a child under 18.

UNPLEASANTLY SURPRISED

According to Hewitt Associates, employee-benefit consultants based in Lincolnshire, Ill., more employers would grant adoption benefits as an option of flexible benefit programs if such benefits were not taxable. Such benefits typically range from $500 to $2,200. They are a small expense to companies because adoptions are not common; according to the National Committee for Adoption, only 34,000 of last year's 109,000 adoptions involved adults and unrelated children.

But employees who want to adopt appreciate what help they can get. Eric B. Perez, manager of business strategy analysis at Xerox Corp., in Stamford, Conn., was one of the first to use his company's adoption plan, which pays up to $1,000 per adoption, after it was inaugurated in 1979. Perez spent more than $4,000 to adopt a two-year-old boy from the Philippines through the International Alliance for Children Inc., in New Milford, Conn. "I was very grateful to Xerox for making $1,000 available," he says. So far, Xerox has spent close to $100,000 on 118 adoptions.

Some companies have been providing adoption benefits for more than 10 years. For example, the plans at S. C. Johnson & Son Inc. and at Foote, Cone & Belding Communications Inc. date back to 1970. Foote Cone's plan is among the most generous—it pays an adoption fee equal to the cost, now around $2,500, of a normal delivery in a local hospital. International Business Machines Corp., which has had a plan since 1973, pays 80 percent of eligible charges, up to $1,000 per adoption.

A 1980 Hewitt report listed 14 companies that provided adoption benefits, including Pitney-Bowes, Hallmark Cards, SmithKline, and Syntex. Since then, says Hewitt, four more companies have joined the list and eight other client companies are considering it. Control Data Corp. plans to announce an adoption plan shortly.

Goodwill and equity are not the only reasons for an adoption program, says American Can's Bogart; it is also part of a company's social responsibility. "Industry can make an impact," he says. And Bruce Mueller, employee-benefits director of Foote Cone, reports that inquiries about his company's adoption benefit encouraged several other employers to offer adoption plans during the past year. "The fact that lots of big companies are coming in can be the most effective force in encouraging adoption," he says.

These arguments fail to impress John Chapoton, Assistant Treasury Secretary. "We do not believe that the tax system is the appropriate vehicle for providing federal aid for adoptions," he told the subcommittee. He opposes exemptions for employer plans on the grounds that the IRS is not equipped to administer them and that they would "further erode the tax base by exempting from tax yet another element of compensation."●

158TH MONROE DOCTRINE ANNIVERSARY

● Mr. HELMS. Mr. President, today, December 2, is a significant date. It is the 158th anniversary of the proclamation by President James Monroe in his annual message to the Congress on December 2, 1823, of what is historically known as the Monroe Doctrine.

Proclaimed at a time of grave crisis in the history of the Americas when the holy alliance of European nations was continuing to restore Spanish domination over its newly independent American colonies and Russian imperialism was extending its domain southward from Alaska almost to San Francisco, it was successful in protecting the Western Hemisphere.

Mr. President, because since 1959 so many North Americans seem to have forgotten the Monroe Doctrine, I shall enumerate its three major points:

First. Opposition by the United States to any future European colonization in the Americas.

Second. Abstention by the United States from involvement in European internal political affairs.

Third. Opposition by the United States to any extension of European systems to any part of the Americas.

Monroe, in preparation of this doctrine, did not act alone, but only after extensive consultations with his cabinet and predecessors. Madison strongly approved it and Jefferson described the doctrine as "our compass" that points the course for our country through the "ocean of time" then opening.

Mr. President, in view of today's mounting crisis in the Central American, Caribbean, and other areas to the South, it is time that we restudy the Monroe Doctrine and take steps for its universalization.●

TENNESSEE CITIES AND GENERAL REVENUE SHARING

● Mr. SASSER. Mr. President, Federal aid to cities and counties in Tennessee and the Nation has been significantly cut back as a result of the Omnibus Reconciliation Act of 1981. Localities in Tennessee and elsewhere are struggling to keep vital local services going while still holding local property taxes down.

But now the administration has come along and recommended a 12½ percent reduction in the general revenue sharing. That means $5 million less in general revenue sharing for cities in Tennessee.

Federal revenue sharing is the one Federal program that goes to local governments without any real strings attached. Yet, this program too has now ended up on David Stockman's chopping block. Indeed, I have no doubt that Mr. Stockman would like to phase out the entire program by 1984.

The impact of a phaseout of this essential Federal aid program would be very harmful to many Tennessee cities.

If the general revenue sharing program is totally eliminated, city property tax rates would go up an average of 55 percent and businesses located in Tennessee cities would see overall tax levies increased by some $28 million.

Mr. President, in these times of fiscal austerity we need a strong revenue sharing program, and I would hope that the administration reconsiders their decision to make severe cuts in the program.

Mr. President, I ask that a table showing the impact of general revenue sharing reductions on Tennessee cities which appeared in the November, 1981 issue of Tennessee Town and City be printed in the RECORD.

The table follows:

[From the Tennessee Town and City, November 1981]

TENNESSEE CITIES AND GENERAL REVENUE SHARING

City	Property tax increase necessary to replace GRS*	Percent increase in the rate
Alcoa	$.30	17
Arlington	1.40	93

BIRMINGHAM'S NATIONAL VETERANS DAY

● Mr. HEFLIN. Mr. President, on November 11, 1981, our Nation showed the respect we have for freedom and for the individual contributions of our fellow man with the observance of "National Veterans Day."

I was privileged to be in Birmingham, Ala., at that city's 35th annual observance of that holiday. The sincerity and the success of the activities in Birmingham earlier this month, as well as for the previous 34 years, serves as a tribute to one man—Birmingham's director of National Veterans Day activities, Raymond Weeks.

Thirty-five years ago, Raymond Weeks had a dream—a dream of one day when our entire country could unite in a ceremony honoring the unselfish service our veterans have given to America. His work to make his dream a reality has earned Mr. Weeks recognition as the "Father of National Veterans Day," and the job he has done for 35 years on the local level has been so outstanding that numerous other observances have been modeled after the one in Birmingham.

That is typical of Raymond Weeks. His life has been one of constant service on behalf of others—in the military, in civic organizations, in the Alabama State Legislature. Whenever the opportunity or need arose, he has given of himself, all the while maintaining constant involvement with his first love—National Veterans Day in Birmingham.

This year's activities included speeches by the distinguished actor, director and war hero, Douglas Fairbanks, Jr.; the Secretary of the Army, John O. Marsh, Jr.; the Commander of the first U.S. Army, Lt. Gen. Donald E. Rosenblum; and the National Commander of the Disabled American Veterans, Sherman E. Roodzant. At this time, it is my pleasure to submit for the RECORD the remarks of these men.

The material follows:

SENATOR HOWELL HEFLIN INTRODUCTION OF DOUGLAS FAIRBANKS, JR. NATIONAL VETERANS DAY, 1981

Ladies and gentlemen: Tonight we are here to honor Douglas Fairbanks, Jr.—stage and screen star, producer, director, author—and distinguished war hero.

While he has starred in more than 70 movies and numerous stage productions, Mr. Fairbanks is being honored tonight for his distinguished military career—a career that earned him international recognition for his leadership, his skill as a military tactician and strategist and, above all, his courage.

Mr. Fairbanks enlisted in the United States Navy in 1941, before the Japanese attack on Pearl Harbor. During World War II, he fought in the Atlantic, Arctic, Mediterranean, Adriatic and Aegean Seas and in the North African, Italian, Yugoslavian, French and Great Britain campaigns. During the amphibious assault on Italy in September 1943, Mr. Fairbanks exhibited such courage that he was awarded the Silver Star Medal. "During the occupation of an island in the area," the citation reads: "He courageously led a landing party ashore and, although exposed to enemy rifle fire, established essential picket positions, thereby contributing materially to the accomplishment of a vital mission."

For his courage in the amphibious invasion of southern France on D-Day, Mr. Fairbanks earned the Legion of Merit Medal. The citation reads: "On the morning of August 17, 1944, when two hostile vessels attacked a group of smaller craft, he courageously led the ships of his unit into action and, aggressively directing the combat operations with expert seamanship against heavy odds, greatly aided in the ultimate sinking of the two vessels. By his brilliant leadership and steadfast devotion to duty throughout this vital period, Lieutenant Commander Fairbanks contributed materially to the successful invasion of a highly strategic area."

Mr. Fairbanks rose to the rank of commander in 1945 and was the only American officer chosen by Admiral Lord Louis Montbattan to be one of his famous "Mountbattan Commandos."

For his wartime service in the military and his significant contribution to the allied victory in Europe, Mr. Fairbanks was knighted "Sir Douglas" by Britain's King George the Sixth in 1949 and was named "Knight Commander" of the most excellent order of the British Empire.

Mr. Fairbanks has received numerous diplomatic and military awards and honors from a number of nations, including England, France, the Netherlands, Belgium, Italy, Brazil, Chile, Greece and Korea.

Mr. Fairbanks served as special advisor to Presidents Franklin D. Roosevelt and Harry Truman. President Roosevelt appointed him Presidential envoy to Brazil, Argentina Uruguay, Chile, Peru and Panama.

It is indeed a great privilege and a distinct honor to introduce to you a distinguished actor, director, author—and a real-life American war hero, Douglas Fairbanks, Jr.

DISTINGUISHED NATIONAL VETERANS AWARD

(Presented to Captain Douglas E. Fairbanks. Jr., USNR (Ret.) For the Year 1981)

Presented Annually By The Combined Veterans Organizations To The American Citizen Who Has Done Most To Distinguish Himself As A Veteran During The Current Year Throughout The United States.

This The 11th Day Of November 1981.

HOWELL HEFLIN,
Chairman 1981 Award Committee.

SOME PREVIOUS RECIPIENTS

Gen. Mark Clark, U.S. Army (1956).

Gen. Lucius Clay, U.S. Army (1957).

Gen. Alfred M. Gruenther, U.S. Army. Head of American Red Cross (1959).

Gen. James A. Van Fleet, U.S. Army (1961).
Gen. Mathew B. Ridgeway, U.S. Army (1963).
Gen. David Sarnoff, Chairman, R.C.A. (1965).
Gen. Lauris Norstad, U.S. Army, Commander in Chief, NATO (1968).
Col. Roscoe Turner, USAFR (1967).
General of the Army Omar Bradley (1970).
Lt. Gen. James Doolittle, USAF, M.M. (1971).
Brig. Gen. James Stewart, USAFR (1972).
Col. Charles A. Lindberg, USAF (Ret.) (1973).
Adm. Thomas Moorer, USN, Chairman, Chiefs of Staff (1974).
Astronaut Neil Armstrong, USNR (1975).
Gen. W. C. Westmoreland, U.S. Army, Chief of Staff (1976).
Brig. Gen. Paul Tibbetts, Jr., USAF (1977).
Adm. Arleigh Burke, USN, Chief of Staff, Joint Chief of Staff (1979).
Gen. Louis Wilson, USMC, Commandant of USMC (1980).

ACCEPTANCE OF AWARD ADDRESS

(By Capt. Douglas E. Fairbanks, Jr., USNR (Ret.))

Your Excellency, Governor James, Senator Heflin, Congressman Smith, Your Honor, Mayor Arrington, Mr. Weeks, Mr. Golden, Admirals, Generals, and all sorts, kinds and sizes of Distinguished Guests, Ladies and Gentlemen:

That "Introduction" delivered by Senator Heflin was the best obituary my wife ever wrote! As she is a Virginian, she did an admirable job of exaggeration in order to play down my Damyankee origins!

Some people have expressed surprise that an actor—primarily a film actor at that—would get himself involved in so many different things. But you'd be surprised—perhaps—to know how far afield the interests of some film actors nowadays can take them! Even "Veteran" actors!

Veterans!

We are all of us only too well aware that "veteran" is another word for "survivor," and that both words have built into them a considerable acknowledgment of luck. Speaking for myself, I can assure you that I feel doubly lucky tonight. First, because I can identify myself with you all as a veteran (on the other hand, whether you will still be surviving after all this evening's festivities and my words are concluded, is very much open to question).

Secondly, and more seriously, though, because of my gratitude for the gesture, I wish you could know how grateful—how very grateful—and a bit humbly embarrassed too—I feel standing here, thanking you for this most highly valued award. There is a tremendous weight and resonance of character and experience to be felt in just facing this audience. To be ushered into this present company, and into the ranks of honor that you not only represent, but embody, fills me with unwordable gratitude and, of course, pride.

Emerson observed that every hero—if I may use that word to make a point—is apt to become a bore at last. Well, I hope not, and I certainly do not intend to suggest that the mold I spring from is in any way heroic! Far from it! For instance, my own experiences often reminded me that if you are on a ship under attack, and you want to run away, where are you going to run to? No, grateful as I am to receive this award (and I haven't the slightest intention of giving it back!), I know only too embarrassingly well that awards are most often given to someone who merely represents or symbolizes a service which has been earned by many. It has been cruelly but often truthfully said that war seldom kills off the right people. I recall, in the Navy, we sometimes used to say that if somebody managed to get his ship sunk by enemy action, or sustained enough casualties, he was decorated. But if he won out, and saved his ship and had no casualties, he wouldn't get any recognition at all!

In the case of my own family—who were the only ones who ever really gave a damn anyway—the matter has never arisen. My wife, my children, and my grandchildren would not, will not, so much as dream of my not being thoroughly deserving of anything I've ever received—for anything! Of course, they might not know what that "anything" was for. But that wouldn't matter! They're so broad-minded! They take an unconventional view of many things. For instance, my eldest daughter, when a small child during the war, thought all dark blue uniforms with bright buttons were Naval officers—and, one day, walking with mother, she saw a policeman in the distance, she called out, "Oh, Mummy, look! There's Daddy!"

In any case, if my family want to say that Daddy won the war single-handed, I have absolutely no intention of disabusing them of the idea. In fact, I might even encourage them! I must admit, that, in my time, I have been known to make up such exaggerated stories that any resemblance between my yarns and the actual facts is very often purely coincidental. (I suspect that there are others here among us tonight that could possibly admit to the same indulgence.)

But on this really solemn occasion I must temper my deep and honest thanks for your wonderful award by acknowledging that, by rights, it should be—if possible—shared with every one of the teams with which I served—in whatever service, in whatever battle, in whatever campaign, and in whatever theater of war, and/or peace! And, of course, in a different way, with all of you as well.

Mark Twain said that war talk by men who have been in war is always interesting.

I'm not so sure about that, but even allowing for the fact that most recollections of the "good old days" are due either to bad memories or good lying, we here certainly can still remember with great vividness our own feelings and "sense impression"—whatever our jobs were—that are now years, and, for some, even decades, old.

We meet here tonight at a time when America seems at last to be recovering two things we had, well, not exactly lost, but rather mislaid for a few years—or thought out-of-date: It is an appreciation of, and a faith in, our country. We are, it seems, taking a new, fresh look at our homeland with new, fresh pride—this time accompanied by a becoming modesty instead of tub-thumping arrogance; we look with a new deep sense of belonging not just to our township or state alone, but to our whole continental vastness and our own people in it. Less and less do we regard ourselves as merely belonging to a large club that somehow provides several unique advantages for its members.

A few years ago, many thought patriotism was "for the birds," an out-of-date cliche reserved for sloppy sentimentalists, or for certain extremists to justify their own power or pomposity, and, in many cases, their excesses or aggressions, or for the philosophy "To Hell with the rest of the world! I'm alright, Jack." Today, though, we find ourselves realizing afresh that if you don't feel a love of roots, of hills, valleys, rivers, skies and coastlines, of people, habits, customs, of your own people, clan or compatriots, you love nothing. You aren't capable of it.

Time, of course, has never, can never, move backwards. We are—we and the rest of the free world hope and pray we are—an ever increasingly responsible and statesmanlike nation. We were, once upon a time, a "promising" nation, then a "strong and equal" nation, and now we are a world power, and even—terrifying enough (for this moment in history at least)—a superpower! This means that while assuming the burdens of such an awesome responsibility we can afford to be quietly confident without needing the added inspiration of the trumpets and the drums—except, of course, for celebrations such as we are enjoying on these particularly special days. After all, we are justifiably proud of our efforts in two great world wars.

We can also now be mature enough to admit that we may possibly have done less well in some subsequent combats—challenges which may have been more limited in scope but just as big in their emotional and physical impact on those directly involved. But from a long-range point of view, they were really not much more than "set backs" which every great power must experience in the course of time. After all, the greatest powers and the most potent and influential cultures in all history—starting, say, five or six thousand years ago with the Egyptians, and the Chinese, then on to the Greeks, the Romans, and finally the British—they shook the world—but they did not win every battle—not by any means! Nor, indeed, every war!

They didn't even come close to doing so! And when they lost, it was not because of any lack on the part of the individual fighting man, but usually because of misjudgments in policy and/or command decisions; or a failure of confidence in a cause or a leader, or an objective, and, oh, for numberless other reasons. But they prevailed for a long time—and their heritage to posterity is indelible! Why? Because the nations or civilizations that did survive over the longest periods were those who were best equipped with the spirit and faith to respond to the challenges of their particular time.

In other words, no nation, any more than any individual, is, or ever has been, forever invincible. But the human spirit is very much so!

Our own Thomas Jefferson said something to the effect that a nation's greatness does not depend on the abundance of its agriculture, the wealth of its industries, nor the size of its armaments, but rather on the quality of human being it produces!

I suggest that we Americans have proven to be of that "top-quality" regardless of the ups and downs of our national fortunes. But it is in the area of our relations with the rest of the world that I'd like to make another point—a point which I feel is apropos and worthy of your notice: The point is, to my mind, whether we do not often perhaps overreact to our potential adversaries and underdevote attention to the problems and anxieties and worries of our friends? If so, let us first briefly analyze our possible potential adversaries, the Soviets:

The object of Soviet policy is, obviously and understandably, to, as it were, "Finlandize" it. In their constant but transparent efforts to achieve this, they are, we must admit, consistent and often effective operators. But I suggest that to deal with a rival—any rival—one must first of all understand his reasoning, his motives, how and why he thinks as he does, acts as he does!

One thing that marks the Russian mentality is—even more than their formal but corrupted attachment to Marxism—their centuries-old fear of what may happen on their borders! They have many countries already within their Empire (but which they call their "Union") and they have put many other countries behind what Churchill so aptly named their Iron Curtain. They have done this partly for ideological reasons but also from fear. Having been invaded and occupied several times, the ordinary, non-political Russian also knows war, knows what it feels like on a massive scale.

This understanding must not, of course, blind us to the cynical and ruthless policies of their rulers—policies which intervene in the affairs of totally alien countries and which, despite numerous treaties, insist on maintaining armed forces far in excess of any conceivable eventuality—and all the

while their own people are short of nearly everything (even Vodka!).

When the Soviets claim they must spend vast sums on their military organizations, this dangerous phobia of theirs must be seen as not just a phase of political expansionist ambition but also as a part of the Russians' pathological fear of the Germans and the Chinese on or near their borders. When the old Russian diplomat Zhukov asked: "How would you like to get up every morning and see 800 million Chinese peeping in your window?" he wasn't just being rhetorically witty. And when the Russians, referring to the Germans—and their other reasons for wanting to keep them divided—ask Americans: "How would you feel if your country was twice invaded in 16 years by Germans—and all the land between New York and Chicago laid waste by them?" one can gain an additional perspective of Russian—as opposed to purely Marxist-Soviet political and military thinking and feeling.

This being said, however, I would urge us all to resist a tendency to regard our most conceivable adversaries as being 12 feet tall, or that they are "supermen" of some sort. For a time, we looked the same way, to some extent, at the Nazis and the Japanese in World War II, and now we seem to be doing it with the Russians. But the Soviets have, in fact, made a number of tremendous mistakes. Their own harsh actions a few years ago in discontented Hungary and Czechoslovakia have haunted the ordinary Russians for years, and have contributed—up to today at any rate—to the Soviet's reluctance to invade and tame a brave Poland. Afghanistan is proving to be a ghastly mistake, not only in Afghanistan itself, but in the opinions of much of the rest of the so-called Third World, where the Soviet invasion has given rise to intense and sustained anti-Russian feeling.

To most recent observers of the world scene, Marxism, like many other things on this only planet we can live on, seems in disarray, to be losing the most ground as a political and economic philosophy. It has lost much of its ideological steam and is rolling up quite a string of failures, while the supposedly decaying "capitalistic" world, or even the free "democratic socialist world" in much of Western Europe, although having serious troubles too, is at least demonstrating very clearly the needed flexibility and resourcefulness and technological initiative that the Marxists have accused us of being too moribund to master.

But this is certainly not a moment for self-congratulation. It is, on the contrary, a very dangerous moment. When a nation's leaders suspect that their internal problems are getting out of hand, some have been known to divert their people's attention from domestic issues and almost force a fresh allegiance to the country's central power by starting foreign adventures or frightening their own people with stories of external threats. We can—and hopefully we will—make it incontrovertibly clear that the western alliance does not seek to destroy Russian power nor to achieve nuclear superiority. We do seek—no, more than that—we insist on a parity of power—or, in other words, a massive reduction by all parties of the threats of war. This present state of affairs cannot be allowed to continue as it is today. No one must ever have reason to press that dreaded button.

Now, to our allies: Some Western Europeans—the younger generations mostly—believe they are caught between the rivalries of Soviet Russia and the U.S., and are trying to hedge their bets. They are afraid the two super-giants will indeed wipe them out. Therefore, not being fully informed—and hence only half-understanding us on the issues—they feel a need to somehow keep the peace with everyone—particularly those countries who have oil and/or weapons. At this point in time these young Europeans are from countries neither as strong nor as rich as we are, nor as they once were themselves, but whose intelligence, experience and abilities are certainly equal to ours—and perhaps, in some cases, superior.

As individuals, we all need friends. So do we as a nation. Therefore, with reference to our allies in the free world, we need and would hope for their willing and collective advice and consent to what we do abroad (which, don't let's fool ourselves, we ought not to be too proud to consider). And, further, for them to join us, and we them, insofar as we are all able, in commonly agreed upon plans for our mutual defense. Our true understanding of their attitudes is every bit as important as their reactions to ours.

For instance, we must sympathetically remember and understand that in two world wars we came in late, and even though we efficiently and bravely tipped the balance of victory toward our side, their losses of life, property, wealth, everything, have been far, far greater than ours; and that though they value their freedom no less than we do ours, they quite naturally harbor a real fear of more wars being fought—for any reason—on that same ground. We may think they are foolishly blinding themselves to the Soviet threats—and to our misunderstanding our own counter-intentions—but really all they dread, and hope to avoid, is being again a horrible battlefield, slaughterhouse and graveyard.

Looking at what could happen, from their point of view, seeing and listening to what the two giants do and say, it is hard to blame them. After all, we in the U.S. still feel the wounds of another war fought here at home 116 years ago—and with "conventional" weapons!

Certainly, there is much to learn from the huge public protests made recently in free, democratic, and allied Western Europe. In West Germany, for instance, anti-nuclear fears are more virulent than ever. And any sign of American "big-talk," of threats or of an insensitivity to these young, emotional and frightened sentiments, could eventually threaten the political and military stability of all our NATO-allied countries.

Hence, it becomes even more ominously clear than ever that it would be a great mistake for us to equate our foreign policy with just our wealth and material "weapons strength" alone! Every bit as important is to realize that true strength is as much dependent on attitude as anything else, and it is therefore essential—I think—for us to undertake, at the earliest moment, as a matter of priority, with patience and sophistication, and self-confidence, with understanding and sensitivity, the far more delicate, but just as necessary, political negotiations required to maintain peace, and to demonstrate, without fear and beyond a doubt, our confident intention to persuade friends and adversaries alike to, as it were, "cool it!"

In short, as we have apparently frightened people by threatening to at least equalize the Soviet's immense military superiority—hoping thereby to deter them from adventuring abroad—we could, I believe, similarly offer to match them in reducing and limiting—on an equal basis—our weaponry.

It is really quite vital to keep before us the fact that Western Europe is the linchpin of Western Free World Security (and in this context, the word "Western" is intended generically to include, of course, Japan and our Commonwealth allies like Australia, New Zealand, the free countries of Asia, and so on). This generalization should of course also include the absolute necessity for achieving a lasting stability in the Middle East—and for its people to realize their ultimate, imperative need to live with each other in peace!

Meanwhile, I hope we will soon be able to provide the masses of young, intelligent, decent Western Europeans with honest and convincing reasons why their idea, or hope, of "neutralism" is a most dangerous thing for them at this time; that such a policy could encourage the Soviets to be more than ever inclined to dominate or control them; and that they are sadly wrong in ever trying to think that such a life "wouldn't be too bad!"

We are not ashamed, and ought not to be, of wanting to help keep the peace by being stronger than we are now—and of persuading our allies of the same thing. Or, at least, to demand no less than equality with the Soviets. It would be ironic if, by becoming "neutral," with the Soviet's military superiority as it is now, Western Europe were to surrender the freedoms the Poles are trying so hard to win. Foreign policies can successfully evolve only after attitudes, confidence, commitments and power are all in balance.

The present, as we know it, has its roots in the past, and with the common interest we share with our allies in a free world, the reward will be, we hope, our common survival and prosperity.

Reminiscence is no small part of these Veteran's Day observances and will always be so as the years go on. They have become one of our proudest traditions. We are only just beginning to appreciate, or remember, what indispensable things traditions are. Those traditions which manage to survive do so because we instinctively know they are more than just ceremonies or reminiscence. More precisely, traditions are a colorful means of measuring our present against our past, and of acknowledging, by re-enactment, a proud contribution to the sum of the national character. Traditions renew ideals, provide us with a more secure sense of continuity, and thereby inspire us to emulate, respect and perpetuate them so that those who follow us can carry on—and build their future on them.

As veterans, we are a brotherhood not only of ourselves but of all who have served our nation in whatever way they could and have thereby added new riches to our inheritance. Now, our confident hearts are being lifted again, not just by our material blessings but by the common recognition of our spirit, and by that patriotism which reveals itself as shared responsibility.

Well over 300 years ago, John Milton wrote: "I think I see in my mind's eye a noble and puissant nation, rousing itself as a strong man after sleep, and shaking its invincible locks." That, Ladies and Gentlemen, is how I feel, that we all feel, about ourselves! And so, with that in mind, I offer again my most heartfelt thanks, and I respectfully raise my glass to the sacred memory of our common past, to those present and absent friends, to all veterans, and members of your organization—and to each and every one of you—and yours. Thank you.

THE WHITE HOUSE,
Washington, D.C., November 5, 1981.

Mr. DOUGLAS FAIRBANKS, JR.,
National Veterans Day in Birmingham, Birmingham, Ala.

DEAR DOUG: Nancy and I are proud and delighted to send our congratulations and best wishes as the National Veterans Day organization presents you with the National Veterans Award.

For over forty years, you have contributed to the well-being of our nation in war and peace. Your distinguished service in the United States Navy during World War II was in the finest tradition of American Armed Forces.

Of course we have known for a long time what an outstanding citizen you are. Our friendship goes back many years, and it has always been one both Nancy and I treasure.

With warm personal regard and, again, our congratulations,

Sincerely,

RON.

REMARKS BY HON. JOHN O. MARSH, JR.

Of all the creatures of the earth, it is only man that has a sense of history. It is this gift which causes us to assemble here today.

In the town where I grew up as a youngster, in the Valley of Virginia, on a small plot of ground, at the intersection of Liberty and Main Streets, is a beautiful monument to those men of Harrisonburg and Rockingham County who gave their lives in World War I. It is a sculptured figure of Liberty mourning her dead.

Carved around the base of the monument are the words:

"They tasted death in youth that Liberty might grow old."

In the 1930's, I can remember in the classrooms on this day, the moment of silence as we paid tribute to mark the 11th hour, of the 11th day, of the 11th month when the Armistice was signed to end the war which was to have ended wars—to make the world safe for Democracy.

Now, over 60 years later, we know that the world has not been made safe for Democracy and wars have not ended. We gather here in Birmingham to pay homage to all of our veterans, not just those of World War I.

Normandy—Midway—Korea—South Vietnam—these were places of violence and valor, far removed from the peaceful and prosperous state of Alabama.

It was an English poet who captured the solemnity of this moment, when the tempo of a nation slows to honor its dead:

> "The tumult and the shouting dies,
> The Captains and the Kings depart;
> Still stands Thine ancient sacrifice,
> An humble and a contrite heart.
> Lord God of Hosts, be with us yet,
> Lest we forget—lest we forget!"

And it was a Canadian soldier, who would be buried in the Fields of Flanders, of which he wrote, who reminded us, the living, of our commitment to our countrymen who fell in battle.

Perhaps we have become too sophisticated and the words seem too old-fashioned or hackneyed. We do not want to be reminded of the obligation of the soldier-poet who says to us:

"Take up our quarrel with the foe;
To you from failing hands we throw
The torch; be yours to hold it high.
If you break faith with us who die
We shall not sleep, though poppies grow
in Flanders Fields."

The purpose in being here today is twofold.

It is commemorative. It is commitment.

Commemoration of this day shall not be complete until such time as this Nation honors all of its veterans of all of its wars. You have done this in Birmingham.

In our public parks, in the hallways of our schools, at the campus, and in the town squares, in the court houses and in the churches, are the plaques, tableaus and statuary which have become community reminders to those who fell in other wars. However, too often there is no shrine to those who served and died on the battlefields of Vietnam. This should trouble our National Conscience. It should be set aright. They made no less a sacrifice for the cause of freedom.

In our time, the formula for a peaceful world is directly related to U.S. defense. A defense that deters war—a defense that causes any would-be aggressor to realize the foolhardiness of an attack on any U.S. interest.

As President Reagan recently stated at Yorktown:

". . . of equal concern to me is the uncertainty some seem to have about the need for a strong American defense . . . Military inferiority does not avoid a conflict, it only invites one, and then insures defeat. We have been trusted with freedom and must ensure it for our children and for their children. We're rebuilding our defenses so that our sons and daughters never need to be sent to war."

We do not seek empire, nor do we seek to force our will on others. Our record after both World Wars is testimony to that.

But, because we are not an aggressive nation, our potential adversaries nevertheless should not forget one of our early flags, carried by our successful Revolutionary forebearers. It was a pine tree displayed on a white background. Around the base of the tree was coiled a rattlesnake and printed across the bottom of that banner were the words, "Don't tread on me."

As we set ourselves to the task of strengthening America's defenses, let us remember that we have much to do. That it will not be done in a day. That it will require sacrifice. Yet, we must get on with it, and we shall get it done.

Let us speak to this commitment.

The world in which we live has three dimensions:

It is a world of crisis.

It is a world of change.

It is a world of ideas.

We live in a troubled world. We live in a world of precarious peace, a peace which is maintained only by U.S. strength. And, to the extent that the U.S. appears to be weakened, peace is weakened. It is only the U.S. leadership of the Free World and U.S. power that safeguards an uneasy truce.

A hasty global overview points to the difficulties of our times. There are seven major geographic areas of concern today:

1. Europe—Where NATO forces are counterposed to prevent aggression by the Warsaw Pact. Our attention is also riveted on the events in Poland.

2. Africa—That continent is the scene of great instability and political cross currents, but is vital to the West because of its resources;

3. The Middle East—Which at times appears to be a tinderbox of conflict. This volatile area is the source of enormous energy supplies;

4. Southwest Asia—Where we find 85,000 Soviet combat forces in Afghanistan;

5. Northeast Asia—Where U.S. forces, along with our Korean allies, safeguard the Korean Peninsula;

6. Southeast Asia—Which is still gripped by oppression; and

7. Latin America—Where we see growing unrest and instability in our own Hemisphere.

To meet these threats of violence, U.S. forces are organized on the basis of the Total Force Concept whereby the regulars, the Guard and the Reserve are co-equal partners.

It is vitally important that we give greater emphasis to the National Guard and the Reserve. In the Army in the coming year you will see greater attention to these essential civilian components.

Soviet power is awesome. Their intercontinental strategic arsenal includes 7,000 nuclear warheads—almost 1,400 of which are in their Intercontinental Ballistic Missile Force and over 900 of which are placed aboard Soviet submarines.

Like their land and sea forces, their air power is a formidable force—strategically and tactically.

A new Soviet blue water navy is appearing on the world's oceans. This naval force is designed to project Soviet power around the world.

The Soviet ground forces have now grown to more than 180 divisions. We have 24 divisions, eight of which are in the National Guard. They have about 47,000 tanks. We have 11,000. We find similar ratios in most other types of essential equipment.

While we have reduced our ability to produce equipment, they have increased theirs.

By any reasonable test, the Soviets have far more than they need to defend their own frontiers. The fact is they have the capability to launch such an attack and project military power beyond their borders.

I have spoken of the military role as we view this threat to our security. But what can others do? Specifically, what can the friends of the Armed Forces and the United States Army do?

I appeal to you this afternoon for special help in educating ourselves on matters that concern the Defense Establishment and the Army. You can tell this story to our fellow citizens who do not have the same level of knowledge or interest about defense matters as you do.

It is the story of:

The threat we face, and

What needs to be done in:

Manpower;

Readiness;

Modernization;

Sustainability.

These needs are not easy and they have a price. Our changing times add to the challenge.

We live in a world of change impacted by technology, by communications, by transportation, by exploration into outer space. It is a world being changed by exploding populations and emerging nations.

However, the world is not changed by armies nor by machines. It is changed by ideas.

The world of ideas and hope is America's world. Its preservation requires dedication and sacrifice from each of its citizens. It requires your skills, your efforts and it requires your time.

You are our greatest resource. You are America's hope for the future.

The last line of the Declaration of Independence is a commitment:

"And for the support of this Declaration, with a firm Reliance on the Protection of divine Providence, we mutually pledge to each other our lives, our fortunes, and our sacred Honor."

We must make this pledge.

President Reagan at Yorktown said:

". . . The freedom we enjoy today has not always existed, and carries no guarantees. In our search for an everlasting peace, let all of us resolve to remain so sure of our strength that the victory for mankind we won here is never threatened."

Perhaps some historian at some future milestone will write—Here passed a small group of Americans, who in their time explored the reaches of outer space and raised the curtain on a new age of discovery.

Through science and medicine, they sought to conquer famine and disease, and helped alleviate human suffering by finding ways to lessen pain.

Through quiet strength and reason, they made less shrill the voices of prejudice and hate.

They paid Liberty's price of eternal vigilance, yet became neither oppressor nor oppressed.

To a land troubled by drugs and crime—by poverty and loss of destiny—they brought a measure of purpose and order as well as personal dignity.

They helped restore the beauty of the earth and safeguarded the elements of our planet vital to all forms of life.

They were a people who willingly bore the burdens of defense. Whose forces kept freedom's lonely vigil and were the guardian of their Nation's values.

And, to a world torn by war, they renewed again the hope of peace.

These things they were able to do because they possessed not only the knowledge, but the will to do them—and believed they could.

Let me leave a charge with you today which was the charge that Washington made to the delegates to the Constitutional Convention. At a time when it appeared the Convention would fall into disarray and the sacrifices of the American Revolution have gone for naught because of differences that developed in the Convention between regions over differences of political philosophies and economic concerns, Washington, the President of the Convention, charged the delegates as to their task with these words:

"Let us raise a standard to which the wise and the honest can repair. The event is in the hands of God."

Let us raise that standard today.

COMMENTS BY: LIEUTENANT GENERAL DONALD E. ROSENBLUM

Mayor Arrington, Congressman Smith, General Merrill, Raymond Weeks, Members of John C. Persons Chapter AUSA.

AMENITIES

I am delighted to be here today, as we pause to honor the veterans of all the wars in which we have fought. I think it's most appropriate that we reflect on our heritage, and the role our veterans had in forging it. And John McCrae helped us do that when he wrote after World War I:

In Flanders fields the poppies blow
Between the crosses, row on row,
That mark our place; and in the sky
The larks, still bravely singing, fly
Scarce heard amid the guns below.

We are the dead. Short days ago
We lived, felt dawn, saw sunset glow,
Loved and were loved, and now we lie
In Flanders fields.

Take up our quarrel with the foe:
To you from failing hands we throw
The torch; be yours to hold it high.
If ye break faith with us who die
We shall not sleep, though poppies grow
In Flanders fields.

I know that no one in our country is more aware of the significance and history of Veterans' Day than you people gathered here in Birmingham. And certainly we all know that Veterans Day began as Armistice Day, a holiday set aside to celebrate the ending of World War I and to honor those who had fought in the battles of that war.

On the first anniversary of the signing of the Armistice over 60 years ago President Wilson set the tone for this annual observance when he said:

"To us in America, the reflections of Armistice Day will be filled with solemn pride in the heroism of those who died in this country's service and with gratitude for the victory, both because of the thing from which it has freed us and because of the opportunity it has given America to show her sympathy with peace and justice in the councils of the nations."

And I can recall as a young boy that at 11 a.m. on each Armistice Day everything stopped as we paid our respects to those who had fallen in the war to end all wars.

But we know peace didn't last. World War II soon followed and of course the Korean Conflict came after that. After each of these conflicts America treated her veterans as the heroes they were.

Then came the longest and most unpopular war in our history. In 1965, American troops became engaged in a type of war Americans did not fully understand. For the most part, soldiers fought in small units against the Viet Cong Guerrilla. For the first time, the horrors of war were brought into American homes for families to see on television in living color. The withdrawal of American troops from Vietnam was completed in March 1973. Our soldiers came home without the ticker-tape parades and confetti that showered their predecessors.

But observances such as this, here in Birmingham serve as excellent reminders to the rest of the nation that the veterans of all of our wars served with dedication and courage. They understood the need for sacrifice . . . of leaving loved ones behind. They knew the loneliness of being on a troopship with thousands, bound for an undisclosed destination. They, too, experienced blood, sweat and tears—sleepless nights, and mud and rain in their chow.

Above all, it was their patriotism and resolve displayed in the fight for freedom that commanded the respect of their fellow Americans. They knew that just desire alone would not guarantee the existence of freedom. They knew that desire must be coupled with the will and capability to win the battle . . . and win it quickly.

It is appropriate today for us to say to the Nation's war veterans, "Thank you for all you have done for America." But, as I was giving some thought to what I would say today it occurred to me that virtually everything a grateful people can say about our veterans has been said before. Indeed, what more can we say?

Perhaps the most appropriate way to honor the finest veterans the world has ever known is to rededicate ourselves to the cause for which they so valiantly fought—freedom. And let me tell you, there are no short cuts to maintaining our Nation's freedom.

The dangers of being unprepared to defend our freedom are great. History shows that each time we've become involved in a war, it's been because somebody thought the United States would not or could not fight. Although we are currently enjoying a period of peace, we are constantly reminded of just how fragile that peace is by such events as the recent assassination of Anwar Sadat and the subsequent tensions between Egypt and Libya.

And we cannot ignore the fact that the Soviet Union is building a military force beyond the need for defense of their borders. These forces are, indeed, a threat to peace and freedom. The Soviet Union has modernized its forces to the point that many of their weapons and equipment are now equal to or superior to our own.

In view of all this it's gratifying to note the new national spirit that is rebuilding America's defense capability. This new spirit of America is the same as the spirit of victory which gave our Nation its freedom after the last major battle at Yorktown in 1781. That spirit pulled us through hard times, and it will pull us through again, if the situation should arise.

It is healthy to reflect occasionally on our past deeds and our history as a Nation and find a measure of pride and feeling of achievement.

But to do full service to the cause for which our veterans fought, we must be united in our will to travel the long road ahead.

It is a road with many junctions and crossroads requiring decisions as to our direction for the future. Perhaps we are at one of those crossroads today—and if we are, we must as a Nation and as individual citizens choose our destiny—and we must choose it wisely. And moreover, once we have made our choice we must move boldly forward—we must believe in ourselves; if we don't—no one else will.

For America to move forward and remain secure it will take the efforts of all of us, in the tradition of the Veterans we're honoring today. And the members of the AUSA have a special mission—we've got to speak out and tell the story of the Army—Active, Guard and Reserve—and the need for public support to insure a strong national defense.

I know those of you here today are already active in supporting the defense of our Nation and because of this have found yourselves subject to criticism upon occasion. And I also know that when you've given your all, criticism hurts and there is a subsequent reluctance to stand up again. And the most vocal criticizers are usually the nonparticipators, the sideliners who haven't what it takes to shoulder responsibility and assume leadership.

Well, Theodore Roosevelt had an answer for those critics. He said,

"It is not the critic who counts, not the man who points out how the strong man stumbled and fell, of where the doer of deeds could have done them better.

"The credit belongs to the man who is actually in the arena; whose face is marred by dust and sweat and blood; who strives valiantly, who errs and comes short again and again . . . and spends himself in a worthy cause; and at the best knows in the end the triumph of high achievement, and who, at the worst if he fails, at least fails while daring greatly . . ."

This has always been the spirit of the American people and particularly our Veterans.

To be credible and respected our Army needs your support. That handful of ragged and rugged Americans who from the very day of our Nation's birth courageously carried its battle streamers forward, are testaments to the courage of all Americans—Then and now. Those Americans with frozen and bloody feet at Valley Forge were not summer soldiers or sunshine patriots, for they were the mainstay of a fledgling Army that established the American precedent. Ten major conflicts and 167 battle streamers later, their sons and daughters continue to carry those same battle colors forward; and the feet that bled 2 centuries ago at Valley Forge are the same feet that trudged across Europe and the Pacific, that struggled up and down the rugged hills of Korea, and slogged through the rice paddies of Viet Nam.

To insure we continue with a tough and dedicated soldier in the First US Army I have charged the leaders with 3 things. We will have disciplined, trained, physically fit soldiers and units.

Discipline—follow orders of officers and NCOs willingly. Pride in themselves—in their units—in their profession. Trained to the Army standards.

Physically fit—look like soldiers and build intestinal fortitude.

We will meet these standards and continue the effort to build a combat ready Army which is credible to the citizens of our Country and to potential adversaries.

In my view Veterans Day is not just another day for speeches, music and parades. It is a day to honor those for their efforts in preserving and upholding America's heritage and ideals. Beyond that, however, it is a day to rededicate ourselves, renewing our strength to meet successfully any requirements which be before us. There are burdens which must be borne, but the Country's Army—your Army—has willingly borne them before . . . And we will not flinch from the task now.

Thank you.

REMARKS OF SHERMAN E. ROODZANT

"It was the nakedness of Bryce's left calfbone that bothered me. Every strip of flesh and muscle had been torn away, so that the splintered bone looked like a broken ivory stick."

That ghastly description of a war wound came from the pages of Philip Caputo's Vietnam combat novel. A Rumor of War. The scene is haunting. It's brutal. But it's a scene that's been repeated countless thousands of times in the wars America has fought.

Such scenes echo the pounding of German artillery as it turned the trenches of World War I into rivers of precious American blood. They echo the crashes of Japanese Kamikaze

planes that transformed the decks of American ships into fields of flame.

And, they echo the firing of communist machine guns, as they mowed down young Americans on the banks of Korea's Yalu River. Over and over again, the horrifying scenes of disabling injury have been repeated in the nine wars and other military actions our country has been forced to fight.

Tomorrow, on Veterans Day, 1981, we ask all of our nation's citizens to remember the courageous men and women whose blood paid the price for peace.

We call on our country's people to understand that war is seldom like the movies on TV—films that focus on the glory of war. The sudden arrival of death or permanent disability is not clean or fine or glorious. War is ugly.

It may have its fine moments, to be sure. It may bring out the very best in our country's young men and women. But those are side effects of war—not the reality of combat.

The reality of war is like Caputo's description of a shattered leg bone. In another period of history, it was the horror of a Confederate soldier crawling across the forest floor toward death, as described in one of Stephen Crane's stories.

War is young Americans being slaughtered and maimed. It's other young Americans mopping from their faces the sweat of fear . . . fear that their number will come up next. These are the men and women who have paid the price for peace, and peace isn't cheap.

Veterans Day is their day. And you can be sure America's 30 million living veterans recall the blood and sacrifice that Veterans Day commemorates. They gave greatly of themselves, risking death and disability, to purchase peace for their country.

America's veterans—particularly its 2½ million disabled veterans—have paid dearly to preserve our freedom, prosperity, and independence from foreign domination.

The Birthright we Americans enjoy . . . a heritage most of us take for granted . . . was bought with anguish and pain.

A million and a quarter of our finest young men and women sacrificed their lives to defend our right to choose our own leaders at the ballot box. Countless thousands will never again enjoy peace of mind because of mental wounds they suffered while fighting to assure that all of us can worship as we wish.

Millions left arms, legs, or other parts of their bodies on the battlefield to insure every American's liberty to say exactly what he or she believes . . . because freedom of speech is a right earned by the patriots who founded the United States.

America's veterans had to interrupt their lives to answer their country's call to duty. They left their jobs and families behind to risk death and disability on the field of battle, in the air, or on the sea.

They did it because they treasured freedom, something that means more here in the United States than anywhere else in the world.

Today, too many young Americans view military service as a responsibility to be avoided at almost any cost. But, like those who serve today, we who have served know differently. We know it is not an easy task to be a soldier, a sailor, an airman or a marine when our country is at war.

As we look at today's world, we understand that it isn't easy to wear the uniforms of our Armed Forces even during peacetime. Just in the past few months, two Soviet-backed countries have attacked American aircraft.

Our military officers and bases have become targets for terrorist assaults. And, at least five times this year, communist troops have instigated fire fights with American forces stationed on the demilitarized zone separating North and South Korea.

I bring this up because the organization I represent—the Disabled American Veterans—is in the business of representing all of those who become disabled in the defense of our country.

And I believe the DAV has a clear obligation to look out for the interests of those who would become disabled if our nation had to go to war again.

To me, the facts are clear. Thousands upon thousands of American troops would come home disabled if our country got into a tangle with another superpower such as the Soviet Union.

The unpredictable factors that are necessarily a part of war make it difficult for military planners to estimate the actual number of casualties we'd face. But, even if use of nuclear weapons could be avoided, casualty figures would still be staggering.

How would our country respond if suddenly faced with a tidal wave of combat-wounded troops, coming home in need of immediate medical attention? Sadly, no one knows. Since the end of the Vietnam War, America has lacked adequate plans and policies for medical treatment of casualties in the event of a new war.

Deeply concerned about this, the DAV has backed legislation to improve the medical staffing of our Armed Forces. We've backed additional legislation to make sure the VA has the medical capacity to do its part as the military medical system's primary back-up in the event of war or national emergency.

And we've stood behind legislation that would allow the VA and the Defense Department to share their medical resources now. As a preparation for the demand that a new war would place on both medical systems, such a sharing arrangement is indispensable.

I don't want to see another war. No rational person does. But, as the members of this audience are well aware, there's international tension and instability all around the globe today. The possibility of war . . . and the possibility of American troops being drawn into the fighting . . . are always there.

If another war involving U.S. troops breaks out, we must be prepared to take care of those who would come home disabled. To do anything less would be unconscionable.

America owes a sacred debt to those who have purchased peace through immense sacrifices. Our country owes this debt to those who will make those same sacrifices if we have to go to war again. And we in the Disabled American Veterans—the DAV—are determined to make sure America never forgets that debt.

Over the past few years, however, we've faced an increasingly bitter battle in defending the rights and benefits earned by those who pay for America's liberty with their blood, health and mental well-being.

Times have been particularly tough due to the overwhelming demand for cuts in government programs.

The Veterans Administration health care system has been starved for the funding and staffing it needs to provide quality medical treatment to sick and disabled veterans.

Programs designed to place disabled and Vietnam era veterans in decent jobs are being shredded. And these programs were never really large enough to put a very big dent in the problems disabled veterans face in today's tight job market.

Many veterans have actually lost their entitlement to benefits they earned through the sacrifices their country asked them to make during our wars. And thousands upon thousands of veterans have been turned away at the doors of undermanned VA medical facilities.

Fortunately, the DAV and veterans' organizations have been able to fight off many of the most damaging proposals thrown at veterans' programs in recent years. For example, with the help of Congress, we blunted an assault made on our programs last winter by David Stockman and his powerful Office of Management and Budget.

But such accomplishments have never come easily. And today, defending veterans' programs from such callous attacks is getting harder year by year . . . even month by month. But we in the Disabled American Veterans will not waver in the heat of these attacks.

We will battle to defend the rights of those who pay the price for peace. We will struggle to improve America's system of veterans' benefits and services.

As the pressure for cuts in these programs mounts, we will remind the American people of what Theodore Roosevelt said about the debt owed to disabled veterans. "A man who is good enough to shed his blood for his country," said our 26th President, "is good enough to get a square deal afterward."

It has always been difficult for disabled veterans to get the "square deal" Roosevelt was talking about. It's more difficult now than ever before. But let's remember that young man I talked about in the beginning of these remarks . . . the one who lost his leg in Vietnam.

Should this veteran or any veteran disabled in the defense of America be denied treatment by the medical system Congress created to serve their needs? Should any veteran be turned away from a job he or she can do because of a disability suffered while defending our country?

Should educational and rehabilitation programs designed to help disabled veterans get a foothold in life be curtailed after they gave so much to make a good life possible for the rest of us?

Certainly not . . . but all of these things are happening to veterans' programs in America today. We in the DAV believe that those who pay the price for peace deserve better treatment than that. Thank you.●

RECESS UNTIL 9 A.M. TOMORROW

Mr. STEVENS. Mr. President, is there an order for convening tomorrow morning?

The PRESIDING OFFICER. There is an order for convening at 9 o'clock.

Mr. STEVENS. Mr. President, if there be no further business to come before the Senate, I ask unanimous consent that the Senate stand in recess in accordance with the previous order.

There being no objection, the Senate, at 7:44 p.m., recessed until tomorrow, Thursday, December 3, 1981, at 9 a.m.

NOMINATIONS

Executive nominations received by the Senate December 2, 1981:

DEPARTMENT OF STATE

Paul H. Nitze, of Maryland, for the rank of Ambassador while serving as head of the U.S. delegation to the Intermediate Range Nuclear Force Negotiations.

Fred M. Zeder II, of Hawaii, for the rank of Ambassador during the tenure of his service as Personal Representative of the President to conduct negotiations on the future political status of the Trust Territory of the Pacific Islands.

EXTENSIONS OF REMARKS

SENATE COMMITTEE MEETINGS

Title IV of Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a system for a computerized schedule of all meetings and hearings of Senate committees, subcommittees, joint committees, and committees of conference. This title requires all such committees to notify the Office of the Senate Daily Digest—designated by the Rules Committee—of the time, place, and purpose of the meetings, when scheduled, and any cancellations or changes in the meetings as they occur.

As an additional procedure along with the computerization of this information, the Office of the Senate Daily Digest will prepare this information for printing in the Extensions of Remarks section of the CONGRESSIONAL RECORD on Monday and Wednesday of each week.

Any changes in committee scheduling will be indicated by placement of an asterisk to the left of the name of the unit conducting such meetings.

Meetings scheduled for Thursday, December 3, 1981, may be found in the Daily Digest of today's RECORD.

MEETINGS SCHEDULED

DECEMBER 4

9:30 a.m.
Finance
Savings, Pensions, and Investment Policy Subcommittee
To hold hearings on S. 829, increasing annuities payable to survivors of Tax Court judges in accordance with certain salary increases, S. 1607, providing a minimum interest and dividend exclusion for each individual, S. 1645, permitting funds in an individual retirement account to be invested in collectibles, and on the substance of S. 1855, revising certain IRS provisions relating to the taxation of State judicial plans which are the regular, exclusive, mandatory plans for service as an elected State judge.
2221 Dirksen Building

Governmental Affairs
Energy, Nuclear Proliferation and Government Processes Subcommittee
To hold hearings on Federal regulatory enforcement policy.
3302 Dirksen Building

10:00 a.m.
Joint Economic
To hold hearings on the employment/unemployment situation for November.
5110 Dirsken Building

11:30 a.m.
Judiciary
To hold hearings on pending nominations.
2228 Dirksen Building.

DECEMBER 7

10:00 a.m.
Judiciary
To resume hearings on S. 995, providing for contribution of damages in antitrust price-fixing suits.
2228 Dirksen Building
Joint Economic
Agriculture and Transportation Subcommittee
To hold hearings on the economic effects of transportation on U.S. agricultural products, focusing on agriculture exports.
5110 Dirksen Building

1:30 p.m.
Judiciary
Constitution Subcommittee
To resume hearings on Senate Joint Resolution 110, Senate Joint Resolution 17, Senate Joint Resolution 18, and Senate Joint Resolution 19, measures amending the Constitution to establish legislative authority in the Congress and the States with respect to abortion.
6226 Dirksen Building

2:00 p.m.
*Banking, Housing, and Urban Affairs
To hold hearings on Senate Resolution 209, S. 1859, Senate Concurrent Resolution 40, S. 971, S. 1609, and S. 1691, measures revising certain provisions of the Federal Reserve Act relating to the structure and membership of the Federal Reserve Board.
5302 Dirksen Building

DECEMBER 8

9:00 a.m.
*Commerce, Science, and Transportation
To hold hearings on S. 1879, providing the Interstate Commerce Commission with authority to review good faith purchase applications which have been rejected by the trustees of the bankrupt Rock Island Railroad.
6226 Dirksen Building.
Governmental Affairs
To hold hearings on debt collection procedures in the health professions student loan program, focusing on high delinquency rates.
5110 Dirksen Building

9:30 a.m.
Energy and Natural Resources
Business meeting, to resume markup of S. 1484, promoting the development of oil shale resources by revising the authority to lease lands containing oil shale deposits, and other pending calendar business.
3110 Dirksen Building
Environment and Public Works
To hold oversight hearings on the Endangered Species Act (Public Law 96-159).
4200 Dirksen Building
Labor and Human Resources
To resume oversight hearings to examine affirmative action regulations of the Office of Federal Contract Compliance Programs, Department of Labor.
4232 Dirksen Building
National Ocean Policy Study
To hold hearings on the status of Atlantic bluefin tuna stocks.
235 Russell Building

10:00 a.m.
Governmental Affairs
To hold hearings on the nomination of Frederic V. Malek, of Virginia, to be a Governor of the U.S. Postal Service.
3302 Dirksen Building
Rules and Administration
To hold hearings on Senate Joint Resolution 95, providing for the construction of the Franklin D. Roosevelt Memorial in the District of Columbia, and S. 1638, establishing a national memorial to Franklin D. Roosevelt on Roosevelt Island, New York City.
301 Russell Building

DECEMBER 9

9:30 a.m.
Select on Indian Affairs
To hold oversight hearings on programs for older American Indians, and to hold hearings on S. 1890, allowing the Lac Courte Oreilles Band of Lake Superior Chippewa Indians of Wisconsin to use up to 20 percent of the funds in their land claims trust accounts to recover certain indirect costs.
357 Russell Building

10:00 a.m.
Energy and Natural Resources
Business meeting on pending calendar business.
3110 Dirksen Building
Judiciary
To hold hearings on S. 1030, revising certain provisions of the Gun Control Act (Public Law 90-618) relating to the licensing of manufacturers, dealers, and importers of firearms and ammunition, and prohibited activities concerning firearms.
2228 Dirksen Building

11:00 a.m.
Labor and Human Resources
To hold hearings on the nomination of Lilla B. C. Tower, of Texas, to be Director of the Institute for Museum Services.
4232 Dirksen Building

2:00 p.m.
Judiciary
To hold hearings on pending nominations.
2228 Dirksen Building
Joint Economic
Monetary and Fiscal Policy Subcommittee
To hold hearings on Federal Government policy as it relates to the defense industrial base.
6226 Dirksen Building

DECEMBER 10

9:00 a.m.
Energy and Natural Resources
To hold hearings on S. 1867, to increase the acreage limitations and abolish the residency requirements of the Federal reclamation laws.
3110 Dirksen Building
Judiciary
*Criminal Law Subcommittee
To hold hearings on S. 613, amending the Federal Criminal Code to revise the scope of, and penalties under, the Hobbs Act, prohibiting interference with commerce by threat or violence.
2228 Dirksen Building

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

9:30 a.m.
Commerce, Science, and Transportation
Business meeting, on pending calendar business.
235 Russell Building
Environment and Public Works
To resume oversight hearings on the Endangered Species Act (Public Law 96-159).
4200 Dirksen Building
Labor and Human Resources
To resume oversight hearings to examine affirmative action regulations of the Office of Federal Contract Compliance Programs, Department of Labor.
4232 Dirksen Building
Select on Intelligence
Budget Subcommittee
To hold closed hearings on intelligence matters.
Room S-407, Capitol
10:00 a.m.
Governmental Affairs
Energy, Nuclear Proliferation and Government Processes Subcommittee
To hold oversight hearings on activities of the Department of Energy.
3302 Dirksen Building
10:30 a.m.
Judiciary
Juvenile Justice Subcommittee
To hold hearings on current conditions of correctional institutions.
6226 Dirksen Building

DECEMBER 11

9:00 a.m.
Energy and Natural Resources
To continue hearings on S. 1867, to increase the acreage limitations and abolish the residency requirements of the Federal reclamation laws.
3110 Dirksen Building
10:00 a.m.
Environmental and Public Works
Business meeting, to resume markup of proposed amendments to the Clean Air Act (Public Law 95-95).
1202 Dirksen Building
10:15 a.m.
Finance
Taxation and Debt Management Subcommittee
To hold hearings on S. 696, providing that certain State or Federal organizations operating as libraries which serve the public be treated as tax-exempt public charities, and S. 1883, conforming the net operating loss carryback and carryforward rules for the Federal National Mortgage Association to that available for other financial institutions.
2221 Dirksen Building

DECEMBER 16

9:30 a.m.
*Veterans' Affairs
Business meeting, to mark up S. 349, providing for limited judicial review of the administrative action of the Veterans' Administration, and for reasonable fees to attorneys representing legal counsel for veterans.
412 Russell Building
10:00 a.m.
Commerce, Science, and Transportation
Aviation Subcommittee
To hold oversight hearings on training and testing programs for air traffic controllers.
235 Russell Building
Energy and Natural Resources
Business meeting, to consider pending calendar business.
3110 Dirksen Building

JANUARY 13, 1982

9:30 a.m.
Judiciary
Constitution Subcommittee
To hold hearings on S. 1761, amending the Voting Rights Act of 1965, to provide for the application of preclearance provisions to all States and political subdivisions, and provide for submission of any changes under the preclearance provisions to the appropriate U.S. district court.
2228 Dirksen Building

JANUARY 14, 1982

9:30 a.m.
Judiciary
Constitution Subcommittee
To continue hearings on S. 1761, amending the Voting Rights Act of 1965, to provide for the application of preclearance provisions to all States and political subdivisions, and provide for submission of any changes under the preclearance provisions to the appropriate U.S. district court.
2228 Dirksen Building

JANUARY 20, 1982

9:30 a.m.
Judiciary
Constitution Subcommittee
To resume hearings on S. 1761, amending the Voting Rights Act of 1965, to provide for the application of preclearance provisions to all States and political subdivisions, and provide for submission of any changes under the preclearance provisions to the appropriate U.S. district court.

HOUSE OF REPRESENTATIVES—*Thursday, December 3, 1981*

The House met at 10 a.m. and was called to order by the Speaker pro tempore (Mr. PRICE).

DESIGNATION OF SPEAKER PRO TEMPORE

The SPEAKER pro tempore laid before the House the following communication from the Speaker:

WASHINGTON, D.C.,
November 30, 1981.

I hereby designate the Honorable MELVIN PRICE to act as Speaker pro tempore on Thursday, December 3, 1981.

THOMAS P. O'NEILL, Jr.,
Speaker of the House of Representatives.

PRAYER

The Chaplain, Rev. James David Ford, D.D., offered the following prayer:

O God, from whom we have received the blessings of life, graciously bestow upon us the gift of Your presence. We pray for our Nation that You will encourage the people to strive to do those things that bring honor and peace and understanding one with another. Give us a vision that overcomes our selfish interests and enable us to work in harmony for the common good. May Your love and abiding grace touch each life that reaches to You for whatever need, and cause us all to be mindful of the gift of this new day. Amen.

THE JOURNAL

The SPEAKER pro tempore. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Sparrow, one of its clerks, announced that the Senate had passed a bill of the following title, in which the concurrence of the House is requested:

S. 691. An act to amend titles 18 and 17 of the United States Code to strengthen the laws against record, tape, and film piracy and counterfeiting, and for other purposes.

THE RAILROAD ACCOUNTABILITY ACT OF 1981

(Mr. DORGAN of North Dakota asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DORGAN of North Dakota. Mr. Speaker, today, I am introducing legislation to hold the Nation's land grant railroads to their bargain with the American people.

One hundred years ago the people of America gave over 130 million acres of public lands to a handful of railroad corporations. These corporations received these lands for one purpose and one purpose only: to enable them to build and operate railroads for the benefit of all.

That was the bargain. The railroads received vast amounts of land that proved rich in coal, timber, oil, gas, and other resources. Almost 25 percent of my State, North Dakota, was given away in this fashion. In return, the railroads were to use this endowment to provide rail service for the public.

Now, however, the land grant railroads are trying to walk away from that bargain.

A prime example is the railroad that is now the Burlington Northern. Congress gave the BN 40 million acres of public lands. By means fair and not so fair, the BN has turned these grants into a land and mineral empire that is one of the richest in the world. The BN's coal holdings alone are close to 15 billion tons, and it has 7.5 million acres of oil and gas rights.

The BN has set up a holding company to separate these land grants from the railroad they were intended to support. At the same time, it is planning to abandon hundreds of miles of branch lines in North Dakota, Montana, and in other States.

It wants to take the land grant resources and develop them exclusively for its own profit, while it leaves the railroad bare, and while it leaves farmers to truck their grain long distances over roads that were not built to take such pounding.

It wants the State and Federal Governments to use funds they do not have to build new roads or to assume responsibility for the tracks the BN abandons.

That is no way to run a railroad as the Penn Central and others have amply demonstrated.

Last year, the BN's nonrailroad income provided over half the money it put into the railroad. This is the use for which the land grants were intended. If the BN diverts its endowment from that intended use, then the people of my State and of other States can expect an erosion of service, higher rates, and ultimately, more abandonments.

Adding insult to injury, the railroads received such generous new tax breaks from Congress this year that the BN and possibly others will pay virtually no income tax to the Federal Government. Despite this congressional beneficence, added to that already bestowed, the BN claims it cannot afford to keep branch lines open.

The legislation I am introducing today would help them get their thinking straight on these matters.

First, the legislation would require the BN and other land grant railroads to include income from their land grants in their branch line balance sheets, when they want to abandon a line and are trying to justify that move to the Interstate Commerce Commission. They could not avoid this requirement, moreover, by stashing their land grants and minerals into a holding company.

This provision would diminish somewhat the danger to the public which railroad holding companies present. It would pierce the accounting devices by which land grant railroads don a tattered cloth coat when they appear before the ICC to justify an abandonment.

In addition, my legislation would require the BN and other land grant railroads to forfeit a fair portion of their land grants if they decide to abandon service, when there are still shippers who want and need that service. They would forfeit the granted lands and minerals to a State, in the proportion that they abandon track mileage in the State.

Fair is fair. If the land grant railroads are willing to serve the people, then they should be able to keep their land grants. If they do not want to serve the people, then they have no business keeping those grants. We should take them back and put them to the use for which they were intended.

Naturally, the railroads contend otherwise.

Perhaps my colleagues have seen the big newspaper ads in the Washington Post, in which the railroads proclaim that they have paid back the land grants 10 times over by providing allegedly cutrate service to the Government. That is an impressive figure. How did the railroads calculate it? By ignoring the value of the coal, oil, gas, timber, and other minerals connected to their land grants. By pretending that all the public gave them was scrub prairie.

It is even questionable that the service the railroads provided the Government was as "cut rate" as they claim.

In short, if we believe that the railroads have paid back their land grants 10 times over, then we would probably believe that the Dutch settlers were taken to the cleaners when they bought Manhattan Island from the Indians for trinkets and beads.

More important, the very premise of the railroads' argument is incorrect.

Congress expected more than some discount rail fares when it gave the railroads those massive land grants. It expected continuing rail service for the people of this Nation. "The entire concept of authorizing the (land grant) railroads was premised on their continued operation." That is the conclusion of a Congressional Research Service study undertaken at my request.

The bargain continues. The railroads cannot pack up their land grants and walk away.

On top of this, the CRS study points out that Congress reserved for itself the power to modify or clarify the land grants to make certain that their underlying purpose is carried out. That is exactly what my legislation seeks to do.

We need good, healthy rail service in this Nation. Our farmers need it. Our business people need it. Rail service is economical. It is safe. It saves fuel at a time when saving fuel is one of the biggest challenges on our horizon.

Over 100 years ago our forebearers in this Chamber thought they were insuring this rail service for future generations. They created for this purpose perhaps the biggest endowment that this Nation or any nation has ever seen.

Now the recipients of that endowment want to divert it to other purposes. That is not right. It is not fair. It is an affront to the good faith of the American people.

It is up to us to require the railroads to honor their commitment. It is up to us to make certain that the original purpose of the railroad land grants is fulfilled.

I invite my colleagues to join me in this task by cosponsoring the legislation I am introducing today.

THE SO-CALLED UNITED STATES-CANADA "COMMITMENT" REGARDING THE ALASKAN NATURAL GAS PIPELINE

(Mr. CORCORAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. CORCORAN. Mr. Speaker, the House will soon be considering House Joint Resolution 341, a resolution approving waivers to the Alaska Natural Gas Transportation Act of 1976 that were submitted by the President on October 15. The other body has approved these waivers and both House committees of jurisdiction have reported House Joint Resolution 341. The 1976 law limits floor debate to 1 hour, and so it is important that Members be aware of the issues involved here.

One issue that has received considerable attention is the supposed "commitment" by the United States to Canada in connection with the pipeline project. I would like to discuss this issue here. On September 8, 1977, President Carter and Canadian Prime Minister Trudeau announced that the United States and Canada had reached an agreement on the joint project for the transportation of Alaskan and Canadian natural gas. On September 20, 1977, the "Agreement on Principles Applicable to a Northern Natural Gas Pipeline" was signed by the two countries. This was an agreement on principles, not a commitment to a specific approach for financing the project. The agreement established terms and conditions by which a pipeline would be built to deliver natural gas to the lower 48 States.

We have been led to believe by the proponents of the waivers of law that, if we do not pass the waiver package, we will be reneging on our word. Actually, the submission of the pending waiver package by the administration and expeditious consideration by the Congress fulfills the responsibility of the United States. However, we should not be limited to this and only this legislative remedy for moving this important pipeline project forward to completion. Just as in the case of treaties, no American President can bind the Congress to approve of agreements reached between the President and foreign leaders.

Furthermore, Canada has blatantly violated the 1977 agreement when it established requirements on the type and size of steel to be used in the Canadian segment of the pipeline. When the original agreement was made, it was felt that the Alaska Natural Gas Transportation System (ANGTS) would benefit both the Canadian and U.S. steel industries. Now, however, the Canadian National Energy Board has stressed that at least 85 percent of the steel used to build the Canadian portion of the pipeline should be manufactured by Canadian steel companies.

On February 20, 1978, Canada announced that it had chosen a 56-inch pipe for the 1,085-mile segment between Whitehorse, Yukon, and Caroline Junction, Alberta. U.S. officials had informed Canada that a 48-inch pipe was preferred because of its lower cost. Canadian Deputy Prime Minister MacEachen was quoted as saying that the reason his government chose the larger pipe was because it was produced by two Canadian steel companies but by no U.S. companies.

Section 7 of the agreement required that each Government "endeavor to insure that the supply of goods * * * to the Pipeline project will be on generally competitive terms, (including) price, reliability * * * and delivery schedules." The Canadian policy is obviously in violation of this section of the agreement.

The United States has complied with the requirements of the formal agreement. Some people argue that if we do not pass this waiver package, the Canadians will feel that we have not kept our part of the bargain. In fact, however, it is we in the United States who should feel that way. Our commitment requires our Government to expedite construction of the pipeline by Congress lifting the jurisdiction of the courts and permitting the limitation of administrative procedures. The agreement never committed the U.S. Government to securing capital for the construction of the project.

Mr. Speaker, we have kept and can keep our promises without accepting this particular waiver package. Neither the U.S. Government nor our gas ratepayers were or can be expected to pay for a gas transportation system that may never deliver gas to U.S. consumers.

PERMISSION FOR COMMITTEE ON INTERIOR AND INSULAR AFFAIRS TO HAVE UNTIL 5 P.M. FRIDAY, DECEMBER 4, TO FILE SUNDRY REPORTS

Ms. OAKAR. Mr. Speaker, I ask unanimous consent that the Committee on Interior and Insular Affairs have until 5 p.m. Friday, December 4, 1981, to file sundry reports.

The SPEAKER pro tempore. Is there objection to the request of the gentlewoman from Ohio?

There was no objection.

PERMISSION FOR COMMITTEE ON THE DISTRICT OF COLUMBIA TO HAVE UNTIL MIDNIGHT TOMORROW TO FILE REPORT ON H.R. 4910, DISTRICT OF COLUMBIA SELF-GOVERNMENT AND GOVERNMENTAL REORGANIZATION ACT

Ms. OAKAR. Mr. Speaker, on behalf of the chairman of the Committee on the District of Columbia, Mr. DELLUMS, I request unanimous consent that the Committee on the District of Columbia have until midnight, Friday, December 4, 1981, to file its report on H.R. 4910, a bill to amend the District of Columbia Self-Government and Governmental Reorganization Act and the charter of the District of Columbia with respect to the provisions al-

lowing the District of Columbia to issue general obligation bonds and notes and revenue bonds, notes, and other obligations.

The SPEAKER pro tempore. Is there objection to the request of the gentlewoman from Ohio?

There was no objection.

PERMISSION FOR COMMITTEE ON ENERGY AND COMMERCE TO HAVE UNTIL MIDNIGHT TONIGHT TO FILE REPORT ON HOUSE JOINT RESOLUTION 341, WAIVER OF LAW PURSUANT TO ALASKA NATURAL GAS TRANSPORTATION ACT

Ms. OAKAR. Mr. Speaker, I ask unanimous consent that the Committee on Energy and Commerce may have until midnight tonight to file a report on House Joint Resolution 341, waiver of law pursuant to the Alaska Natural Gas Transportation Act.

The SPEAKER pro tempore. Is there objection to the request of the gentlewoman from Ohio?

Mr. CORCORAN. Mr. Speaker, reserving the right to object, I do so in order to inquire of the distinguished gentlewoman from Ohio if she can inform the House as to what the content perhaps is of the report. But, more importantly, what the expectation might be as to when the House would consider this joint resolution.

Ms. OAKAR. Mr. Speaker, will the gentleman yield?

Mr. CORCORAN. I yield to the gentlewoman from Ohio.

Ms. OAKAR. This is a privileged resolution that can come up at any time next week. The reason for allowing this report to be filed a little later is so that all of the various opinions, including the minority opinions, might be in the report.

Mr. CORCORAN. If the request is for a delay in the submission of the report, I would assume that that would mean we would be given adequate time to review the report, not only in terms of those who have participated in its development but also, and most importantly, as I indicated earlier, the expedited procedure here allows for only 1 hour of debate on something which many of us feel is quite controversial rather than just minor technical in nature. So we have until the middle of December, as I understand it, to take up this matter.

Is there some expectation that even as soon as next week this matter would, in fact, be scheduled? That is the concern that I have, as to just when might the House be debating this issue.

Ms. OAKAR. We are really not sure because this is a privileged resolution. But I am sure that the Speaker will note the gentleman's comments and try to act accordingly.

Mr. CORCORAN. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentlewoman from Ohio?

There was no objection.

PERMISSION FOR COMMITTEE ON ENERGY AND COMMERCE TO HAVE UNTIL MIDNIGHT TONIGHT TO FILE REPORT ON H.R. 4927, RECORD CARRIER COMPETITION ACT OF 1981

Ms. OAKAR. Mr. Speaker, I ask unanimous consent that the Committee on Energy and Commerce have until midnight tonight to file a report on H.R. 4927, the Record Carrier Competition Act of 1981.

The SPEAKER pro tempore. Is there objection to the request of the gentlewoman from Ohio?

There was no objection.

DISPENSING WITH CALL OF CONSENT CALENDAR ON MONDAY, DECEMBER 7, 1981

Ms. OAKAR. Mr. Speaker, I ask unanimous consent to dispense with the call of the Consent Calendar on Monday, December 7, 1981.

The SPEAKER pro tempore. Is there objection to the request of the gentlewoman from Ohio?

There was no objection.

DISPENSING WITH CALENDAR WEDNESDAY BUSINESS ON WEDNESDAY NEXT

Ms. OAKAR. Mr. Speaker, I ask unanimous consent that the business in order under the Calendar Wednesday rule be dispensed with on Wednesday, December 9, 1981.

The SPEAKER pro tempore. Is there objection to the request of the gentlewoman from Ohio?

There was no objection.

WHITE HOUSE CONFERENCE ON AGING

(Mr. HARKIN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HARKIN. Mr. Speaker, today the Third White House Conference on Aging is ending. Every 10 years the White House Conference on Aging is held and this is the first time in 30 years that the members of the subcommittees of that White House Conference on Aging have been selected by a poll conducted by the Republican National Committee. Even 10 years ago President Nixon did not have the gall to try to stack the White House Conference on Aging, but this year President Reagan did.

In 3½ days of meetings here in Washington they only had time for one vote. The delegates to this White House Conference on Aging were hand-picked by the White House, stacked into those subcommittees, and then the other delegates were not even allowed to express themselves on the individual issues that concern the elderly of this country.

Why I ask is President Reagan afraid to hear the voices of the elderly in this country? We know why. Because this administration wants to pull the rug out from underneath of programs that this Congress and other Presidents have established to provide for the well-being, the health and security of the elderly people of this country.

President Reagan has made a travesty and a sham of a very important meeting held every 10 years by the elderly in our country, the White House Conference on Aging.

COMMUNICATION FROM THE CLERK OF THE HOUSE

The SPEAKER pro tempore laid before the House the following communication from the Clerk of the House of Representatives:

WASHINGTON, D.C.,
December 2, 1981.

Hon. THOMAS P. O'NEILL, Jr.,
The Speaker, House of Representatives, Washington, D.C.

DEAR MR. SPEAKER: Pursuant to the permission granted in the Rules of the House of Representatives, the Clerk received at 9:20 a.m. on Wednesday, December 2, 1981, the following message from the Secretary of the Senate: That the Senate passed without amendment H.R. 4591.

With kind regards, I am,

Sincerely,

EDMUND L. HENSHAW, Jr.,
Clerk, House of Representatives.

HEARINGS ON TAX EXPENDITURES

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Michigan (Mr. BONIOR) is recognized for 5 minutes.

● Mr. BONIOR of Michigan. Mr. Speaker, I rise to announce that the House Committee on Rules will hold hearings on December 9 and 10, 1981, on a bill which I authored, H.R. 4882.

This bill would require that the Congress establish ceilings for tax expenditures in each of its budget resolutions and for related purposes.

If the Congress is ever to have an effective budget process, it must have access to as many fiscal tools as possible in formulating that budget. To leave direct consideration of tax expenditures out of our deliberations on the first and second budget resolutions, is to deny ourselves access to an estimated $266 billion (fiscal year 1982) in tax concessions that could be used to offset some of the draconian cuts we have been forced to make in direct expenditures.

The hearings will be held in room H-313 of the Capitol at 10 a.m. and inter-

ested Members and staff are invited to attend.●

CONGRESSMAN WYDEN INTRODUCES LEGISLATION TO PROHIBIT IMPORTATION OF LIBYAN OIL

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Oregon (Mr. WYDEN) is recognized for 5 minutes.

● Mr. WYDEN. Mr. Speaker, on behalf of Mr. MARKEY and Mr. FOGLIETTA, I am today introducing legislation to end the embarrassing spectacle of the U.S. Government bankrolling the terrorist excursions of Libyan leader Mu'ammar Qadhafi.

The U.S. Government purchases significant amounts of oil from Libya to fill the strategic petroleum reserve. Since September of 1980, the Government of the United States has purchased 13 million barrels of oil from Libya. This brings the total to 23 million barrels of Libyan oil for the strategic reserve and $660 million American tax dollars for Mu'ammar Qadhafi.

The U.S. Government is the fourth largest importer of Libyan crude into America—after Conoco, Gulf, and Marathon. In the first 8 months of this year, we purchased an average of 30,000 barrels of Libyan oil a day.

Although the U.S. Government does not negotiate directly with the Libyan Government, it buys the oil from companies who do. For the records of the Department of Energy, the U.S. Government is the importer of record.

This bill is a modest first step to end the hypocrisy of Colonel Qadhafi using the U.S. Government credit card to buy Soviet weapons for use against our allies. It is time that America backs up our rhetoric with concrete policy decisions.

Since introducing my original legislation, H.R. 4797, Exxon Corp. has announced its decision to end operations in Libya. We applaud this decision, and hope that other companies in Libya follow suit. It is apparent that the decision by Exxon and reports that Mobil may also end operations in Libya has clearly caused Colonel Qadhafi to reevaluate his policies. His removal of troops from Chad may have been as much an economic decision as a foreign policy decision. It has also been reported that his presence in Chad was costing him over $2 billion per year.

In addition, he has been forced to scale back the ambitious domestic program of subsidized housing, cheap food, cars, radios, and electricity projects.

In the end, U.S. policy toward the Government of Libya is a matter of principle. We can no longer finance a government that exports terrorism the same way Japan exports cars and televisions.

H.R.—

A bill to prohibit the U.S. Government from importing oil extracted in Libya

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) notwithstanding any other provision of law, after the date of enactment of this Act, no department or agency of the United States or any other component of the United States Government may import, directly or indirectly, into the United States or its territories or possessions any crude oil extracted in Libya.

(b) The Secretary of the Treasury may prescribe regulations to carry out the provisions of subsection (a).●

COPERNICUS CULTURAL AND CIVIC CENTER TO BE DEDICATED

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. ANNUNZIO) is recognized for 5 minutes.

● Mr. ANNUNZIO. Mr. Speaker, on December 9 the Copernicus Foundation will sponsor a dedication gala in celebration of the completion of the first phase of the Copernicus Cultural and Civic Center in Chicago at 5216 West Lawrence Avenue, located in the 11th District I am honored to represent.

The Copernicus Foundation was established by the Illinois Division of the Polish-American Congress as a not-for-profit corporation in order to create the Copernicus Cultural and Civic Center to serve the Chicago area's 1.2 million people of Polish descent. The able Mitchell P. Kobelinski, a former administrator of the Small Business Administration, is the foundation's president.

The cultural and civic center is part of the Copernicus Foundation's efforts to preserve Polish heritage, culture, and folklore, as well as the brilliant record of Polish contributions to the ethnic mosaic of Chicago and our entire Nation. The foundation also helped to establish a senior citizens' nutrition site and social center to serve all of the residents on the northwest side of Chicago.

When completed, it is anticipated that the Copernicus Cultural and Civic Center will be the finest building of its kind in the country and will serve as a living monument to the outstanding contributions which Polish Americans have made to the strength and greatness of the United States.

In addition to providing Polish and English language instruction and classes in ethnic handicrafts, the center will sponsor senior citizens programs, art exhibitions, a Polonia bookstore, an authentic Polish restaurant, a comprehensive research library, and a 700-seat theater.

Mr. Speaker, I extend my greetings to all the officers and members of the Copernicus Foundation on the occasion of this dedication, and send them my best wishes for continued success in service to our Chicago community. The names of the officers and board of directors follow:

OFFICERS

President, Mitchell P. Kobelinski; executive vice president, Donald A. Gutowski; vice president, Hon. Roman C. Pucinski; vice president, arts and programing, Edwin Cudecki; vice president, volunteers, Wanda Kalin; vice president, engineering, Louis Koncza; secretary, Helen Raczynski; assistant secretary, Jan Lorys; treasurer, Genevieve Daly; assistant treasurer, Stella Patrzykont.

BOARD OF DIRECTORS

Marion N. Baruch, Jerzy Bazylewski, Elaine Beatovic, Harriet Bielanski, Rev. Edward Brzostowski, Richard W. Ciesla, Grazyna Cioromski, Edwin P. Fifielski, Stephanie Gondek, John Grabowski, Stefanie Jagielski, Olga Kaszewicz.

Helen Kempa, Richard Lelko, Roman Lobodzinski, Kazimierz Lukomski, Aloysius A. Mazewski, George W. Migala, Stanley Richards, Angela Ritza, Rev. John Rolek, Josephine Rzewski, Estelle Sprengel, Edmund Stefanowicz, Tadeusz Szebert, Julian Witkowski, Alice Zurek.

ADMINISTRATIVE DIRECTOR

Helen M. Milecki.

CONSULTANT FOR ARTS AND PROGRAMING

Leonard Pas.●

NOTICE OF HEARINGS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New Jersey (Mr. RODINO) is recognized for 5 minutes.

● Mr. RODINO. Mr. Speaker, the Subcommittee on Monopolies and Commercial Law will continue its series of hearings on merger policy on Wednesday, December 9, 1981. That hearing will focus mainly on mergers and takeovers in the energy industries and will be held at 9:30 a.m. in room 2141 of the Rayburn House Office Building.

Members or other individuals wishing to testify or submit a statement for the record should address their requests to the House Committee on the Judiciary, 2137 Rayburn House Office Building, Washington, D.C. 20515.●

DEATH OF MISSIONARIES IN EL SALVADOR REMAINS SYMBOL OF THE FAILURE OF OUR NATIONAL POLICY

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from Ohio (Ms. OAKAR) is recognized for 5 minutes.

● Ms. OAKAR. Mr. Speaker, 1 year ago yesterday an unspeakable atrocity was committed on a dark road in El Salvador. The bodies of four American churchwomen, cruelly violated, slaughtered like sheep, were thrown into a ditch by their abductors. Their murderers undoubtedly expected that this shocking atrocity would get a message to the people of El Salvador. Instead, they sent a message to the entire world, and especially to the American people. In the minds and hearts of millions of Americans, these women stood for something—and that is why they were killed. Four brave women, in life so powerless at the hands of their killers, have become powerful in death.

On December 2, 1980, they were simply four dedicated missionaries. What do they represent today, December 2, 1981? They have become something more. Maura Clarke and Ita Ford, Dorothy Kazel, and Jean Donovan are names that have been etched in our national soul.

They are symbols of the failure of a national policy that promotes increasing militarization and weaponry as the solution to the political dilemmas of this hemisphere.

They are symbols of the thousands of nonalined, noncombatant civilians of El Salvador who have been tortured, mutilated, slaughtered since the recent civil violence began—the numbers are now estimated to exceed 11,000 since January 1981.

They are symbols of what the eclipse of our human rights policy in Latin America has really meant: a license for those who carry our guns, ammunition, and equipment, to kill at random—to obliterate all political opposition with bullets rather than ballots.

In their own dedication to relief work in the weeks before their death, these women symbolize the almost half million refugees from El Salvador that violence has driven from their homes into neighboring countries—violence that means certain death if we deport them from our shores.

They represent the vicious repression of humanitarian workers, church people, journalists, teachers, community organizers that has marked several Latin American countries that enjoy our friendship and foreign assistance.

These women represent, above all, the reluctance of the Salvadoran Government to fix blame for the murder of innocent civilians. Their unsolved murders are evidence of the complicity and duplicity of our own State Department in putting out reports of continuous progress in the investigations and prosecutions of these murders—when in fact there has been no progress and no evidence of pressure being applied.

For a whole year the families and religious communities of these four women have pressed and pleaded for information and action in the investigation and prosecution of these murders. We know well the obstacles, indifference, and evasions they encountered. Since January of 1981, the Members of Congress have sponsored 18 pieces of legislation; they have risen to speak on this floor 237 times on the issue of El Salvador. What has been the response of our administration and State Department? Since last December, millions of American citizens have flooded the White House and the Congress with more mail than on any other international issue in recent memory. What has been the response of our Government?

With their blood, these woman planted seeds of hope for a peaceful community among the Salvadoran people. What has our foreign policy planted there?

We cannot afford to let fear and paronoia dictate our international relations. In the long run, this will be the greatest threat to our national security.

The four martyrs of El Salvador lived with fear daily—but it did not overcome their dedication to justice and compassion. Their own words speak eloquently of their humanity, their courage, their faith.

Sister Maura Clarke wrote in a letter:

> My fear of death is being challenged constantly as children, lovely young girls, old people are being shot and some cut up with machetes . . . A loving God must have a new life of unimaginable joy and peace prepared for these precious unknown, uncelebrated martyrs.

Jean Donovan wrote to a friend:

> I love life and I love living. While I feel compassion and care for the people here, I am not up for suicide and so must assess my own situation frankly. Several times I decided to leave. I almost could, except for the children, poor bruised victims of adult lunacy. And who would care for them? Whose heart could be so staunch as to favor the reasonable thing in a sea of their tears and neediness? Not mine, dear friend. Not mine.

The four martyrs of El Salvador have honored us all as Americans, as women, as ministers of peace and compassion. As a nation, we can do no less honor, than to bend all of our efforts toward bringing an end to the terrible violence that claimed their lives.●

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. BETHUNE) to revise and extend their remarks and include extraneous material:)

Mr. LEACH of Iowa, for 60 minutes, on December 10.

Mr. COURTER, for 60 minutes, on December 9.

Mr. COURTER, for 60 minutes, on December 15.

(The following Members (at the request of Ms. OAKAR) to revise and extend their remarks and include extraneous material:)

Mr. BONIOR of Michigan, for 5 minutes, today.

Mr. WYDEN, for 5 minutes, today.

Mr. ANNUNZIO, for 5 minutes, today.

Mr. GONZALEZ, for 15 minutes, today.

Mr. RODINO, for 5 minutes, today.

Mr. DE LUGO, for 5 minutes, today.

Mr. COELHO, for 5 minutes, today.

Ms. OAKAR, for 5 minutes, today.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

(The following Members (at the request of Mr. BETHUNE) and to include extraneous matter:)

Mr. WHITEHURST.

Mr. ROBERTS of South Dakota.

Mr. PASHAYAN.

Mr. HUNTER.

Mr. CORCORAN.

Mr. YOUNG of Florida in 10 instances.

Mr. REGULA.

Mr. SHUMWAY.

Mr. TAUKE.

(The following Members (at the request of Ms. OAKAR) and to include extraneous matter:)

Mr. GRAMM.

Mr. RODINO.

Mr. SCHUMER.

Mr. MINETA.

Mr. HUBBARD.

Mr. WALGREN.

Mr. CLAY.

Mr. HAMILTON in two instances.

Mr. D'AMOURS.

Mr. ROSENTHAL in 10 instances.

Mrs. BOUQUARD in five instances.

Mr. DORGAN of North Dakota.

Mr. PEASE.

Mr. STARK in three instances.

Mr. BINGHAM.

Mr. MCDONALD in five instances.

Mr. BARNES.

Mr. SAVAGE.

Mr. BIAGGI in five instances.

Mr. WATKINS.

SENATE BILL REFERRED

A bill of the Senate of the following title was taken from the Speaker's table and, under the rule, referred as follows:

S. 691. An act to amend titles 18 and 17 of the United States Code to strengthen the laws against record, tape, and film piracy and counterfeiting, and for other purposes; to the Committee on the Judiciary.

ADJOURNMENT

Ms. OAKAR. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 10 o'clock and 15 minutes a.m.) under its previous order, the House adjourned until Monday, December 7, 1981, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

2596. A letter from the Architect of the Capitol, transmitting the semiannual report on expenditures covering the period April 1 through September 30, 1981, pursuant to section 105(b) of Public Law 88-454, as amended; to the Committee on Appropriations.

2597. A letter from the Acting Secretary of the Interior, transmitting certification that an adequate soil survey and land classification has been made on the Carlsbad Irrigation District, Brantley project, New Mexico, and that the lands to be irrigated are susceptible to the production of agricultural crops by means of irrigation, pursuant to section 1 of the act of July 31, 1953; to the Committee on Appropriations.

2598. A letter from the Principal Deputy Assistant Secretary of Defense (Comptroller), transmitting certification that no use was made of funds appropriated during the period April 1, 1981, to September 30, 1981, to make payments under contracts for any program, project, or activity in a foreign country except where, after consultation with a designee of the Secretary of the Treasury, pursuant to section 109 of the Military Construction Appropriation Act of 1981, Public Law 96-436; to the Committee on Appropriations.

2599. A letter from the Director, Defense Security Assistance Agency, transmitting a report on the impact on U.S. readiness of the Air Force's proposed sale of certain defense articles to Saudi Arabia (Transmittal No. 82-07), pursuant to section 813 of Public Law 94-106; to the Committee on Armed Services.

2600. A letter from the Director, Defense Security Assistance Agency, transmitting a report on the impact on U.S. readiness of the Navy's proposed sale of certain defense articles to Australia (Transmittal No. 82-09), pursuant to section 813 of Public Law 94-106; to the Committee on Armed Services.

2601. A letter from the Director, Defense Assistance Agency, transmitting a report on the impact on U.S. readiness of the Navy proposed sale of certain defense articles to Japan (Transmittal No. 82-11), pursuant to section 813 of Public Law 94-106; to the Committee on Armed Services.

2602. A letter from the Assistant Secretary of the Army (Installations, Logistics and Financial Management), transmitting notice of the proposed conversion to contractor performance of the dry cleaning function at Fort Carson, Colo., pursuant to section 502(b) of Public Law 96-342; to the Committee on Armed Services.

2603. A letter from the Assistant Secretary of the Army (Installations, Logistics and Management), transmitting notice of the proposed conversion to contractor performance of the nutritional care activity at Fitzsimons Army Medical Center, Aurora, Colo., pursuant to section 502(b) of Public Law 96-342; to the Committee on Armed Services.

2604. A letter from the Assistant Secretary of the Army (Installations, Logistics, and Financial Management), transmitting notice of the proposed conversion to contractor performance of the motor pool function at Fort Carson, Colo., pursuant to section 502(b) of Public Law 96-342; to the Committee on Armed Services.

2605. A letter from the Assistant Secretary of the Army (Installations, Logistics and Financial Management), transmitting notice of the recent discovery and disposal of a suspected lethal chemical agent at Fort Polk, La., pursuant to section 409(b)(4) of Public Law 91-121 and section 506(d) of Public Law 91-441; to the Committee on Armed Services.

2606. A letter from the General Counsel of the Department of Defense, transmitting a copy of Executive Order 12315, "Amendments to the Manual for Courts-Martial, United States," pursuant to article 36(b) of the Uniform Code of Military Justice, 10 U.S.C. 836(b); to the Committee on Armed Services.

2607. A letter from the Chairman, Council of the District of Columbia, transmitting D.C. Act 4-114, "To provide a standard for determining death," pursuant to section 602(c) of Public Law 93-198; to the Committee on the District of Columbia.

2608. A letter from the Chairman, Council of the District of Columbia, transmitting D.C. Act 4-115, "To provide an adult with the choice of executing a directive that would allow life-sustaining procedures to be withheld or withdrawn in instances of a terminal condition," pursuant to section 602(c) of Public Law 93-198; to the Committee on the District of Columbia.

2609. A letter from the Secretary of Education, transmitting the "Report to Congress on the Feasibility and the Desirability of Alternative Measures of Comparability," pursuant to section 102 of Public Law 95-561; to the Committee on Education and Labor.

2610. A letter from the Secretary of Transportation and Chairman and President of the National Railroad Passenger Corporation, transmitting the fifth annual report and second one issued jointly by the Department of Transportation and the National Railroad Passenger Corporation for fiscal year 1980, pursuant to section 703(1)(D), Public Law 94-120; to the Committee on Energy and Commerce.

2611. A letter from the General Counsel, Department of Energy, transmitting a draft of proposed legislation to extend the expiration date of section 252 of the Energy Policy and Conservation Act; to the Committee on Energy and Commerce.

2612. A letter from the Assistant Secretary of State for Congressional Relations, transmitting a copy of Presidential determination 82-2, finding that the furnishing of defense articles and defense services to the Government of Belize will strengthen the security of the United States and promote world peace, pursuant to section 3(a)(1) of the Arms Export Control Act; to the Committee on Foreign Affairs.

2613. A letter from the Assistant Secretary of State for Congressional Relations, transmitting notification of transfer of economic support funds to the peacekeeping account, pursuant to section 610(a), and authorization for the furnishing of immediate assistance for an organization of African Unity peacekeeping force in Chad. Pursuant to 614(a)(1) of the Foreign Assistance Act, as amended; to the Committee on Foreign Affairs.

2614. A letter from the Assistant Secretary of State for Congressional Relations, transmitting notice of the State Department's intention to consent to a request by the Philippines for permission to transfer certain U.S.-origin defense equipment to New Zealand, pursuant to section 3 of the Arms Export Control Act; to the Committee on Foreign Affairs.

2615. A letter from the Director, Defense Security Assistance Agency, transmitting notice of the Air Force's intention to offer to sell certain defense articles and services to Saudi Arabia (Transmittal No. 82-07), pursuant to section 36(b) of the Arms Export Control Act; to the Committee on Foreign Affairs.

2616. A letter from the Director, Defense Security Assistance Agency, transmitting notice of the Navy's intention to offer to sell certain defense articles and services to Indonesia (Transmittal No. 82-8), pursuant to section 36(b) of the Arms Export Control Act; to the Committee on Foreign Affairs.

2617. A letter from the Director, Defense Security Assistance Agency, transmitting notice of the Navy's intention to offer to sell certain defense articles and services to Australia (Transmittal No. 82-09), pursuant to section 36(b) of the Arms Export Control Act; to the Committee on Foreign Affairs.

2618. A letter from the Director, Defense Security Assistance Agency, transmitting notice of the Air Force's intention to offer to sell certain defense articles and services to Japan (Transmittal No. 82-11), pursuant to section 36(b) of the Arms Export Control Act; to the Committee on Foreign Affairs.

2619. A letter from the Secretary of Labor, transmitting the semiannual report of the Inspector General for the period April 1, 1981, through September 30, 1981, pursuant to section 5 of Public Law 95-452; to the Committee on Government Operations.

2620. A letter from the Secretary of Education, transmitting the semiannual report of the Inspector General for the period April 1, 1980, through September 30, 1981, pursuant to section 5 of Public Law 95-452; to the Committee on Government Operations.

2621. A letter from the Comptroller General of the United States, transmitting a report on the need for a systematic approach to management of congressional reporting requirements (PAD-82-12, November 25, 1981); to the Committee on Government Operations.

2622. A letter from the Chief, Records Management Branch, Federal Communications Commission, transmitting notice of a proposed new records system, pursuant to 5 U.S.C. 552a(O); to the Committee on Government Operations.

2623. A letter from the Secretary of Agriculture, transmitting a report on the Elkhorn Wilderness Study Area on the Helena and Deerlodge National Forests in Montana, pursuant to Public Law 94-557; to the Committee on Interior and Insular Affairs.

2624. A letter from the Attorney General, transmitting the second report on steps

taken by the Department of Justice to comply with the intent of Congress that section 1073 of title 18 of the United States Code apply to cases involving parental kidnaping and interstate or international flight to avoid prosecution under applicable State felony statutes, pursuant to section 10(b) of the Parental Kidnaping Prevention Act of 1980; to the Committee on the Judiciary.

2625. A letter from the Assistant Secretary of State for Congressional Relations, transmitting the text of an agreement between the United States of America and the Czechoslovak Socialist Republic, pursuant to section 408 of Public Law 93-618, together with a draft of proposed legislation to provide for the final settlement of certain claims against Czechoslovakia, and for other purposes; jointly, to the Committees on Foreign Affairs and Ways and Means.

2626. A letter from the Comptroller General of the United States, transmitting a report on user charge revenues for wastewater treatment plants (CED-82-1, December 2, 1981); jointly, to the Committees on Government Operations and Public Works and Transportation.

2627. A letter from the Comptroller General of the United States, transmitting a report on National Weather Service ADP system (CED-82-6, November 18, 1981); jointly, to the Committees on Government Operations and Science and Technology.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. ZEFERETTI: Committee on Rules. H.R. 1465. A bill to amend the Congressional Budget Act of 1974 to require the Congressional Budget Office, for every significant bill or resolution reported in the House or the Senate, to prepare and submit an estimate of the cost which would be incurred by State and local governments in carrying out or complying with such bill or resolution; with amendments (Rept. No. 97-353). Referred to the Committee of the Whole House on the State of the Union.

Mr. JONES of North Carolina: Committee on Merchant Marine and Fisheries. H.R. 3816. A bill to improve the operation of the Fishermen's Contingency Fund established to compensate commercial fishermen for damages resulting from oil and gas exploration, development, and production in areas of the Outer Continental Shelf; with an amendment (Rept. No. 97-354). Referred to the Committee of the Whole House on the State of the Union.

Mr. JONES of North Carolina: Committee on Merchant Marine and Fisheries. Report on "Semi-Paratus: The United States Coast Guard, 1981" (Rept. No. 97-355). Referred to the Committee of the Whole House on the State of the Union.

Mr. DINGELL: Committee on Energy and Commerce. House Joint Resolution 341. Joint resolution providing for a waiver of law pursuant to the Alaska Natual Gas Tranportation Act (Rept. No. 97-350, Pt. II). Referred to the Committee of the Whole House on the State of the Union.

Mr. DINGELL: Committee on Energy and Commerce. H.R. 4927. A bill to amend the Communications Act of 1934 to eliminate certain provisions relating to consolidations or mergers of telegraph and record carriers and to create a fully competitive marketplace in record carriage, and for other purposes; with an amendment (Rept. No. 97-356). Referred to the Committee of the Whole House on the State of the Union.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. BETHUNE:

H.R. 5109. A bill to provide for the inclusion of certain items within the unified budget, effective with respect to the fiscal year 1983 budget; to the Committee on Government Operations.

H.R. 5110. A bill to establish a Commission on the Budget Process to make recommendations to Congress and the President to improve and reform the budget process; jointly to the Committees on Government Operations and Rules.

By Mr. BIAGGI:

H.R. 5111. A bill to require improved collection of defaulted NDSL loans by institutions of higher education and by the Department of Education, and for other purposes; to the Committee on Education and Labor.

H.R. 5112. A bill to amend title 39, United States Code, to provide that the U.S. Postal Service shall be subject to certain provisions of the Occupational Safety and Health Act of 1970; jointly to the Committees on Education and Labor and Post Office and Civil Service.

Mr. DE LUGO (for himself, Mr. HOLLAND, Mr. HEFTEL, and Mr. SCHULZE):

H.R. 5113. A bill to amend the Internal Revenue Code of 1954 to reduce the rate of certain taxes paid to the Virgin Islands on Virgin Islands source income, and for other purposes; to the Committee on Ways and Means.

Mr. DORGAN of North Dakota:

H.R. 5114. A bill to require the forfeiture of railroad land grant lands in proportion to rail service abandonments; to the Committee on Energy and Commerce.

H.R. 5115. A bill amending title 49 of the United States Code to require the Interstate Commerce Commission to consider income from land grants in rail line abandonment and discontinuance proceedings, and for other purposes; to the Committee on Energy and Commerce.

By Mr. EDWARDS of California (for himself, Mr. RODINO, Mr. RAILSBACK, and Mr. EVANS of Georgia):

H.R. 5116. A bill to amend the act of November 6, 1978, with respect to certain fees charged under the Bankruptcy Act; to the Committee on the Judiciary.

By Mr. PASHAYAN (for himself, Mr. ALBOSTA, Mr. ATKINSON, Mr. BADHAM, Mr. BLILEY, Mr. BEARD, Mr. BEREUTER, Mr. BEILENSON, Mr. BONER of Tennessee, Mr. BURGENER, Mr. JOHN L. BURTON, Mr. CAMPBELL, Mr. CHENEY, Mr. CLAUSEN, Mr. CLINGER, Mr. COELHO, Mr. COURTER, Mr. DANIEL B. CRANE, Mr. PHILIP M. CRANE, Mr. DASCHLE, Mr. DAUB, Mr. DELLUMS, Mr. DORNAN of California, Mr. DUNN, Mr. EDGAR, Mr. ERDAHL, Mr. FAUNTROY, Mr. FAZIO, Ms. FERRARO, Mr. FOGLIETTA, Mr. FORSYTHE, Mr. FUQUA, Mr. GINGRICH, Mr. GOODLING, Mr. GRISHAM, Mr. HAMMERSCHMIDT, Mr. HANSEN of Idaho, Mr. HORTON, Mr. JOHNSTON, Mr. KOGOVSEK, Mr. KRAMER, Mr. LAGOMARSINO, Mr. LEE, Mr. LOEFFLER, Mr. LOWERY of California, Mr. MATSUI, Mr. MCCLORY, Mr. MCCLOSKEY, Mr. MCCOLLUM, Mr. MCDADE, Mr. MILLER of California, Mr. MOORHEAD, Mr. MOTTL, Mr. MURPHY, Mr. PANETTA, Mr. PEPPER, Mr. PORTER, Mr. QUILLEN, Mr. ROBINSON, Mr. SAVAGE, Mr. SCHEUER, Mrs. SCHROEDER, Mr. SCHULZE, Mr. SHUMWAY, Mr. SKEEN, Mr. SKELTON, Mr. SMITH of Pennsylvania, Mr. SNYDER, Mr. SOLOMON, Mr. SPENCE, Mr. SUNIA, Mr. THOMAS, Mr. VANDER JAGT, Mr. WHITEHURST, Mr. WHITTAKER, Mr. WINN, Mr. WOLPE, Mr. WON PAT, and Mr. YOUNG of Alaska):

H.R. 5117. A bill to authorize the President of the United States to present on behalf of the Congress a specially struck gold medal to Bryan Lewis Allen; to the Committee on Banking, Finance and Urban Affairs.

By Mr. UDALL:

H.R. 5118. A bill to provide water to the Papago Tribe of Arizona and its members, to settle Papago Indian water rights claims in portions of the Papago reservations, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. REUSS (for himself, Mr. ST GERMAIN, Mr. FAUNTROY, Mr. D'AMOURS, Mr. ALEXANDER, Mr. DASCHLE, Mr. DORGAN of North Dakota, and Mr. JEFFORDS):

H.J. Res. 369. Joint resolution resolving that current economic policies must be reconsidered to bring and keep interest rates down, that the President and the administration and the Board of Governors of the Federal Reserve System shall discourage speculative lending, the Board of Governors of the Federal Reserve System shall reconsider its tentative decisions to reduce the targets for growth in money supply for 1982, and that the President shall comply with section 10 of the Federal Reserve Act; to the Committee on Banking, Finance and Urban Affairs.

MEMORIALS

Under clause 4 of rule XXII,

229. The SPEAKER presented a memorial of the Legislature of the Territory of Guam, relative to the support of Senate bill 1674; to the Committee on Interior and Insular Affairs.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 1465: Mr. FOGLIETTA, Mr. DASCHLE, Mr. GUNDERSON, Mr. HEFTEL, Mr. KILDEE and Mr. ROEMER.

H.R. 1733: Mr. PATTERSON.

H.R. 2488: Mr. HOWARD, Mr. JOHN L. BURTON, and Mr. MILLER of Ohio.

H.R. 3606: Mr. FISH.

H.R. 4457: Mr. CHAPPELL, Mr. FISH, Mr. KOGOVSEK, Mr. SMITH of Pennsylvania, and Mr. YOUNG, of Florida.

H.R. 4467: Mrs. SCHNEIDER, Mr. CARNEY, Mr. HUTTO, and Mr. RINALDO.

H.R. 4509: Mr. BURGENER and Mr. CHENEY.

H.R. 4877: Mr. WON PAT.

H.R. 4930: Mr. ANDREWS, Mr. CHENEY, Mr. DERRICK, Mr. GREGG, Mr. HALL of Ohio, Mr.

SIMON, Mr. SUNIA, Mr. WILLIAMS of Ohio, and Mr. GUNDERSON.

H.R. 5004: Mr. CONABLE, Mr. SCHULZE, Mr. FRENZEL, Mr. TAUKE, Mr. BAILEY of Pennsylvania, and Mr. MCDADE.

H.R. 5013: Mr. GEPHARDT.

H.R. 5076: Mr. LENT, Mr. BENEDICT, Mr. ROBERTS of South Dakota, Mr. KOGOVSEK, Mr. BEREUTER, Mr. MORRISON, Mr. LOTT, Mr. GINGRICH, Mr. GREGG, Mr. SIMON, Mr. REGULA, Mr. DASCHLE, and Mr. FISH.

H.J. Res. 151. Mr. KASTENMEIER, Mr. GOLDWATER, Mr. PASHAYAN, and Mr. UDALL.

H.J. Res. 293: Mr. LUNDINE, Mr. CLINGER, and Mr. SMITH of Alabama.

H.J. Res. 354: Mr. STENHOLM, Mr. HOYER, Mr. AUCOIN, Mr. FISH, Mr. WHITEHURST, Mr. FORSYTHE, and Mr. WOLF.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

293. By the SPEAKER: Petition of the Board of Directors of American Trucking Associations, relative to the Multi-Employer Pension Plan Stabilization Act of 1981; to the Committee on Education and Labor.

294. Also, petition of the State of Michigan Home Weatherization Program Review Board, relative to the continued funding of its program; to the Committee on Energy and Commerce.

SENATE—*Thursday, December 3, 1981*

(Legislative day of Monday, November 30, 1981)

The Senate met at 9 a.m., on the expiration of the recess, and was called to order by the President pro tempore (Mr. THURMOND).

PRAYER

The Chaplain, the Reverend Richard C. Halverson, LL.D., D.D., offered the following prayer:

Let us pray:

Unless the Lord watches over the city, the watchman stays awake in vain.—Psalm 127: 1.

Lord God of history, who has determined allotted periods and the boundaries of the nations.—Acts 17:26.

When we have done all we know to do for our Nation's defense, we are still vulnerable if we trust only in our military might.

Apart from Thee there is no real security, for the Lord is our defense.—Psalm 89: 18.

History is replete with the record of "Acts of God" which were decisive in military engagements. Thou didst lead Joshua and Thy people to the defeat of Jericho. Because of Thee the Midianites were defenseless against Gideon and his 300; and giant Goliath was no match for David and his sling. Japan in the middle ages was saved from invaders by strong winds, or the "divine wind," kamikaze. The mighty forces of Napoleon were defeated by winter snows. Dorchester Heights was saved because strong winds prevented British forces from crossing Boston Harbor.

We do not presume to ignore our responsibility for defense, O Lord, but deliver us from the fatal error of indifference to our need for divine direction and protection. In the Lord's strong name we pray. Amen.

RECOGNITION OF THE MAJORITY LEADER

The PRESIDENT pro tempore. The majority leader is recognized.

Mr. BAKER. Mr. President, I thank the Chair.

THE JOURNAL

Mr. BAKER. Mr. President, I ask unanimous consent that the Journal of the proceedings of the Senate be approved to date.

The PRESIDENT pro tempore. Without objection, it is so ordered.

ORDER FOR ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, I ask unanimous consent that after the recognition of the two leaders under the standing order there be a brief period for the transaction of routine morning business in which Senators may speak for not more than 2 minutes each and to extend not past 9:30 a.m.

The PRESIDENT pro tempore. Without objection, it is so ordered.

NOTICE OF LENGTHY SESSION TODAY

Mr. BAKER. Mr. President, is there an order for the Senate to resume consideration of the Department of Defense appropriations bill at 9:30 a.m.?

The PRESIDENT pro tempore. The majority leader is correct.

Mr. BAKER. I thank the Chair.

Mr. President, I urge all Senators to consider that this evening may be a very late evening. It is Thursday, where there is a regular evening session were these ordinary and regular circumstances, which they are not, and while we are on notice that any evening might be a late evening, this evening must be, I am afraid, because it is essential, in my judgment, that we finish our deliberations on and consideration of the Department of Defense appropriations bill before this day is over.

Last evening negotiations were undertaken to try to arrive at a time agreement for final disposition of this bill at not later than 11 p.m. this evening with a number of other provisions relating to amendments and other matters.

I shall confer with the minority leader in the course of the morning and hope that we can obtain such an order or some variation of that order to assure that the bill will be finished this evening.

But in any event Senators should be on notice that the Senate will stay in session as long as necessary to complete this bill which I am afraid might be very late indeed unless we can accelerate the pace of our progress thus far.

With that unhappy announcement, I have no further requirement for my time under the standing order and I am prepared to yield it to any Senator or yield it to the control of the distinguished acting minority leader.

RECOGNITION OF THE ACTING MINORITY LEADER

The PRESIDENT pro tempore. The acting minority leader is recognized.

Mr. PROXMIRE. Mr. President, I thank the majority leader, and I am happy to accept that offer on behalf of the minority leader.

I have no special need for time on behalf of the minority leader.

Mr. BAKER. I thank the Senator and I yield my time remaining under the standing order to the distinguished acting minority leader.

CONFIRMATION HEARING STATEMENT OF ELLIOTT ABRAMS POINTS OUT NEED FOR GENOCIDE RATIFICATION

Mr. PROXMIRE. Mr. President, recently, the Foreign Relations Committee heard testimony from Elliott Abrams, President Reagan's nominee for the position of Assistant Secretary of State for Human Rights and Humanitarian Affairs. The Committee subsequently approved Mr. Abrams' nomination by a vote of 13 to 0.

Mr. Abrams opening statement presented several important issues. Emphasizing the long tradition of support for human rights in this country, Mr. Abrams said:

> But the role of human rights in our foreign policy dates not from 1977, but from 1776. The United States was founded "to secure the blessings of liberty," and as the President recently said, "The promotion of liberty has always been a central element of our nation's foreign policy."

Mr. Abrams perceived the difficulties of dealing with human rights issues in a complex world where the degree to which governments respect political freedoms varies greatly. Again, he cited the President, this time describing the duty of the United States in today's world:

> We will speak up against the enemies of freedom and we will try to help its friends. We will encourage those who seek freedom, not least by telling the simple truth of their efforts and the efforts of those who seek to oppress them.

Finally, Mr. Abrams stated the two rules upon which he aims to base his efforts to promote and protect human rights in American foreign policy: The need for truth and the need for effective action. In his statement, he stressed the moral obligation to be truthful in dealing with human rights affairs.

Most importantly, Mr. Abrams referred to the need to choose a course of action with a practical goal in mind; How can we help?

Mr. President, ratification of the Genocide Convention would address all of the issues raised by Mr. Abrams. As an affirmation of the value of human life and human rights, the treaty certainly continues the tradition of promoting human rights and liberty which has its source, as Mr. Abrams pointed out, "not from 1977, but from 1776."

Through its ratification of the Genocide Treaty, the United States would make a decisive movement toward "speaking up against the enemies of freedom."

Finally, ratification of the treaty provides an obvious answer to Mr. Abrams question: "How can we help?" How much more practical an act is there than the ratification of a convention which would join the United States with over 80 other nations in an international agreement which legally asserts the value of human life?

In closing, Mr. Abrams stated:

How can we help to expand the frontiers of liberty by an inch or by a mile? Our aim must never be simply to make us feel good or others feel bad; it must be to defend and to promote the cause of liberty.

The Genocide Treaty is consistent with all of the principles which underlie our Nation. Ratification of the treaty would expand the frontiers of liberty not by an inch or a mile, but incalculably.

I hope that we can ratify the treaty in the near future.

Today the Foreign Relations Committee begins hearings on the Genocide Treaty, and I think this is very good news for those who have waited so long for action on this treaty which has been pending in this body for more than 30 years.

QUORUM CALL

Mr. PROXMIRE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. GORTON). The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I yield back the remaining time under the provision for the two leaders.

ROUTINE MORNING BUSINESS

The PRESIDING OFFICER. Under the previous order, there will now be a period for the transaction of routine morning business during which Senators may speak for not more than 2 minutes each.

SUBMISSION OF MATERIAL REGARDING WILLIAM J. CASEY

Mr. MOYNIHAN. Mr. President, I submit for printing in the RECORD the following information which was submitted to the Select Committee on Intelligence by Mr. William J. Casey, Director of Central Intelligence. The information consists of a revision and update of Mr. Casey's response to the committee's questionnaire which he provided at the time of his confirmation hearing and which appeared in the RECORD of January 27, 1981.

STATEMENT FOR COMPLETION BY PRESIDENTIAL NOMINEES*

*All responses are based on information as of January, 1981, except as otherwise noted.

NOTE: This is the revised version of Mr. Casey's SSCI Questionnaire. It was submitted to the Committee on September 28, 1981.

Name: Casey, William J.

Address: Glenwood Road, Roslyn Harbor, New York.

Position to which nominated: Director, CIA.

Date of nomination: January 20, 1981.

Date of birth: March 13, 1913.

Place of birth: New York.

Marital status: Married.

Full name of spouse (including any former names used by spouse): Sophia Kurz.

Names and ages of children: Bernadette Casey, 35 years.

Education: Institution, dates attended, degrees received, dates of degrees: St. Agnes High School, 1926–28, none; Baldwin High School, 1929–30, 1930; Fordham University, 1930–34, BBS, 1934; Catholic Univ. of America, 1935–36, none; St. John's Law School, 1936–37, LLB, 1937.

Honors and awards: List below all scholarships, fellowships, honorary degrees, military medals, honorary society memberships, and any other special recognitions for outstanding service or achievement: Bronze Star, WWII; William Donovan Award 1974; Honorary Doctorates: Fordham University, St. John's University, Adelphi University, Molloy College.

Memberships: List below all memberships and offices held in professional, fraternal, business, scholarly, civic, charitable and other organizations:

New York Bar Association, 1950, present; International Rescue Committee, President, 1970, 1971; Citizen's Commsn. on Indochinese Refugees, Co-Chairman; American Bar Association, 1970, present; Nassau County Bar Association, 1956, present; Council on Foreign Relations, 1973, present; Atlantic Council, Director, 1976, present; Commission on Organization for Conduct of Foreign Policy, present; Veterans of the OSS, Association of Former Intelligence Officers, present.

Employment record: List below all positions held since high school, including the title or description of job, name of employer, location of work, and dates of inclusive employment.

See Attachment A.

Government experience: List any experience in or direct association with Federal, State, or local governments, including any advisory, consultative, honorary or other part-time service or positions.

See Attachment B.

Published writings: List the titles, publishers and dates of books, articles, reports or other published materials you have written:

Lawyers Desk Book, 1965; Tax Sheltered Investments, 1952; Estate Planning Desk Book, 1956; Forms of Business Agreements, 1966; Accounting Desk Book, 1967; Where and How the War Was Fought, An Armchair Guide to the American Revolution. Published by Morrow 1976; Life Insurance, Real Estate, Mutual Funds Desk Books; Executive Pay Plans; How to Finance a Business, Renegotiation Forms of Business Agreement; Forms of Wills and Trusts; Charitable Giving and Foundations; numerous articles and speeches in law reviews and other journals.

Political affiliations and activities: List all memberships and offices held or financial contributions and services rendered to all political parties or election committees during the last ten years:

1980—Campaign Director. Reagan-Bush and Reagan for President. Contributions of $1,000 to Reagan, Bush, Connally, Baker primary campaigns. $10,000 Republican National Committee. $2,000 Senatorial campaign in New York.

1978—$10,000 Duryea for Governor in New York.

1976—Ford Campaign $1,000.

1974—$1,000 Wilson for Governor in New York.

1972—$300 Nixon campaign.

Qualifications: State fully your qualifications to serve in the position to which you have been named. (Attach sheet.)

See Attachment C.

Financial Disclosure and Potential Conflict of Interest:

1. Please describe any employment, investment, association, or activity which might create, or appear to create, a conflict of interest in the position to which you have been nominated:

None.

2. As far as it can be foreseen, state your plans after completing government service. Please state specifically any agreements or understandings, written or unwritten, concerning employment after leaving government service, in particular concerning agreements, understandings or options to return to your current position:

I have no plans at present, but in the past after completing government service I have always returned to the practice of law. I have no agreements, understandings or options to return to my present position.

3. Describe the financial arrangements you have made or plan to make, if you are confirmed, in connection with severance from your current position. Please include severance pay, pension rights, stock options, deferred income arrangements, and any and all compensation that will or might be received in the future as a result of your current position or your past business or professional relationships:

I have made no such arrangements except that upon termination with my law firm I will receive a severance amount.

4. Please list below all corporations, partnerships, foundations, trusts, or other entities toward which you have fiduciary obligations or in which you hold directorships or other positions of trust:

During 1976–1981 I have been a director with respect to a number of enterprises, as listed below:

Long Island Trust Company; Litco Bank Corporation of NY, Inc.; Long Island Lighting Co.; Capital Cities Communications, Inc.; Gamble Skogmo; St. Francis Hospital; International Rescue Committee; Long Island Action Commission; Saffir Publishing Company; International Center for Economic Policy Studies; Energy Transition Company, Inc.; Institute for Economic and Legal Analysis; Sophia and William Casey Foundation.

5. Have you been an attorney for, or a representative or registered agent of, a foreign government, or any entity under the control of a foreign government? In your present position are you formally associated with individuals who are attorneys for, or representatives or registered agents of, foreign governments or entities? If the answer to either or both questions is yes, please describe each relationship on a separate sheet?

I was not an attorney for, or a representative or registered agent of, a foreign government, or any entity under the control of a foreign government, in January 1981. The list of my clients during 1976–1981 provided in response to Question 14 shows that I performed legal services for Indonesia and Korea, who were clients of Rogers & Wells (see Attachment D for detailed explanation of these services). To the best of my knowledge, during the past ten years I have performed no legal services for, nor have I represented or otherwise acted as a registered agent of, a foreign government or foreign government entity, other than as stated above.

As of January 1981, to the best of my knowledge, I was not formally associated with individuals who were attorneys for, or representatives or registered agents of, foreign governments or entities. In September 1981, I was informed by Rogers & Wells that the firm had been representing a client controlled by a foreign government entity as of January 1981.

6. List all securities, real property, partnership interests, or other investments or re-

ceivables with a market value in excess of $1,000.

See Attachment E.

7. List all loans, mortgages, or other indebtedness in excess of $1,000:

Long Island Trust Co., $3,617.79, guarantor of loan to brother: Promissory note of 5/4/79, 13.37 percent, $328.89/month;

The Royal Bank & Trust Co., $150,000, guarantor of loan to COAP Planning: Promissory note of 8/16/79, 9.75 percent due 7/30/82;

National Savings & Trust Co., $350,000, (8/81 bal.), $218,749, guarantor of loan to ITA, Ltd.: Term loan of 1/22/80, prime plus 2 percent, due on 1/22/84;

National Savings & Trust Co., $100,000, guarantor of loan to ITA, Ltd.: Line of credit issued 1/80, prime plus 2 percent; final payment due 11/2/81;

United States Trust Co., $18,000, promissory note of 4/2/79, prime plus 1 percent due on demand.

8. Please describe all gifts of pecuniary value in excess of $500 received in the past five years.

None.

9. Please list any legal actions in which you are presently either a plaintiff or defendant, and any legal actions in the last five years in which you have been a plaintiff, defendant, or witness.

See Attachment F.

10. Describe any business relationships, dealing or financial transaction (other than taxpaying) which you have had during the last ten years with the Federal Government, whether for yourself, on behalf of a client, or acting as an agent, that might in any way constitute or result in a possible conflict of interest with the position to which you have been nominated.

None.

11. List any lobbying activity during the past ten years in which you have engaged for the purpose of directly or indirectly influencing the passage, defeat or modification of any legislation at the national level of government or affecting the administration and execution of national law or public policy. List specifically any appearance before any committee of the Congress, and any other effort in any capacity to influence an action of a committee of Congress:

1978–1979, Testified as Co-chairman of Citizen's Commission for Indo-Chinese Refugees before Senate and House Subcommittees on Immigration and before Subcommittee of House Foreign Relations Committee on visit to Islands in S.E. Asia to which boat people were going to escape Vietnam—urged stronger relief measures for these refugees.

1980, Participation with partners fo my law firm in making representations on behalf of client who builds condominiums in Florida on impact of condominium legislation pending in Senate and House.

12. Explain how you will resolve any potential conflict of interest that may be disclosed by your responses to the above items:

By disposing of assets or establishing a blind trust if necessary.

13. List sources and amounts of all income received during the last five years, including all salaries, fees, dividends, interest, gifts, rents, royalties, patents, honoraria, and other items exceeding $500. (If you prefer to do so, copies of U.S. income tax returns for these years may be substituted here, but their submission is not required.) Unlike the original filing, these figures include capital transactions, and the 1980 figures are actual than estimated.

14. Add schedule itemizing each individual source of income which exceeds $500. If you are an attorney, accountant, or other professional, attach schedule listing all clients and customers whom you bill more than $500 worth of services during the past five years.

	1980	1979	1978	1977	1976
Salary					1,185
Fees, royalties	194,327	130,050	237,077	143,117	119,563
Dividends	98,107	53,374	41,164	30,684	43,259
Interest	18,195	46,027	43,122	14,498	102,892
Gifts					
Rents	2,700	1,200			
Other, exceeding $500 (losses)	78,634	(68,107)	28,611	(84,599)	45,624
Total	391,963	162,544	349,974	103,700	312,523

For a schedule itemizing each individual source of income, see my Financial Disclosure Report to the Office of Government Ethics, Jan. 8, 1981, which has been furnished to the Committee and the amendment thereto, Aug. 28, 1981, which is Attachment G. (Omitted.) For Client List see Attachment H. Please note: The attached list covers some clients and customers for whom less than $500 worth of services was provided.

Other Information:

15. Have you ever been convicted (including pleas of guilty or nolo contendere) of any criminal violation other than a minor traffic offense? No.

16. Please advise the Committee of any additional information, favorable or unfavorable, which you feel should be considered in connection with your nomination? None.

17. Please provide the Committee with the names and current addresses of five individuals whom you believe are in a position to comment upon your qualifications for the office to which you have been nominated:

John J. McCloy, 1 Chase Manhattan Plaza, NY 10005; Richard Helms, 4649 Garfield Street, NW, Washington, DC 20007; William Rogers, Rogers & Wells, 200 Park Ave., New York, NY 10017; Stanley Sporkin, 8816 Brierly Road, Chevy Chase, MD 20015; Leo Cherne, Research Institute of America, 589 Fifth Ave., NY 10017.

18. Are you willing to appear and testify before any duly constituted committee of the Congress on such occasions as you may be reasonably requested to do so? Yes.

19. Are you willing to provide such information as is requested by such committee? Yes.

The undersigned certifies that the information contained herein is true and correct.

Signed: William J. Casey.

Date: September 29, 1981.

Chairman, Task Force on Equity and Venture Capital, SBA.

Nov. 80–Jan. 81, Transition team for President-elect Reagan.

Jan. 81–Present, Director of Central Intelligence.

[Attachment C]

Qualifications

I have been successful in directing Federal government organizations at the Securities and Exchange Commission and the Export-Import Bank and in working with a large range of government agencies and committees during my tenure as Undersecretary of State.

I have had intelligence experience in building the American intelligence service in Europe in World War II and in directing clandestine intelligence operations into Germany during the last six months of World War II. Since then, I have been an active consumer and user of American intelligence as a member of the General Advisory Committee on Arms Control and as Undersecretary of State. I have also had an opportunity to study the organization and operation of our intelligence services as a member of the Murphy Commission on the Conduct of Foreign Policy and as a member of the President's Foreign Intelligence Advisory Board.

During my entire working life my activities as a lawyer, author and editor have involved the gathering, analysis and evaluation of information and applying it to practical purposes.

[Attachment D]

Indonesia and Korea were clients of the law firm rather than my personal clients, but I was consulted and provided limited legal services with respect to their business affairs, accumulating only 48¾ billable hours with respect to the Government of Indonesia and Pertamina between July 1976 and June 1978 and 12 hours between November 1976 and February 1978 for the Republic of Korea. I was compensated for my services through Rogers & Wells; my hourly rate at the time was approximately $260 per billable hour. I was consulted with respect to certain tax matters related to Indonesia's petroleum industry. In this connection, I had a meeting at the Department of Treasury and, I believe, two meetings at the Internal Revenue Service in the summer of 1976.

The legal services that I performed for the Government of Korea consisted of conferring with the Korean Ambassador to the

United States and other members of Rogers & Wells relating to whether a claim of sovereign immunity should be asserted by the Government of Korea. I was called upon for these services when the partner in charge of the account was unavailable. On this point, see the attached letter from Rogers & Wells.

ROGERS & WELLS,
Washington, D.C., September 2, 1981.

STANLEY SPORKIN, Esq.,
General Counsel, Central Intelligence Agency, Washington, D.C.

DEAR MR. SPORKIN: At your request, this is to confirm the information provided orally to Mr. La Plante. During the period William Casey was of counsel to our firm, the firm provided certain representation to the Republic of Indonesia (on a matter relating to Pertamina) and to the Republic of Korea. In regard to the Republic of Indonesia, in the summer of 1976, Mr. Peter Fisher, a partner of our firm, and Mr. Casey had two information meetings with IRS officials. Subsequently, the firm foresaw a possible need to move to an advocacy position with respect to the IRS, and we determined that we should register the firm and Mr. Fisher under the Foreign Agents Registration Act in case this eventuality came to pass. To the best of our recollection and belief, Mr. Casey had no further meetings with, or other contract with, United States Government officials on this matter subsequent to the summer of 1976 meetings just referred to.

With respect to our work for the Republic of Korea, we determined at the time that registration under the Foreign Agents Registration Act was not required, since all of our work came within the exemption to registration provided for in section 3(g) of the Act. We should also note that, to the best of our recollection and belief, Mr. Casey's limited work on this matter did not involve any meetings with, or any other contract with, United States Government officials.

Sincerely,

ANTHONY F. ESSAYE.

LEGAL ACTIONS INVOLVING WILLIAM CASEY
(1976–1981)

As defendant:

Kurz v. *Casey*, Index No. 18920/74 (Supreme Court, Nassau County, NY). An action brought by the widow of my brother-in-law who had a heart attack while mowing the lawn at a house occupied by him but owned by my wife and me. Dismissed from the bench, but reversed on appeal and remanded to the trial court where it is pending.

Maiden v. *Biehl*, 74 Civ. 4690 (S.D.N.Y.). A derivative action brought on behalf of bondholders against directors, accountants (Harkness & Sells) and investment bankers selling bonds of Multiponics, an agricultural company of which I was a director. Additional information has been furnished to the Committee.

In re Multiponics, Inc., 622 F.2d 709 (5th Cir. 1980), *rev'g*, 436 F.Supp 1065 (E.D.La. 1977). Bankruptcy proceedings arising out of the business described above in *Maiden* v. *Biehl*. Additional information has been furnished to the Committee.

Crescent Property Services, Inc. v. *Capitol Towers Unit I Trust, et al.* (*Scheuer* v. *Trustee*), Case No. 286569 (Superior Court, Sacramento County, CA). A claim for inflation adjustment and payment of compensation for managing Sacramento garden apartments held for my benefit.

Halbfinger v. *Bleakney, et al.*, 71 Civ. 3261 (S.D.N.Y.); *Levinkind* v. *Winters, et al.*, 71 Civ. 1015 (E.D.N.Y.), consolidated 73 Civ. 1714 (S.D.N.Y.); *Funnell* v. *Arkus-Duntov, et al.*, 69 Civ. 1890 (S.D.N.Y.); and *Weiner* v. *Winters, et al.*, 69 Civ. 2461 (S.D.N.Y.), consolidated 69 Civ. 1890 (S.D.N.Y.). Detailed information concerning these cases, all of which relate to the Fund of America, has been provided to the Committee.

Stone v. *Export-Import Bank*, 552 F.2d 132 (5th Cir. 1977). An action brought under the Freedom of Information Act against the Export-Import Bank, of which I was chairman. It is possible that several other actions of this nature were brought against the bank and that I was never made aware of them. Such suits do not touch me personally.

IHS Enterprises, Inc., et al. v. *Mark Strausberg, et al.*, Index No. 17989/80 (Supreme Court, New York County, NY). Plaintiffs have brought an action for breach of contract against SJS Associates, a business venture formed in 1978 to engage in publication of financial information and deal in options on securities. Also named in the suit are all of the limited partners in SJS Associates, including SWC Information Company, which is owned by me. I was not personally named as a party in the action. In May 1981, plaintiff's first action was dismissed for failure to state a cause of action, but leave was granted to amend the pleadings. The suit was refiled and I have been informally advised that the action will be dismissed.

As plaintiff:

Casey v. *Health 'n Sports, Inc.*, (Supreme Court, Nassau County, NY, 1980). This action (previously reported to the Committee as *Casey* v. *Abraham Shames*) was to collect a debt owed after Mr. Shames initiated bankruptcy proceedings. Action was initiated (process served), but never filed.

PLEASE NOTE: Although several of the firms with which I was associated were involved in litigation, I was not a party in any of that litigation so far as I am able to determine.

As witness:

National Cash Register v. *Ginsberg*, New York Supreme Court—witness to conversation action on contract against client.

U.S. v. *Clifford*, Eastern District, New York—character witness.

U.S. v. *Gleason*, Southern District, New York—character witness.

PLEASE NOTE: Additional appearances as witness may have been made; however, no comprehensive listing has been kept.

THE GREAT FRIENDSHIP RUN

Mr. BAKER. Mr. President, I would like to take this opportunity to inform my colleagues of an event scheduled to occur in May of 1982 in the People's Republic of China; an event that may be of particular interest to Members in this Chamber who push themselves out the door every day to run in heat, snow, rain and wind and who understand the sense of accomplishment and well-being that consistent runners know.

The Great Friendship Run, as it will be called, has been organized by Mr. Stan Cottrell of Tucker, Ga. Mr. Cottrell set a world's record last year for running across the United States, 3,100 miles, in 48 days. In addition, he has recently completed a training run from Nashville to Chattanooga for the benefit of the Heart Association. His plan now is to run the length of the Great Wall of China, 4,100 miles, through the mountains and desert beginning in May. At the same time, runners from the People's Republic of China will commence a race in the United States, following Stan's American course from coast to coast.

Mr. President, I think this is a fine example of American enterprise and good will. The Great Friendship Run will signify continuing international cooperation between the United States and the People's Republic of China and I want to wish Stan Cottrell every success for his heroic undertaking.

FACING THE REALITY OF ENTITLEMENTS

Mr. McCLURE. Mr. President, during the past several weeks, the Senate has been concentrating on the appropriations bills, and wrestling with the problems of budget cuts. Like many of my colleagues, I have been saying for years that the Federal Government has got to quit spending so much money and I am very pleased that Congress is finally taking action to get the Federal budget under control. We have done a lot of work in the last 10 months, and we still have a long way to go. The budget reductions have been painful ones for us to make, but I still believe that they are absolutely essential to the overall well-being of this Nation.

While I completely support the necessity of reducing Government expenditures, I am concerned that the recent round of budget cuts has been aimed at the wrong mark. If we are to get control of the real problem in the growth of the Federal debt and future deficits, it will have to lie in that minefield of dealing with entitlement programs.

I wonder how many Americans even know what an entitlement is? I wonder how many people realize that entitlements—those income maintenance, income transfer, retirement funds that people are "entitled" to—are now consuming 50 percent of the Federal budget? How many Americans are aware that the recent round of budget cuts have been aimed at programs that make up less than 25 percent of the budget, and that entitlement programs have not been touched? As I said before, Mr. President, dealing with entitlements is a political minefield, but sooner or later, and I hope it is sooner, Congress is going to have to confront the issue.

Several of my colleagues and I tried to cross that minefield during the Appropriations Committee markup of the continuing resolution. The amendment that was offered by my colleague from Georgia, Senator MATTINGLY, would have allowed for a 2-percent reduction in entitlements at the discretion of the President, and would have required a 2-percent decrease in payments not required by law. The amendment could have saved as much as $8 billion, but it was defeated. Because of this action, we are now back to where we began—cutting programs that make up less than 25 percent of the budget. I think this course is going to cause some problems and I would like to give a small example of the effect on one segment of the Labor, HHS, Education appropriations bill.

One of the major aspects of the President's budget plan is the block grant. I have supported this funding approach for many years because I think in the long run it will prove not only more economical, but will benefit the various programs involved by allowing more freedom from bureaucratic redtape. I do not think the block grants, as finally enacted, were structured as well as they could have been, but I think it was a step in the right direction.

The education block grant is a block grant in name only. The two largest education programs, title I and education of the handicapped, were, respectively, left separate within the block and as a categorical grant. The education programs that were, in reality, blocked make up a very small portion of the money we spend on education programs. This block has suffered an incredible amount of budget reductions. In 1980, the programs in the education block received $805 million. In 1981, the figure dropped to $561 million. For 1982, the Senate has recommended a figure of $350 million.

Because Congress wanted to insure that the greatest amount of money provided through the education block grant would be used directly for the benefit of students, the block contains a provision requiring that 80 percent of the funds within the grant be passed along to school districts. The combination of the 80-percent, pass-along provision and the loss of over 50 percent of the funds for the programs in the block is going to have an effect that Congress did not anticipate because the State departments of education get their administrative money through the block. I think we will all agree that keeping administrative costs down is an admirable goal. However, in the case of education programs, the problem of limiting administrative money is not so simple.

Many times the money a State department of education uses that is dubbed administrative is actually money that goes to provide direct services and training for school districts. Let me give you a few concrete examples:

A small school without a full-time librarian has a little bit of money available to improve its library. However, this school has no one available to advise them on how to get the best value for their library-book dollars. The school cannot possibly hire someone to act as a consultant because they would not have any money left over to buy the actual books. The State department of education, however, can use their so-called administrative funds to provide this type of short-term technical assistance and thus help the school use their money wisely.

Another example. A school district finds that its teachers are having difficulties with students' reading skills. The district feels its teachers need some special help with teaching techniques, but does not have enough money in the budget to hire a reading specialist to train its teachers. Here again, the State department of education can provide this in-house training through personnel paid with administrative money.

Mr. President, this type of training service and technical assistance is very much within the legitimate function of the State department of education. I do not believe we are talking about educational frills. We are talking about basic services that school districts must have to serve their students.

With the institution of the 80-percent,

passthrough requirement and the budget cuts, State departments of education are now expected to perform all these functions with a great deal less money. The Chief State School Officer of Arkansas, Don Roberts, has said that his department now has $5, when it used to have $9.

I hope I am wrong, but I think that the effect on our schools is going to be devastating. Because of the failure of Congress to act on checking the growth of entitlement programs, we have no choice but to make cuts in other areas—the result of which is clear in the problem I just pointed out in the education block grant.

During consideration of the Labor, HHS, Education appropriations bill I inserted report language that will at least insure that hearings be held on what effect the budget cuts and the 80-percent, passthrough requirement have had on the services that State departments of education provide to schools. The report language also states that the Appropriations Committee will consider the possibility of a supplemental next year.

Mr. President, I ask unanimous consent that the text of the report language be inserted in the RECORD at this point in my remarks. In addition, I would also request that a letter I received from the Idaho State Superintendent of Public Instruction, Jerry Evans, outlining the problems his department is facing, also be inserted in the RECORD at this time.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

TEXT OF THE REPORT LANGUAGE

Because the Committee wanted to ensure that the maximum amount of federal money is used directly for the benefit of students, it sought to limit the amount that could be absorbed by administrative costs. It is the intention of the Committee to review this formula once this bill has gone into effect to see if it is the proper way to achieve this objective. Some educators have pointed out that greater cost-effectiveness can be achieved through more flexible standards which recognize State Departments of Education sometimes use administrative money to provide school districts with services and training that the districts would not be able to provide through their own budgets. The Committee intends to hold hearings on this matter and consider the possibility of a supplemental appropriation in 1982.

STATE OF IDAHO,
Boise, October 26, 1981.

Senator JAMES MCCLURE,
Dirksen Building,
Washington, D.C.

DEAR SENATOR MCCLURE: Rumors have been reaching me that it is projected that there will be a further cut of $130 million for the Education Block Grant below the $490 million previously set by the Senate.

If everything else stays in place, i.e. 6% to the Secretary, 1% for the Trust Territories and .5% as a minimum for any state with 80% to flow through to the LEA's, the impact on our State Department will be even more drastic than I advised you before.

Currently in FY '82 we have budgeted $851,600 for state agency use from the programs included in the Block. If we compare a FY '83 appropriation of $360 million to our current budget, the impact next year will be as follows:

Senate recommendation	$360,000,000
Idaho local school districts	1,339,200
Idaho State Department of Education	334,800
Fiscal year 1982 budget	851,600
Fiscal year 1983 available	334,800
Shortfall fiscal year 1983	516,800

If this further cut is made, I would hope that there would be some change or flexibility in the 80–20 allocation to state and local agencies. Any consideration you can give this will surely be appreciated.

Sincerely,

JERRY L. EVANS,
State Superintendent of Public Instruction.

Mr. MCCLURE. Mr. President, if Congress thinks it can ignore the growth of entitlement programs and try to balance the budget by cutting back further on such a small percentage of total expenditures, like the education block grant, then we are just not living in the real world. You do not have to be an economist to figure out that the 1983 and 1984 budgets will not be balanced when half of the budget is growing at an unbelievable 16 percent a year. In order to balance the budget, we have got to deal with the large portion, the one that is still growing.

I think it is absolutely necessary that the American public recognize what is happening in the growth of those other programs. I cannot believe that the people will support bankruptcy of their country in terms of short-range benefits for themselves. If there was any message in that election last year, it was that the American people said, "I want the national good served, rather than my special interest." I think that was a fundamental change from the attitudes of the past, and I think that is the reason why we should not lose courage and I have not. I think we can do what is necessary to do, and I hope we will.

We can put together a package that is demonstrably fair to all sectors of our society, that will still do what is necessary for economic revitalization in this country. The tax bill was important to reverse the trends that had been established. It was important for us to begin to say to people, "Consume less than you produce, produce more than you consume, save a little, invest a little, defer your consumption to a later date." That was inherent in the tax bill. But at the same time, we have to control expenditures. I believe that it is possible to put together a package that would delay the tax cut by 3 months, delay the increases in all these entitlement programs by 3 months, increase some of the excise taxes, cut $2 or $3 billion out of the size of the military program and reduce 1982 expenditures on the order of $16 to $25 billion a year. These do not require massive changes. And we might then relax and say we have got the job done. We would not.

That would still leave an $80 billion deficit in 1984. So I think it is important to look again at that area that is still 50 percent of the budget, growing at 16 percent a year, that has not yet been addressed. I do not believe you can cut benefits to the elderly, if you do not at the same time cut other things. I do not believe people have to fear they are going to lose something. We are not talking about cutting future benefits—we are talking about cutting the rate at which they grow, or limiting the rate at which they grow. I think we can put that together if we can only demonstrate to them that they are not bearing the entire burden by themselves, that their contribution to the future well-being of this country is worth it, will work, and that it is being shared by the other people in our society equally.

I think we can do that.

ORDER OF PROCEDURE

Mr. BAKER. Mr. President, I ask unanimous consent that the order to resume consideration of H.R. 4995 at this time be deferred for 2 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

THE EXECUTIVE CALENDAR

Mr. BAKER. Mr. President, I wish to inquire of the minority leader if he is in a position to consider items on the Executive Calendar beginning with the judiciary on page 2 and continuing through page 3, all of the nominations on those two pages.

Mr. ROBERT C. BYRD. Those nominations have been cleared on this side.

Mr. BAKER. I thank the minority leader.

EXECUTIVE SESSION

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate now go into executive session for the purpose of considering the nominations just identified.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I ask unanimous consent that the nominations be considered and confirmed en bloc.

The PRESIDING OFFICER. Without objection, it is so ordered.

Without objection, the nominations are confirmed.

The nominations considered and confirmed en bloc are as follows:

THE JUDICIARY

Edward R. Becker, of Pennsylvania, to be U.S. circuit judge for the 3d circuit.

Jackson L. Kiser, of Virginia, to be U.S. district judge for the western district of Virginia.

Robert G. Doumar, of Virginia, to be U.S. district judge for the eastern district of Virginia.

DEPARTMENT OF JUSTICE

Brent D. Ward, of Utah, to be U.S. attorney for the district of Utah for the term of 4 years.

Joseph P. Stadtmueller, of Wisconsin, to be U.S. attorney for the eastern district of Wisconsin for the term of 4 years.

Donald B. Ayer, of California, to be U.S attorney for the eastern district of California for the term of 4 years.

Louis G. DeFalaise, of Kentucky, to be U.S. attorney for the eastern district of Kentucky for the term of 4 years.

William S. Vaughn, of Missouri, to be U.S. Marshal for the eastern district of Missouri for the term of 4 years.

Howard V. Adair, of Alabama, to be U.S. Marshal for the southern district of Alabama for the term of 4 years.

James L. Meyers, of Louisiana, to be U.S. Marshall for the middle district of Louisiana for the term of 4 years.

Paul R. Nolan, of Washington, to be U.S. Marshal for the eastern district of Washington for the term of 4 years.

Harry Connolly, of Oklahoma, to be U.S. Marshal for the northern district of Oklahoma for the term of 4 years.

(NEW REPORTS)

ALASKA LAND USE COUNCIL

Vernon R. Wiggins, of Alaska, to be Federal Cochairman of the Alaska Land Use Council.

DEPARTMENT OF THE INTERIOR

Pedro A. Sanjuan, of the District of Columbia, to be an Assistant Secretary of the Interior.

Janet J. McCoy, of Oregon, to be High Commissioner of the Trust Territory of the Pacific Islands.

THE JUDICIARY

Jules G. Körner III, of Maryland, to be a judge of the U.S. Tax Court for a term expiring 15 years after he takes office.

Perry Shields, of Tennessee, to be a judge of the U.S. Tax Court for a term expiring 15 years after he takes office.

Meade Whitaker, of Michigan, to be a judge of the U.S. Tax Court for a term expiring 15 years after he takes office.

STATEMENT ON THE CONFIRMATION OF JACKSON L. KISER, OF VIRGINIA, TO BE U.S. DISTRICT JUDGE FOR THE WESTERN DISTRICT OF VIRGINIA; AND ROBERT G. DOUMAR, OF VIRGINIA, TO BE U.S. DISTRICT JUDGE FOR THE EASTERN DISTRICT OF VIRGINIA

● Mr. WARNER. Mr. President, I rise today in support of the confirmation of Robert G. Doumar and Jackson L. Kiser—President Reagan's nominees to be U.S. district judges in the Eastern and Western Districts of Virginia, respectively.

The responsibility of the Senate, in its role to "advise and consent" on Federal judgeships is very important. Federal judges must make decisions affecting life, liberty, the pursuit of happiness, and the right of property—real and personal.

Those who don the judicial robe, never an imperial robe, must always be conscious of the common, everyday humanity and dignity which binds us equally together.

A judge should have acquired a background which enables an understanding of life's broadest experiences with people, particularly those in lesser economic circumstances.

A judge must also be a person of the highest order of intelligence, capable of interpreting the law, analyzing the issues, and making finding of fact. It demands integrity unquestioned and honesty unsullied.

Mr. President, in my judgment the single most important criterion of a Federal judge is that he or she have the personal commitment to dispense equal justice under the law for all. I believe both Mr. Doumar and Mr. Kiser have demonstrated unwaivering commitment and dedication over the years to this principle, and reflect in every way the exacting standards I have described.

In the case of Mr. Doumar, I have observed personally his adherence to those standards and his application of those principles over the years.

On the other hand, I must say, when I began my interviews with candidates and consultations seeking the recommendations of Virginians, I had never met Mr. Kiser. Early in my travels, his outstanding reputation before the bar was brought to my attention by way of recommendations from persons in my State. These recommendations were subsequently strongly reinforced by judges and attorneys throughout Virginia. I then interviewed Mr. Kiser and I determined that he, indeed, was among the best qualified and deserving of the President's nomination.

Mr. President, it is a special honor for me to urge my colleagues to confirm these two men. They are eminently qualified and they meet the high standards Virginians, indeed all Americans, expect of their Federal judges.●

NOMINATIONS OF MEADE WHITAKER, JULES G. KORNER, III, AND PERRY SHIELDS TO BE JUDGES OF THE UNITED STATES TAX COURT

Mr. DOLE. Mr. President, I urge the confirmation of Meade Whitaker, Jules G. Korner, III, and Perry Shields as judges of the U.S. Tax Court.

FAVORABLE COMMITTEE ACTION

On December 2, the Committee on Finance held a hearing regarding Messrs. Whitaker, Korner, and Shields, and found them to be eminently qualified to become judges of the U.S. Tax Court. The nominees each have a broad range of experience in the field of Federal taxation. Their experience and judgment, as well as their legal knowledge, would be of great value to the Tax Court in the performance of its important responsibilities.

Our committee then voted unanimously to recommend that the Senate confirm their nominations.

MR. WHITAKER'S BACKGROUND

Meade Whitaker, of Michigan, most recently Federal taxes director for the Ford Motor Co., has had a distinguished career of Government service, including serving as chief counsel for the Internal Revenue Service and tax legislative counsel for the Treasury Department. Mr. Whitaker graduated first in his law school class at the University of Virginia. We anticipate that he will bring a combination of high intellectual ability, as well as extensive high level Government experience, to the performance of his duties on the bench.

MR. KORNER'S BACKGROUND

Jules G. Korner, III, of the District of Columbia, has had a long and varied career in the private practice of law, including distinguished service to the District of Columbia Bar Association. He has published extensively in the field of taxation, and was Adjunct Professor of Law at Georgetown University, here in the District, from 1963 to 1968. We expect that Mr. Korner will grace the Tax Court with a high level of knowledge and judgment regarding the business and financial community, indispensible assets in the performance of the Tax Court's leading role in establishing judicial precedent in the tax area.

MR. SHIELDS' BACKGROUND

Perry Shields, of Knoxville, Tenn., has had extensive experience in the administration of the revenue laws from both sides of the fence. Mr. Shields served in a variety of positions with the Internal Revenue Service in the Southeastern United States. He has also enjoyed in recent years an unusually extensive tax practice representing private clients before the IRS and the Federal courts. He also served as chairman of the taxation section of the Tennessee Bar Association. In addition to being an excellent candidate for the bench, we anticipate that Mr. Shields will bring his varied experiences to bear on the Tax Court's efforts to devise better and more efficient means of dealing with its growing caseload.

REPORT ON INVESTIGATIONS

The Committee on Finance has reviewed each nominee's financial disclosure forms and the materials they filed with the Judicial Ethics Committee of the Judicial Conference. Moreover, the nominees have each discussed the possible existence of conflicts of interest with the committee's chief counsel. The committee is confident that there are no problems in these areas.

I highly recommend to you Mr. Whitaker, Mr. Korner, and Mr. Shields, and I urge you to vote to approve their nominations.

STATEMENT ON THE CONFIRMATION OF HOWARD V. ADAIR, OF ALABAMA, TO BE A U.S. MARSHAL FOR THE SOUTHERN DISTRICT OF ALABAMA

● Mr. HEFLIN. Mr. President, it gives me great pleasure today to wholeheartedly support the nomination of Howard Van Voorhis Adair, known to his friends as "Luckie," to be U.S. marshal for the Southern District of Alabama. I wish to congratulate President Reagan on the excellence of this nomination, for I am absolutely certain that Mr. Adair will be a true credit to the U.S. Marshals Service.

I believe it proper that in dealing with the many nominations which come before this body, we occasionally step back to examine the positions which we are filling. Let us take that opportunity for reflection with the U.S. Marshals Service.

The scope and detail of duties and responsibilities given U.S. marshals have dramatically increased since the first 13 U.S. marshals were appointed by President George Washington in 1789. Today, almost 200 years later, the responsibilities of the 94 marshals, representing the 94 judicial districts, reflect all aspects of the complex society they serve.

Under the authority delegated them by Congress, U.S. marshals protect witnesses to organized crime who jeopardize their lives and families with their testimony. Marshals provide physical security for U.S. courtrooms and personal protection for Federal judges, jurors, and attorneys. Besides serving as officers of the courts, marshals perform a wide range of Federal law enforcement functions for the Attorney General.

U.S. marshals have continued to exercise their traditional duty of executing all civil and criminal process emanating from the Federal courts, as well as maintaining custody of prisoners and evidence pursuant to Federal statutes.

As we all know, the job of U.S. marshal is a difficult and complex one. It is because of that very fact that I am so certain that Howard Adair will be an excel-

lent U.S. marshal, for he has always excelled at difficult things. I have been personally acquainted with Mr. Adair for some period of time, and have long been an admirer of his dedication to our country and the ideals which it holds. The position of U.S. marshal is only one more way of evidencing this.

After active duty in World War II, Mr. Adair went to work for south central Bell Telephone Co. in Mobile, Ala., beginning an association with them which would last 32 years, until he retired as a supervisory foreman. That career was interrupted by military service again in the 1960's, an even today he serves as a sergeant major in the Alabama National Guard.

Mr. Adair is a member of the Mobile Housing Board and the Veterans of Foreign Wars. In the past, he has belonged to Downtown Mobile Unlimited and the Communications Workers of America, as well as serving as Mobile jury commissioner.

The position of U.S. Marshal for the Southern District of Alabama is headquartered in Mobile. Many of the unique aspects of this geographic areas stem from the presence of one of the major port areas of our Nation. It is an area Howard "Luckie" Adair is well acquainted with, as a life-long resident.

Based upon my personal observations, I believe the nominee is a great American. I am confident that he will serve with great distinction as one of the best U.S. Marshals that Alabama has ever had, and provide proof of the wisdom of President Reagan's nomination. It is with a great deal of pleasure that I recommend and wholeheartedly support the nomination of Howard Van Voorhis Adair for this most important position.

Thank you, Mr. President.●

STATEMENT ON THE CONFIRMATIONS OF PEDRO A. SANJUAN, OF THE DISTRICT OF COLUMBIA, TO BE AN ASSISTANT SECRETARY OF THE INTERIOR; JANET J. M'COY, OF OREGON, TO BE HIGH COMMISSIONER OF THE TRUST TERRITORY OF THE PACIFIC ISLANDS; AND VERNON R. WIGGINS, OF ALASKA, TO BE FEDERAL COCHAIRMAN OF THE ALASKA LAND USE COUNCIL

● Mr. McCLURE. Mr. President, I rise in support of the nominations of Pedro A. Sanjuan to be Assistant Secretary of the Interior for Territorial and International Affairs, Janet J. McCoy to the High Commissioner of the Trust Territory of the Pacific Islands, and Vernon R. Wiggins to be the Federal Cochairman of the Alaska Land Use Council.

The Assistant Secretary of the Interior for Territorial and International Affairs has responsibility for administering the laws and departmental functions related to the United States' insular areas. He must also coordinate other international activities of the Department of the Interior.

I am particularly pleased to bring this nomination before the Senate today. If, as I fully expect, Mr. Sanjuan is approved, it will be the first time this office has been occupied by a confirmed Presidential appointee. I believe this will significantly enhance the Department's responsiveness to the issues and needs of the territories. Mr. Sanjuan's background encompasses a broad range of experience in the international community in both the public and private sectors. This has given him the general knowledge, skills, and sensitivity needed for this position.

Janet J. McCoy, who has been nominated for High Commissioner of the Trust Territory of the Pacific Islands will have responsibility for the orderly administration of this area, and during the transition from the trusteeship, to assist the local governments in establishing self-government. Mrs. McCoy's background includes administrative experience in State government, private consulting in press and media relations, work in broadcasting, and extensive international travel. Her broad experience in these areas provides her with a broad cultural perspective and the ability to fulfill with sensitivity her duties as High Commissioner.

Mr. Vernon Wiggins has been nominated to be Federal Cochairman of the Alaska Land Use Council. The council was established by the Alaska National Interest Lands Conservation Act. The Federal cochairman has the responsibility under the act to cochair a council of members of all of the land-managing agencies of the Federal Government, along with the Alaska State Departments of Natural Resources, Fish and Game, Environmental Conservation and Transportation, and representatives of the Alaska Native community, who advise the Secretary of the Interior and the Secretary of Agriculture and others with respect to land and resource use decisions in Alaska. Mr. Wiggins has lived in Alaska for the past 14 years and has been involved in land and resource planning throughout his professional career.

Each of the three nominees has submitted an informational form to the Committee on Energy and Natural Resources, answered all questions asked of them by members, and otherwise met all requirements under Senate and committee rules. On Thursday, November 19, 1981, the committee held hearings on these nominations which included testimony from public witnesses. On December 2, 1981, the Committee on Energy and Natural Resources unanimously reported favorably each of the nominations on a vote of 20 yeas and 0 nays. Mr. President, I know of no opposition to these nominations and urge the Senate to confirm them unanimously.●

Mr. BAKER. Mr. President, I move to reconsider the vote by which the nominations were confirmed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAKER. Mr. President, I ask that the President of the United States be immediately notified that the Senate has given its consent to these nominees.

The PRESIDING OFFICER. Without objection, it is so ordered.

LEGISLATIVE SESSION

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate return to legislative session.

The PRESIDING OFFICER. Without objection, it is so ordered.

DEPARTMENT OF DEFENSE APPROPRIATIONS, 1982

The PRESIDING OFFICER. Under the previous order, the Senate will now resume consideration of H.R. 4995, which will be stated by title.

The legislative clerk read as follows:

A bill (H.R. 4995) making appropriations for the Department of Defense for the fiscal year 1982, and for other purposes.

The Senate resumed consideration of the bill.

The PRESIDING OFFICER. Under the previous order, the Senator from Arkansas (Mr. PRYOR) is recognized to offer an amendment on which there will be 1 hour of debate equally divided.

UP AMENDMENT NO. 736

(Purpose: To delete all funds for any interim program of silo hardening for the basing or deployment of the MX missile)

Mr. PRYOR. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Arkansas (Mr. PRYOR) proposes an unprinted amendment numbered 736.

On page 28, line 18 strike out "9,076,906,000" and all thereafter through line 19 and insert in lieu thereof "$8,722,906,000 to remain available for obligation until September 30, 1983: *Provided*, that none of such funds may be used for any interim program for the basing or deployment of the MX missile".

(The names of the following Senators were added as cosponsors of the amendment: Mr. HATFIELD, Mr. LEVIN, Mr. EAGLETON, Mr. DIXON, Mr. HART, and Mr. GLENN.)

Mr. PRYOR. Mr. President, I am going to make a very short opening statement. We had a discussion on this whole matter of the MX basing system last evening during the discussion of the Cohen-Nunn amendment, which was agreed to by this body. I would like to say that my amendment is cosponsored by several of my colleagues and would replace the language adopted last evening.

Mr. President, inasmuch as my amendment would replace the language adopted yesterday, let me take a few moments to comment on the Senate's action last evening in adopting the Cohen-Nunn amendment which I did support in its final language.

That particular language accomplishes some of the objectives that I support, along with my colleagues and cosponsors. and I am pleased that it was adopted because I do think that the Cohen-Nunn amendment moves us at least a step away from hardening fixed-base silos as the method of deployment of the MX missile.

It rejects, in principle, this last minute, half-baked idea of hardening silos that the military experts had already rejected.

Second, it tells the administration to quit stalling on a decision and to get a decision to the Congress July 1, 1983, not sometime in 1984 or 1985.

Finally, it says, in principle, that we should quit thinking about interim basing programs and concentrate our efforts toward permanent basing.

It is, Mr. President, nothing short of a repudiation of the whole Weinberger-Reagan nondecision on MX.

I think the Senate should be commended for sending what I consider to be a very strong message to the White House and to the Department of Defense on this very, very critical issue, and I think the Senate should be commended for saying to the administration that we are tired of hearing about what you will not do and that we want you to say what you propose to do.

Having said that about yesterday's actions, let me say that it was, in my opinion, not enough, and the taxpayers are still left to "twist slowly, slowly in the wind" as we stumble along attempting to make this decision.

I do not think we ought to fund to the tune of $354 million any interim basing mode. We should not pay another cent for basing until a permanent basing mode is proposed, until we find a consensus expressed not only in the Congress but also in conjunction with the Department of Defense.

I also think the Cohen-Nunn amendment, in effect, established a new program for interim basing with soft silos rather than hard ones, if we read the language carefully. While that saves the cost of hardening, we still have several billion dollars in deployment costs and an even more vulnerable situation. It adopts a soft silo system that we have heard criticized for years and years.

Finally, Mr. President, the program that we are embarking upon is a program with unknown costs. Most importantly, it is one more in a series of ad hoc, 1-year decisions very similar to a continuing resolution, postponing the final decision. There is no real long-term planning and there has been no real discussion of a program for which the taxpavers are going to pay $354 million for additional studies.

I think, Mr. President, that we ought to be very honest with ourselves as to what we are doing by the adoption of the Cohen-Nunn amendment and not going further.

We are simply in the position of adding another $354 million in studies to a program that has already been researched and studied in the past 13 or 14 years to the tune of $4 billion.

I do not know what else there could be to study.

I would only say, and submit respectfully, Mr. President, that we should go further by taking the entire $354 million out of this budget. If we can reach a consensus, if we can find the answers that we are all seeking, then it might be possible and prudent to come back in the spring with a supplemental program to fund a permanent basing system for the MX missile program.

Mr. President, I shall have, possibly, further comments during the course of the next hour. At this time, I wish to recognize one of the very distinguished cosponsors of this amendment, an authority in this field, the Senator from Oregon (Mr. HATFIELD).

Mr. HATFIELD. Mr. President, I am grateful to the Senator from Arkansas for yielding.

May I inquire, Mr. President, what the time situation is? Do we have a time agreement on this amendment?

The PRESIDENT OFFICER. There is a time agreement of 1 hour equally divided. To the proponents of the amendment, 23 minutes, 26 seconds remain.

Mr. HATFIELD. How many minutes would the Senator like me to use?

Mr. PRYOR. Would the Senator like 7 or 8 minutes? Whatever he would like.

Mr. HATFIELD. Eight minutes.

Mr. PRYOR. Mr. President, I yield 8 minutes to the Senator.

Mr. HATFIELD. Mr. President, I am pleased to join my distinguished colleague, the Senator from Arkansas (Mr. PRYOR) in offering an amendment cutting $354 million which has been budgeted by the Air Force for the hardening and upgrading of Titan and Minuteman missile silos. This $354 million is the initial amount in preparation to deploy a portion or all of 100 MX missiles in these silos in the mid-1980's.

This proposal will be enormously costly. It will amount to no more than a marginal interim solution—if that. Strategic scientists are virtually unanimous in their agreement that this upgrading and hardening of silos will not make the MX missiles inside them invulnerable. In fact, it may result in the most dangerous of all strategic occurrences—a highly lethal missile would be put in a highly vulnerable basing system. This development could effectively invite the Soviet Union to attack the United States in times of crisis.

I am deeply concerned, Mr. President, that the Committee on Appropriations would agree to fund this concept without sufficient hearings. As a result of this, we have only vague estimates—and no firm numbers—on how much this interim basing solution will ultimately cost. Estimates can range from between $5 and $20 billion or even higher. Furthermore, this money is only a downpayment on the ultimate basing choice for the MX missile. These costs could easily push $100 billion before the entire system is built.

COSTS

Mr. President, let me first discuss costs.

The long-term costs of basing an unknown number of MX missiles in hardened Titan and Minuteman missile sites are uncertain. Exact information from the Air Force has been unavailable until very recently, much too late for effective analyses and hearings to be held on the subject. I have received only recently the updated, suggestive costs on the entire MX outlay for fiscal year 1982, which amounts to $1.959 billion.

According to the Library of Congress, the total cost of the interim basing solution depends exclusively on how many missiles are deployed in hardened and upgraded silos, and where they are deployed. The cost of upgrading and hardening 18 Titan silos, up to 5,000 pounds per square inch (psi) is estimated at $6.2 billion, according to the Library. The cost of upgrading 36 Titan silos would reach $7.8 billion. The cost of upgrading 40 Minuteman silos would be $5.6 billion.

I want to stress to my colleagues that these figures in no way reflect the true cost that this interim and possibly vulnerable basing choice will incur. We do not know how many missiles the administration wants to deploy. This figure will, in all probability, depend on the effectiveness of the long-term basing options which are also being studied by the Air Force and the Army. It is conceivable that more than a majority of the 100 MX missiles proposed to be deployed will require silo basing. If the MX missiles are deployed in a combination of Minuteman and Titan silos, costs could easily reach $15 to $20 billion in fiscal year 1982. This figure could grow even more ominous if we included inflation and the seemingly inevitable cost overruns that occur in a program of this size.

Mr. President, even this does not begin to reflect the truly staggering cost of the entire MX missile concept. We must first remind my colleagues that the Air Force proposed to build some 226 MX missiles at a cost of some $13.8 billion. This does not include the additional costs of building over 1,000 nuclear warheads to place atop these missiles. This missile will be a formidable strategic weapon—the most accurate and most efficiently lethal system of its kind ever built.

Mr. President, the figures I have just quoted destroy hopes of a balanced budget. In an era when we are trying to substantially reduce programs which have huge budget impacts in the years 1983, 1984, and beyond, we are blindly adopting a MX missile concept whose costs at this point in time are quite literally open-ended. In no other part of the Federal budget are we, in this year of fiscal austerity, tolerating this kind of gross irresponsibility. Yet we seem so anxious to embrace any proposal offered by the administration without benefit of critical analysis in the military field.

The silo-basing concept which this amendment strictly and solely addresses is an interim solution. It is the precursor of three long-term solutions which the President wants studied. These three solutions include ultimately basing the MX missile in mountain ranges, surrounding missile fields with a ballistic missile defense (BMD) system, or putting the MX missiles on a very large number of aircraft called the Continuous Air Patrol (CAP) option. No one knows with any certainty what these long-term solutions would cost. The President has directed that one must be chosen by 1984.

Estimates on the CAP concept have ranged from $30 to $100 billion. This staggering amount of money, similar to the cost which would have been incurred had the Congress gone along with the proposed Multiple Protective Shelter (MPS) system proposed by President Carter, is an open invitation to long-term fiscal bankruptcy. The cost of the deep-mountain basing could be similarly enormous. The cost of ballistic missile defense

systems around Titan and Minuteman missile fields is also unknown, but would easily stretch into the tens of billions of dollars.

Ballistic missile defense configuration that would have to occur should the President succeed in both deploying MX missiles in Titan and Minuteman fields, the United States would, without any question, have to abrogate the ABM Treaty which has been negotiated with the Soviet Union. This would open the door for a far more complex and costly ABM arms race on land and in space into the 1990's and beyond.

Mr. President, there has been a great deal of back-slapping in the committee because this defense bill supposedly presents an honest picture of defense costs to the American people. In fact, this bill does not begin to address the open-ended and long-term costs which are being incurred this year. If all aspects of the MX missile concept, including the missile costs, interim basing costs, and long-term basing options, are added together, the MX missile system will exceed $75 to $100 billion before it is completed.

Why, in the full flush of fiscal honesty which has beset the committee on defense, has no one gone out of their way to discuss these numbers? Any fiscal conservative who tells me that we can afford a $75 to $100 billion MX missile system, a full-scale Trident submarine program, a B–1B and Stealth Bomber, and still remotely hope to bring Federal spending under control is, in my humble opinion, a heretic from fiscal conservatism.

This nation simply cannot afford both an interim and long-term MX solution. I am not about to stand before the Senate and delude the American people into believing that it can.

The $354 million cut that I propose in this amendment is simply an effort to bring a small amount of fiscal sanity and honesty to this particular strategic option.

VULNERABILITY

Mr. President, the projected costs of the MX missile and its deployment are already formidable enough. They raise the most serious questions about whether a nation entering a deepening recession, with budget deficits projected to increase dramatically, can afford this kind of strategic extravagance. The cost problems would still be serious, even if the strategic concept behind the basing of MX missiles in Titan and Minuteman silos made sense.

Since President Reagan announced the proposal to deploy a number of MX's in super-hardened silos, Washington seems to have been inundated by present and former defense officials, strategic scientists, and others who have nearly unanimously indicated that Soviet missiles will be able to destroy even hardened and upgraded silos by the mid-1980's. The list of the individuals testifying against this concept is impressive, as impressive as the negative assessments they make about it.

On October 5, in testimony before the Senate Armed Services Committee, Secretary Weinberger indicated that the super-hardening and upgrading of Titan and Minuteman silos would not be a solution to the question of ICBM vulnerability beyond 1987.

In that same hearing, General Jones, Chairman of the Joint Chiefs of Staff, said, "In my own view, I consider the MX in a very survival mode to be extremely important to the security of the Nation. I remain to be convinced that there is a survivable mode other than MPS." Jones added that if forced to choose, for budget reasons, between the B–1 bomber, the advanced technology Stealth bomber, and the MX, "I would put MX last under the current program slice."

On October 29, 1981, Gen. Lou Allen, Jr., Air Force Chief of Staff, indicated a similar lack of enthusiasm over the new MX concept. He said, "Whereas last year I testified to this committee that I believe the MX to the survivable basing mode was the No. 1 priority of the Air Force. This year I must say that the B–1 program, the bomber program is the No. 1 priority. That emphasis has shifted in my mind."

Lt. Gen. Kelly Burke, Deputy Chief of Staff for Research, Development and Acquisition also was asked whether he thought hardening missile silos would make any difference given warhead accuracy. He was asked by Senator CANNON: "I have in mind what former Secretary Brown said when he said it does not help a lot to have a 5,000 psi silo in the middle of a crater. Do you agree with that statement?"

The response from General Burke was: "Yes, sir."

Mr. President, this is the testimony from existing Defense Department officials. They form an impressive refutation of their own President's proposed plan.

Even more serious challenges were made in testimony by Mr. William J. Perry, Undersecretary of Defense for Research and Engineering in the Carter administration, on November 15 of this year. As my colleagues are aware, Dr. Perry was the scientist most responsible for strategic basing options and for MX deployment. His testimony was given before the Subcommittee on Strategic and Theater Nuclear Forces of the Senate Armed Services Committee. Let me quote from this rather remarkable testimony:

> The technical issue of whether (our silos) can be made harder, 3,000, 5,000, or 10,000 psi, is an interesting technical issue, but it is irrelevant. The Soviets now have the capability where they can deliver the missiles with sufficient yield and sufficient accuracy so that the silo will be encompassed within the crater of the fireball, in which case hardness is quite irrelevant . . .
>
> My recommendation to the Congress is simple, which is that you reject that proposal.

Mr. President, Dr. Perry is a highly respected scientist. Having a first-hand assessment of Soviet capabilities during the Carter administration, he knows full well that the Soviets have a significant number of single-warhead SS–18 missiles. These warheads are enormous, ranging in size from 20 to 24 megatons. The crater left by a blast from a warhead this size would measure approximately 1 mile across and probably hundreds of feet deep. It would obliterate hardened silos. Even if we could double the proposed strength to 10,000 pounds per square inch, the silo itself would disappear in a nuclear fireball. Putting, then, an expensive and highly lethal MX missile in such an unsurvivable basing mode raises a deeper and much more serious question, which was spoken to directly by Dr. Perry in the same testimony.

Dr. Perry was asked whether it made any sense to proceed with the deployment of the MX if we did not have an invulnerable system of some type. His response was:

> I agonized over that and said on balance I would not go ahead with that because I do not believe we will come up with a survivable basing mode that is acceptable . . .
>
> Since I am pessimistic that we will get a basing mode that is both survivable and acceptable, I am opposed to putting a weapon (the MX) that lethal in an unsurvivable mode, for reasons I have described in terms of hair-triggering the (nuclear) alert.
>
> I would instead pour my resources into other directions.

Mr. President, a deep and troubling question has remained both unasked and unanswered in the Senate Appropriations Committee's consideration of this issue. It is a question that has rightfully been raised by members of the Senate Armed Services Committee, it was raised by Dr. Perry in his testimony, and is raised by me today. If the United States insists on placing the most lethal missile it has ever produced in a costly and vulnerable basing mode such as that proposed by President Reagan, does it not invite the Soviets to attack those missiles in times of crisis? The answer, according to Dr. Perry, is "yes."

If the Soviets can destroy the silos containing the MX missile with a single warhead atop the SS–18 missile, it can convince itself that such an attack on the MX missile complex would result in enormous strategic rewards. By expending a single warhead, the Soviets can destroy the 10 to 12 warheads planned for deployment on a single MX missile.

This 10-to-1 exchange ratio, particularly when the target would be a first strike or pre-emptive strike missile such as the MX, will encourage the Soviets to initiate a preemptive strike of their own in order to limit damage to the 75 percent of their missile arsenal which rests in their own silos, vulnerable to U.S. attack. If we are so concerned about the instability caused by threats to our own land-based missiles, why are we deploying a missile like the MX which will make Soviet leaders nervous and prone to launch their forces in time of international crisis?

This is a fundamental danger involved. Both sides are pursuing highly accurate, first-strike weaponry such as the U.S. MX and Trident II missiles, which will place a hair trigger on nuclear war on both sides in times of crisis, or of an accidental alert. I have sought and will continue to seek to neutralize the growth in these first-strike arsenals on both the sides of the Soviet Union and the United States through effective Strategic Arms Limitation Talks. I have encouraged the administration to place a

moratorium amendment at the center of those strategic discussions. I believe strongly that the President should follow his proposed limitation on tactical weapons in Europe with a more comprehensive strategic proposal.

Mr. President, the concept of basing MX missiles in Titan or Minuteman silos has deep and dangerous flaws. It could amount to an interim, $5 to $20 billion expenditure which will then have to be added to the long-term solution to MX basing. The total MX system could cost the American taxpayers $100 billion in the long run, and insure that any effort to balance the Federal budget by 1984 or 1985 would be laughable. Worst yet, this money will be spent on a basing system that virtually every specialist in this field believes will do nothing to solve the vulnerability of our land-based missile force. Finally, in an ultimate and dangerous irony, deployment of the MX missile in such vulernable silos may actually encourage the Soviet Union to strike in times of crisis or accidental alert.

For all these reasons, and for many more that have been mentioned in the debate on this issue, I urge the Senate to adopt this amendment.

Mr. STEVENS and Mr. PERCY addressed the Chair.

The PRESIDING OFFICER. Who yields time?

Mr. STEVENS. Mr. President, I intend to yield time to the Senator from Illinois, but first let me make three short statements.

In the first place, the Subcommittee on Defense Appropriations did hold a hearing on the President's strategic package and this is one of the key items in that package.

Second, we have been committed to the construction of the MX for many years. It was my series of amendments that prevented us from being committed to any deployment mode, but we have a missile ready to go now and ready to come off the production line.

The price of defense, the price of preparedness, is not cheap.

The Senator from Oregon makes a good point about the way in which these weapons systems are all coming to the point of production at the same time, and it is going to be difficult to finance all of them simultaneously and meet our economic goals, but it can be done. It particularly can be done if the Senate will stand behind the President in his determination to show to the Soviets that we are committed to this course if the Soviets are not willing to enter into the START talks and set goals for mutual arms reductions.

The hopes that I am sure the Senator from Oregon has and that the American people have for reducing our arms expenditures rest at the bargaining table. With the advent of the Soviets' SS–18 and SS–19 force, we have no alternative but to proceed as rapidly as possible with the MX. We need an interim deployment mode.

The Cohen-Nunn amendment yesterday did not shut off all the options. It preserved options beyond that of hardening the silos. But to delete all the money at this time, in my opinion, would be to become a defense ostrich and to stick our heads in soft holes in the ground while we are trying to find someplace to put the MX's which will be manufactured.

This does not delete the money for the MX. It deletes the money necessary to devise a way to deploy them until we do have a permanent deployment scheme agreed upon, which, in my opinion, will not be agreed upon until the outcome of the talks. The Senator from Illinois knows this well.

I yield 5 minutes to the Senator from Illinois.

Mr. PERCY. I thank my distinguished colleague. His comments reflect the principal concern I have.

Mr. President, first, we cannot have a credible foreign policy without a strong national defense, and we cannot have that without a strong economy. So first, we put our highest priority on rebuilding the economy, and we all have pledged ourselves to that.

Now we are addressing the second phase, that is, how we can develop a credible defense establishment. So long as you have a credible defense establishment, you have incentive for arms limitation, arms reduction, and arms control.

As the President has said, everything in his October 2 package is on the table. It is negotiable. But you must be in a negotiating position in which we all back and support a program which we will go ahead with if we cannot find a way to limit this irrational arms race that the Senator from Oregon has described so eloquently.

Mr. President, I oppose the amendment offered by the distinguished Senator from Arkansas and support the President's plan to deploy the first MX missiles in hardened silos in existing ICBM fields—an option which I would point out has not been foreclosed by the Senate vote last night on the Cohen-Nunn amendment.

As passed by the Senate, the Cohen-Nunn amendment left intact $20 million for research and development related to the design of reconstructed silos hardened to levels beyond that currently associated with existing Titan and Minuteman launchers. The amendment also provides $334 million for research and development on the design of reconstructed, but not superhardened, silos for the MX. In large measure, the administration's decision not to oppose the Cohen-Nunn amendment reflected their assessment that the President's plan for deploying the MX in reconstructed silos could in fact go forward under the funding levels provided in the bill as modified by the amendment.

I was interested in the way the newspapers this morning portrayed the vote yesterday as a defeat for the administration. The amendment would never have received that overwhelming vote if the administration had opposed this. The administration did not oppose it, because the $20 million in there was what they said they could logically spend, and that is allowed by the measure of last night.

Before any further obituaries are written on the President's fixed-silo MX plan, I would want to emphasize that it has one very important advantage that was largely overlooked in yesterday's debate: It provides a specific course for getting the MX in operation, rather than taking us back to square one in terms of further studies. Mr. President, we have studied and studied this question of how to deploy the MX. I admit that there is a certain attractiveness to calling for new efforts to come up with a theoretically invulnerable MX plan. But we must not forget how many times we have gone down that road before. And in every case in which a specific proposal has been laid on the table, it has been found lacking. We have had the buried trench, the "racetrack," and most recently the so-called linear grid multiple protective shelter system. But in the end, none was deemed acceptable.

Before we junk the President's plan for putting the first MX missiles in existing silos, let us recall that the promise of future solutions has repeatedly proven more illusory than real. The fixed-silo plan is in effect an "insurance policy" that permits us to go forward with the MX now while continuing to study better solutions. Let us not turn this approach on its head.

I want to stress one other advantage of the President's plan: It gives us leverage in the opening rounds of the new START negotiations, scheduled to commence early next year. What kind of bargaining strength will we have if we cancel the fixed-silo plan in return for new studies? Will that approach actually impress the Soviets? I believe not and agree fully with Secretary Haig's statement to the Foreign Relations Committee that Congress support for the MX—and the B–1—will make or break, I repeat, make or break our efforts to negotiate significant arms reductions in START. And, as President Reagan stated on October 2, everything—including the MX—will be on the table in these upcoming negotiations.

I think that statement is very important for the concerns expressed by the distinguished chairman of the Appropriations Committee, Senator HATFIELD.

Mr. President, in recent weeks a controversy of sorts has arisen as to whether the President's plan to deploy the first increment of MX missiles in reconstructed ICBM silos would violate our declared policy of avoiding actions that would undercut existing SALT agreements. Paragraph 4, article IV of the unratified SALT II Treaty provides that in the process of modernizing and replacing ICBM silo launchers, neither party may increase the original internal volume of the silo by more than 32 percent. Preliminary Air Force studies have shown that while an MX missile can be deployed in and launched from existing Titan and Minuteman silos without requiring increases in the silo volume greater than the 32-percent limit, this is not the case if a Minuteman silo is hardened to levels in the range of 5,000 pounds per square inch (p.s.i.) overpressure.

When I first learned that there was a possibility that the President's MX basing proposal might conflict with the

administration's stated policy on strategic arms limitation agreements, I asked Gen. Lew Allen, Air Force Chief of Staff, to advise me whether any such conflict did in fact exist. On Monday, I received General Allen's reply, and I am pleased to inform my colleagues that General Allen's letter confirms that—

None of the programs being undertaken in the Administration's strategic modernization effort includes a commitment to a course of action that would necessitate renegotiation of limitations agreed to in SALT I or SALT II.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. PERCY. Mr. President, will the Senator yield me an additional 2 minutes?

Mr. STEVENS. I yield.

Mr. PERCY. Mr. President, I ask unanimous consent that General Allen's letter be printed in full in the RECORD following my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. PERCY. Mr. President, in his letter, General Allen discusses the question of deploying the MX in hardened Minuteman silos and confirms that to achieve the Air Force's higher hardness objectives, the SALT II limits on volumetric increases would have to be exceeded.

However, General Allen states—and I think this is very important—that there are alternative ways to deploy the MX in existing silos that would be compatible with SALT II and no decision on these alternative basing options need be made for at least the next year. For example, General Allen notes that the MX could be deployed in Titan II silos, which even if hardened to 5,000 pounds per square inch would not require volume increases beyond the 32-percent limit. Alternately, the MX could be deployed in Minuteman silos which are reinforced beyond current hardness levels but short of a psi level that would necessitate internal volume changes beyond the SALT II limit. As General Allen observes:

Should we decide to deploy the MX in reconstructed Minuteman silos, there is no need to rule out the possibility of SALT compatible solutions at this time, albeit at somewhat lower hardness levels, and we will be examining these alternatives in the months ahead.

What is significant in this approach is that no decision on an MX basing configuration that would entail a departure from our voluntary SALT restraint policy need be made before we have begun the new START negotiations early next year. As a result, we can address this decision, as well as other decisions pertaining to the configuration and characteristics of our strategic weaponry, in the context of our experience in these negotiations. Should the first phases of the new START talks indicate that the Soviets are indeed earnest in their declared willingness to negotiate substantial arms reductions, I would fully expect that this administration would avoid any decision on MX basing that would undercut the progress being registered in START.

This could be achieved either by deploying the MX in an explicitly SALT II-compatible mode or by reaching a specific understanding with the Soviet Union that deploying the MX in super-hardened Minuteman silos is an action fully consistent with the spirit and intent of SALT II. I would remind my colleagues that it was clearly the intent of SALT II to sanction the deployment of the MX. The fact that extra hardening—which is after all a stabilizing and nonprovocative step—might, if pursued, create a technical problem of compliance should be regarded more as an issue to be addressed and resolved than as an insurmountable barrier to this deployment option.

Indeed, during our committee hearings on the strategic package, Paul Warnke, who has great experience in dealing with the Soviets on the fine print of SALT agreements, testified that—

If there is any problem with regard to the thirty-two percent limit on the enlargement of silos, I am sure that is the kind of technical adjustment that would cause no problems.

Mr. President, if I may just summarize. First, there has been no decision or commitment by the administration to deploy the MX in a manner that would violate the terms of SALT II. Second, there are a number of SALT-compatible alternatives available. Third, no decision need be made on this question for at least the next year, by which time the START talks will be well underway. And fourth, should the administration eventually decide that it was necessary to deploy the MX in substantially enlarged Minuteman silos, it is not unreasonable to assume that the United States and the Soviet Union could agree that such an action did not undercut the tacit arrangement now being observed by both sides with respect to the spirit and intent of SALT II. Accordingly, I see no conflict whatsoever between the administration's proposal for the MX and its declared policy on SALT restraint and urge rejection of the amendment.

EXHIBIT 1

DEPARTMENT OF THE AIR FORCE,
Washington, D.C., November 27, 1981.

Hon. CHARLES H. PERCY,
U.S. Senate,
Washington, D.C.

DEAR SENATOR PERCY: I am writing to provide further information regarding the manner in which President Reagan's strategic modernization program is both fully consistent with existing strategic arms limitation agreements including the unratified SALT II accords and strongly supportive of the Administration's commitment to achieve meaningful progress in the reduction of strategic arms.

With regard to the first consideration, none of the programs being undertaken in the Administration's strategic modernization effort includes a commitment to a course of action that would necessitate renegotiation of limitations agreed to in SALT I or SALT II. There are a few cases, as discussed below, where we will have options to proceed in ways that would take us beyond existing limits. In all these cases we also have alternatives that would remain within SALT restraints. In no case have we yet committed ourselves to go beyond SALT limits and we have no need to make such decisions for at least the next year. Thus we can address these choices in the context of our experience in the upcoming Strategic Arms Reduction Talks that are scheduled to begin early next year.

There are three areas, one with regard to the B–1B and two with regard to the M–X, where there are options to exceed the limits contained in the SALT II Treaty. In the bomber case, we have announced our plans to provide the B–1B with both internal and external ALCM carriage. In the Second Agreed Statement to Paragraph 14, Article III of the SALT II Treaty, the U.S. agreed that the B–1 would be equipped with no more than 20 air-launched cruise missiles. Our current design would provide the B–1B with the capacity to carry up to 22 ALCM. For the next several years, however, we will have the option to equip the B–1B with 20 rather than 22 ALCM by simply providing 12 rather than 14 stations for external ALCM carriage and we have no need to make that decision any time soon. Moreover, even were we eventually to choose to equip the B–1B with 22 ALCM we would not violate the SALT II Treaty as written, since the first B–1B equipped for ALCM carriage (number 19 in the production run) is scheduled to come off the production line in August 1986 while the treaty, if ratified without revision, would remain in force only until December 31, 1985.

The two potential SALT problems associated with the M–X program concern the number of reentry vehicles carried by the MX missile and the internal silo dimensions that might be involved should the M–X be destructed for greater hardness. The M–X missile, as you know, was expressly designed to stay within SALT II parameters. Although it has always had the potential to carry up to 12 reentry vehicles, we continue to plan to carry only 10 RVs thus complying with the SALT III limit for "new" ICBMs.

With regard to the silo dimension issue, OSD has not yet reached a decision as to whether the M–X will be deployed in reconstructed Titan or Minuteman silos. Air Force preliminary analyses indicate that to achieve our higher hardness objectives in Minuteman silos, these silos would have to be reconstructed in a manner that would enlarge their internal volume beyond the maximum of 32 percent allowed in Paragraph 4, Article IV of the SALT II Treaty. Should we decide to deploy the MX in the reconstructed Minuteman silos, there is no need to rule out the possibility of SALT compatible solutions at this time, albeit at somewhat lower hardness levels, and we will be examining these alternatives in the months ahead. In any event, no decision need be made on the specific reconstructed silo design for at least a year and construction would not begin before August 1984.

In my view, the President's strategic modernization effort represents a series of essential steps that are needed not only to maintain a credible strategic deterrent and restore an adequate balance but also as the necessary measures to provide an incentive for the Soviets to negotiate seriously toward meaningful, equitable and verifiable strategic arms reductions. None of the elements within this comprehensive effort is currently planned in a manner that would necessitate renegotiation of existing SALT agreements and there will be ample opportunity to address those areas where options for deviation from these limits exist.

Sincerely,

LEW ALLEN, *General, USAF,*
Chief of Staff.

Mr. STEVENS. Mr. President, we are indebted to the Senator from Illinois, the chairman of the Foreign Relations Committee, for his statement.

I want to do one thing before I yield to the Senator from Texas. I want to follow through on what the Senator from Illi-

nois has said. I was most alarmed and surprised to hear this morning that the Cohen-Nunn amendment was a defeat for the administration. That is not true.

I stated on the floor three times yesterday that I had been in contact with the Secretary and with Dr. DeLauer. They were not exactly happy about the turn of events, but they understood them.

We did not oppose that amendment. As a matter of fact, the meeting that led to the final version of that amendment was held in my office. The Senator from Texas and I were involved. The two of us certainly have been identified with presenting the administration's position—the Senator from Texas as chairman of the Armed Services Committee and me in my capacity as chairman of the Defense Appropriations Subcommittee.

Before that amendment came to a vote, it was cleared with the administration. There was no defeat here yesterday for the administration on the Cohen-Nunn amendment. As a matter of fact, it clearly left more money than was anticipated in the first place for exploration and research so far as hardening is concerned—$20 million in long term, $20 million in short term, and the remainder of that money was earmarked for compatible research and development relating to missile deployment. That is consistent with what we had as an objective.

I will yield to the Senator from Texas. I hope he not only will cover that point but also will reaffirm again that the reports that the Cohen-Nunn amendment somehow went against the administration's position is in error. I yield to the Senator from Texas such time as he may wish.

Does the Senator from Mississippi want time this morning, also?

Mr. STENNIS. Yes.

Mr. STEVENS. How much time remains, Mr. President?

The PRESIDING OFFICER. Nineteen minutes and 19 seconds.

Mr. STEVENS. I yield to the Senator from Texas such time as he uses.

Mr. TOWER. Mr. President, the Senator from Arkansas proposes an amendment that should not even be considered here in a debate on the appropriations bill. It is a matter that should be considered in the course of authorizing legislation. Actually what the Senator from Arkansas proposes to do is to delay the deployment of the MX by some 18 months thus opening the window of vulnerability wider.

He would imperil the security of the United States as a consequence of his amendment should it be adopted and he would certainly, as has been pointed out by the distinguished chairman of the Foreign Relations Committee, undermine the negotiating position of the President.

Let me say a brief word about Senator HATFIELD's concern about the cost of defense. We are all concerned about it. I share that concern. But it should be fully understood that we are going to have to make a commitment to spend an uncomfortable amount of money on defense if we ever hope to convince the Soviet Union that we mean business, that we intend to have the means to defend ourselves, to defend our allies, to protect our vital interests abroad, and support our foreign policy objectives before the Soviet Union is going to come to terms with the United States. Underfunding defense now could cost us a great deal more later on. As a matter of fact, we find ourselves in this position because we have underfunded defense over the years.

I am even more impatient than the Senator from Arkansas over the delay in the selection of the MX basing mode because I have been a member of the Armed Services Committee for some 15 years and have worked with strategic programs for that period of time, and I now have the responsibility of chairing the committee that has to make the basic defense policy positions.

Senator PRYOR would preempt the Armed Services Committee and bar us from doing in February or March what we might choose to do. I think it would be folly to adopt an amendment of this kind without it being thoroughly inquired into and given the advantage of some lengthy deliberation when in fact we will probably report out an authorization bill around the 1st of April of next year.

The MX missile is not going to be deployed in the next fiscal year anyway. The missile is not even going to fly on its initial test until January 1983. What the Senator from Arkansas will do would be to impose an unconscionable delay on deployment. In fact by precluding any R. & D. on an interim basing mode, he may be also precluding R. & D. on a permanent basing mode because it is envisioned that anything that we do or a number of options that we may have for an interim basing mode may later be incorporated into a permanent basing mode.

The idea of hardening is not a bad or ridiculous idea. It is unreasonable to think that hardening alone is going to give us survivability, but there is a great deal of military technical and scientific opinion that holds that perhaps the best mix is a deceptive basing and hardened silos protected by a ballistic missile defense system. I would not want to junk the idea of hardening silos altogether, although I would be the first to concede that standing alone hardening is not enough to afford us survivability.

I shall address myself at this point to a matter brought up by both Senator PERCY and Senator STEVENS. The decision made here yesterday was not a defeat for the administration. The administration some days ago accepted as an option the deceptive basing mode, and this was stated very clearly by the Secretary of Defense. Deceptive basing is alive and well and hopefully will be adequately funded in terms of the R. & D. that we do on it. In my view, ultimately the most survivable mode, and I believe that this view is shared by a substantial majority of the experts in these matters, is a deceptive basing mode with a ballistic missile defense system with some elements of the BMD themselves perhaps being deceptively based which holds the best prospect and the best promise for survivable urgent hard target kill capability which is essential if we are going to not only protect the security of the United States but bring the Soviets to terms at the conference table. The amendment of the Senator from Arkansas would impose a perilous delay on our strategic modernization and seriously undermine the negotiating position of the President and, therefore, should be defeated.

Again let me say that what was done here last night is still compatible with the administrations' search for various alternatives to provide us with a survivable urgent hard target kill capability.

Mr. PRYOR. Mr. President, will the distinguished Senator from Texas yield to me for a question?

Mr. TOWER. I am delighted to yield to the Senator for a question on his time.

(Mr. ARMSTRONG assumed the chair.)

Mr. PRYOR. It is my understanding from the Senator's statement that he is saying that the Armed Services Committe—and he is correct I am not a member of that committee—is going to hold authorization hearings and discuss MX basing modes in April. This is precisely and exactly what I am attempting to do through this amendment—to have a full discussion of how we are going to spend $354 million before we write the Defense Department a blank check not knowing what we are doing. This is especially true in light of the fact, I say to my friend from Texas, that on December 1, 1980, the Department of Defense submitted to Congress a report on basing mode options in which there were 31 studies on every conceivable mode of basing the MX missile. What is $354 million going to do to further study the 31 systems that have already been studied to death? They have been beaten to death.

What I am trying to do is to get this money out of this bill so it will not be totally squandered and wasted, and when the Senator alludes to the fact or to the assumption or the allegation that my amendment is going to imperil the defense of this country, I can only say that that is absolutely not true, that is as far from the truth as I can imagine the Senator coming at this point. This amendment of mine simply takes away the $354 million that we are going to waste and squander and it keeps, I must say this once again, $20 million in the bill for permanent basing, and that is exactly the process we should be proceeding upon at this time.

Mr. TOWER. Let me simply say in response, I know it was not the intention of the Senator from Arkansas to imperil the security of the United States. What I said was that is the practical effect of what he proposes to do.

To suggest that this money will be squandered is, I think, somewhat in the nature of a lot of hot rhetoric. I do not expect that it will be squandered, and I think the thrust of the Cohen-Nunn amendment yesterday was to make sure that it was directed in the right way.

Let me say that that simply because we have studied various options, 31 of them the Senator names, and I do not remember the precise number, he may

be correct on that, a lot of them, of course, are cockamamie ideas somebody scrawled on the back of an envelope but, in fact, the fact that we have studied 31 different ways does not mean we have to scrap everything else and select from what we have already studied because time marches on and technology marches on and science marches on, and our intelligence estimates add to our knowledge of what the Soviets are doing to the extent that maybe we should reject all we have considered in the past and proceed toward something new.

So to say we have already studied things, therefore no more study is required, is not compatible with the facts or the times.

Therefore, I would hope that we would have the advantage of the expenditure, hopefully in a fruitful way, of the funds that are appropriated here so that we can better do our work in the authorizing committee. We cannot say "Come in here and give us a design and a cost profile" before we appropriate any money. You have to appropriate the money before you can do the research that produces a design and a cost profile.

Mr. PRYOR. Mr. President, I yield 2 minutes to the distinguished Senator from Colorado, and a cosponsor of the amendment.

Mr. HART. Mr. President, I thank my colleague from Arkansas and my colleagues from Ohio and Illinois.

I strongly support the amendment of the Senator from Arkansas. Because of the very nonsensical situation in which we find ourselves, it is the only sensible approach, it seems to me, that the U.S. Senate can take.

It makes no sense to go into the expenditure of billions of dollars for an ICBM system, put it in a basing mode or deploy it in another situation which is going to make it a more attractive target to our opponents, and also lower the threshold of the possibility of nuclear war. That is exactly what the administration's decision does.

Frankly, I am sympathetic with the administration's quandary. It is very, very difficult to figure out what to do with this new missile. The fact that the administration had to spend the better part of the year trying to solve this—and failed—is the product of the failure of the SALT II Treaty which would have put a cap and a limit on the size of the Soviet threat and the number of Soviet warheads. Without that limit, without that cap, frankly, no MX basing mode makes any sense.

If we are to make the MX missile make any sense, to modernize or make survivable the next generation of ICBM's, we are going to have to define and limit the size of the Soviet threat. and the only way I know how to do this is through negotiated agreements or treaties.

Mr. President, I did not support the so-called Nunn-Cohen amendment last night. I did not do so for one reason, and that is because it opens up an even less acceptable alternative than silo hardening, and that is an ABM system or ballistic missile defense system. That is even greater folly than a hardened silo fixed-site deployment mode for this new generation of mobile missile.

If we went to that system it seems to me, that would be even more dangerous than putting this new attractive missile, the MX, in the present silos, or hardened silos.

So I strongly disagree with the possibility the Senator opened up last night. That option—an ABM system—was rejected by the Senate of the United States a decade or decade and a half ago. Other than that I strongly support the effort being made by the Senator from Arkansas, and I hope the Senate will go along with it.

The PRESIDING OFFICER. Who yields time?

Mr. PRYOR. Mr. President, I yield 8 minutes to the distinguished Senator from Ohio (Mr. GLENN) who is one of the cosponsors of the amendment.

The PRESIDING OFFICER. The Senator is recognized for 8 minutes.

Mr. GLENN. Mr. President, I think in all this MX decision we should drop back and analyze first what is the basic problem. Why do we need an MX? That may sound very simplistic at this point in the argument, but I think the basic reason why I think we need an MX is because the fixed geographic points of our 1,054 missiles out there are vulnerable to a Soviet first-strike.

These are fixed geographic points. If the Soviet planners can target, and with the increased accuracy of Soviet nuclear warheads, our missiles then supposedly become vulnerable to a first-strike knockout.

We would still have our submarine-launched ballistic missiles, of course, to retaliate. But let us say we are going with an MX because we feel we have a first-strike vulnerability. What are we going to do? How are we proposing to fix that fixed point of vulnerability, by going to an even more concentrated, larger MX in the same old silos that the Soviets already have targeted?

If that is the way we fix our original problem, then it just defies any logic that I can possibly dream up. They do not even have to figure out new aim points to knock this thing out. With their new accuracy that was talked about here on the floor yesterday, they can do exactly that.

Our defense planners say they can harden to 5,000 psi. But you talk to them and nobody has the foggiest idea yet as to how we are going to harden to 5,000 psi. That type of hardening has not yet been invented, and there are many engineers who feel it is practically impossible with any present technology we know about.

So we once again find ourselves with the same old Titan silos which have been targeted, now being targeted with a bigger new booster in it, with even more concentrated vulnerability than we have had in the past, and that just does not make sense.

Can the Soviets do this? Do they have the warheads? Certainly they do on the SS-18, a big booster which they are limited to 10 warheads on now. They have 308 of those, and our experts estimate that they can put somewhere between 25 and 40 warheads on each one of those, which comes up to an additional 4,600 or so warheads just if they expand the front-end loading of their present SS-18.

Well, if this is a silly way to go, and I describe it as that silly way to go, trading one geographic point vulnerability for an even more concentrated increased geographic point vulnerability, then what should we do?

I think we need to look at our NATO allies and the Soviets themselves for that answer. Look at what has happened in Europe. Since 1964 they have had the Pershing I's based in West Germany. Why is that an effective missile? Well, it is solid fuel, it has a nuclear warhead, and it is kept in missile parks most of the time. But it is fully transportable. It can be moved on its transporter to any one of a myriad of launch points during exercises or in a combat situation.

It can be launched from any stopping point. It needs no prepared facilities other than those carried along with it. In other words, it has an infinite number of launch points, and it is the thing guaranteed that would give any Soviet targeter nightmares because he cannot know possibly all the spots to target outside of those missile parks.

Our current theater nuclear forces talks getting underway in Geneva are concerned with this next generation now that we are going to send to NATO the Pershing II. They already accept this. They accept the Pershing II. NATO voted it in, and it is a fully transportable, mobile missile capable of going anywhere, and if we need any further corroboration of this, look at the Soviet Union itself in their SS-20's, again solid fuel rocket, nuclear warhead, usually kept in missile centers, but fully transportable, capable of being launched from anywhere. Can we target them? Only if we barrage attack and catch a few of them maybe, but not enough to stop most of them from being fired at Western Europe.

Even more, they have the SS-16 they were developing one time; with the SS-20, with one additional stage, and that mobile missile, the SS-20 with one additional stage, which can be plugged in the field, becomes an ICBM, the SS-16. The Soviets have guaranteed us they are not using that option, and we think their testing program has been terminated.

But over the past 3 years, Mr. President, I have had repeated, repeated, conversations with Pentagon planners on the subject, and not one time has anybody told me that this idea of a mobile system was not the thing that would give us the best guaranteed retaliatory response, and would do the most to prevent consideration of a first-strike by the Soviet. It would come from an ICBM that is not planned for a specific hole, that specific geographic point, but is free to move to anywhere.

Instead of this 200,000-pound giant we are proposing and tying it in a hole, and tying it to hardening. our new MX could be—and this is fully technically feasible—our new MX can be one-third the weight, still have up to three warheads now, and probably more later, and be fully transportable. They agree completely that no such technical reasons

exist that would prevent such a development.

It would be smaller, it can be air shipped, it could be air launched, it could be trucked, barged, put in silos, and used in a variety of ways, all designed to do one thing—keep the Soviet planners and targeters from ever thinking that they really have a "first strike" capability.

Now, why are we not moving in that direction? The Pentagon has one answer—social interface. Two words: social interface. That is the term they use to say that the American people could never be convinced even in an emergency, even if we were under attack, even if our very survival was at stake—which it is in the decisions we are making here—to accept movements of missiles away from remotely located silos someplace. In other words, what we are talking about are weapons to prevent a Soviet first strike, but we would not accept in this country the fact that we could move these missiles away from remote sites, over the hills and out of sight of most Americans. And yet they actually admit what would be given the best of terms, the very best guaranteed response to the Soviets that if the Soviets do miscalculate that we have reaction capability that we can respond with.

By contrast, the Soviets accept mobile missiles, not through any sense of foolhardy risk, because the missiles and warheads in transport are fully safe. We participate and we ask our NATO allies to accept this whole concept and yet, at the same time, we tell our allies that, "Oh, no," we throw up our hands and say, "Americans could not possibly see a missile outside a silo. That would be unbearable. How could Americans ever tolerate anything out in the open that would give us a better deterrent capability?"

I think the whole thing is actually preposterous that we are going with this big system and tying it once again to the vulnerable fixed geographic points which gives us less retaliatory capability.

Now, what do we do right now? Do we have missiles right now outside the silos? Well, I do not know how everyone seems to think we can get these things from the factory to where they are supposed to be launched from. We have nuclear weapons aboard ships. We have nuclear weapons going in and out of ports. Missiles are shipped across country from manufacturer to installation site. Warheads are manufactured, flown or shipped, installed on those missiles, taken off from time to time and transported back to the plant for updating modifications. Bombers stand alert with live nuclear weapons aboard. On any given day, we have these things going all over the country. So we have de facto weapons mobility now.

And yet we talk about we cannot go to a better system and a cheaper system because of the social interface that we ask our allies all over the world to accept. It is preposterous.

And I rise to support the proposal of the Senator from Arkansas. About a year ago, the fixed-base MX was estimated to cost $35 to $50 billion, while the price of the mobile MX was $23 to $28 billion, which gives us better security, and better guaranteed retaliatory response. If I thought it had a chance of passage here, I would put in an amendment to sink the whole thing, and save the $2.2 billion.

I know I have overrun my time. I thank the distinguished Senator from Arkansas for allowing me this time.

Mr. STEVENS. Mr. President, how much time remains?

The PRESIDING OFFICER. The Senator from Alaska has 11 minutes and 8 seconds, and the Senator from Arkansas has 1 minute and 4 seconds.

Mr. STEVENS. I yield 8 minutes to the Senator from Mississippi.

Mr. STENNIS. Mr. President, I thank the Senator. I will try to yield back at least 2 minutes of that time.

Mr. President, to get down to the basics of this thing, where will this amendment take us? It will take us nowhere. Stop the whole thing. Do not move forward here except with an infinitesimal small amount left for that purpose. Put it back where we were 4, 5, or 6 years ago.

Now, all the time during those years that we have been right up to the doorstep, the Senate Armed Services Committee has been open for hearings to anyone that had a plan. I would welcome, as a member, and as a former chairman, I would have welcomed, another plan.

The multiple protection shelter has points about it that are not altogether desirable. But everyone agrees that we need and must have this missile, the MX missile, itself. It is the No. 1 of our Triad. No. 1 of the future; an absolute must. All the disagreements go over the basing mode, where and how and what is best.

Certainly, the answer is that we need the missile and we all want it and everything is clear. We have spent around $4 billion. Certainly it is not the answer to say that we do not know what we want; we do not know which is best; of all the things that are available that we have heard; we are not willing to make a real start.

So, with all due deference, I have great esteem for the Senator from Arkansas. He is a good debater. With all deference to him as author of this amendment, it makes us turn around and, in effect, go in the opposite direction, backward.

He says now that we have had 31 studies. How many studies did Thomas Edison have trying to make the incandescent light? Supposing he would have given up on 31? I remember as a little boy reading about his endurance and versatility.

Those that split the atom, how many tries did they make? Suppose they stopped on 31?

How many did Rickover have when they all said that you could not put nuclear power in a submarine? All of them said it could not be done, except Rickover. Well, he did it. He did it.

So, this is not a 31 or 61 or 101 proposition. We have to keep going, at least, until we find a way. So, that is my point.

Incidentally, the adoption of the amendment, the Nunn amendment yesterday, I raised the point on the floor in the begining that if this impairs or detracts or curbs the President of the United States, headed next year for the SALT talks, then we must not pass anything in that field. I am entirely satisfied with the final language. It is an asset to the bill. I was glad to vote for it and we will follow that on through the conference.

Back to this plan now. I say we have been open all the time for proof; the Appropriations Committee has been open all the time for proof. We just absolutely cannot afford to stop or turn back, as this amendment does. You could not send a better message to the Soviets that we do not know what we want; we do not know how to do it. We think we have to have that engine in the missile, but we cannot get any further than that. That is a fine fact of life to arm the President and his negotiators with. That just does not represent our effort.

We will find a way. We must find a way. You could make some good points for or against what is in the bill now, what has been in the bill. But I never have heard anyone stand up and make the argument that we do not need the missile.

It has been proposed that we can send it from an airborne base or even a submarine launch base. But, again, everyone agrees it needs to be launched from the land. So, that is what we are looking for. And we will find a way.

I think it is the gravest kind of mistake to turn back now and just, "We do not know what we want. We do not know what we can do. We are going to quit."

I urge that this bill be debated here on this floor, where every Senator—members of the Appropriations Committee or Armed Services Committee or not—could offer amendments in his judgment on anything that he thought was sound and let the body pass on it. I stand for that system always.

But, it certainly does not mean we have to vote for these amendments that are a backward step.

I am not warning anyone, but we will never be able to get by this situation we are in with reference to the No. 1 spot of our Triad by just stopping in our tracks and saying that we will wait for something better.

So, I do not think we have any choice, Mr. President. I do not think we have any choice. There has not been any choice or alternative brought in here that has not already been considered. A lot of matters have been suggested and many have been considered.

I do not know what the Secretary and the President may do. in the final analysis, on this matter. But, for Lord's sake, we cannot turn around here and just take it out. We have to have something positive and affirmative upon which they can stand in debate and argument and negotiations, something that is plausible to point to that they are going to achieve this fact of life.

We are going to have this fine missile that everyone agrees is highly superior and we are going to have it on launching bases that are effective—whether perfect or not is another matter—but that is effective and practical and workable to complete our triad, which is, at this point, lagging some, but by no means knocked out.

I thank the Senator for yielding the time. I gladly yield back what time I have remaining of my 8 minutes.

Mr. PRYOR. Mr. President, may I inquire how much time remains?

The PRESIDING OFFICER. The Senator from Arkansas has 1 minute and 4 seconds remaining.

Mr. PRYOR. Mr. President, I yield 4 seconds to the distinguished Senator from Illinois.

The PRESIDING OFFICER. The Senator is recognized for 4 seconds.

Mr. DIXON. Mr. President, I rise in support of the amendment offered by the Senator from Arkansas striking money for super hardened silo basing for the MX missile.

We are faced with difficult and expensive decisions daily on this floor, but none more so than those we make in the areas of defense and national security.

We are faced daily with the allocation of scarce resources, and in this case the question is whether to allocate nearly $8 billion for the hardening of Titan or Minuteman missile silos so that they can hold the MX missiles.

Mr. President, for a year in the Senate now, and as a candidate for the Senate for a year before that, I have supported the proposition that the MX missile is necessary to reduce the vulnerability of our current land-based missile system.

During all of that time, however, I opposed the method of basing the missile that was being put forth—the "shell game" in the desert. It was a massive proposal, and massively unrealistic. It might have worked, but it could not be done.

Now, the administration has abandoned that proposal—which, of course, was not its own—and put forth another. This one—to harden existing silos—is downright simple compared to the "racetrack" approach. But, ultimately, I am afraid, it is not a better choice. This one can be done, but it will not work.

Mr. President, the MX missile will be no less vulnerable in the hardened silos than are the Titan and Minuteman missiles now in those silos. If the Soviets are becoming capable of taking out the Minutemen and Titans—which is the premise on which we base our need for the MX—then surely they can take out whatever missile is in the Minuteman and Titan silos.

I have in my files an unclassified map showing the locations of our currently deployed ICBM's. The Soviets know where they are. The hardened sites are vulnerable.

Mr. President, this basing mode is unacceptable, and so I must support this amendment, which removes the "basing" money from the Defense appropriations bill.

I urge my colleagues to support it, and I urge the administration to bring together the warring factions within the armed services and produce with them a basing system for the MX missile that is achievable and that protects a $14 billion missile from destruction.

Mr. PRYOR. Mr. President, I yield 5 seconds to the distinguished Senator from Ohio.

Mr. GLENN. Mr. President, I only want to be certain that the record is clear in saying that I am a strong supporter of the B–1 and have been for many years.

Mr. PRYOR. Mr. President, I yield 30 seconds to the distinguished Senator from Michigan.

Mr. LEVIN. Mr. President, last night we decided no superhardened, fixed silo interim solution was a good amendment. It did not go far enough. The Pryor amendment says no more interim solutions at all.

If studies were weapons, the Russians would be quaking in their boots.

Last year we said March 1981. The Townes decision was supposed to be the final of the final. Security is not jeopardized by this amendment, but it is enhanced by saying no more billions for interim, tentative, nondecisions. This is a fish-or-cut-bait amendment. I am proud to cosponsor it.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. STEVENS. Mr. President, how much time have I remaining?

The PRESIDING OFFICER. Three minutes and 20 seconds.

Mr. STEVENS. I yield 1 minute to my friend from Arkansas.

Mr. PRYOR. I am very grateful to the distinguished Senator from Alaska. Would the Senator from Alaska like to go forward?

Mr. STEVENS. Very well.

Mr. PRYOR. That will be fine.

Mr. STEVENS. Mr. President, yielding myself the remainder of my time, let me read to the Senate a letter I received from the President yesterday.

THE WHITE HOUSE,
Washington, December 1, 1981.

Hon. TED STEVENS,
Chairman, Subcommittee on Defense, Committee on Appropriations, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: I deeply appreciate your support for my Administration's five point strategic modernization program. Your leadership has contributed to a better understanding of our efforts and has been critical to the support we have received in the Appropriations Committees.

I recognize that some aspects of the program are not entirely satisfactory to some members of Congress. I must emphasize, however, that each of the five elements is equally vital to our effort to restore the strategic balance at the same time as we commence a major new round of negotiations on nuclear weapons reduction. A Congressional rejection of any major element of our interrelated program would lead to a substantially greater and potentially more dangerous inferiority than would have resulted from the Carter program. Of equal importance it would also be a dangerous and misleading signal of weakening American resolve in the face of an ever growing Soviet challenge. Such a signal, especially now, would undermine the U.S. negotiating position at the very outset of the Intermediate Range Weapons Negotiations in Geneva.

I share with many the goal of meaningful and verifiable reduction of nuclear arms. Nevertheless, I firmly believe that this objective can only be attained when the Soviets are convinced that we are determined to restore the military balance. In order to realize our shared national goals and preserve our position at Geneva, I strongly urge your assistance in obtaining Senate approval of the entire strategic modernization program.

Sincerely,

RONALD REAGAN.

Mr. President, that has been our goal and I urge the defeat of this amendment.

Mr. PRYOR. Mr. President, I sincerely appreciate my friend from Alaska yielding me this additional minute.

I should like to list the cosponsors of this amendment. They are Senators HATFIELD, LEVIN, EAGLETON, DIXON, HART, and GLENN.

I should also like to make reference to a comment by my friend from Mississippi who quoted one of my heroes, Admiral Rickover. Admiral Rickover stated recently before a congressional committee:

> Each year there is controversy in the Department over the shape of the Navy's future shipbuilding programs. Often the concession to those whose programs are cut back is a promise to conduct further studies. As a consequence, the Navy's long-range shipbuilding program has for years been in turmoil.

Mr. President, that is precisely what we are doing here. We are taking $354 million and we are saying, "Let us study this matter a little further."

We studied it $4 billion worth. We are still in the old syndrome. We are caught in the old trap of buying now and deciding later, committing ourselves when we do not mean to commit ourselves.

Mr. President, I strongly urge my colleagues to support this particular amendment, which makes sense.

THE MX ISSUE AND AN EFFECTIVE STRATEGIC DETERRENT

Mr. KENNEDY. Mr. President, I rise in support of the amendment offered by the Senator from Arkansas (Mr. PRYOR) to delete funds associated with the MX basing system.

Mr. President, I also believe it is unwise to appropriate funds for hardening existing Titan and Minuteman silos.

When President Reagan announced his strategic arms recommendations on October 2, he wisely rejected the absurd MX missile racetrack basing plan. I strongly agreed that the racetrack offered no real additional protection for our land-based missiles against a concentrated Soviet strike.

This plan is particularly ineffective in the absence of SALT restraints on Soviet strategic nuclear forces. By correctly deciding against the racetrack, the country has been spared a costly and ineffective scheme that would have been highly destructive of large regions of the West.

Unfortunately, the administration's alternative of hardening existing missile silos has an equally grave strategic drawback. With respect to the problem of vulnerability, MX missiles in fixed, hardened silos provide no more protection than our existing Minuteman missiles in fixed, hardened silos.

Moreover, placing the MX in superhardened silos is only a temporary decision. Only in 1984 will the administration make a final determination on which basing system offers genuine hope of strengthening our land-based missile force. I support the administration's decision to pursue further research on such basing alternatives as long-endurance aircraft and deep-silo missile deployment.

79-059 O-85-30 (Pt. 22)

However, I believe it is an unquestioned waste of defense resources to increase the hardness of existing silos. Super-hardening is irrelevant, because these silos could still be destroyed by existing Soviet warheads. As former Secretary of Defense Harold Brown has written:

There is talk of further hardening of existing silos for a much-truncated MX force, but since the MX will not be available until 1986, that further hardening if it is at all feasible, will not be available before the Soviets can install a new generation of guidance systems. The Soviets, using technology that they have already developed, will surely be able by that time to improve the accuracy of their ICBMs further, so that in the case of nuclear war, the hardened MX silos will find themselves in the fireball and in the crater left by the nuclear explosion of Soviet warheads; the silos would not survive such an experience.

At a time when we face so many urgent defense tasks—such as increasing the readiness of our conventional forces, enhancing our airlift and our sealift capability, and improving our military command, control and communications network—we simply cannot afford to pour defense dollars down a missile silo.

Mr. President, there is no question that the Soviets have dramatically improved the accuracy and further increased the power of their ICBM force. Nor is there any doubt that the Soviet Union will continue to strengthen its strategic nuclear forces. The United States must counter this military challenge to our security. We should support programs, such as the Stealth bomber, the Trident II missile, and greater efforts to protect our strategic command, control and communications systems, that will truly strengthen our nuclear deterrent.

We should seek to limit the Soviet military threat through effective arms control agreements. And we should oppose programs, such as further hardening of existing missile silos, which serve to weaken our national defense by squandering scarce dollars on military projects which do not add to our security.

Mr. President, I urge my colleagues to join me in supporting the Pryor amendment.

Mr. STEVENS. Mr. President, have the yeas and nays been ordered?

The PRESIDING OFFICER. The yeas and nays have been ordered.

Mr. STEVENS. I yield back the remainder of my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Arkansas. The yeas and nays have been ordered and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Alabama (Mr. DENTON), the Senator from Arizona (Mr. GOLDWATER), and the Senator from California (Mr. HAYAKAWA) are necessarily absent.

Mr. CRANSTON. I announce that the Senator from Arizona (Mr. DECONCINI) and the Senator from South Carolina (Mr. HOLLINGS) are necessarily absent.

I further announce that, if present and voting, the Senator from Arizona (Mr. DECONCINI) would vote "nay."

The PRESIDING OFFICER. Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 35, nays 60, as follows:

[Rollcall Vote No. 445 Leg.]

YEAS—35

Andrews	Hart	Moynihan
Baucus	Hatfield	Pell
Biden	Huddleston	Proxmire
Bumpers	Kassebaum	Pryor
Burdick	Kennedy	Randolph
Cranston	Leahy	Riegle
Dixon	Levin	Sarbanes
Dodd	Mathias	Stafford
Durenberger	Matsunaga	Tsongas
Eagleton	Melcher	Weicker
Ford	Metzenbaum	Williams
Glenn	Mitchell	

NAYS—60

Abdnor	Garn	Nunn
Armstrong	Gorton	Packwood
Baker	Grassley	Percy
Bentsen	Hatch	Pressler
Boren	Hawkins	Quayle
Boschwitz	Heflin	Roth
Bradley	Heinz	Rudman
Byrd, Harry F., Jr.	Helms	Sasser
	Humphrey	Schmitt
Byrd, Robert C.	Inouye	Simpson
Cannon	Jackson	Specter
Chafee	Jepsen	Stennis
Chiles	Johnston	Stevens
Cochran	Kasten	Symms
Cohen	Laxalt	Thurmond
D'Amato	Long	Tower
Danforth	Lugar	Wallop
Dole	Mattingly	Warner
Domenici	McClure	Zorinsky
East	Murkowski	
Exon	Nickles	

NOT VOTING—5

DeConcini	Goldwater	Hollings
Denton	Hayakawa	

So Mr. PRYOR's amendment (UP No. 736) was rejected.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. TOWER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. STEVENS. Mr. President, may we have order?

The PRESIDING OFFICER. The Senator will please suspend. The point of the Senator is well taken. The Senate is not in order.

Mr. STEVENS. Mr. President, Senator LEAHY has an amendment that he is prepared to present. I have examined the amendment of the Senator from Vermont. I ask whether he is willing to enter into a time agreement. It is my understanding that we can have an agreement to vote not later than 12 on the Senator's amendment that he is about to offer. Is that correct?

Mr. LEAHY. I will be perfectly willing to do so. I know the time constraints that the distinguished chairman is under.

Mr. STEVENS. Mr. President, I ask unanimous consent that the vote take place not later than 12, with the time to be equally divided according to the usual procedure.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STENNIS. Mr. President, may we have quiet, so that the Senator can be heard? He has given very generously of his time, 1 hour, equally divided.

The PRESIDING OFFICER. The Senate will be in order.

UP AMENDMENT NO. 737

(Purpose: To eliminate waste, fraud, and abuse in the Military Personnel and Operation and Maintenance accounts)

Mr. LEAHY. Mr. President, I send to the desk an amendment and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Vermont (Mr. LEAHY) proposes an unprinted amendment numbered 737:

On page 71, after line 30, add the following new section:

SEC. 780. Notwithstanding any other provisions of this Act, not more than $58,172,487,856 shall be appropriated for Military Personnel and Retired Military Personnel, and not more than $63,428,633,943 shall be appropriated for Operation and Maintenance.

Mr. LEAHY. Mr. President, I ask for the yeas and nays on the amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. LEAHY. Mr. President, 10 days ago, the President of the United States ordered the shutdown of the Federal Government because of his conviction that the pattern of ever-increasing public spending must be stopped.

Today we are considering the most expensive defense appropriations in our Nation's history. The total cost of this bill is 100 times greater than the level of spending that caused the President to veto the continuing resolution.

The enormous increase in defense spending implemented by this bill reflects the conviction of the administration and the committee that a major increase in our military strength is essential. I do agree that we need a major increase in our military strength.

I am deeply disturbed, however, that the effort to increase our military strength has not been matched by a dramatic increase in our efforts to cut waste, fraud, and mismanagement in the Defense budget. If we cannot control waste and correct mismanagement in a $170 billion budget, how can we hope to control it in a $208 billion budget?

The word is out at the Pentagon—the good times are here—enjoy them while we can—spend, spend, spend.

When a program is growing like Topsy, the weeds are hard to find and easy to ignore.

Now waste, fraud, and mismanagement are not easy to find. A candidate who once thought the entire Federal budget could be balanced by cutting waste, fraud, and abuse is now facing the largest deficit in American history.

However, the House Defense Subcommittee made major efforts to find and eliminate waste and fraud.

In at least six areas involving personnel costs and operation and maintenance, it made cuts designed to eliminate waste and to force correction of mismanagement.

Those cuts were based on dozens of audits by GAO and DOD's own audit groups.

For example, the House Defense Subcommittee found serious waste in mili-

tary pay accounting procedures. Let me quote from the House report:

The committee has reviewed eight recent audit reports which document millions of dollars being wasted due to poor management of military personnel and retired pay accounts.

The House committee cited the following:

(1) Inadequate debt collection procedures.

(2) Divorced personnel continue to collect allowances at "with dependent" rates even though they are not entitled.

(3) A member paid by a sister service is sometimes paid twice because the member's parent service is not notified that payment was made.

(4) Military retirees entitled to either DOD retired paychecks or VA entitlements sometimes receive both payments.

(5) Paychecks written for personnel who have deceased as well as invalid paychecks are not properly controlled to assure timely destruction.

In order to force the Defense Department to deal with this serious waste of the taxpayers' money, the House cut the military personnel accounts by $60 million—or one-tenth of 1 percent.

The Senate committee did not disagree with the House's judgment. It stated in its committee budget documents, and I quote:

Various Defense and GAO audits document millions of dollars wasted due to poor management of military personnel and retired pay accounts.

It went on to cite the specifics cited by the House committee.

Yet, this bill reinstated the $60 million the House had cut. Now, what signal does this send to the Defense Department? It says, "We won't slap your wrist, we won't even shake our heads in disappointment."

Military pay mismanagement is, unfortunately, not an isolated example. The House Defense Subcommittee also stated in its committee report that:

Two years ago the committee criticized the Navy's practice of improperly paying basic allowance for quarters when in fact adequate quarters were available to house those not meeting the criteria for living off station. The committee directed the Navy at that time to correct the problems in this area and insure that empty housing is fully utilized.

Because it found that the Navy continued its wasteful practices in spite of its warnings, the House subcommittee made across-the-board cuts to force correction of these problems.

Again, the Senate Defense Subcommittee agreed with the House Subcommittee's judgment. It stated:

Sailors and Marines are being paid to live on the economy when military housing is available; some personnel living in military housing still continue to receive allowances.

Yet, this bill reinstates the $52 million the House cut.

The same problem exists in Guard and Reserve units where soldiers are paid for drills they do not attend. Let me quote the House report:

Based upon eight new audits by various Defense audit agencies, the committee has concluded that the Guard and Reserve components have still not corrected this payroll problem. The committee believes that the Department is paying people who are not present at drills. One audit documented that one out of forty names on Marine Corps Reserve rosters certified to receive pay never even attended drills. Based upon the information available to the committee, there is no reason to believe that the other Reserve and Guard components are substantially better than the Marine Corps Reserve.

While the Appropriations Committee has traditionally been a supporter of a strong Guard and Reserve force, this support does not extend to pay practices which border on outright fraud.

Here, again, this bill reinstates the 1-percent across-the-board cut adopted by the House to force correction of this fraud, abuse, and mismanagement.

In addition to these serious deficiencies in pay programs, millions are also wasted in the $3 billion that the Department of Defense spends each year to move military personnel from one post to another.

The President proposed management changes which will make the program more efficient—and save $40 million. I am glad to see that this bill reflects that reduction.

However, much more than this corrective is needed. There are also serious problems which will not be corrected by the President's order.

The House committee found that the Department of Defense's own audit services document that:

Carriers suspended for poor performance are still awarded contracts;

Erroneous and duplicate obligations are made on the books;

Claims for reimbursement are not always made against nonperforming carriers;

Shipments are not weighed by DOD personnel as called for in their own regulations;

There is poor utilization of Government facilities for storing household goods at a time when additional storage facilities are being procured through commercial markets;

Personnel are sent back to the United States from overseas tours with only 1 or 2 months left before leaving the service; and

Realinement of personal property shipping offices would produce substantial savings through elimination of duplication.

In spite of the President's improvements in this area the Senate Defense Subcommittee noted that "DOD audit reports document mismanagement of (permanent change of station) funds."

Yet, it added back the $15 million that the House cut to force correction of these serious problems.

My amendment also includes two changes made by the House which are based on my conviction that, when we are asking for reductions in Government programs that benefit our own citizens, we should ask the same from our allies—especially our wealthy allies.

In 1952, when the German economy was barely starting to recover from World War II—and the dollar was stronger than the Deutsch mark—the United States entered into a status of forces agreement with the West Germans which made the United States responsible for most of the damages caused in military maneuvers in West Germany.

Since the 1950's, much has changed. The West German economy is clearly much stronger than it was in 1951—and probably stronger than our own.

The conferees on the fiscal year 1981 supplemental appropriation did not approve any funds for maneuver damage claims due to the Department of Defense's failure to undertake negotiations with the NATO allies concerning peacetime host nations support and related status of forces matters.

If we do not withhold these funds, the Army will have no incentive to enter into negotiations to change its existing agreements, and no leverage when it begins negotiating.

Therefore, my amendment deletes the $39.8 million so that these agreements will be renegotiated and the interests of the U.S. taxpayer protected.

Finally, the House subcommittee determined the U.S. taxpayers are paying $18 million a year for depot maintenance and other indirect costs of the AWACS aircraft in Saudi Arabia.

American consumers pay $10 billion a year for Saudi oil—80 percent of which is profit. Hard-pressed American taxpayers should not pay any subsidies to one of the richest nations in the world.

Mr. President, some may argue that these cuts are arbitrary—that a 1 or 2 percent or even a tenth of a percent cut cannot be justified. I submit to my colleagues that, after the recent demands by the administration for across-the-board cuts in all domestic programs, this argument cannot be taken seriously.

My amendment will save the taxpayers $200 million—and perhaps much more. I urge the adoption of the amendment.

Mr. President, I reserve the remainder of my time.

The PRESIDING OFFICER (Mr. GRASSLEY). Who yields time?

Mr. STEVENS. Mr. President, the Senator's amendment is one which is well thought out. I will say that to the Senate. And it is a very difficult one for us to deal with because it is complex. I hope the Senate will understand what it is because we have agreed to an up and down vote on this. As I have indicated before, if we can get a time agreement, I am more than willing to have an up and down vote.

The Leahy amendment will cut areas that we have already cut. Senator LEAHY's amendment would cut $15 million from permanent change of station. We have already cut $84 million from that account. Senator LEAHY's amendment would cut $60 million from military and retired pay. We have already cut $272 million from military pay and $37 million from retired pay. The basic allowance for quarters cut in the Leahy amendment is $52 million. We have already cut $6 million in that account. There is also a cut of $17 million in the Guard and Reserves in the Leahy amendment. We have already cut Guard and Reserves by $12 million.

The basis of his cuts is that he feels there is waste, fraud, and abuse to be cut that the House cut and that we restored in our committee because we did not feel that those cuts were definitive enough, were identifiable enough to make with-

out having an impact on personnel programs.

We have examined reports on waste, fraud, and abuse and we have some obvious differences to resolve with the House. I ask the Senate to help us preserve those numbers because we have some goals to achieve in conference.

Our committee has eliminated the funds that we identified with mismanagement and waste, and I think the House is trying to accomplish that, too. Across-the-board cuts will not do that, however. Indiscriminate cuts in military personnel accounts—specifically in entitlements—will not create the savings they purportedly will achieve. Entitlements must be paid. I am certain Senator LEAHY has put some thought into his amendment, as the committee did.

The result of the Leahy cuts, however, would be the necessity for reprogramming requests. His cuts would ultimately affect program levels.

We have examined the funding for permanent change-of-station, basic allowance for quarters, Reserve and Guard drills, and active duty and retired pay. We believe the amounts we have provided are the minimum required for the program level that is envisioned by the administration.

Again, the difficulty with the Leahy amendment is that his cuts are in addition to the reduction we have already made. We feel, as I have indicated, the cuts we have made are as deep as we possibly can go.

As part of the same amendment, Senator LEAHY has proposed that we reduce the Air Force flying hour program of $18.2 million on the basis that the Air Force should obtain reimbursement from the Saudi Government for the costs of the AWACS deployment. We believe this amendment has two basic flaws. In the first place, the Saudi Government is providing the fuel for the deployed aircraft; is is providing housing and subsistence for the crews and, therefore, this estimate of $18.2 million is strictly on the basis of the training time figure for the AWACS flying program.

But the difficulty with this amendment really is that we deployed the AWACS to the Saudi Arabian Government, and we have now endorsed the future sales of the AWACS to Saudi Arabia. If we do not continue these flying hours, the net result will be a bill in later years which will have to be paid. In other words, these are current-year flying hours. They are going to take place under the terms of the agreement, and the Saudi Government is, in fact, reimbursing the Government for the out-of-pocket expenses. The Leahy amendment would, in effect, dock the Air Force for being there with an AWACS.

We have made the agreement. It is an international agreement, and I consider this to be one of the great problems with the Leahy amendment since it proposes an $18.2 million reduction in training effort for the Air Force. In effect, we are taking $18.2 million away from the Air Force because the AWACS is in Saudi Arabia, it is going to stay in Saudi Arabia, and it is going to fly in Saudi Arabia. But we are saying we cannot use these funds for flying in Saudi Arabia, and the implication is that the Senator wishes Saudi Arabia to pay rent on the AWACS while there. The AWACS is there for the defense of our country as well as for the area defense. I think that was gone over in the debate on the Saudi AWACS sale.

Another portion of the Senator's amendment, as I understand it, would delete $39 million from the cost of the U.S. force maneuvers in Germany. Under the current agreements with the Federal Republic of Germany, our Government has assumed the cost of damages to property caused by the Armed Forces maneuvers.

The House bill proposed that those funds be deleted, and the House has deleted those funds from every bill that we can recall. We have always had to restore them since they are part of an international agreement.

The intent of the House proposal is to support the concept of a renegotiation, which would require the host government to assume the responsibility for damage caused by our forces as they maneuver in a foreign country.

I can only say to the Senate that this is not an issue that ought to be settled in a defense appropriation bill. We fund the costs that the military presents and justifies to us on the basis of existing agreements.

There are ways to obtain renegotiation of those agreements, either through the defense authorization bill or through a bill originating in the Committee on Foreign Relations. The specific issue of how great the contribution should be from our allies for the costs of maintaining U.S. forces around the world I think is an issue that has not been explored sufficiently, as the Senator from Ohio and I stated on the floor last night.

But we feel——

Mr. LEAHY. Mr. President, will the Senator yield?

Mr. STEVENS. Let me just finish this one sentence.

We feel compelled to fund existing agreements. We think particularly now that we are into this fiscal year already and these maneuvers are going on already that the Senate cannot take this money out. If the money is deleted, it is not a conference issue. Mr. President, there would then be valid claims against the Government of the United States under the existing agreement, and I would say to my friend from Vermont that what would happen would be that we would find the United States more and more involved in German courts as a result of the claims presented by German citizens under valid U.S. agreements under which we have agreed to pay the bill.

So all this amendment will do will be to employ a lot of German lawyers to present claims on behalf of German citizens against the United States in German courts, and I say that respectfully. We need to fund these claims so that the Department of Defense may, in fact, pay those costs.

I think the Senator from Vermont may say to us that the Department could absorb those costs. The difficulty is that if you delete them with the House bill its expression of intent, I do not think the Department could absorb the cost without a specific appropriation for the future.

So I would urge that the amendment be rejected. I hope that others will come and address the questions involved.

The Senator has done his homework in terms of the amendment because I can tell the Senate that although it looks like a very simple little amendment, and in relationship to this bill, a total of less than $200 million can be looked at as a little amendment, the Senator has what I would call a sleeper. It is a sleeper amendment because it touches some very, very vital nerves as far as the defense system is concerned.

It concerns funding for AWACS, maneuvers in Germany, retired pay, permanent change of station, active and retired pay basic allowance for quarters and Guard and Reserve drills.

Now to do that all in one amendment and stay under $200 million, the Senator has been very adept with his pencil and very sharp with his cuts. But that is the effect of the amendment as I understand it and I cannot support the Senator's amendment.

Mr. LEAHY. If I might just address some of the points made by the Senator from Alaska. Of course, in the State I come from, Vermont, $200 million is still a lot of money and so it is fairly easy—in fact, about a third of our annual budget for our whole State. It is clear to the people of my State that $200 million is a significant amount, even in a $200 billion-plus overall budget.

I would hope, though, that on the question of German payments that the Senator would not leave the impression that somehow damage claims would go unpaid as a result of my amendment. I am sure he did not mean to do that, because the German Government now pays those claims automatically and then sends a bill to the U.S. Government for repayment.

Mr. STEVENS. If the Senator will yield, just to make sure we are in agreement, it is my understanding that the Senator's information is not correct, that, under the procedures followed now, we pay these directly from the Department of Defense when they are bona fide claims. Now there may be some that are not paid that the Germans pay and then present to us. But the routine claims against the Government of the United States are paid by the Department of Defense directly.

Mr. LEAHY. It is my understanding, I say to the distinguished chairman, that in the West German budget it has a specific item to pay the claims.

I would also point out, however, that the conferees in the 1981 supplemental appropriation, which included the distinguished Senator from Alaska, did not approve any funds for maneuver damage claims due to the failure of the Department of Defense to undertake negotiations.

And let me read specifically from the conferee's committee report, signed by my good friend from Alaska and others, in which they say:

The conferees on the fiscal year 1981 Supplemental appropriation did not approve any funds for maneuver damage claims due to the Department of Defense's failure to undertake negotiations with the NATO allies concerning peacetime host nations support and related status of forces matters.

I mention this because of my concern that we are talking about a procedure that started when Germany was impoverished, when the deutsche mark was really not worth a great deal. I have found that Uncle Sam tends to continue to pick up the tab for its allies, even after their economy has become stronger than ours. One of the reasons it stays that way is we continue to pay the bills.

I appreciate the compliment of the distinguished chairman in saying that I have done my homework on this. But I must admit, again, that it is the thinking of the people of my State that some of our allies, especially our richer allies, ought to be put on a pay-as-you-go basis.

This is especially true with regard to AWACS. As the distinguished Senator from Alaska knows, I was on the losing side of that vote. It is one I considered for some time. Having lost on that, however, I would not in any way suggest that the United States go back on its commitments. I feel that we have now made that commitment to Saudi Arabia. It may be a bad deal but we made it and we have got to go forward with it.

But there was nothing in that commitment that said we had to continue to pick up the tab. Saudi Arabia pushed up the price of oil by $2 a barrel the day after we turned over the AWACS to them. I am now saying—a month later—that we ought to at least tell them we are not going to pick up another $18 million of American tax dollars to pay for the cost of operating those AWACS.

I am not suggesting we rob some other part of the Air Force to do it, because that would go contrary to the intent of my amendment. My amendment is to save money for the American taxpayers, period. We are sending $10 billion a year to Saudi Arabia, as it is. All I am suggesting is take it out and have the Saudis pay for it.

The distinguished chairman knows—and I have heard him make statements to this effect time and time again on the Appropriations Committee—that sometimes the only way to get an agency, including the Department of Defense, to focus their attention on waste and fraud is tell them you are just not going to have the money. I think we both agree on that, if they think that as a result of uncorrected mistakes in the past that they might lose some of the money to continue those mistakes, they will be likely to correct those mistakes in the first place.

I have the privilege of serving on the Appropriations Committee with my friend from Alaska. Over and over again, the two of us have voted the same way to focus the attention of different departments and point out where they have had problems and just tell them if they are not going to correct them we are just taking the money away.

These are areas where I would like to do that. My amendment would not detract from readiness or anything else. That is why, in preparing this amendment, I have taken only those amounts that the GAO and the House committee and others have agreed to are really directly affected by waste, fraud, and mismanagement.

I reserve the remainder of my time.

Mr. STEVENS. Mr. President, I yield 5 minutes to the Senator from Mississippi and then 5 minutes to the Senator from Kansas. How much time do we have remaining?

The PRESIDING OFFICER. Eighteen minutes for the Senator from Alaska, 16 minutes on the side of the Senator from Vermont.

Mr. STEVENS. And after the Senator from Kansas, I yield 5 minutes to the Senator from New Mexico.

The PRESIDING OFFICER. The Chair recognizes the Senator from Mississippi.

Mr. STENNIS. Mr. President, I thank the Senator from Alaska. Mr. President, I commend the Senator from Vermont in the work that he has done here. He has done meaningful things. He knows what he is doing, he could explain and did explain the items and that is making headway on these very savings that he is talking about.

But I want to part ways with him right there and point out the way to get this effectively done is to handle the rest of it in conference. I will serve as an enlistee, if I may, for him on some of these items in particular if I am a conferee. Starting where the House has already made the start, I am sure that we will make some headway.

But it is a dangerous thing on the floor to go to cutting right and left, even though these are relatively small numbers compared to the total in the bill. As the Senator has pointed out, it is still money, and it is not our money. It is the taxpayers' money. It is money that the taxpayer earned. At one time, it was his altogether but it has been taken away from him by the Government for the purposes here that we are supposed to fully justify.

So I will certainly be with him as a conferee, if I am a conferee, and believe that we can carry some of his suggestions forward.

I want to point out, though, as a group, $17 million reduced from Guard and Reserve drills. Now this year, after a long delay, the authorization committee increased by $50 million that much special money for further implementing these Guard and Reserve units with everyday, ordinary small items like field telephones and field equipment that they do not ordinarily get except something that has been almost worn out by the regular services. But we have upgraded the importance of these units to the extent of this special appropriation authorization and that has been adopted already in a slightly different form by the House Appropriations Committee and the House which has passed a bill and it is also in this bill. That $50 million, after examination, was found justified.

I do not believe there will be any amendment here to strike that out.

In addition, we attempted to upgrade the Guard and Reserve and require a special report. However, I will not dwell upon that further.

On the AWACS matter, as has been mentioned, I voted on the other side from the Senator from Vermont, but I would certainly be interested in not spending one dollar more than is necessary to carry out that agreement, as he said, in full, even though his philosophy was against it. Once having committed, that is our policy and we will back it up. But I do not see any reason why that should be paid by us. However, it will be a factual matter and we will have that in conference.

Mr. President, I think about the same thing can be said about the rest of these items.

On military pay accounts, just to take it off the top of the fund to the extent of the $60 million, I would have to have some substantial proof to justify withholding that much money on a payment that is mandatory. I would be also interested in what he said about the permanent change of station, and so forth.

The question of the German military maneuvers is certainly a delicate matter, a sensitive matter, and it requires the judgment of someone who is more knowledgeable, perhaps, than any of us here. Certainly, we can bring that up in the conference.

Again, I commend the Senator for the work he has done, for having these suggestions to make. But we have to protect the bill, Mr. President. The committee has to protect the bill.

The PRESIDING OFFICER. The time of the Senator from Mississippi has expired.

The Senator from Kansas is to be recognized for 5 minutes.

Mrs. KASSEBAUM. Mr. President, there is no one more anxious than I to find beneficial ways to reduce the Defense appropriations bill. But I think the Senator from Alaska has rightfully stated that there are some very sensitive areas that this amendment touches. I am interested in one specific area, the recommendation to eliminate $18 million for our financing our operation of the AWACS in Saudi Arabia. These are not the planes we anticipated selling in 1984 but it is our operation which is ongoing now in Saudi Arabia.

During the debate that we had for a lengthy period of time regarding the proposed sale of the AWACS, there was never any statement made objecting to the continuation of the current U.S. Air Force AWACS operation in Saudi Arabia.

One of the basic concepts we have always followed in our military operation is the shared burden. This has been true in NATO; it has been true in every relationship we have established. The Saudis are already paying for fuel for the U.S. AWACS and for housing and transportation for U.S. crews. But it seems to me troubling to extend this to their paying U.S. Force personnel flying time salaries. It would place us, it seems to me, dangerously close to the position of being a mercenary force. Therefore, I am very troubled by this proposed reduction because I do not believe it is a beneficial one to our defense structure.

I yield back any time remaining.

The PRESIDING OFFICER. The Sen-

ator from New Mexico is recognized for 5 minutes.

Mr. SCHMITT. Mr. President, the Senator from Vermont is to be commended for once again bringing to the attention of the Senate the basic issue of inefficiency within the Defense Department. There is no question that the Defense Department is not immune to inefficiency, both that generated by itself and that, unfortunately, generated by the Congress.

As the Senator is aware, it is the propensity of the Congress to overreview certain procurement actions and, through report language and at times legislative language, to put restrictions on ways in which the Defense Department might operate efficiently which has resulted in much of the cost increase and many of the cost overruns that the Defense programs have been subjected to in recent years.

It has become almost impossible for a new weapons system to be developed under any kind of an umbrella of predictable costs.

With that in mind, the subcommittee and the full Committee on Appropriations have begun a systematic review of the various components of inefficiency within the Department of Defense, including those which have been brought about by congressional action as well as those brought about by problems within the defense bureaucracy itself.

I would draw the attention of our colleagues to the report language on page 8 of the Senate report, which deals with "Department of Defense Efficiency and Cost Savings."

I ask unanimous consent, for emphasis, that that set of paragraphs under that title be printed in the RECORD at this point.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

DEPARTMENT OF DEFENSE EFFICIENCY AND COST SAVINGS

The Committee supports the need for increased defense spending to meet the threats to U.S. national security interests in the 1980's. The major increase in Soviet defense spending throughout the 1970's as well as Soviet adventurism in Africa, Asia, and Latin America pose a serious threat to U.S. security interests throughout the world.

The Committee is also committed to the reduction of overall Federal spending to meet the goals of a balanced budget as well as a sound economy. U.S. national security must be based on a strong economy. The Committee, therefore, views with favor the efforts of the Department of Defense to combat waste, fraud, and abuse within the Department as well as to undertake efforts to make defense programs more efficient.

The Congress has provided the Department of Defense with the necessary legislation to use multiyear funding where appropriate. The Committee intends to recommend funds for multiyear funding in those programs where there is low technological risk and where cost savings can be realized. Further, the Department is urged to revise DOD Directive 7200.4 to accommodate the new legislation providing authority for multiyear funding.

It is the Committee's understanding that many of the reforms proposed by the Deputy Secretary of Defense can be implemented internally within the Department. The Committee urges the Department to implement these reforms as quickly as possible including, but not limited to, increased use of firm-fixed price contracting, increased use of past performance in source selection, greater competition in both R. & D. and procurement stages of programs, and increased R. & D. funding and competition at the lower-tiered producer level.

The Committee is also concerned about the high cost of new programs and directs the Department to provide to the Committee a design-to-cost analysis for all new procurement items. While U.S. strength lies in its technology, the use of high technology can result in cost inefficiency when inappropriately utilized.

The Committee also directs the Secretary of Defense to report to the Committee by March 1, 1982, what steps have been implemented in the Department of Defense to provide for increased efficiency in R. & D. and procurement. The Committee further directs the Secretary to report what proposals requiring congressional action would provide for increased efficiency.

Mr. SCHMITT. I draw the attention of the Senate, and the attention of the Senator from Vermont, particularly, to those paragraphs that note that we now have in place, through the authorization process, necessary legislation to allow the Defense Department to correct many of the problems that have resulted in costly and inefficient procurement of defense systems. In particular, it is important to note that multiyear funding can now be used by the Department of Defense where it is appropriate to do so. It has been estimated by many, including the General Accounting Office, that in many weapons systems and many other procurements, because of the lack of multiyear negotiations in the procurement process, we lose as much as 20 or 30 percent in the cost of those programs.

In addition, in that report language the committee is encouraging the Department to implement the various reforms that the Deputy Secretary of Defense has already articulated for the committee, including but not limited to increased use of firm-fixed price contracting, increased use of past performance in source selection, greater competition in both R. & D. and procurement stages of programs, and increased R. & D. funding and competition at the lower tiered producer level.

It is my firm belief that this is the track upon which we must embark as well as continued oversight and, where necessary, the kinds of funding reductions proposed by the Senator from Vermont, to insure that the Defense Department must operate, and the Congress must operate, defense programs in the most efficient way possible.

I do not believe that at this point the proposal of the Senator is necessary. I thing the Subcommittee on Defense Appropriations is well aware of the problem and working more vigorously, maybe, than in the past to identify where inefficiencies result and why they result; taking the necessary legislative or other action to see that they do not recur or are reduced to the lowest level possible.

The PRESIDING OFFICER. The Senator from Vermont.

Mr. LEAHY. Mr. President, I will be prepared to yield back the remainder of my time in a moment. I do appreciate the kind things said by my colleagues on the other side of this issue. I am reminded a little of the line from Julius Caesar, when, as you will recall, after Caesar's assassination, Mark Anthony said, "I come here not to praise Caesar but to bury him."

I appreciate my colleagues coming here to praise me, but I suspect they may be trying to round up the votes to bury me at the same time.

I would like to clear up the record on several points. First, we are not about to take all the money away from Saudi Arabia and try to bankkrupt that small desert country. I am talking about cutting out $18 million in indirect costs of operating the AWACS money over there. I should point out for the record that the American taxpayers will still be giving Saudi Arabia $24 million toward the use of AWACS, a system from which they derive a great deal of prestige.

Considering the fact that they, perhaps coincidentally, the day after our vote on the AWACS sale, raised the price of oil so substantially, I believe they should pay for those costs.

Also, on the German matter, I feel that we made it very, very clear on the supplemental appropriations that we expected the Department of Defense to undertake negotiations to correct that situation. They have not done so and, if anything, this amendment will tend to focus their attention, to show that we really are serious. All of us, including every Member on the floor now, agreed with that supplemental appropriations language which told them to get moving and change that agreement.

Having made these points, I think the arguments have been well set out on both sides. I commend my colleagues on theirs and I advise my friend from Alaska that I am perfectly willing to yield back the remainder of my time. I know he has a full day ahead of him.

Mr. SCHMITT. If the Senator will yield for an additional comment, he brought the Roman Empire into this discussion. I think it is important to know that, in the early phases of the Roman Empire, they were noted for the efficiency of their military organization, the efficiency of their military operations based on simplicity, primarily. I do not know how long the development and procurement process went on to secure the famous Roman short sword, but I suspect that was done with a great deal more expedition than we have seen in defense programs to date.

What I hope the Senator will recognize is what the Subcommittee for Defense Appropriations is trying to do is bring simplicity into the defense programs, to eliminate some of the perplexing interference that has come from not only within the Department itself but from the Congress, so we may be able to move a little bit back toward those times of great efficiency in military operations and, as a result, have a much more secure deterrent than we have had in the past.

Mr. LEAHY. Mr. President, I appreciate the history lesson of my good friend from New Mexico, but I point out that even with our problems, we are probably still a match for the Romans at their best.

Mr. President, I yield back the remainder of my time.

Mr. STEVENS. I yield back my time, Mr. President.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the amendment.

The yeas and nays have been ordered. The clerk will call the roll.

The legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Alabama (Mr. DENTON), the Senator from Arizona (Mr. GOLDWATER), the Senator from California (Mr. HAYAKAWA), and the Senator from Wyoming (Mr. WALLOP) are necessarily absent.

Mr. CRANSTON. I announce that the Senator from Arizona (Mr. DECONCINI) and the Senator from South Carolina (Mr. HOLLINGS) are necessarily absent.

I further announce that, if present and voting, the Senator from Arizona (Mr. DECONCINI) would vote "nay."

The PRESIDING OFFICER (Mr. COCHRAN). Are there any other Senators in the Chamber who wish to vote?

The result was announced—yeas 22, nays 72, as follows:

[Rollcall Vote No. 446 Leg.]

YEAS—22

Boren	Heinz	Nunn
Bumpers	Inouye	Pell
Byrd, Harry F., Jr.	Kennedy	Proxmire
Chiles	Leahy	Riegle
Cranston	Levin	Roth

NOT VOTING—6

DeConcini	Goldwater	Hollings
Denton	Hayakawa	Wallop

So Mr. LEAHY's amendment (UP No. 737) was rejected.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. McCLURE. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. STEVENS. Mr. President, it is our intention now to deal with some amendments and colloquys that Members have discussed with me and I have discussed with the Senator from Mississippi. We would after those go to an amendment of the Senator from Georgia dealing with the B–1 and then following that an amendment of the Senator from Ohio that deals with a question of a sense of the Senate resolution dealing with SALT.

It is my anticipation that there will not be a rollcall vote take place until somewhere around 1:15 p.m. or 1:30 p.m., but we cannot guarantee that.

Mr. President, at this point the Senator from Alabama (Mr. DENTON) had the right to be recognized to present an amendment dealing with funds for the General Daniel "Chappie" James Center for Aerospace Science and Health Education at Tuskegee Institute.

Mr. President, I ask unanimous consent, since he is necessarily absent, to have printed in the RECORD his statement and the amendment he would offer along with the response that I was prepared to give to that amendment if he withdrew it indicating that the House and Senate conferees would to the extent possible urge the Department to reprogram the necessary funds to carry on the work of that institute.

The PRESIDING OFFICER. Without objection, it is so ordered.

APPROPRIATING FUNDS FOR THE GENERAL DANIEL "CHAPPIE" JAMES CENTER FOR AEROSPACE SCIENCE AND HEALTH EDUCATION AT TUSKEGEE INSTITUTE

● Mr. DENTON. Mr. President, for the benefit of my colleagues I would point out that I have discussed the introduction of this amendment with the distinguished majority floor manager, and a satisfactory arrangement has been worked out regarding its consideration. Before proceeding with my formal statement, I would like to commend the senior Senator from Alaska for the leadership, courtesy, and patience that he has extended to all Senators during the consideration of this most critical legislation.

My amendment appropriates an additional $9 million in the operation and maintenance account for the defense agencies, and provides for the Secretary to transfer that amount to the Tuskegee Institute for the purpose of establishing the General Daniel "Chappie" James Center for Aerospace Science and Health Education.

As most of my colleagues are aware, highly decorated Gen. "Chappie" James was the first, and so far the only, black officer to attain four-star rank. He was a personal friend of many of us, including the Senator from Alaska and myself. His career of service and dedication to our Nation has served as an inspiration to countless Americans. The proposed General James Center would house Air Force and Army ROTC, aerospace science, and health education programs serving to stimulate interest in military, aerospace, and related Government service professions.

The total cost of this proposal is $12.5 million, of which Tuskegee Institute has raised $3.5 million. The total one-time Federal funding request is therefore $9 million. It is important to note that the General James Center has the full support of the Department of Defense. The appropriation contained in this amendment would accomplish the following:

House the General "Chappie" James Center for aerospace science and health education.

Implement a program in aerospace engineering as an integral part of Tuskegee Institute's fully accredited engineering program.

Renovate Moton Airfield on the campus of the Institute to provide hands on training in the aerospace program.

Establish extensive health education capabilities in the James Center.

House administrative offices, recruiting areas, and classrooms of Tuskegee Institute's ROTC programs.

Mr. President, during World War II, Tuskegee Institute became the center for training the U.S. first group of black pilots. Among that distinguished group was Daniel "Chappie" James. Since that time, Tuskegee has established one of the leading ROTC and military science programs among predominantly black institutions of higher learning in the country.

Currently, no predominantly black college or university in the country offers a program in aerospace engineering. Of all students enrolled in programs in aerospace engineering, only 3 percent are black. The program proposed in this request does more than memorialize General James; in a very real sense, it carriers forward his contribution to our Nation by motivating and assisting young people to fill a national need for aerospace scientists.

Continued supremacy in the aerospace field is clearly vital to national security, yet the number of graduates in aerospace engineering programs was approximately 40 percent less in 1979 than in 1972. Support of this initiative would constitute a visible manifestation of our recognition that national security depends on maintaining an educational system that can provide applicable training and skills. Continued substantive advancements in defense technology demand such a recognition.

In conclusion, Mr. President, this proposal addresses itself directly to President Reagan's Executive order of September 15, 1981, calling for "the development of a Federal program designed to achieve a significant increase in the participation by historically black colleges and universities in federally sponsored programs."

From the effects this proposal will have, the additional appropriation should be viewed as an investment that will earn manifold returns, as well as constitute a fitting tribute to a great American.●

The text of the amendment follows:

On page 10, line 6, strike out "$4,768,000,000" and insert in lieu thereof "$4,777,000,000".

Mr. STEVENS. Mr. President, I certainly recognize and understand the Senator's interest in assuring the establishment of the General Chappie James Center for Aerospace Science and Health Education. A memorial of this kind—a working memorial with a real potential for substantial contributions to space and health sciences at Tuskegee Institute—is far more meaningful than some piece of cold stone.

There is some concern, as the Senator knows, over whether the funding support

should come from the Department of Education or the Department of Defense. However, this is a one-time cost, and I believe there is a capability within the overall defense budget to absorb it.

Accordingly, I am willing to support the Senator's position to the extent of calling upon the Department to propose a reprograming to provide the necessary $9 million. I can assure the Senator the Defense Appropriations Subcommittee will extend sympathetic consideration to such a reprograming initiative.

Further, I will commit to the Senator that I will carry this position into conference and urge the House conferees to support it with appropriate language in the statement of the managers.

Mr. STENNIS. Mr. President, will the Senator yield to me so that I may express my interest in the project now and at some time at the proper place expand on my views.

Mr. THURMOND. Mr. President, I rise to associate myself with remarks of the distinguished Senator from Alaska and the distinguished Senator from Mississippi, regarding the establishment of the Chappie James Center at the Tuskegee Institute. This Center for Aerospace Science and Health Education will not only honor a highly decorated four-star general, but also will provide a new educational avenue for many young people aspiring to be aerospace scientists and engineers.

This country needs to enhance our national posture in aerospace science and engineering. Our preeminence in this field is vital to our national security. Establishing this center is a step in this direction.

Mr. President, I support all efforts to try to find the funds for such a center.

Mr. STEVENS. I will say to the Senator we did not accept the amendment, as he knows. We did indicate we would urge the Department to reprogram the funds if they are available. to carry out the goal of the Chappie James Memorial.

UP AMENDMENT NO. 738

Mr. McCLURE. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report the amendment.

The bill clerk read as follows:

The Senator from Idaho (Mr. McCLURE), for himself, Mr. JACKSON, Mr. SYMMS, and Mr. CANNON, proposes an unprinted amendment numbered 738.

Mr. McCLURE. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

At the appropriate place in the bill insert the following:

"After the date of enactment of this Act no sale of silver from the National Defense Stockpile under the authority of Public Law 97–35, or any other Act, shall occur until the President, not later than July 1, 1982, redetermines that the silver authorized for disposal is excess to the requirements of the stockpile, taking into consideration such factors as the President considers relevant, including the following factors:

1. The findings and recommendations of the report by the General Accounting Office on the sale of silver from the National Defense Stockpile to be completed on or before January 1, 1982.

2. The demand for silver to meet defense, essential civilian, basic industrial, and monetary requirements, taking into account the most recent "Defense Guidance" used by the Department of Defense in programming general purpose conventional forces as well as historical monetary uses of silver as a medium of payment to foreign workers and troops during times of national emergency.

3. The projected magnitude of the increase in production as well as the accuracy and reliability of the data used in projecting increases in both domestic and reliable foreign production capacity, taking into account the lead times associated with expanding capacity and obtaining such requirements as the necessary labor, equipment, transportation and energy.

4. The current reliability of supplies from foreign sources and the economic and security implications resulting from our dependence on these sources of supply in times of national emergency taking into account the probability of a supply disruption or sharp price increase and its impact on the U.S. economy or a national priority such as defense.

5. The need for silver in the stockpile during the next 10 year period taking into account long-term supply and demand projections of the Bureau of Mines, U.S. Department of Interior.

Should the President taking into consideration the factors described above find the silver to be in excess to stockpile needs, he shall report to the Committees on Armed Service of the Senate and House of Representatives that he has made such a determination, and shall include a detailed discussion and analysis of the factors set forth above, and other relevant factors, including alternative methods of disposal for such silver, together with his recommended method of disposal. No action shall be taken to dispose of silver from the National Defense Stockpile, prior to the approval by Congress of the recommended method of disposal."

Mr. McCLURE. Mr. President, this amendment is cosponsored by Senator JACKSON, Senator SYMMS, Senator CANNON, as well as myself.

Mr. President, the amendment I am offering, and which the distinguished floor manager of the bill has agreed to accept, is absolutely necessary to address a critical and unfortunate situation into which we have been forced.

When we passed the Omnibus Reconciliation Act earlier this year, that act contained authority to sell materials from the national strategic stockpile.

Included in the list of materials to be sold was the strategic stockpile supply of silver. This authorization was requested and pushed by the administration, and particularly by the Office of Management and Budget, who were most anxious to receive revenue from the sale into the Federal Treasury.

In my judgment, Mr. President, this overriding desire has afflicted OMB and apparently the administration as well with an acute cause of tunnel vision. I am afraid that unless we take action to insure a more cautious and careful consideration of the decision to sell silver, and all its implications, that case of tunnel vision may in fact prove to be terminal as far as our Nation's best interests are concerned.

I do not believe, Mr. President, that adequate consideration as to the impact of the sale was made at the time it was proposed, at the time it was authorized, or has been made since.

Not only are we unsure about the untested notion and subsequent decision that the silver is excess to our strategic stockpile needs, I believe little if any thought was given to the effect on the domestic silver market of dumping 105 million ounces of silver on it.

Since the time the sale was announced in March the price of silver has fallen drastically from $12.13 per ounce to $8 per ounce today—all this in a period of continuing inflation.

As a citizen of one of the Nation's most important silver producing States, I know firsthand what the effect on this drop in prices has been in terms of real human suffering—yes, real human suffering among those whose jobs are lost and businesses ruined because silver mines are closing.

I noticed that one administration official speaking recently in Boise, Idaho, mentioned that great care has been taken not to sell silver below the market price. How silly can you get. What, in heaven's name does the administration think the market price is and what created it?

Given the view of things, I suppose I can understand why the President and his administration have so far refused to reconsider their position on the sale—even when the President himself has indicated he is personally opposed to the sale of silver. I have been trying to enlighten them.

Mr. President, earlier this year, in my capacity as chairman of the Senate Committee on Energy and Natural Resources, I requested that the General Accounting Office undertake a study of the issue of the stockpiled silver.

That in-depth study is nearing completion. Frankly, the preliminary results of the study are damning to the silver sale, to the method being used to sell the silver, and to the criteria on which the sale is justified.

GAO's efforts to date have identified demand for silver during periods of national emergency that have not been considered. They have identified uncertainties relating to the availability of both domestic and foreign supplies that have not been addressed.

GAO has found that the data used to support the zeroing of the strategic silver stockpile is extremely soft. They have also found that the war scenario, upon which the stockpile goals are established. is being re-evaluated due to the Sadat assassination.

Preliminary findings by GAO regarding the method of selling the silver also raise serious questions about whether the U.S. Government is getting the best deal for the taxpayer. The sale has raised the ire of our major foreign suppliers, including Peru, Mexico, and Canada, all of whom have protested to the U.S. State Department.

Later today I am meeting with the Ambassadors of two of these nations, Peru and Mexico, to discuss these matters.

Thus, Mr. President, the purpose of my amendment is to stop the further sale of silver from the national strategic stockpile until the results of the GAO report can be considered and studied, and other relevant factors overlooked in the haste of the difficult, even frantic, legislative period of time in which the authority to sell silver was given can be taken into account. That is all, Mr. President, I am asking for.

It is not only reasonable, it is logical for the proper formulation of national policy. When these factors are duly considered, and should the President still believe the silver in question is in excess of stockpile needs and should be disposed of, I am asking in my amendment that adequate thought and consideration be given to alternative methods for its disposal.

The administration has unilaterally decided the best way to get rid of the silver is to sell it on the market; but there may be, and I am convinced there are, better, less disruptive, and possibly more profitable ways of carrying the disposal out.

For example, I have suggested and introduced legislation calling for the minting of a new $10 silver coin commemorating the 250th anniversary of the birth of George Washington.

I have also introduced a bill providing for a new silver coin of a value to be determined by the Treasury. We are also considering a proposal to create a nondenominational silver coin of a fluctuating value such as the Krugerrand of South Africa.

Proceeds from the sale of all these coins would provide revenue for other stockpile purposes without adversely affecting the silver market as outright dumping would. Another option which should be seriously considered is the possibility of issuing silver-backed bonds or debentures, which would also realize revenue without unduly damaging the silver market.

There are, I suspect, other viable options; but I want to make certain that those I have mentioned at least are taken into consideration. To make sure alternatives to the sale of the stockpile are not glossed over or overlooked entirely, my amendment requires that the President report on alternatives and make a recommendation as to that method of disposal he feels should be followed.

Congress would retain the option of determining if the President's recommendations are to be carried out.

I recognize that my offering such an amendment to the Defense appropriations bill is a somewhat extraordinary procedure. I am not anxious to offer an amendment at all; but an amendment is apparently necessary and I mean to do everything I can to see that it survives the conference.

Extraordinary circumstances require extraordinary action. This administration has no better friend than the senior Senator from Idaho, but on this issue it is wrong.

Mr. STEVENS. Mr. President, this amendment has been discussed with me and with the distinguished Senator from Mississippi. I know the Senator from Washington is also interested in it. It deals with the question of changes in the silver stockpile, and it is an amendment which would require a study of the silver stockpile and action on that study.

Mr. McCLURE. The Senator is correct.

Mr. STENNIS. Mr. President, I have conferred with the author of this proposal and I am totally in sympathy with the idea of postponing—and that is all the proposal does, postpone—the in-depth consideration of this important matter about disposing of the silver stockpile.

Mr. McCLURE. The Senator is correct.

Mr. STENNIS. We found on the Armed Services Committee that those things are important and frequently involve more in-depth study as to their facts than appears on the surface.

I am in sympathy with his proposal.

Mr. SYMMS. Mr. President, since early October of this year GSA has offered for sale silver from the strategic stockpile. However, on only four occasions was silver actually sold. In many instances, the bids received by GSA were not satisfactory.

Thus, one would conclude that the silver stockpile sales have been unsuccessful in accomplishing their intended goals of raising revenue for the purpose of purchasing strategic materials more critical to national security than silver.

In addition, Mr. President, these attempted GSA sales could not come at a more adverse time for the mining industry in north Idaho. The recent decision to close the Bunker Hill mine and smelter in Kellogg, Idaho, made national headlines.

As one might expect this has caused economic disaster in north Idaho. And, I might add, this comes on top of already high unemployment in the timber and logging industry. The GSA silver sales created market uncertainties, and in all likelihood, made it more difficult to find a buyer for Bunker Hill.

Consequently, Mr. President, the most sensible course of action would be to halt these sales immediately and then formulate a different program for increasing our stockpile of critical materials in a manner that would not be detrimental to the silver mining industry.

One such approach might involve a U.S. silver coinage program. Senator McCLURE, Representative CRAIG, and I are developing legislation to put such a program into effect.

In the meantime, Mr. President, it makes no sense to continue with these sales. No revenue of any consequence is being raised for the treasury; no purchases of other critical materials are occurring as a result; the sales are having detrimental economic effects on my State and neighboring States. So, why continue with these silver sales which have proven to be a failure for all concerned?

Mr. STEVENS. Mr. President, this matter of the strategic stockpile is within the jurisdiction of the Armed Services Committee and the Defense Appropriations Subcommittee. We feel it is necessary, and I am prepared to accept the amendment.

The PRESIDING OFFICER. Is there further debate? If not, the question is on agreeing to the amendment of the Senator from Idaho.

The amendment (UP No. 738) was agreed to.

Mr. JACKSON. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. McCLURE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. McCLURE. I thank the Chair and I thank the Senator from Alaska.

The PRESIDING OFFICER. Are there further amendments?

Mr. McCLURE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. GLENN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

THE ACCURACY OF OUR ICBM'S

Mr. GLENN. Mr. President, this subject does not require an amendment, but I wanted to have a discussion with the distinguished Senator from Alaska, the floor manager of the bill, regarding a particular area that has been written about some recently but has not received that much attention, but has been of increasing concern to me.

I wanted to express my view on the growing concern about the accuracy of our ICBM's and whether we have really tested these missiles to the extent that would justify the kind of confidence level that is expressed in all the confidential papers, as to so many hundred yards or so many hundred feet of accuracy on certain ranges and so forth.

Generally, the tenor of the discussions centers on the fact that we have no extensive test data on North-South ICBM firings. All of our testing is done out of Vandenberg, out over the Pacific to the area of Kwajalein Island, and all of the Soviet testing is done out over the southern part of the Soviet on Kamchatka Peninsula and basically shoots out over the Pacific Ocean area.

But we know from many of our orbital situations that you get in quite different situations when you use different orbits around the Earth, because of anomalies in the Earth's surface, because of variations in the magnetic field, and a whole host of reasons that may make the trajectories less accurate when fired on a different trajectory than that fired on the test ranges.

Now, even on the test ranges, we fire flight after flight after flight and gradually refine the accuracies to get the kinds of things that then are quoted in our classified documents as being accuracies on which we then rely. And we have similar observations of Soviet tests that give us the best estimates of what the Soviet's missiles will do.

Yet there are many very distinguished scientists who think that if we fire on a different route—in other words, if we really had to go to war and fire over the pole or the Soviets were to fire at us

that the real accuracies would be perhaps very different from those on which we are basing our estimates.

Now, to give an indication of the importance of this, here we are on the floor talking about many, many tens of billions of dollars of expenditures for an MX missile because we base the need on the fact that the Soviets can literally pinpoint our missile system here and perhaps knock out a major portion of that group of 1,054 ICBM's that we have in place now. So the arguments run that forces may combine to introduce an overall bias in the intended trajectory that would cause missed distances in actual combat that could not be predicted from our test firing results that were derived from firing ICBM's over an East-West trajectory.

Now, such assertions may be canards. But in the abstract world of nuclear deterrence, I think it is vitally important that we nail down, to the extent it is possible, those things that are verifiable and that is that we reduce the unknowns as best we can. If we permit the trajectory-accuracy issue to remain an intellectual exercise with no further empirical assessments, it seems to me that we could, through interminable arguments, erode the very deterrence to which we are paying so much attention and which we try to maintain.

I believe it would benefit all of us if the Department of Defense and the Air Force would very seriously examine ways in which quantifiable test data could be obtained to evaluate potential anomalies in these trajectories for operational ICBM's.

I intend to watch this topic very closely in the coming year, and I would hope that, through this colloquy on the floor here today and through a discussion with the distinguished floor manager of the bill, perhaps we could ask the Air Force, without going through an amendment process or going through a formal sense-of-the-Senate resolution, but ask the Air Force to come back to us—in fact, ask the Department of Defense, because it affects not only the ICBM's but also the sub-launch missiles that are launched on basically the same test range all the time—as to what their competence level is in the accuracies now and what they plan to do to make certain that these trajectories really reflect all of the anomalies that might be effective on a missile in an actual combat situation.

In the Strategic Review, in the summer of 1981 issue, Mr. A. G. B. Metcalf has an editorial entitled "Missile Accuracy—The Need To Know." He talks about some of these things. Mr. President, I ask unanimous consent that his article be printed in the RECORD at the end of our discussion here today.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. GLENN. Mr. President, in that article, he suggests that, perhaps to get some north-south firing experience to see whether there are unknown anomalies that we should be taking into consideration, we set up a test range along a longitude of 120 degrees out of Vandenberg down toward the Antarctic, which is a very remote ocean area, and do some testing on impact points down in that area.

Now, I think this is certainly one suggestion. I would not limit my suggestions to that. But, I would hope that the Air Force would come back to us with a study. I will follow up with a letter to the Air Force on this asking if they have considered this and what their plans are to see that these growing concerns by many scientists are taken into consideration to make sure we do have some of these accuracies on which we are basing our missile programs.

I hope the distinguished floor manager of the bill would support such a request, I do not plan to bring this to a vote, because I do not think it is really necessary, because I think the Air Force will be very willing to respond in this regard.

But I would add this: It is appropriate, I think, that we discuss it at this time, because if they are to set up an additional test range, then I hope that their letter back to us or their discussion of this would include the cost estimates of what would be required to set up additional test ranges to those we have now off the east coast for the sub-launch missiles out of Cape Canaveral and those involving the Air Force ICBM's out of Vandenberg on the west coast.

That is basically the problem. Basically, I hope the Air Force can come back to us with that. I hope the distinguished floor manager of the bill could support this request.

EXHIBIT 1

MISSILE ACCURACY—THE NEED TO KNOW

As this issue of Strategic Review goes to press, no decision as to the deployment of the MX missile has been announced by the Secretary of Defense.

To the extent that the Air Force argues in the name of "invulnerability" to commit a large portion of its budget for MX missiles buried in holes in the ground in a basing mode, the wisdom of which is seriously questioned, and fails to signal loudly and clearly its requirement for a manned offensive penetrating bomber at the forefront of aeronautical technology, to that measure does it confuse the public understanding of what airpower is all about and undermine the very rationale for an independent Air Force at all!

The great air leaders of the past warned against what could well be a blind jeopardizing of the hard-won achievement of a separate service for the projection of airpower. And there are with us great air leaders who still warn against throwing away the experience gained at the cost of much blood and treasure to hazard the national safety of untried "shell-game" war-deterrence schemes, tied to the ground, which put no enemy military force at risk.

Official spokesmen for the Pentagon, including the Secretary of Defense, repetitiously assert that our 1,000 Minuteman ICBMs are (or will be) "vulnerable"—i.e., that they can be destroyed in a single "first strike." He, no doubt, sincerely believes this. Yet, this is not a substantiated fact, nor could it be. It is no more than an agreed upon position which has been handed to him. Competent studies show that this could not happen, even on an idealized theoretical basis: that the "accuracies" of ICBMs—both U.S. and Soviet—have been greatly overstated. Nothing has been put forward which technologically supports the belief that we (or the Soviets) could, with any degree of confidence, expect to hit one silo at ICBM range, let alone 1,000 of them distributed over an area equal to one-third of the United States.

Parenthetically, the proposal to deploy 200 U.S. ICBMs, clustered in an area less than one per cent of the United States, in the name of invulnerability is quite beyond our understanding.

To destroy an ICBM installation already rendered unusable—even before it is built—by the existing preponderance of Soviet nuclear strike forces would appear to be a needless exertion. However that may be, it would seem that 200 of the 300 Soviet SS–18 "blockbuster" missiles, MIRVed to, say, 2,000 warheads—ten for each "dragstrip"—fired in a random grid or carpet pattern over the proposed Nevada-Utah complex, would put that system, its roads, its transporters and its shelters out of business. And all this is without addressing the question of the secrecy of missile locations in a complex employing the thousands—perhaps tens of thousands—of workers it would require.

When we had generals who thought in terms of strategy, it would have been realized at once that our enemy could, in a cities-sparing strike, destroy such an isolated target after warning us to evacuate the area, so that—unlike the case for the existing Minuteman installations—any casualties could be regarded as our own fault. Thus, the proposed Nevada-Utah Multiple Protective Shelters (MPS) basing mode would be a set-up of our own making for one-way coercion. With our own cities vulnerable and as hostage, we could hardly launch, or even threaten to launch, a strike which would involve Soviet populations in retaliation for a strike which purposed only to take out U.S. weapons that the Soviets perceived as threatening.

As to invulnerability, if U.S. ICBMs were to be deployed under complete control on the dark side of the moon so that their invulnerability was absolute, as the fatality exchange ratios acknowledged by the JCS presently stand, they still could not be used against the Soviet Union. Nor would the threat of their use—the only other purpose they could have—as a war deterrent be credible. This is so because the Soviet Union possesses more ICBMs (in the ratio of three to two) carrying more nuclear destructive megatonnage (in the ratio of six to one) than do those of the United States. And these Soviet forces may be MIRVed into practically any number of warheads desired—superior in number and lethality to those of the United States, whose population centers present geographically and demographically a much more vulnerable target system than is the case for the Soviet Union. This Soviet capability to devastate U.S. population centers presents a fundamental question which cries out for an answer before going ahead with the MPS transporter deployment presently projected by the Air Force for the sole purpose of enhancing the perception of invulnerability of missiles whose purpose is to threaten the Soviet Union.

In this connection, it must be noted that the Soviets also possess a clear superiority in both submarines and submarine-launched ballistic missiles as to number, throw-weight and range. Indeed, the Soviets have demonstrated that they can launch from submarines in Soviet ports SSN–8 missiles which have the range to reach vital centers in the United States. The ranges of U.S. SLBMs presently at sea do not possess a corresponding capability, nor do the SLBMs which are currently replacing them, match the range of the existing Soviet SSN–8s.

It is time we faced up to the reality that the ability of U.S. nuclear strike forces—existing or projected, vulnerable or invulnerable—to deter a likely Soviet war initiative is just about zero. The Soviets, sensibly, will seek to use their overall military superiority to exploit every opportunity to subjugate the remaining areas of the Free World—piece by

piece—but not to initiate hostilities as participants in any of the suicidal nuclear holocaust "first-strike–second-strike" scenarios so dear to the hearts of civilian analysts.

When U.S. nuclear missile forces were visibly superior to Soviet missile forces some fifteen or more years ago, the threat of ICBM "massive retaliation" may have been credible as a war deterrent: something like the biggest guy in a saloon threatening to wipe the floor with anyone who wants to start trouble. It is one way of keeping the peace. But when you are clearly very far from being the biggest guy in the saloon, such a threat will no longer be taken seriously. Nor will it keep the peace.

What U.S. nuclear ballistic missiles now provide (and it is all they provide)—again, whether vulnerable or invulnerable—is the capability to strike targets in the Soviet Union, should the Soviets launch what could be a suicidal strike against the United States. Even then, we would have to weigh—no matter what damage we had sustained—whether retaliation which only escalated the level of carnage served any useful military purpose.

Nevertheless, we must have the new MX intercontinental ballistic missile to replace the aging Minuteman, so long as the Soviets possess the capability for coercion implicit in this dimension of nuclear power. The need for the improved MX missile is not in question, only its mode of deployment. The new MX could be deployed with the saving of tens of billions of dollars and without risking foreclosing the future of the Air Force, by basing the MX in Titan and Minuteman silos and using the supporting command and control infrastructure already built, paid for and operational.

The committee named by the Secretary of Defense to study the MX basing mode is respectfully invited to bring a wider examination to studies which have been made available to its members and which demonstrate that in the present state of the art of missile inertial guidance, targeting accuracies are greatly exaggerated and that neither U.S. Minuteman nor Soviet ICBMs are capable of the targeting accuracy necessary to destroy enemy silos. These studies, while requiring an elementary scientific education, are most persuasive. And the greater the technological expertise one brings to an examination of these analyses, the more persuasive they become.

Clearly, no program on the heroic scale contemplated by the proposed MX basing mode, which would consume a vast percentage of defense budgets for years to come, should be undertaken without the fullest investigation of the validity of the very grounds upon which it is recommended—namely, the vulnerability of Minuteman as against the absurd claim of invulnerability of the MX in the MPS deployment.

There is another even more serious problem: The targeting accuracy information which would more than likely be given to the President, who would have to make the decision to launch our own ICBMs, would reflect the gross misunderstandings currently held by those officials to whom he would look for advice. The conventional wisdom in this regard is considered to be grossly in error by those competent to judge. We do not know—and according to inertial guidance authorities, we cannot ever know—the extent to which a multiplicity of indeterminate fundamental physical forces render uncertain the point of impact of such missiles when fired for the first time in an untested trajectory. This is not opinion; this is physics, for which analytic proof exists. No proof—not even on a theoretical basis—has been offered to support the "accuracies" currently claimed. No refutation has been offered to the finding that Minuteman "vulnerability" is without foundation.

And all our test experience—Vandenberg Air Force Base to Kwajalein—while of value in progressively improving our missile guidance technology, does not help us much in making a target miss-distance prediction of high confidence over an untried trajectory. This is because the unpredictable forces which combine to introduce an overall bias in the intended trajectory can only be "corrected" by repeated shots with identical missiles over the same mission profile. This "correction" in targeting, unfortunately, then cannot be transferred to another mission profile—a polar trajectory, for example.

With the accepted perception of accuracy of targeting of missile strike forces greatly exaggerated—and the fact that inertial guidance technologists are seldom to be found in the vicinity of the Oval Office, or, for that matter, in the higher reaches of the Pentagon—it is hard to see how, with the best of intentions, the President will be given the information he needs to make a decision, even if he asks the right questions. Under such circumstances, a decision to launch could result in unexpected and unintended devastation; not a small matter, looked at from either side. It is submitted that such uncertainty, if taken into account, would stay the President's hand.

Accordingly, steps should be taken now to ensure that those individuals who might have responsibility for launching U.S. nuclear strike forces—the President and, in the event of his incapacitation, all those in the hierarchy of responsibility are provided before the fact with a more realistic understanding of the physical limitations in targeting ballistic warheads and what the actual probabilities are with respect to miss-distances of impact to target. Not to do so is to fail to take seriously the NORAD early-warning structure and to leave a vital information gap at the highest level of the National Command Authority.

One result of such an educational process would be a greater appreciation of the essential impotence of these so-called strategic systems in the existing environment. The mirror image of this perception is, of course, the devaluation of the credibility of the threat of their use and the consequent bursting of the deterrence bubble. Such perceptions can lead to the realization that indiscriminate nuclear devastation is a game that two can play and, therefore, is a game that cannot be played at all. This could be the beginning of real strategic arms reduction.

Such a facing up to reality should lead to more appropriate sizing of usable warfighting military forces in all categories. These are badly needed to preserve an equilibrium which is steadily becoming more unstable by reason of our disproportionate reliance upon strategic nuclear delivery systems whose perceived worth rests upon a misunderstanding as to their targeting accuracy and the illusion that they possess the power to deter war, as we have known it. This overlooks that in the eyes of the Soviet Union these U.S. strike forces must be clearly seen as already effectively neutralized.

The net of all this is to point out that ballistic missile warheads, when fired by either side in actual mission trajectories, can be expected to do no more, with a high degree of confidence, than to devastate targets about the size of cities. Even so, considering the catalogue of guidance uncertainties, for the ranges involved this would be considered very good shooting, indeed, if we had not once more mistakenly gotten into the habit of advertising War War II "picklebarrel" accuracy.

It is time that the whole matter of warhead targeting accuracy and Minuteman "vulnerability" received more critical examination, if the Air Force is serious about spending $100 billion or more for the MX in any one of the "shellgame" basing modes proposed. In the long run, this would necessarily be at the cost of modern strategic and tactical aircraft—and, as many believe, with the outside chance of ringing down the curtain on a separate Air Force. In the circumstances, we had better know what we are doing. The only way to do this is for the Committee, or the Congress if the decision is theirs, to look into a subject which has too long been shrouded in secrecy. An examination should be made involving fresh technical expertise free of conflict of interest in selling this or any program, including guidance and associated hardware, either by industry to the Department of Defense, or by the Department of Defense to the Congress.

The suggestion to test-fire a missile in a southerly direction may merit consideration as a means of testing the accuracy assumptions upon which the concept of Minuteman vulnerability is based. It could be launched from Vandenberg Air Force Base parallel to Longitude 120° W, impacting for ICBM ranges in the Antarctic Ocean near the Antarctic Circle.

While such a test, being entirely over water, would not reflect the accumulated guidance errors which would be expected for a northerly polar firing—the actual mission profile—it would resolve once and for all a great many questions. Among these would be the merits of the U.S. silo "vulnerability" argument and, as well, what our missile guidance system in its present state of development (presuming equal accuracy for the Soviets) could actually be expected to do when launched over a new and untested trajectory where the first shot was the only shot.

A number of issues having grave implications for our country hang upon this question of missile accuracy. It is time we knew the full facts.—A. G. B. METCALF.

Mr. STEVENS addressed the Chair.

The PRESIDING OFFICER. The Senator from Alaska.

Mr. STEVENS. Mr. President, the Senator from Ohio has raised an interesting question. I do believe we ought to pursue the topic. It has been examined partially. I have an article here from Aviation Week & Space Technology of July 13, 1981, entitled "Panel Reexamines ICBM Vulnerability." It reviews the work of the Townes Committee, which I am sure the Senator from Ohio is familiar with. I ask unanimous consent that it be printed in the RECORD at this point.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

PANEL REEXAMINES ICBM VULNERABILITY

(By Paul S. Mann)

WASHINGTON.—The Townes committee reviewing MX missile basing proposals also has reexamined the broad issue of the vulnerability of U.S. Boeing Minuteman 3 intercontinental ballistic missile force to a first strike by the Soviet Union (AW&ST Feb. 25, 1980, p. 16).

Theodore S. Gold, committee executive secretary, said the group has reviewed charges by critics of MX that the uncertain accuracy of ICBMs and a lack of ICBM testing over wartime flight paths rendered strategic missile performance unpredictable and unreliable. Consequently, critics said, such an attack against hardened silos is an unlikely course of action for either the U.S. or the Soviet Union.

Chaired by Charles Townes, professor of physics at the University of California, the Townes panel was commissioned in March by Defense Secretary Caspar W. Weinberger (AW&ST Mar. 23, p. 16), to provide an inde-

pendent assessment of MX basing possibilities.

Gold said the committee's report would go to Weinberger soon.

"There are two sides to the vulnerability issue," Gold said. He said that among the studies received by the committee was one by J. Edward Anderson, professor of mechanical engineering at the University of Minnesota, who has specialized in inertial guidance research and taught the subject in Honeywell, Inc.'s, education program.

Anderson questioned the vulnerability of ICBMs because he doubts the accuracy required to destroy a missile silo so far away can be achieved in wartime. War imposes unforeseen stresses and complications, he said, and the sources of error that can upset missile guidance and warhead accuracy are numerous.

Neither the U.S. nor the Soviet Union in peacetime can fly its ICBMs along wartime trajectories over the North Pole, he said. This lack of realistic testing weakens assurances about missile accuracy, reliability and performance, he said. "ICBMs are and will remain city busters, not silo busters."

The Air Force disagrees. "We have sufficient confidence to be able to predict a circular error probable and a maximum bias—the distance between the target and the center of the pattern of scatter of test shots around it—within a range we're comfortable with," Lt. Col. Louis T. Montulli said.

Montulli previously served as branch chief of missile and reentry vehicles at the Air Force Weapons Laboratory, Kirtland AFB, N.M., and as nuclear test director for Minuteman 3 warheads at the Ballistic Missile Office at Norton AFB, Calif. He is now deputy director for MX renewable energy systems in the MX office at the Pentagon.

As for testing realism, Montulli said, "What makes us feel comfortable that we can predict what the maximum bias or error will be of a flight over a path we cannot practice—and that route certainly can be described as a path from the U.S. over the North Pole—is that we can replicate all the phenomena that we expect to see over that path.

"We can replicate them by flying over several paths that are different from that of the North Pole and different from each other. We can see what happens to gravity changes, what happens to magnetic fields at different times of the year, when there are sunspots, when there are not, when the Van Allen Belt is acting in a certain way. We've been doing it for 20 years and that accumulated base of knowledge gives the engineer the ability to say, 'I know what's handling that particular problem, what's controlling it and I know how much I don't know.' That's important. How much you don't know is the number of feet of bias you might expect because you just cannot measure it or calculate it more accurately."

A former Pentagon analyst who studied ICBM test results as a private consultant in the late 1970s said, "Bias in fact has never been completely zeroed out even in the controlled tests at Kwajalein. Ever since Titan 2 tests, bias has caused significant deterioration in the hard target kill accuracies measured at Kwajalein."

Bias dominates discussions of ICBM accuracy. The size and seriousness of bias are much disputed, although its principal causes are not.

"Bias is basically the effect that occurs by shooting for a particular aimpoint and finding that after multiple shots you have a cluster of hits off to the left or off to the right," Montulli said. "It's similar to what a rifleman would find if he kept shooting at a target and his cluster was off to one side; he would then adjust his sight to bring it back into the target."

An Air Force officer who works on Minuteman 3 operations and who participated in the late 1970s in a Strategic Air Command assessment of bias and accuracy problems said, "We know bias is inherent in the inertial guidance system. We understand bias and what contributes to it and the relative contributions of each factor causing it. But how they interact is unknown, and compensating errors are hard to determine.

"I do not think the impact of bias on missile accuracy is serious. We know that changes in software, in flight program, in targeting will increase bias, but not in all cases. Bias fluctuates as a function of changes in software and flight programs."

"In an inertially guided missile," Anderson said, "the bias error is due mainly to error in the model of the Earth's gravitational field stored in the missile computer. Because anomalies in the Earth's gravitational field differ at different parts of the Earth, Soviet tests over their own territory or even U.S. tests over the Vandenberg Missile Range bear no relation to the anomalies over polar trajectories.

"Short of actual tests over the approximate trajectories to be used in a first strike, there is no way in principle to verify that the bias error has been removed" from the missile's guidance system. Anderson also said that satellite measurements of gravitational fields along trajectories unflown by missiles are relatively inaccurate because the precise position of the satellite itself is unknown.

Montulli agreed that knowledge of gravitational forces both at the launch site and along the flight path "is one of the most important things to bias," and that measurement of gravitational variations must be accurate. He said this can be done by satellite with the improvements in technology that have occurred in the past 20 years. Can the Air Force measure gravitational anomalies accurately enough to insure silo destruction? "Most definitely," Montulli said.

"We can be extremely accurate to quantities and numbers far above what we need in hard target capability on any individual flight path," he said. "We've done this, we have measured gravitation, we have taken the flights, we have done the experiments and confirmed them. The issue one really gets into is that you must do that over a large portion of the Earth to be continuously accurate over flight paths you're interested in flying."

The missile needs to "know," according to Montulli, the various forces acting upon it at any given point in its trajectory and how to adjust to them.

"We measure those variables, obviously at discrete points, and then spatially connect those points or average them over the distance we're concerned with," he said. "You could increase accuracy if you take the time to make more measurements and spend the money to put more satellites up, and that's basically how we gain the knowledge that has now become integrated over 20 years—by continually taking those kinds of measurements and increasing the data base."

Even if the Air Force can measure accurately gravitational anomalies over flight paths, whether flown by test missiles or not, the private consultant who studied Minuteman test results said the Air Force has not fired an ICBM at a silo. "It is inconceivable," he said, "that our Minuteman 3s could provide a counterforce capability that we could count on. It is also inconceivable," he added, "to have any confidence that one-half our warheads would fall within 500–800 ft. of Soviet silos, more or less the miss distance we think we would need to insure silo destruction."

Anderson made the same argument about Soviet ICBMs. He claimed his "miss-probability" computations show clearly that "with weapons available to the Soviets today, or in the foreseeable future, a first-strike cannot be expected to knock out even one-half the Minuteman force."

The private consultant said it is easy to quantify the percentage of warheads that would fall within the circle of lethality at Kwajalein. "But even with repeated firings over the same test range using the same guidance configurations, the accuracy is not particularly good," he said. "The information on accuracy for shots fired at Kwajalein is classified, of course, but you would not be impressed with the number of hits we achieve within 500–800 ft. of Kwajalein's intended targets. The real question, of course, is what would be the percentage of accurate hits we would achieve against Vladivostok or Murmansk or wherever, and that percentage of accuracy must be much less."

The Air Force concedes the number of tests it conducts using the same guidance configuration—meaning the same software, warhead materials and aerodynamics—is relatively small.

"We do deal in this game with what might be called a small sample segment of pristine, identical type shots," Montulli said. "A half dozen, or a dozen in one case I'm aware of, would represent the kind of numbers we're talking about. It would more frequently be six than 12."

Cost limits the number of shots, he said, but "you put a great deal of engineering analysis into that shot to understand the variation of each particular change you make or particular effect you're trying to measure to understand the effect of that particular variable on the flight path. That gives very high confidence." He also said engineering data derived from NASA flights have some relevance and augment the data base on guidance problems in general, if not Minuteman 3's guidance system in particular.

William Hoehn of the Rand Corp. staff said most of the technical community would probably agree that with an appropriately constructed test program—one with a large enough sample providing sufficient statistical data—one can measure and identify systematic and random error and alleviate bias. However, the sample size of guidance sets is small—6, 7 or 11 tests each.

Test range "tinkering" can compensate for bias that appears at Kwajalein, he said, "but if you've tested your missiles over only one azimuth, it is unlikely you have learned a lot about the possibilities of bias over other trajectories or what you could expect in the way of missile performance."

Thomas E. Cooper of the House Armed Services Committee staff said, "To me it all comes down to reliability. I don't worry nearly as much about the missile reaching the target and hitting it accurately as I do about getting it off the launch pad and into its trajectory. In other words, the critical period is the launch and its immediate aftermath. You can test one missile at a time repeatedly and have high reliability. But the real question is, could you fire a thousand missiles at once with the right timing and have high reliability? It's similar to practicing a heart attack. Reliability means will all those missiles get out of their silos, get going and reach their targets? It's hard to separate accuracy and reliability. Obviously you must have both."

Anderson said the complexity of an ICBM requires "prudent military planners" to assign lower reliability to the rocket's many subsystems, especially given the lack of sufficiently realistic testing. Such prudence would dictate that "the number of launchers committed to an attack double or triple."

He suggested that if the Soviets, counting on high reliability, plan a first-wave attack using 1,000 warheads to strike 1,000 Minuteman missiles, a total of 125 launch rockets would be required if they are Soviet Model 2 SS–18s, each armed with eight independently targetable 1.5-megaton warheads. But

if the Soviets anticipate lower equipment reliability, Anderson said, it is difficult to see how they could assign any less than three warheads to each target, thus requiring 375 SS–18 rockets for the Minuteman alone for a first-wave attack.

"A second wave could not be expected to be effective," Anderson said, because of fratricide, in which the first warhead's blast effects destroy succeeding warheads without detonating them. "To insure effectiveness of the second warhead, it must be delayed until the shock wave of the first has dissipated, the air has cooled and the very strong winds generated by the first explosion die down."

Adequate kill probability would require waves of warheads to arrive several minutes apart, but if the U.S. had elected not to launch on warning of the Soviet first wave, remaining Minuteman missiles would almost certainly be fired upon arrival of the first wave, he said. "Increase in the overall success probability as a result of a second or third wave is therefore much diminished," Anderson said, and "the greatest reliance must be placed on the first wave."

The Soviets should have higher confidence than the U.S. in terms of hard target kill capability, according to Anthony R. Battista of the House Armed Services research and development subcommittee staff. "They have tested over a broader spectrum of possible operational condition and more adverse circumstances, like bad weather; and they have exercised their communications, command and control tactical and conventional systems more vigorously in testing and in ocean exercises.

"Based on their empirical data," Battista said, "the Soviets might have higher confidence in their accuracy and reliability. If, therefore, as the critics allege, MPS [mutiple protective shelters, the basing system proposed by the Air Force for the MX missile] is vulnerable, think how much more vulnerable our present silos are."

Mr. STEVENS. Mr. President, I think that both the members of the Armed Services Committee and the Appropriations Committee ought to become more familiar with the problems involved. I join in urging that the Department of Defense and the Air Force respond to our inquiry and we will follow that up next year when we have our hearings.

Mr. GLENN. I appreciate that. I thank the distinguished Senator from Alaska, the floor manager of the bill.

Mr. STEVENS. Mr. President, I am informed that the Senator from New Mexico has an amendment which I am prepared to discuss with him now. Following that, it is my understanding that the Senator from Georgia has a matter to present.

I yield to the Senator from New Mexico.

UP AMENDMENT NO. 739

Mr. DOMENICI. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from New Mexico (Mr. DOMENICI) proposes an unprinted amendment numbered 739.

Mr. DOMENICI. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At an appropriate place in the bill, insert the following new section:

"SEC. . So far as may be practicable Indian labor shall be employed, and purchases of the products of Indian industry may be made in open market in the discretion of the Secretary of Defense."

Mr. DOMENICI. Mr. President, the amendment I am offering today is quite simple and noncontroversial. It extends to the Secretary of Defense the discretionary authority presently contained in the so-called Buy Indian Act to enter into contract negotiations for DOD work without advertising the availability of the work. I must emphasize that this authority is completely discretionary. It in no way mandates or otherwise forces the Secretary of Defense to make DOD work available to Indian labor. Nothing will happen unless the Secretary of Defense believes that the DOD will benefit from directing that work be given to qualified Indian businesses.

As I have mentioned, this authority already exists in the Buy Indian Act. Currently the Secretary of the Interior is the only executive official authorized to implement this authority in situations involving the Department of the Interior. It is my belief that it would be well to extend this authority to the Department of Defense in order to allow the DOD and qualified Indian business to take advantage of any circumstances in which Indian labor would work to the advantage of national defense.

It should be emphasized that this amendment in no way degrades the provisions of section 502 of the fiscal year 1981 Defense Authorization Act which regulates the manner in which DOD contracting out of in-house service and maintenance activities can occur. In particular, it is expected that the provisions of this amendment would only be applied in cases where Indian labor would yield a cost advantage to the DOD compared to in-house costs.

Mr. President, I have consistently supported actions designed to promote the effectiveness of U.S. national security activities. I have also supported actions intended to promote opportunities for the Indian population of this country. This amendment is a small matter, but it happily addresses a way in which, I believe, the interests of both the DOD and Indians can be promoted.

I am certain that there are situations in which the DOD can benefit from the provisions of this amendment. This amendment would encourage identification of these situations and provide a mechanism for pursuing them. I believe all parties affected would be well served.

I would like to end by again assuring the Senate that the discretion of the Secretary of Defense to enter into labor negotiations is absolutely unfettered in any way by this amendment. Existing regulations relating to contracting out are also not affected by this amendment.

Mr. President, I ask that the amendment be agreed to.

Mr. STENNIS. Mr. President, will the Senator summarize the amendment?

Mr. STEVENS. Mr. President, this item has been discussed with us. It deals with the whole question of buy Indian provisions of existing law and the situation that exists that only the Secretary of the Interior, at the present time, can use the authority of existing law to buy Indian products and to utilize Indian work force as far as the efforts of the Indian people to obtain contracts in dealing with things such as maintenance and repair of military installations on or near their reservations.

Mr. President, this amendment by my colleague from New Mexico will extend the discretionary authority granted the Secretary of the Interior in 25 United States Code, section 47 to the Secretary of Defense. Section 47 currently grants to the Secretary of Interior, and I quote:

So far as may be practicable Indian labor shall be employed, and purchases of the products of Indian industry may be made in open market in the discretion of the Secretary of the Interior.

This amendment will make the same provision for the Secretary of Defense.

We should note that the authority is completely at the discretion of the Secretary, and therefore he may exercise this provision as he sees fit. The intent of the amendment is to allow Indians to assume a larger share of the available work which is required to reduce the unacceptably high backlog of maintenance and repair at military installations.

Implicit in this provision is the understanding that the Indian work force could in some cases do the work less expensively than the Department can do in-house. Of course the restrictions and guidelines found in section 502 of Public Law 97–86 will apply to all contracts of this nature.

It should be kept in mind that this discretionary authority is already granted to the Secretary of the Interior. While there is a history of how this authority may be used. The Secretary of Defense is, of course, not bound by the Department of Interior's operation of the program as he implements the Department of Defense's program.

I reiterate that this provision is discretionary and subject to the judgment of the Secretary of Defense as to its applicability.

We have discussed this matter. What this really does is to give the Secretary of Defense the same authority as the Secretary of the Interior to enter into contracts with Indian people and to use, to the extent practicable, the products of Indian industry or the labor of Indian people to be employed in his discretion to carry out the work that has to be performed anyway with existing moneys. This does not add any money. It adds authority to the Secretary of Defense to recognize some of the situations that the Indian people close to military reservations at times need different types of contracting procedures to get involved.

Mr. STENNIS. This amendment is satisfactory to me.

Mr. DOMENICI. Mr. President, I would say to my dear friend, it is purely discretionary. It is the same kind of discretionary authority vested in the Secretary of the Interior.

Mr. STEVENS. I am grateful to the Senator from New Mexico for raising this matter. My State, of course, has a very high population within this definition of Indian people, the Alaskan Native people, and we have many military reservations at which they could be employed. Particularly, they could be handling some of the basic contracts if the Secretary of Defense sought to use this authority. It does not mandate it, but it authorizes it.

The Senator from Mississippi has said he agreed to the amendment, Mr. President. We are prepared to accept the amendment.

The PRESIDING OFFICER. If there is no further debate, the question is on agreeing to the amendment.

The amendment (UP No. 739) was agreed to.

Mr. DOMENICI. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. STEVENS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. STEVENS. Mr. President, during my temporary absence, the Senator from New Hampshire (Mr. RUDMAN) will act in my stead.

The PRESIDING OFFICER. The Senator from Georgia.

COST ACCOUNTABILITY OF THE B-1 PROGRAM

Mr. NUNN. Mr. President, this will concern critical information on the question of cost accountability of the B-1 program which we will be discussing at length in a few minutes. As I outlined it in my remarks earlier this week, one of the major issues related to the B-1B will be its impact on the other parts of the Defense budget as well as the uncertainty surrounding the cost.

The Secretary of Defense has stated it will cost $20.5 billion in fiscal year 1981 dollars to purchase 100 aircraft. GAO estimates that the costs could range over $25 billion. I am recently informed that the independent cost analysis group in the Pentagon has made an estimate that is higher than the $20.5 billion, but I am not privy to their actual estimate at this stage.

Both Secretary Weinberger and Deputy Secretary Carlucci have stated in writing their intention to hold the costs to the $20.5 billion and have implemented strong management procedures to monitor the costs as outlined in the November 4, 1981, Carlucci memorandum which was officially provided to the Congress. I commend them both for this personal commitment to strong oversight of this B-1 program.

There are, however, two aspects of the B-1 program and cost that should be of great concern. One is the absolute cost of the program. The other is whether or not the planned 100 airplanes will be procured if the costs increase and DOD holds the line at $20.5 billion. At this point I find a strong commitment on the part of the Secretary of Defense and the Assistant Secretary to holding the program costs to $20.0 billion but no strong link to procuring 100 aircraft for that price.

What number of planes, then, is affordable as the unit cost increases, if the unit cost does increase? What number makes sense in terms of force size?

When we are going with a two-bomber program, the real fear that I have is we could get into a situation, because of cost overruns, and so forth, underestimates, where we do not procure enough individual units of eight the B-1B or the ATB, the advance bomber, to make sense from an economic point of view. We also have to consider what would happen if we procure very few units of both of these airplanes in terms of what we usually overlook here in the Congress, and what is most of the time overlooked even in the Department of Defense in the beginning stages. That is the logistics cost, the spare parts, the maintenance, the training, and all of those things that go up in cost tremendously if you have only a few units.

I believe the B-1 program costs are of such overriding importance to the overall defense budget that Congress should insure that we can maintain close oversight of this program from a reliable baseline of facts.

This amendment accomplishes this in two ways: First, it requires the President to certify what the cost of the 100 B-1B aircraft will be. If the $20.5 billion in fiscal year 1981 dollars is correct, then the President would so certify.

If that is not the correct amount in the President's opinion, the amendment requires the President to certify as to the correct amount to establish the baseline.

In other words, this does not take the $20.5 billion figure and wrap it around the President and say, "You have to use this figure." It just says to the President, "We want you to certify before we begin this program what your best estimates of the overall cost is."

Second, this amendment requires that the B-1B be covered in the quarterly selected acquisition report (SAR) and that such report be for a total of 100 B-1B aircraft.

The purpose of this amendment is not to put undue restrictions on the B-1B or the required information about it not required of other major weapon systems. The major difference in treatment for the B-1 would be that the President would certify the baseline costs. Once this certification is made, all that is required is a report every quarter, by the Secretary of Defense along with the other major systems, on the costs to develop and procure 100 B-1B aircraft. In essence, it is a tracking system to enable us to focus more sharply on the B-1 program.

In essence, it is a tracking system to enable Congress and the Department of Defense to focus more sharply on the B-1B program, the costs and the units.

Secretary Carlucci has already implemented a procedure requiring a quarterly report for himself and Secretary Weinberger describing progress to carry out the B-1 program within budgeted costs. I think this is a strong, positive step forward. The information from this report is simply transferable to the Congress in the previously existing systems acquisition report. So we are not asking them to come up with any information that is not already going to be reported directly to Secretary Weinberger on a quarterly basis. We are simply asking that that information be sent to Congress.

Mr. President, as we start this very large, very important, and very expensive program, it seems prudent to establish this reliable baseline and, given the conflicting testimony we have received to date, it appears that the best way to do this is to have it certified by the President.

In the years ahead, the pressure on the defense budget will increase. In other words, to fund the B-1, it would not surprise me to see slowdowns in other important programs such as the advanced technology bomber, the building of Navy ships and the development of a rapid deployment force. So the actual cost of the B-1 is greater than just the dollar value. It is essential for Congress to insure that we get a viable program, one that does not reduce the number of aircraft to a level that is not economically feasible. That is why this amendment would require that the quarterly SAR reports include the estimate for 100 B-1's. Such visibility would give us a clear track record of how we are doing as we move into the fiscal years 1983, 1984, and 1985 and as we are forced to make difficult decisions not only in strategic programs, but also, most importantly, in conventional programs that may be impacted by reason of overall budget limitations and by reason of the strategic programs themselves.

If Congress can insure that DOD will hold the line on B-1 costs to the current estimate and procure the planned 100 fleet size, certainly over the long haul, a stronger case is made in support of the B-1. This amendment will help insure that this case can be made.

Mr. President, I urge my colleagues to support this amendment. I know the Senator from Alaska would like to have a few words to say on this. This amendment can be summed up as, really, a cost accountability amendment for a major and important program, the B-1B.

Mr. RUDMAN. Mr. President, will the Senator from Georgia yield for a question?

Mr. NUNN. I am glad to yield, Mr. President.

Mr. RUDMAN. My recollection is that, several months ago, as an amendment to the authorization bill, the Senator from Georgia, joined by the Senator from Mississippi, the junior Senator from Georgia, and this Senator, passed through this body and, later the House, an item which now requires the Secretary of Defense to report on 50 strategic and general procurement programs on a quarterly basis, based on their SAR's. Is that correct?

Mr. NUNN. The Senator is correct and the Senator from New Hampshire played a major role in getting that passed by the Senate and adopted later. I thank the Senator for that.

Mr. RUDMAN. It is my understanding, however, Mr. President, that in this particular edition, the Senator from Georgia, in his amendment, proposes that this

certification be sent forth to the appropriate committees of the Congress by the President.

Mr. NUNN. The Senator is correct. This is only a one-time certification, and it is only the one program, so it would be a good deal simpler and narrower than the original amendment I had, which, as the Senator recalls, we changed from a presidential certification to a certification by the Secretary of Defense.

Mr. RUDMAN. Mr. President, I commend the Senator for this amendment. It tracks quite closely what we did in this body by, I believe, a unanimous vote, 91 or 92 votes, and this is different because of the enormous amount of money contained in this program. I ask the Senator from Georgia to add me as an original cosponsor.

Mr. NUNN. I shall be honored and delighted to do that.

Mr. President, I ask unanimous consent that the Senator from New Hampshire (Mr. RUDMAN) be added as a cosponsor to this amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. NUNN. Mr. President, I thank the Senator not only for his support in the unit cost amendment and this amendment but for the attention he has given to the details of the defense budget. We have talked many times. He is on the key committee and the subcommittee. I do not know anyone who has spent more time and exercised more leadership in his first year in the U.S. Senate than the Senator from New Hampshire. I thank him for that and I think he has made a real addition to the Senate and to the key committee.

Mr. RUDMAN. Will the Senator from Georgia yield?

Mr. NUNN. Yes.

Mr. RUDMAN. The Senator from Alaska wishes to make a statement, Mr. President. He is otherwise detained. I suggest that we might summon him to the floor at this time.

Mr. NUNN. That will be fine.

Mr. NICKLES. Mr. President, will the Senator from Georgia yield?

Mr. NUNN. I am glad to yield to the Senator from Oklahoma.

Mr. NICKLES. Mr. President, the Senator mentioned the $20 billion figure—20.5, I believe it is—for the 100 airplanes. Is that 1981 dollars or after inflation?

Mr. NUNN. That is a fiscal year 1981 constant-dollar figure. That does not include inflation. That is 1981 dollars. There is some confusion on these figures, Mr. President. I think CBO came out with an $89 billion figure on—my understanding is that that figure was then-year dollars which cannot be added to the 20.5. That is 1981 constant dollars.

Mr. NICKLES. I thank the Senator for his clarification.

Mr. STENNIS. Mr. President, we just have to admit the fact, that, to some degree, by renewing the B–1 and picking up again the idea of really making the planes—we have had the research and development going all this time—we just have to say that it is a situation that is different, that is confusing to some degree. There is concern about it, double concern. This bill is funding a double bomber program and that has not been done before. I think those things add up here to a very fine suggestion that the Senator from Georgia has made in his proposal, to select a definite starting point. Although he does not attempt to wrap the President up and make it a stationary requirement, it does continue his discretion, as I understand the Senator's explanation, which is very proper to do.

Mr. NUNN. The Senator is correct on that, Mr. President.

Mr. STENNIS. It will be of tremendous value to the committees that have to pass on these programs every year, Mr. President. It is hard to get at the real facts each 12-month period and it is difficult, too, for the Department of Defense to keep up with all these things. But they should be considered annually and submitted here annually for passage by this body and by amendment proposals to be heard as wished. I feel encouraged by this approach. It is very reasonable, moderate enough in its terms. I know it will do good. I think it will save money. I think it will be an additional guideline, in a way, for the Department of Defense itself. They need it. They are overwhelmed with problems here and elsewhere.

Mr. NUNN. If the Senator from Mississippi will yield.

Mr. STENNIS. I am glad to yield, Mr. President.

Mr. NUNN. Mr. President, the Senator from Mississippi has been here for many years and seen these programs come and be completed and seen the overruns, and so forth. As he well knows, he has my great respect in all that he has done for our national security for so many years. I thank him for his comment.

Mr. President, I want to point out one thing. When the Senator mentions the importance of the baseline, we all know the President has to rely on experts to get these cost estimates. I am not trying to have the figures on a constant basis, but I do believe when the President makes his certification, it will greatly escalate the degree of care that the experts have in submitting to him their best and informed judgment. I believe the President will, before he makes his certification, ask several times if this is the kind of accurate baseline that we need. I believe that is very important as we start tracking this program.

I know the Senator from Mississippi has seen that many times, there is a tendency, when any program is being sold, and it does not matter whether there is a Republican in the White House or a Democrat in the White House, the tendency is to low-ball the program, to have very low figures and get the program passed, then have it go up many, many times in cost. I do not believe our national security would continue to survive that.

I understand there is a recent Janes report out that basically says that we are going to have to get on top of the per unit cost of these weapons systems or we really are going to continue to have a gap vis-a-vis the Russians.

I know that the Senator from Mississippi has seen this over and over, and I ask if he does not share my view that there will be a great deal of care going into the expert submissions to the President before he makes the certification.

Mr. STENNIS. Yes; definitely, there will be a difference, and that difference will be reflected by the Department and by the uniformed military. It will make the President, himself, more conscious of his personal responsibility in the field. It will be an assurance to the Members of this body, the entire Congress, and to the American people, the taxpayers, that the President does have his hand on the throttle, so to speak; that this program is reviewed closely and carefully; and that he has to put his own name on the line, so to speak, to start it off each year.

That will help us make an evaluation of the situation and a recommendation to this body and at the same time assure better results.

I hope the Senator will continue to pursue his fine effort in the procurement field, which has been crying for some attention. He is just the man to dig in and keep digging. He has a way of coming up with very constructive, helpful modifications of the system and the law and the procedure.

I rejoice in the contribution that the Senator from New Hampshire is making on the Appropriations Committee. Even though he has been here just a short time, relatively speaking, his contribution is already measurable, and I know that it will grow and bear more fruit each year.

Mr. President, for the reasons stated, I strongly support this amendment. It is based upon what we have seen develop with reference to these systems. I hope there will be an overwhelming vote.

Mr. RUDMAN. Mr. President, I thank the Senator from Mississippi for his kind comments.

I ask the Senator from Georgia if he will yield for a question, so that whatever language we have here will be clearly understood.

The last four lines of the amendment read as follows:

> . . . and such funds for the purchase of B–1B aircraft shall remain available during any quarter that the total program costs of 100 B–1B aircraft is included in the Selected Acquisition Report required for the B–1B program for the previous quarter by section 811 of the Department of Defense Authorization Act, 1976 (10 U.S.C. 139 note).

I assume that the language, the way I read it, means that so long as this was complied with on a quarter-by-quarter basis, it would not cause any delay during a succeeding quarter, so long as the funds had been properly reported in the preceding quarter. Am I correct?

Mr. NUNN. The Senator is correct. It is not my intention at all to interrupt the funding of this program.

I will have remarks later about the overall program, but I do agree completely with the interpretation of the Senator from New Hampshire.

Mr. RUDMAN. One further question: Obviously, at the first quarter, there would not be a previous quarter in which an SAR had been complied with; so I assume there is no intention to have a 6-month delay built into this.

Mr. NUNN. The Senator is correct. If the Senator would like to clarify that in

conference, that is the intention. I think it is clear that you cannot have a previous quarter when you have a first report.

Mr. RUDMAN. I suspect that some literal minded lawyer might get us into a Catch-22 situation by saying that, starting in the first quarter, since there was no SAR for the previous quarter, you could not spend for that quarter. I thought I would put that in the RECORD.

Mr. NUNN. The legislative record should be absolutely and abundantly clear that the Senator from New Hampshire is correct. That is not the intention. It is obvious that there has to be a beginning point, which is the certification by the President; and the SAR report coming after that would include the updated version.

Mr. RUDMAN. Mr. President, the Senator from Alaska, the chairman of the subcommittee, will come to the floor soon. For the moment, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. NUNN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT NO. 740

(Purpose: Provide for certification and periodic reporting of the costs of the B–1B program)

Mr. NUNN. Mr. President, the amendment has already been discussed. I have not sent it to the desk. I have made a one-word modification in the amendment, prior to sending it to the desk, which makes clear that the point of the Senator from New Hampshire is the intent of this amendment on the acquisition of reports.

I send the amendment to the desk.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Georgia (Mr. NUNN), for himself, Mr. RUDMAN, and Mr. HARRY F. BYRD, JR., proposes an unprinted amendment numbered 740.

Mr. NUNN. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 24, line 22, after "multiyear contract," insert: "and $1,958,000,000 shall be available only for purchase of B–1B aircraft when the President certifies to the Congress that it is feasible to accomplish the program for the purchase of 100 B–1B aircraft at a total program cost of not to exceed $20,500,000,000 (in constant fiscal year 1981 dollars), or in such other amount as the President certifies and explains to the Congress, and such funds for the purchase of B–1B aircraft shall remain available during any quarter that the total program cost of 100 B–1B aircraft is included in any Selected Acquisition Report required for the B–1B program for the previous quarter by section 811 of the Department of Defense Appropriation Authorization Act, 1976 (10 U.S.C. 139 note).".

Mr. NUNN. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. STEVENS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. EAST). Without objection, it is so ordered.

Mr. STEVENS. Mr. President, I am indebted to my friend from New Hampshire for his assistance in this matter.

I say to the Senator from Georgia that when I heard about the amendment he was to offer concerning the certification and periodic reporting of the B–1B, I discussed this matter with the Department of Defense. I am delighted to report that this is consistent with the concepts that the Secretary and the Under Secretary intend to follow, and it is consistent with the President's wish to maintain full cost control on the items we are going into.

There is existing law, which is the amendment that was originated by the Senator from Georgia previously.

This amendment will provide the mechanism so that future costs of the B–1B will track the existing law, which was their intention anyway.

I think there is no difficulty at all in stating to the Senate that this meets the objectives of the Department of Defense, and it is consistent with the program that has been discussed with the Secretary and the Under Secretary. It is my understanding that they are meeting periodically, are establishing cost control programs, are monitoring those programs, and will be providing the reports that are required by law on the acquisitions that are authorized and funded.

I think that it is a proper addition to the bill.

I see no reason to ask for a rollcall vote. I do not think the Senator from Georgia needs one, does he?

Mr. NUNN. I do not need a rollcall vote. I am glad to have one if the Senator from Alaska desires. If he chooses not to, that will be fine with me.

Mr. STEVENS. I have discussed it. I understand the Senator from Mississippi has no objection.

It is a matter, as I said, totally consistent with existing law and with the current procedures of the Department of Defense and as such it reaffirms the policies of Congress and of the administration to maintain strict cost controls over the new programs that we are funding.

So I recommend the adoption of the amendment.

Mr. NUNN. I thank the Senator from Alaska. I know he has been concerned about the cost of all the major weapons systems, and I know he has expressed concerns about the costs of these strategic programs.

I am very grateful for his support of this amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Georgia.

The amendment (UP No. 740) was agreed to.

Mr. NUNN. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. STEVENS. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 741

Mr. STEVENS. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Alaska (Mr. STEVENS) proposes an unprinted amendment numbered 741.

On page 10, line 6, strike the amount "$5,812,000" and insert "$8,500,000".

Mr. STEVENS. Mr. President, this pertains to the amount of money that can be used for emergencies and extraordinary expenses on the approval of the Secretary of Defense and certification.

I ask that this amount be increased. The current amount is $5.812 million. It should have been changed in our committee to the figure of $8.5 million.

It is, in my opinion, a technical amendment. It has been discussed with the Senator from Mississippi and I am authorized to state he concurs.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Alaska.

The amendment (UP No. 741) was agreed to.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. NUNN. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. STEVENS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. STEVENS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STEVENS. Mr. President, for the information of all concerned, and I do hope Senators in their offices are listening to the proceedings, we are about to get into the B–1 issue, and once it starts we will go through a series of B–1 matters and then into the ammunition matters. I think if Senators have any amendments they wish to offer or have considered with the hope they might be accepted, this is probably the last time that luxury is going to exist. I anticipate we will be here until 11 or midnight once we start in on the major amendments pertaining to the major weapons systems.

So I urge Senators, if they have any amendments to offer for consideration, to come now because I anticipate the B–1 amendment within a matter of minutes.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. ARMSTRONG. Mr. President, I

ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

EQUALIZATION OF PER DIEM PAY FOR OFFICERS AND ENLISTED PERSONNEL

Mr. ARMSTRONG. Mr. President, there are many aspects of the pending legislation about which I would like to comment and, in fact, there are many reasons why, as one Member of this body, I congratulate and compliment the manager of this bill. But I especially want to draw the attention of my colleagues to a relatively small but extraordinarily significant action on the part of the members of the Committee on Appropriations and, particularly, on the part of the manager, the Senator from Alaska (Mr. STEVENS).

I want to compliment Senator STEVENS for standing firm on the issue of equalization of per diem pay for officers and enlisted personnel. This issue of equalizing the pay, the per diem pay, for enlisted men and officers involves really a very small amount of money but a principle which is of very great importance.

Per diem is normally paid when members of the Armed Forces are transferred away from their home duty stations on a temporary duty basis. For many years, as Senators will recall, there had been a basic injustice in the way per diem regulations were written. It used to be that when an officer goes on temporary duty he continues to receive his basic allowance for subsistence. All officers received BAS each month. Enlisted personnel do not automatically receive the basic allowance for subsistence. BAS is paid to enlisted personnel only when they do not have access to a Government mess. The vast majority of enlisted personnel who receive BAS are married.

Until this year, an officer who went on temporary duty was entitled to draw both per diem pay and his BAS. But enlisted personnel eligible for BAS were prohibited from receiving both.

Clearly, this was unfair. The Senate first took action to remove this injustice to our enlisted personnel in November of 1979 when it added to the Defense Officer Personnel Management Act an amendment I offered to permit enlisted personnel, as well as officers, to draw both BAS and per diem pay while on temporary duty. Regrettably, this provision was dropped during conference with the House on the DOPMA bill.

Justice did triumph eventually. The Defense authorization bill we approved earlier this year contains a provision providing for equalization of the payment of per diem pay.

But justice in this instance will be short-lived, if the Defense Appropriations Subcommittee of the House of Representatives is permitted to have its way. No sooner had the Armed Services Committees of the House and Senate authorized the equalization of per diem pay than the House defense appropriations subcommittee voted to delete the funds required to pay for this reform.

This action would save at most, I am advised, $35 million, and if we make a saving of $35 million, or whatever it turns out to be, in this way we will send a completely wrong signal to our service men and women around the world. In the last several years we have seen all too clearly the havoc that can be wrought to our national security by ignoring the needs of our service men and women. Years of neglect imposed hardship after hardship upon service families, and reduced our defenses to a lower state of readiness than at any time since Pearl Harbor.

Fortunately, we have also seen in this last year how rapidly fair treatment for our service men and women can turn around what all had come to regard as a horrendous situation. Congress in 1980 finally recognized the harm it had caused from a decade of neglect, and made partial restitution of the military pay and benefits that had been eroded away. As a result, fiscal 1981 was the finest recruiting and retention year in the history of the U.S. Armed Forces.

This very success has, I regret to point out, caused some people to believe that Congress can once again afford to stick its head in the sand, to begin again to renege on promises made to our military personnel, but not yet delivered.

Nothing could be further from the truth. It would, in my view, be both morally wrong and very dangerous to our security to follow the backsliding path on military personnel issues. That is exactly what is happening in the House of Representatives. By eliminating the funding for the per diem equalization reform adopted earlier this year, the House is really transmitting a signal to our service men and women around the world that we were not serious about a reform and that, in fact, we do not intend to fulfill what they have every right to think is a permanent reform.

So it is for this reason, Mr. President, that I rise to compliment the managers of this bill and all who have joined with the managers in reversing the actions of the House and putting back into the bill the funds for this long needed reform.

I congratulate Senator STEVENS and the subcommittee. Needless to say, I urge them to stick to their guns when they go to conference with the House and let our colleagues in the House know that, while small in dollars, it is important as a matter of principle and to the morale of our servicemen and women.

Mr. President, I suggest the absence of a quorum.

Mr. STEVENS. Mr. President, will the Senator withhold that request?

Mr. ARMSTRONG. Yes.

Mr. STEVENS. I thank the Senator for his kind remarks. At first, when he came on the floor, I thought he was one of our new recruiters and perhaps he was thinking that he might enter into the foray in Hawaii rather than Colorado.

I do know that he has a wide span of influence, but I did not really realize that it was that far that he extended to the islands that are our southern neighbors. I do not know if the Senator knows it, but if you drew a line directly south from my home you would hit Honolulu. So the Senator has gone almost as far west as I live, in thought at least.

I do thank him for his courtesy.

Mr. President, I understand that there is an amendment here that is being suggested by the Senator from Ohio and the Senator from Illinois. I have been asked to notify the Senate that there will be a rollcall vote on this amendment if it is offered.

Mr. GLENN addressed the Chair.

The PRESIDING OFFICER. The Senator from Ohio.

Mr. GLENN. Mr. President, is the floor manager ready to take up this amendment at this time?

Mr. STEVENS. Yes.

UP AMENDMENT NO. 742

(Purpose: Expressing the sense of the Senate that the United States should not undercut existing strategic arms limitation agreements)

Mr. GLENN. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will state the amendment.

The legislative clerk read as follows:

The Senator from Ohio (Mr. GLENN), for himself, Mr. PERCY, Mr. CRANSTON, and Mr. CHAFEE, proposes an unprinted amendment numbered 742.

At the end of the bill, insert the following: "SEC. . It is the sense of the Congress that the United States should not take any action in connection with its defense programs which would undercut existing strategic arms limitation agreements, unless the President determines, and so notifies Congress, (1) that the Soviet Union is no longer exercising the same restraint, or (2) that such action would be vital to the national security interest of the United States.

Mr. GLENN. Mr. President, the purpose of this amendment is to give congressional backing to the administration's expressly stated intent not to take any actions "that would undercut the existing SALT agreements so long as the Soviet Union exercises the same restraint."

These exact words expressed U.S. policy in an official declaration by the Secretary of State on March 3 of this year. It was reaffirmed by Secretary Haig on November 4 before the Committee on Foreign Relations. On November 3, Secretary of Defense Weinberger told the committee that the defense program the administration is proposing, including the strategic arms proposal in this bill, "will not violate any of the terms of that unratified document."

Secretary Weinberger indicated essential agreement with the proposition that the integrity and credibility of the President's strategic modernization package will be strengthened if the Soviets continue to respect existing SALT agreements.

My fellow Senators are aware of recent indications in the press that the United States could take certain steps, as could the Soviet Union, which could jeopardize the SALT regime and prospects for new talks.

Mr. President, the newspaper talk has indicated that such comments have in-

deed centered around the MX proposal the administration is going with. There was testimony given before, I believe it was, the Armed Services Committee, that indicated that one of the Pentagon officials testified he thought it would, in fact, violate the value of the silo agreement that was part of SALT II. That, later on, I believe, was corrected, but the reports were in the paper and indicated some doubts about how much these things had been changed and raised some doubts as to whether we were being very, very careful about not violating any of the SALT II provisions that would give either side a reason to go ahead and break out and negate all of the SALT II agreements in making new weapons systems or new basing modes. It certainly is not in the interest of either side that that occur.

I have discussed our program in detail with senior Defense and military officials. I am convinced that we could proceed with the strategic programs outlined without in any way jeopardizing the SALT regime. I believe it is very important that we follow such a prudent course during this uncertain time ahead.

While this amendment is not binding upon the President, it is designed to demonstrate that the Congress of the United States supports the President in his intention to continue to adhere to SALT if the Russians do so. I believe an atmosphere in which both sides are showing restraint, and which we are showing our backing in the Congress of those expressions by the administration, will be very conducive to the productive outcome of the strategic arms reduction talks, as they are now called, START, beginning next year.

So, Mr. President, I ask that the amendment be considered and I yield the floor for any other comment.

Mr. PERCY addressed the Chair.

The PRESIDING OFFICER. The Senator from Illinois.

Mr. PERCY. Mr. President, once again, I have enjoyed very much indeed working with the distinguished Senator from Ohio and I fully support the amendment that he has offered and which I strongly join him on.

Mr. President, at the beginning of this year, there was considerable uncertainty concerning the direction that this administration would follow with respect to previously negotiated SALT agreements. There are three such accords:

The SALT I ABM Treaty, which was signed in 1972 and remains fully in force today;

The SALT I interim agreement, which formally expired in October 1977 but which both sides have continued to observe; and

The SALT II treaty, which was signed in June 1979 but never voted on by the full Senate. Citing obligations under international law, the Carter administration pledged to avoid any actions that would have defeated the object and purpose of the treaty while the agreement remained before the Senate, provided the Soviet Union demonstrated the same restraint.

In the first months of Mr. Reagan's Presidency, the new administration addressed the question of whether the United States should continue to respect the existing SALT agreements. Rejecting the counsel of some that the United States embark on a program of so-called strategic "quick fixes," many of which would have necessitated clear violations of the terms of the SALT I and SALT II accords, the administration wisely decided that our national security interests were best served by maintaining a policy of restraint vis-a-vis past SALT agreements while it carried out its broad review on its future SALT policy.

On March 3, 1981, Secretary of State Haig announced that while it was reviewing its SALT policy, the United States would take no action that would undercut existing SALT agreements so long as the Soviet Union exercised the same restraint. As Secretary Haig informed the Foreign Relations Committee during a hearing on November 4, this was an issue on which the President made a personal decision early on in his administration. It was not a Haig policy or a Weinberger policy but rather an American policy.

In tandem with its SALT review, the administration undertook a far-ranging review of our strategic force modernization requirements. The results of that review were announced by the President on October 2, and the specific programs proposed by the administration are before the Senate today.

During the course of the strategic weapons review, administration officials made it clear that the various strategic modernization proposals were not being devised with an eye to SALT II. Indeed, Secretary Weinberger advised the Foreign Relations Committee on November 3 that it was not by design that the President's proposed strategic package avoids conflicts with the SALT I and SALT II agreements on strategic offensive arms, but nevertheless, it does.

In this same hearing, Secretary Weinberger testified that there was no military necessity, I repeat, no military necessity to go beyond the provisions of SALT II at this time. Accordingly, the Secretary announced that the United States would continue to avoid actions that would undercut existing SALT agreements so long as the Soviet Union does likewise, thus reconfirming the administration's policy announcement of March 3.

On November 4, Secretary Haig advised the Foreign Relations Committee that in light of Secretary Weinberger's statement that there was no military requirement to depart from a policy of SALT restraint, "clearly the arms control and geopolitical aspects of the question favor that we continue to maintain this policy, and I would anticipate that we will."

Mr. President, the amendment which Senator GLENN and I are offering today simply puts the Senate on record in support of a policy of reciprocal United States and Soviet restraint on existing SALT agreements that the administration itself has firmly endorsed. The benefits of maintaining this policy are profound:

First, Soviet adherence to this policy insures that their strategic programs are kept within known parameters, and a number of militarily significant options, such as increasing the number of warheads on their missiles, are denied them outright. In a Foreign Relations Committee hearing last month, Gen. David Jones the Chairman of the Joint Chiefs of Staff, declared that the Joint Chiefs support the administration's position on this issue and pointed out that without the restrictions imposed on the Soviet Union by this policy, uncertainties as to the total number of Soviet systems, their production rates, and the characteristics of individual weapons systems would grow.

Second, by continuing a policy of restraint on past SALT agreements, we improve the likelihood that the new START negotiations will commence early next year, hopefully, in the context of stability and continuity, thereby enhancing the prospects that these crucial negotiations will succeed.

Mr. President, as I said in remarks earlier today, in recent weeks a controversy of sorts has arisen as to whether the President's plan to deploy the first increment of MX missiles in reconstructed ICBM silos would violate our declared policy of avoiding actions that would undercut existing SALT agreements.

When I first learned that there was a possibility that the President's MX basing proposal might conflict with the administration's stated policy on strategic arms limitation agreements, I asked Gen. Lew Allen, Air Force Chief of Staff, to advise me whether any such conflict did in fact exist. On Monday, I received General Allen's reply, which I have already placed in the RECORD. General Allen's letter confirms that:

> None of the programs being undertaken in the Administration's strategic modernization effort includes a commitment to a course of action that would necessitate renegotiation of limitations agreed to in SALT I or SALT II.

General Allen also observes that:

> Should we decide to deploy the MX in reconstructed Minuteman silos, there is no need to rule out the possibility of SALT compatible solutions at this time, albeit at somewhat lower hardness levels, and we will be examining these alternatives in the months ahead.

What is significant in this approach is that no decision on an MX basing configuration that would entail a departure from our voluntary SALT restraint policy need be made before we have begun the new START negotiations early next year. As a result, we can address this decision, as well as other decisions pertaining to the configuration and characteristics of our strategic weaponry, in the context of our experience in these negotiations. Should the first phases of the new START talks indicate that the Soviets are indeed earnest in their declared willingness to negotiate substantial arms reductions, I would fully expect that this administration would avoid any decision on MX basing that would undercut the progress being registered in START.

This could be achieved either by deploying the MX in an explicitly SALT II-

compatible mode or by reaching a specific understanding with the Soviet Union that deploying the MX in superhardened Minuteman silos is an action fully consistent w.th the spirit and intent of SALT II. I would remind my colleagues that it was clearly the intent of SALT II to sanction the deployment of the MX.

There is no question but that the Soviets had a great deal of concern about the so-called shell game, the MX mobile track. It was the clear indication from the leadership in the Kremlin, with whom I met just a little over a year ago in Moscow, that they looked upon the shell game, the mobile system, as a contravention of SALT II, simply because they regarded it as unverifiable. In the judgment of many in this country, the MX deployed in this manner would have actually escalated the arms race. Of course, the decision of the previous administration has been set aside and made moot and there can be no question but what the fixed silo basing mode as proposed by the present administration is within the framework of SALT II.

The fact that extra hardening—which is after all a stabilizing and nonprovocative step—might, if now pursued, create a technical problem of compliance should be regarded more as an issue to be addressed and resolved than as an insurmountable barrier to this deployment option. Indeed, during our committee hearings on the strategic package, Paul Warnke, who has great experience in dealing with the Soviets on the fine print of SALT agreements, testified that:

> If there is any problem with regard to the thirty-two percent limit on the enlargement of silos, I am sure that is the kind of technical adjustment that would cause no problems.

Mr. President, let me say a few words about the details of this resolution for the legislative record.

First, it is a sense-of-the-Congress resolution and is hence not binding.

Second, this amendment uses the term "undercut," which can be broadly defined to reflect the informal nature of the current SALT adherence regime.

Third, it uses the administration's term "existing agreements" which I would understand to encompass SALT II, but not in the sense that the Congress is hereby endorsing SALT II or the negotiating approaches adopted there. We want to give our START negotiators ample flexibility to develop their own negotiating approaches.

Fourth, the language requires the Soviet Union to exercise the same restraint, and in many respects imposes stricter restrictions on currently available Soviet strategic options than it does on U.S. programs. According to the administration, the Soviets have thus far lived up to their side of this informal compliance regime.

And, finally, the amendment provides flexibility to the President by allowing him to determine that the national security interest of the United States requires a departure from this policy.

Mr. President. the policy that this amendment endorses is one which was decided by the President himself. In hearings before the Foreign Relations Committee last month, the Secretary of State, the Secretary of Defense, and the Chairman of the Joint Chiefs of Staff all supported a continuation of this policy. I believe it is appropriate, and indeed overdue, that the Senate express its support for the administration's position on this issue. The administration has advised me that it does not oppose this amendment, and I urge its adoption.

Mr. STEVENS. Mr. President, I might inquire of the Senators from Ohio and Illinois why this should be on the Defense bill. We really do not have the time to clear this out with all of the agencies that would be involved. Why should we have a sense-of-the-Senate resolution dealing with SALT on this bill? Both Senators are on the Foreign Relations Committee. Why do they not bring out a sense-of-the-Senate resolution generated from the Foreign Relations Committee? If it is noncontroversial, it could be cleared very quickly. But why this bill? This bill is going to become a sense-of-the-Senate Christmas tree before we are through. We have one on unemployment, we have this one coming in on SALT, we have another one coming on something else. The Senator from Alaska is getting to the point where he believes we are spending so much time trying to clear out items that are really not within the jurisdiction of our subcommittee. If we initiated this, Mr. President, you can bet your boots opponents would be out here saying, "What are you doing? This is not within the jurisdiction of the Appropriations Committee."

Why would you dump this on the bill I am trying to manage and get through today? I have been informed that at least three people who are not here want to talk about this. We cannot find them. We obviously are just going to have a prolonged quorum call until they get back to the building.

I ask the Senator from Illinois and the Senator from Ohio, why does this come on the bill now?

Mr. GLENN. If the Senator will yield, I would prefer to have this presented as a sense-of-the-Senate resolution, and refer it to committee, bringing out all the reports and everything else required.

But the reason it is applicable on this bill, as I see it, is that while we had hoped to change the basing mode for the MX, which I think is preposterous for all the reasons I stated on the floor this morning and yesterday, that basing mode has not changed. So this does become applicable because allegations have been made that the basing mode that we are going to does in fact violate the SALT II agreements. That is the reason it has become applicable now. It is important that we not send any wrong signals. The administration first testified that we were in violation of SALT II if we went this particular route and then later on denied it. This sent some wrong signals, it seems to me, across the world, not only to our potential enemy but to our allies as well, and undercuts, in fact, some of the theater nuclear force talks going on right now and the SALT talks scheduled to start next spring.

That is the reason I think it is applicable now and the reason I think it is important now, so that we take away any of this doubt.

If there had been a change in the basing mode, that would have made the rationale for this weaker than it is now. But I think this is necessary to reassure our allies as well as potential enemies.

Mr. STEVENS. Let me just state what the Senators are getting this Senator involved in. This amendment says, "unless the President determines and so notifies the Congress."

I am informed that that should say, "unless the President determines and so informs the Congress," because "notifies" means it triggers a whole series of statutes. The Foreign Relations Committee ought to know better than I about how reports are presented to the Congress under a notification procedure as opposed to just informing the Congress of actions being taken.

I ask the Senators in any event to modify that. As I understand, that was the intention.

Let me inquire of the Chair, has there been written into the amendment presented to the Senate the words "and so notifies the Congress"?

The PRESIDING OFFICER. There has not been.

Mr. STEVENS. I ask unanimous consent that it be changed to "and so informs the Congress."

Mr. PERCY. Reserving the right to object, I would like to say that Under Secretary of State Kennedy was given the language as offered in the amendment. He took 5 or 10 minutes to think about this and touch base with other people in the State Department. He called me back 10 or 15 minutes ago and said that that language was acceptable.

I do not see a great deal of difference between notifying and informing the Congress. It is splitting hairs. I do look upon each term as meaning about the same thing. It is acceptable to me.

Mr. STEVENS. Mr. President, let me notify my friend that I have been informed that that change should be made.

Mr. PERCY. The Senator has been notified what, Mr. President?

Mr. STEVENS. I am being facetious, Mr. President, but there has been serious conversation that has taken place since this amendment has been introduced indicating that the word "notify" should not be in this amendment.

I am serious about making the request. I ask the Senator to change it. I agree with the Senator. I do not see any reason not to change it because I do not understand the difference. But there are people who believe that statutes are triggered by the word "notify" that are not triggered by the word "inform."

I do persist in the request, Mr. President.

Mr. PERCY. I say I have no objection to the change in the word.

Mr. STEVENS. I ask that that amendment be so modified, Mr. President.

Mr. GLENN. Reserving the right to object, Mr. President, I still do not see the difference between notifying and informing. We want to know when these things are going to happen. That is the purpose of this amendment. We put

"notification" in a lot of other things so they do give us things in writing, so it is not just a matter of phone calls or an informal meeting in someone's office.

Notification means that they have to give it to us in writing, it comes before the committee as part of the notifying process. That is what we intend to trigger off this.

Mr. President, we just do not want this business of coming down and having a casual meeting in someone's office and saying, "Well, we informed you that this was going to happen."

That is the major difference.

Mr. STEVENS. Mr. President, will the Senator object to my making the change from "notification" to "information"?

Mr. GLENN. I would, Mr. President. I object.

Mr. STEVENS. Mr President, that demonstrates the difficulty of dealing with this matter. I shall have no alternative to making the tabling motion. This is not the place to write this thing.

I am not part of the Foreign Relations Committee. This is an appropriation bill. I would make the point of order that it is legislation, but I understand that because it is a sense of the Senate resolution, it is not legislation. Am I correct in that, Mr. President? Since this becomes a sense of Congress resolution, it might be legislation.

The PRESIDING OFFICER. The Senator is correct.

Mr. STEVENS. Mr. President, my understanding is that I could make that point of order, but it is legislation, because it puts a burden on the President of the United States to take action or, would you believe, Mr. President, he does not have to take that action if he determines in his mind that it is essential to the national security interests of the United States to take such action.

Why would he possibly take action to violate an agreement, an arms agreement, unless he made that determination?

This is a two-headed monster, Mr. President. It says the President determines and so notifies the Congress that the Soviet Union is no longer exercising the same restraint or if he finds that such action is essential to the national security of the United States, he does not have to notify the Congress at all and he can violate all the agreements he wants, apparently.

This is not the place, Mr. President, for us to be involved in this. I tell you, it is wrong. Now is the time to make the stand.

If the Senator from Illinois will not change that word they have asked me to change and say it is going to be opposed unless it is changed, if the Armed Services Committee members who oppose this can get here and state why they oppose it, I intend to move to table it.

I serve notice to the Senate that we are going to be finished with this bill today and we are not going to have it be a Christmas tree for every sense-of-the-Congress resolution that any Senator wants to hang on it. Not if Senators will listen to me when I say it is time to get this bill finished. If Senators want to be here at 4 or 5 o'clock in the morning, let us have more of these sense-of-the-Congress resolutions, bring them in and we shall discuss them and then table them.

It has been announced we are going to finish this bill; we are trying to get a time agreement to finish the bill; I had hoped this matter would be cleared up. As a matter of fact, that was my understanding when the Senators mentioned it was going to come. I find it has not been cleared. It may have been cleared in one portion of the administration, but certainly not with another portion of the administration. It has not been cleared with the chairman and the ranking member of the Committee on Armed Services. As such, it gives me a problem and it gives me a pain.

When the time comes, Mr. President, I shall move to table it.

Mr. PERCY. Mr. President, I do not want to cause the distinguished floor manager of the bill a problem or a pain over two words, when both Senator GLENN and I have agreed that there is not a great deal of difference between them. I think we ought to talk it over for just a second. I suggest the absence of a quorum.

Mr. GLENN. Mr. President, will the Senator withhold that request for a moment? I know the Senator from Colorado wants to make a short statement.

Mr. HART. Will the Senator from Illinois yield for a question?

Mr. PERCY. I am happy to recognize the Senator from Colorado for a question.

Mr. HART. Mr. President, on November 10, the Senator from Colorado introduced a resolution of this sort into the Senate. It received the number Senate Resolution 242 and was referred to the Foreign Relations Committee. The principal "resolved" clause of that resolution is that it is the sense of the Senate that the United States shall continue to take no steps inconsistent with the terms of the SALT II treaty so long as the Soviet Union also continues to take no steps inconsistent with those terms.

Is the understanding of the Senator from Colorado correct that the sense-of-the-Senate resolution the Senator from Illinois and the Senator from Ohio have introduced is essentially that same resolution?

Mr. STEVENS. Could I respond to that, Mr. President? It is not, because this one has another clause on it. It says if the President finds such action would be vital to national security interests of the United States, he does not have to notify Congress, he can violate the existing strategic arms limitations agreements at will. So, to my knowledge there is a clause on this one which was not on the other one. I do not know why this has been presented the way it has been. As a matter of fact, I cannot conceive of a President of the United States violating an existing agreement on strategic arms limitations unless he did make the finding that national security was involved.

Mr. HART. Mr. President, first of all, I was directing my question to the Senator from Illinois. Second, there is no existing treaty. The treaty has expired. So we are not bound by the treaty.

The question is, Mr. President, is it the administration's position, as it has so stated, that it will not violate the terms of the treaty so long as the Soviets do not, either? My question of the Senator from Illinois is, Is his sense-of-the-Senate resolution here essentially the same as the one I introduced on the 10th?

Mr. PERCY. No, it is not, Mr. President. The recollection of the Senator from Illinois about the resolution—I have it here in front of me, Senate Resolution 242. The heading says "Regarding SALT II." Therefore, the resolution would be limited just to SALT II.

The amendment offered by the Senator from Ohio and the Senator from Illinois applies to all existing treaties—SALT I, SALT II, SALT I interim, et cetera. But it does clearly embrace also SALT II.

Mr. GLENN. If the Senator will yield, we address the same problem. There is that similarity, but there is a little bit different wording so it is not exactly the same. But we do address the same problem.

Mr. HART. Mr. President, I want to support the resolution that the Senator from Illinois and the Senator from Ohio offered here. It is my understanding, based on statements made by spokesmen for the administration, that this is U.S. policy and I think it is in the national interest as well. I understand the arguments of the Senator from Ohio having to do with the basing mode of the MX. And, the resolution which I had introduced some weeks ago was an attempt to broaden that concern to all steps that might be taken that would abrogate an understanding—not an agreement or a treaty but an understanding—that exists between our two nations that we will not begin to circumvent that agreement for the time being—at least until one side or the other does so. In that respect, I want to associate myself with this resolution.

If it does not prevail, I hope that the Senator from Illinois, the distinguished committee chairman, would look kindly on early hearings on the resolution which the Senator from Colorado offered some weeks ago. This might be an alternative course for proceeding.

Mr. PERCY. Mr. President, I believe I have the floor. I suggest the absence of a quorum.

Mr. TOWER. Will the Senator withhold that?

Mr. PERCY. I withhold it for a question, Mr. President.

Mr. TOWER. Would the Senator be amenable to an amendment to this? I believe that, as it reads, it makes us appear to be timorous and weak. I should like to amend it to read: "It is the sense of the Congress that the United States should not take any action in connection with its defense programs which would subordinate the national security interests to existing strategic arms limitation agreements," and strike out all thereafter.

I intend to propose that amendment.

Mr. PERCY. I think it might be well to have an informal discussion of that.

We have underway now a decision which has to be made as to whether we will accept an amendment by the distinguished floor manager, and I think it will be best to talk that over now.

I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. STENNIS. A point of order, Mr. President.

The PRESIDING OFFICER. The Senator from Mississippi.

Mr. STENNIS. The Senate is in session. I call for order.

The PRESIDING OFFICER. The Senate will be in order.

Mr. STENNIS. The Senate has to be in order, even if a quorum call is in progress.

The PRESIDING OFFICER. The Senator is correct.

The bill clerk continued the call of the roll.

Mr. TOWER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

Mr. GLENN. Mr. President, I object.

The PRESIDING OFFICER. Objection is heard.

The clerk will continue to call the roll.

The bill clerk continued the call of the roll.

Mr. STEVENS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

Mr. GLENN. Mr. President, I object.

The PRESIDING OFFICER (Mr. PRESSLER). Objection is heard.

The bill clerk resumed the call of the roll.

Mr. GLENN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Is there objection?

Mr. TOWER addressed the Chair.

Mr. GLENN. Mr. President, I seek recognition.

Mr. TOWER addressed the Chair.

Mr. GLENN. Mr. President, I seek recognition.

The PRESIDING OFFICER. Is there objection?

Mr. GLENN. Mr. President, I seek recognition.

The PRESIDING OFFICER. Is there objection?

Mr. GLENN. Mr. President, no objection is heard. Make a ruling.

The PRESIDING OFFICER. The Chair is attempting to make a ruling. If there is no objection, the quorum call is rescinded.

Mr. TOWER addressed the Chair.

Mr. GLENN. Mr. President, I seek recognition. Mr. President, I spoke first. I seek recognition.

Mr. TOWER. Mr. President, I send to the desk——

Mr. GLENN. I object to that procedure. I spoke before the Senator from Texas. That is not fair.

Mr. BAKER addressed the Chair.

Mr. TOWER. Regular order.

Mr. BAKER. Mr. President, will the Parliamentarian advise the Chair?

Mr. GLENN. Mr. President, I seek recognition.

Mr. TOWER. Mr. President, I believe I have the floor. I am delighted to yield to the majority leader.

Mr. GLENN. Mr. President, I spoke first to the Chair seeking recognition. The Chair recognized the Senator from Texas. I definitely spoke first. That is not the right procedure of the Senate.

Mr. TOWER. Regular order.

The PRESIDING OFFICER. The majority leader.

Mr. BAKER. Mr. President, I do not know what is going on. I just got here.

But the only right I have is to get recognized, and I thank the Chair for doing that.

Mr. TOWER. Mr. President, it is my understanding I was recognized and I yielded to the majority leader.

Mr. GLENN. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator from Texas was recognized. The majority leader sought recognition and he was recognized.

Mr. TOWER. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. TOWER. Does that mean I have lost the floor?

Mr. STEVENS. Yes, that is what that means.

The PRESIDING OFFICER. The majority leader has the floor.

Mr. BAKER. Good.

Now, Mr. President, let us try to untangle what is going on.

Mr. President, what is the pending business before the Senate?

UP AMENDMENT NO. 742

The PRESIDING OFFICER. The amendment of the Senator from Ohio is the pending business. The amendment is No. 742.

Mr. BAKER. Mr. President, has there been any order in respect to debate on that amendment?

The PRESIDING OFFICER. Any order?

Mr. BAKER. Yes, on limited time for debate or otherwise prescribing conditions for the debate.

The PRESIDING OFFICER. There is no limitation of debate.

Mr. BAKER. I thank the Chair.

The PRESIDING OFFICER. Or any other order.

Mr. GLENN addressed the Chair.

Mr. BAKER. Mr. President, is the amendment open to amendment?

The PRESIDING OFFICER. Pardon?

Mr. BAKER. Is the amendment open to amendment?

The PRESIDING OFFICER. The amendment is open to amendment.

Mr. TOWER addressed the Chair.

Mr. GLENN addressed the Chair.

The PRESIDING OFFICER. The majority leader has the floor.

Mr. BAKER. Mr. President, I hope that Senators will continue with the debate on this measure for a moment and perhaps there will be some further resolution of the issue.

But the amendment is in the first degree; is that correct?

The PRESIDING OFFICER. The Senator is correct.

Mr. BAKER. Very well.

Mr. GLENN and Mr. TOWER addressed the Chair.

The PRESIDING OFFICER. The majority leader has the floor.

Does the majority leader yield the floor?

Mr. BAKER. Mr. President, I yield the floor.

Mr. TOWER addressed the Chair.

Mr. GLENN. Mr. President, I sought recognition ahead of the Senator from Texas.

Mr. TOWER addressed the Chair.

The PRESIDING OFFICER. The Senator from Ohio.

Mr. GLENN. I thank the Chair.

Mr. TOWER. Now wait a minute.

Mr. GLENN. I thank the Chair.

Mr. President, I have the floor; is that correct?

Mr. TOWER. That is not a valid point of order.

The PRESIDING OFFICER. The Senator is correct.

Mr. GLENN. I thank the Chair.

Mr. President, I send to the desk a perfecting amendment to my earlier amendment to delete the word "notifies" and to change it to "informs."

The PRESIDING OFFICER. As long as the Senator has a right to modify his own amendment he does not have a right to amend it.

Mr. GLENN. Will the Chair repeat that, please?

The PRESIDING OFFICER. There has been no action on the Senator's first-degree amendment. Therefore, he has the right to modify it but cannot send to the desk an amendment to it.

Mr. GLENN. Mr. President, I request to modify by changing the word from "notifies" to "informs."

The PRESIDING OFFICER. The Senator has the right to modify his amendment. It is so modified.

(The modified amendment is as follows:)

At the end of the bill, insert the following:

"SEC. . It is the sense of the Congress that the United States should not take any action in connection with its defense programs which would undercut existing strategic arms limitation agreements, unless the President determines, and so informs Congress, (1) that the Soviet Union is no longer exercising the same restraint, or (2) that such action would be vital to the national security interest of the United States.

Mr. TOWER and Mr. GLENN addressed the Chair.

Mr. TOWER addressed the Chair.

Mr. GLENN. Mr. President, I request the yeas and nays.

Mr. TOWER addressed the Chair.

Mr. GLENN. I have the floor.

The PRESIDING OFFICER. On the first-degree amendment as modified?

Mr. GLENN. As modified. That is correct. I request the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The yeas and nays were ordered.

Mr. TOWER addressed the Chair.

Mr. GLENN. Mr. President, do I have the floor?

Mr. TOWER. Mr. President, no, he loses the floor.

Mr. GLENN. I do not yield the floor.

Mr. TOWER. He loses the floor.

Mr. TOWER addressed the Chair.

The PRESIDING OFFICER. The Senator does not lose the floor. The Senator does not lose the floor by requesting the yeas and nays.

Mr. GLENN. I thank the Chair.

Mr. President, I repeat the purpose of this amendment is to give congressional backing to the administration to the expressly stated intent not to take any action that would undercut existing SALT agreements so long as the Soviet Union exercises the same restraint.

These exact words express U.S. policy in an official declaration by the Secretary of State on March 3, 1981. He was reaffirmed by Secretary Haig on November 4 before the Committee on Foreign Relations. On November 3 Secretary of Defense Weinberger told the committee that the Defense program the Reagan administration is proposing, including the strategic arms proposals in this bill, will not violate any of the terms of that unratified document.

Secretary Weinberger indicated essential agreement with the proposition that the integrity and credibility of the President's strategic modernization package will be strengthened if the Soviets continue to respect existing SALT agreements.

All Senators are aware of recent indications in the press that the United States could take certain steps as could the Soviet Union which could jeopardize the SALT regime and prospects for new talks.

I add that the newspaper reports involved the fact that we might be proposing with our new MX missile and basing mode to be going beyond silo volumes that were permitted under the SALT agreements even though those agreements were never ratified. Those were the charges.

The PRESIDING OFFICER. The Chair must interrupt the Senator from Ohio.

The Chair has received a ruling from the Parliamentarian that the Chair ruled incorrectly. When the Senator asked for the yeas and nays, the Senator does lose the floor. The Senator from Texas was the first to ask for recognition. The Senator from Texas has the floor.

Mr. TOWER addressed the Chair.

Mr. GLENN. Parliamentary inquiry, Mr. President. I asked for the yeas and nays.

Mr. TOWER. I do not yield for that purpose. The yeas and nays have been ordered on the amendment of the Senator from Ohio.

Mr. GLENN. Mr. President, I made a parliamentary inquiry, and a parliamentary inquiry is in order at any time.

Mr. TOWER. I did not yield.

The PRESIDING OFFICER. I am told by the Parliamentarian that a parliamentary inquiry can only be made if the Senator who has the floor will yield for a parliamentary inquiry. The Senator from Ohio must ask the Senator from Texas if he yields for a parliamentary inquiry.

Mr. GLENN. Mr. President, will the Senator yield for a parliamentary inquiry?

Mr. TOWER. The Senator will not.

UP AMENDMENT NO. 743

(Purpose: Expressing the sense of the Senate that the United States should not undercut existing strategic arms limitation agreements)

I send an amendment to the desk, an amendment to the amendment of the distinguished Senator from Ohio, and ask the clerk to report.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Texas (Mr. TOWER) proposes an unprinted amendment numbered 743:

At the appropriate place in the bill, insert the following:

"SEC. . It is the sense of the Congress that the United States should not take any action in connection with its defense programs which would subordinate the national security interest to existing strategic arms limitation agreements.

Mr. BAKER. Mr. President, I move to table the underlying amendment and I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. GLENN addressed the Chair.

The PRESIDING OFFICER. The Senator from Ohio.

Mr. GLENN. Mr. President, the question for the Parliamentarian is what will be the first vote in this case? Will the first vote be on my modified amendment or on the proposal of the Senator from Texas?

The PRESIDING OFFICER. The motion to table is directed toward the Senator from Ohio's modified amendment, which will take with it the amendment of the Senator from Texas.

Mr. GLENN. Mr. President, was there a motion made to table?

Mr. BAKER. Yes, I made the motion to table, and we have the yeas and nays.

The PRESIDING OFFICER. The motion was made.

Mr. GLENN. The motion to table—and retaining the right to the floor for just a moment—as I understand it, then the pending business is the motion to table which would carry with it my amendment as modified and the amendment of the Senator from Texas, is that correct?

The PRESIDING OFFICER. Would the Senator repeat his inquiry?

Mr. GLENN. The question is, is the motion to table the pending business?

The PRESIDING OFFICER. The motion to table is pending and is not debatable.

Mr. GLENN. A further inquiry, Mr. Presidnet, if the motion to table carries, will it carry not only my amendment as modified but also the amendment of the Senator from Texas?

The PRESIDING OFFICER. The Senator is correct.

Mr. STEVENS. Regular order.

The PRESIDING OFFICER. The yeas and nays have been ordered, and the clerk will call the roll.

Mr. HOLLINGS addressed the Chair.

The PRESIDING OFFICER. The Senator from South Carolina.

Mr. HOLLINGS. May I be recognized. Mr. President?

The PRESIDING OFFICER. There is no debate in order.

Mr. STEVENS. There is no debate in order.

Mr. HOLLINGS. I apologize. I thought we were still debating it. I would like to be heard on the amendment if I can and not get caught up in this wrangle.

Mr. BAKER. Mr. President, it is my motion to table and I respectfully urge the Chair to put the question.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Tennessee to lay on the table the amendment, as modified, of the Senator from Ohio. The yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Alabama (Mr. DENTON), the Senator from Arizona (Mr. GOLDWATER), the Senator from California (Mr. HAYAKAWA), the Senator from Kansas (Mrs. KASSEBAUM), and the Senator from Wyoming (Mr. WALLOP) are necessarily absent.

Mr. CRANSTON. I announce that the Senator from Arizona (Mr. DECONCINI) is necessarily absent.

I further announce that, if present and voting, the Senator from Arizona (Mr. DECONCINI) would vote "yea."

The PRESIDING OFFICER. Are there any other Senators desiring to vote?

The result was announced—yeas 49, nays 45, as follows:

[Rollcall Vote No. 447 Leg.]

YEAS—49

Abdnor	Garn	Murkowski
Andrews	Gorton	Nickles
Armstrong	Grassley	Packwood
Baker	Hatch	Pressler
Boren	Hatfield	Quayle
Boschwitz	Heflin	Roth
Byrd, Harry F., Jr.	Helms	Rudman
Cannon	Hollings	Schmitt
Cochran	Humphrey	Simpson
Cohen	Jackson	Stennis
D'Amato	Jepsen	Stevens
Danforth	Kasten	Symms
Dole	Laxalt	Thurmond
Domenici	Long	Tower
Durenberger	Lugar	Warner
East	Mattingly	Zorinsky
	McClure	

NAYS—45

Baucus	Glenn	Moynihan
Bentsen	Hart	Nunn
Biden	Hawkins	Pell
Bradley	Heinz	Percy
Bumpers	Huddleston	Proxmire
Burdick	Inouye	Pryor
Bryd, Robert C.	Johnston	Randolph
Chafee	Kennedy	Riegle
Chiles	Leahy	Sarbanes
Cranston	Levin	Sasser
Dixon	Mathias	Specter
Dodd	Matsunaga	Stafford
Eagleton	Melcher	Tsongas
Exon	Metzenbaum	Weicker
Ford	Mitchell	Williams

NOT VOTING—6

DeConcini	Goldwater	Kassebaum
Denton	Hayakawa	Wallop

So the motion to lay on the table UP amendment No. 742 was agreed to.

Mr. ROBERT C. BYRD. Mr. President, may we have order in the Chamber?

The PRESIDING OFFICER. The Senate will be in order.

Mr. ROBERT C. BYRD. Mr. President, I believe the distinguished Senator from South Carolina was seeking recognition to call up an amendment. I yield the floor. I would ask him to yield to me, if he is recognized by the Chair.

Mr. HOLLINGS addressed the Chair.

The PRESIDING OFFICER. The Senator from South Carolina.

UP AMENDMENT NO. 744

Mr. HOLLINGS. Mr. President, I send an unprinted amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The bill clerk read as follows:

The Senator from South Carolina (Mr. HOLLINGS), for himself, Mr. LEVIN, Mr. HART, Mr. BUMPERS, Mr. RIEGLE, Mr. EAGLETON, and Mr. KENNEDY, proposed an unprinted amendment numbered 744.

Mr. HOLLINGS. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 2, beginning with line 1, strike out all down through line 19 on page 28 and insert in lieu thereof the following:

TITLE I

MILITARY PERSONNEL

MILITARY PERSONNEL, ARMY

For pay, allowances, individual clothing, subsistence, interest on deposits, gratuities, permanent change of station travel (including all expenses thereof for organizational movements), and expenses of temporary duty travel between permanent duty stations, for members of the Army on active duty (except members of reserve components provided for elsewhere), cadets, and aviation cadets; $14,130,781,000.

MILITARY PERSONNEL, NAVY

For pay, allowances, individual clothing, subsistence, interest on deposits, gratuities, permanent change of station travel (including all expenses thereof for organizational movements), and expenses of temporary duty travel between permanent duty stations, for members of the Navy on active duty (except members of the Reserve provided for elsewhere), midshipmen, and aviation cadets; $10,453,767,000.

MILITARY PERSONNEL, MARINE CORPS

For pay, allowances, individual clothing, subsistence, interest on deposits, gratuities, permanent change of station travel (including all expenses thereof for organizational movements), and expenses of temporary duty travel between permanent duty stations, for members of the Marine Corps on active duty except members of the Reserve provided for elsewhere); $3,151,526,000.

MILITARY PERSONNEL, AIR FORCE

For pay, allowances, individual clothing, subsistence, interest on deposits, gratuities, permanent change of station travel (including all expenses thereof for organizational movements), and expenses of temporary duty travel between permanent duty stations, for members of the Air Force on active duty (except members of reserve components provided for elsewhere), cadets, and aviation cadets; $11,730,381,000.

RESERVE PERSONNEL, ARMY

For pay, allowances, clothing, subsistence, gratuities, travel, and related expenses for personnel of the Army Reserve on active duty under sections 265, 3019, and 3033 of title 10, United States Code, or while serving on active duty under section 672(d) of title 10, United States Code, in connection with performing duty specified in section 678(a) of title 10, United States Code, or while undergoing reserve training, or while performing drills or equivalent duty or other duty, and for members of the Reserve Officers' Training Corps, and expenses authorized by section 2131 of title 10, United States Code, as authorized by law; $1,054,750,000.

RESERVE PERSONNEL, NAVY

For pay, allowances, clothing, subsistence, gratuities, travel, and related expenses for personnel of the Naval Reserve on active duty under section 265 of title 10, United States Code, or personnel while serving on active duty under section 672(d) of title 10, United States Code, in connection with performing duty specified in section 678(a) of title 10, United States Code, or while undergoing reserve training, or while performing drills or equivalent duty, and for members of the Reserve Officers' Training Corps, and expenses authorized by section 2131 of title 10, United States Code, as authorized by law; $361,643,000: *Provided*, That funds made available for fiscal year 1982 for "Reserve Personnel, Navy" may be transferred to the appropriation Reserve Personnel, Navy for fiscal year 1979, in such amounts as may be needed, but not to exceed $100,000 to liquidate obligations incurred and chargeable to that account.

RESERVE PERSONNEL, MARINE CORPS

For pay, allowances, clothing, subsistence, gratuities, travel, and related expenses for personnel of the Marine Corps Reserve on active duty under section 265 of title 10, United States Code, or while serving on active duty under section 672(d) of title 10, United States Code, in connection with performing duty specified in section 678(a) of title 10, United States Code, or while undergoing reserve training, or while performing drills or equivalent duty, and for members of the Marine Corps platoon leaders class, and expenses authorized by section 2131 of title 10, United States Code, as authorized by law; $152,212,000.

RESERVE PERSONNEL, AIR FORCE

For pay, allowances, clothing, subsistence, gratuities, travel, and related expenses for personnel of the Air Force Reserve on active duty under sections 265, 8019, and 8033 of title 10, United States Code, or while serving on active duty under section 672(d) of title 10, United States Code, in connection with performing duty specified in section 678(a) of title 10, United States Code, or while undergoing reserve training, or while performing drills or equivalent duty or other duty, and for members of the Air Reserve Officers' Training Corps, and expenses authorized by section 2131 of title 10, United States Code, as authorized by law; $326,399,000.

NATIONAL GUARD PERSONNEL, ARMY

For pay, allowances, clothing, subsistence, gratuities, travel, and related expenses for personnel of the Army National Guard while on duty under sections 265, 3033, or 3496 of title 10 or section 708 of title 32, United States Code, or while serving on active duty under section 672(d) of title 10 or section 502(f) of title 32, United States Code, in connection with performing duty specified in section 678(a) of title 10, United States Code, or while undergoing training, or while performing drills or equivalent duty or other duty, and expenses authorized by section 2131 of title 10, United States Code, as authorized by law; $1,468,136,000.

NATIONAL GUARD PERSONNEL, AIR FORCE

For pay, allowances, clothing, subsistence, gratuities, travel, and related expenses for personnel of the Air National Guard on duty under sections 265, 8033, or 8496 of title 10 or section 708 of title 32, United States Code, or while serving on active duty under section 672(d) of title 10 or section 502(f) of title 32, United States Code, in connection with performing duty specified in section 678(a) of title 10, United States Code, or while undergoing training, or while performing drills or equivalent duty or other duty, and expenses authorized by section 2131 of title 10, United States Code, as authorized by law; $475,078,000.

TITLE II

RETIRED MILITARY PERSONNEL

RETIRED PAY, DEFENSE

For retired pay and retirement pay, as authorized by law, of military personnel on the retired lists of the Army, Navy, Marine Corps, and Air Force, including the reserve components thereof, retainer pay for personnel of the Inactive Fleet Reserve, and payments under section 4 of Public Law 92-425 and chapter 73 of title 10, United States Code; $14,944,815,000.

TITLE III

OPERATION AND MAINTENANCE

OPERATION AND MAINTENANCE, ARMY

For expenses, not otherwise provided for, necessary for the operation and maintenance of the Army, as authorized by law; and not to exceed $5,400,000 can be used for emergencies and extraordinary expenses, to be expended on the approval or authority of the Secretary of the Army, and payments may be made on his certificate of necessity for confidential military purposes; $15,414,400,000, of which not less than $998,600,000 shall be available only for the maintenance of real property facilities.

ARMY STOCK FUND

For the Army stock fund, $211,300,000.

OPERATION AND MAINTENANCE, NAVY

For expenses, not otherwise provided for, necessary for the operation and maintenance of the Navy and the Marine Corps, as authorized by law; and not to exceed $1,899,000 can be used for emergencies and extraordinary expenses, to be expended on the approval or authority of the Secretary of the Navy, and payments may be made on his certificate of necessity for confidential military purposes; $20,095,389,000 of which not less than $736,800,000 shall be available only for the maintenance of real property facilities: *Provided*, That of the total amount of this appropriation made available for the alteration, overhaul, and repair of naval vessels, not more than $2,800,000,000 shall be available for the performance of such work in Navy shipyards.

NAVY STOCK FUND

For the Navy stock fund, $17,435,000.

OPERATION AND MAINTENANCE, MARINE CORPS

For expenses, not otherwise provided for, necessary for the operation and maintenance of the Marine Corps, as authorized by law; $1,186,440,000, of which not less than $176,800,000 shall be available only for the maintenance of real property facilities.

MARINE CORPS STOCK FUND

For the Marine Corps stock fund, $13,334,000.

OPERATION AND MAINTENANCE, AIR FORCE

For expenses, not otherwise provided for, necessary for the operation and maintenance of the Air Force, as authorized by law; and not to exceed $4,091,000 can be used for emergencies and extraordinary expenses, to be expended on the approval or authority of the Secretary of the Air Force, and payments may be made on his certificate of necessity for confidential military purposes; $16,906,069,000, and not less than $1,000,300,000 shall be available only for the maintenance of real property facilities.

AIR FORCE STOCK FUND

For the Air Force stock fund, $107,800,000.

OPERATION AND MAINTENANCE, DEFENSE AGENCIES

For expenses, not otherwise provided for, necessary for the operation and maintenance of activities and agencies of the Department of Defense (other than the military departments), as authorized by law; $4,768,000,000: *Provided*, That not to exceed $5,812,000 can be used for emergencies and extraordinary expenses, to be expended on the approval or authority of the Secretary of Defense, and payments may be made on his certificate of necessity for confidential military purposes: *Provided further*, That not less than $72,400,000 of the total amount of this appropriation shall be available only for the maintenance of real property facilities.

DEFENSE STOCK FUND

For the Defense stock fund, $79,000,000.

OPERATION AND MAINTENANCE, ARMY RESERVE

For expenses, not otherwise provided for, necessary for the operation and maintenance, including training, organization, and administration, of the Army Reserve; repair of facilities and equipment; hire of passenger motor vehicles; travel and transportation; care of the dead; recruiting; procurement of services, supplies, and equipment; and communications; $619,700,000, of which not less than $39,000,000 shall be available only for the maintenance of real property facilities

OPERATION AND MAINTENANCE, NAVY RESERVE

For expenses, not otherwise provided for, necessary for the operation and maintenance, including training, organization, and administration, of the Navy Reserve; repair of facilities and equipment; hire of passenger motor vehicles; travel and transportation; care of the dead; recruiting; procurement of services, supplies, and equipment; and communications; $570,740,000, of which not less than $28,200,000 shall be available only for the maintenance of real property facilities.

OPERATION AND MAINTENANCE, MARINE CORPS RESERVE

For expenses, not otherwise provided for, necessary for the operation and maintenance, including training, organization, and administration, of the Marine Corps Reserve; repair of facilities and equipment; hire of passenger motor vehicles; travel and transportation; care of the dead; recruiting; procurement of services, supplies, and equipment; and communications; $40,799,000, of which not less than $1,400,000 shall be available only for the maintenance of real property facilities.

OPERATION AND MAINTENANCE, AIR FORCE RESERVE

For expenses, not otherwise provided for, necessary for the operation and maintenance, including training, organization, and administration, of the Air Force Reserve; repair of facilities and equipment; hire of passenger motor vehicles; travel and transportation; care of the dead; recruiting; procurement of services, supplies, and equipment; and communications; $682,608,000, of which not less than $15,300,000 shall be available only for the maintenance of real property facilities.

OPERATION AND MAINTENANCE, ARMY NATIONAL GUARD

For expenses of training, organizing, and administering the Army National Guard, including medical and hospital treatment and related expenses in non-Federal hospitals; maintenance, operation, and repairs to structures and facilities; hire of passenger motor vehicles; personnel services in the National Guard Bureau; travel expenses (other than mileage), as authorized by law for Army personnel on active duty, for Army National Guard division, regimental, and battalion commanders while inspecting units in compliance with National Guard regulations when specifically authorized by the Chief, National Guard Bureau; supplying and equipping the Army National Guard as authorized by law; and expenses of repair, modification, maintenance, and issue of supplies and equipment (including aircraft); $1,047,600,000, of which not less than $27,000,000 shall be available only for the maintenance of real property facilities.

OPERATION AND MAINTENANCE, AIR NATIONAL GUARD

For operation and maintenance of the Air National Guard, including medical and hospital treatment and related expenses in non-Federal hospitals; maintenance, operation, repair, and other necessary expenses of facilities for the training and administration of the Air National Guard, including repair of facilities, maintenance, operation, and modification of aircraft; transportation of things; hire of passenger motor vehicles; supplies, materials, and equipment, as authorized by law for the Air National Guard; and expenses incident to the maintenance and use of supplies, materials, and equipment, including such as may be furnished from stocks under the control of agencies of the Department of Defense; travel expenses (other than mileage) on the same basis as authorized by law for Air National Guard personnel on active Federal duty, for Air National Guard commanders while inspecting units in compliance with National Guard regulations when specifically authorized by the Chief, National Guard Bureau; $1,682,568,000, of which not less than $37,300,000 shall be available only for the maintenance of real property facilities.

NATIONAL BOARD FOR THE PROMOTION OF RIFLE PRACTICE, ARMY

For the necessary expenses, in accordance with law, for construction, equipment, and maintenance of rifle ranges; the instruction of citizens in marksmanship; the promotion of rifle practice; and the travel of rifle teams, military personnel, and individuals attending regional, national, and international competitions; $845,000, of which not to exceed $7,500 shall be available for incidental expenses of the National Board; and from other funds provided in this Act, not to exceed $340,000 worth of ammunition may be issued under authority of title 10, United States Code, section 4311: *Provided*, That competitors at national matches under title 10, United States Code, section 4312, may be paid subsistence and travel allowances in excess of the amounts provided under title 10, United States Code, section 4313.

CLAIMS, DEFENSE

For payment, not otherwise provided for, of claims authorized by law to be paid by the Department of Defense (except for civil functions), including claims for damages arising under training contracts with carriers, and repayment of amounts determined by the Secretary concerned, or officers designated by him, to have been erroneously collected from military and civilian personnel of the Department of Defense, or from States, territories, or the District of Columbia, or members of the National Guard units theerof; $198,200,000.

COURT OF MILITARY APPEALS, DEFENSE

For salaries and expenses necessary for the United States Court of Military Appeals: $2,607,000, and not to exceed $1,500 can be used for official representation purposes.

TITLE IV

PROCUREMENT

AIRCRAFT PROCUREMENT, ARMY

For construction, procurement, production, modification, and modernization of aircraft, equipment, including ordnance, ground handling equipment, spare parts, and accessories therefor; specialized equipment and training devices; expansion of public and private plants, including the land necessary therefor, without regard to section 4774, title 10, United States Code, for the foregoing purposes, and such lands and interests therein, may be acquired, and construction prosecuted thereon prior to approval of title as required by section 355, Revised Statutes, as amended; and procurement and installation of equipment, appliances, and machine tools in public and private plants; reserve plant and Government and contractor-owned equipment layaway; and other expenses necessary for the foregoing purposes; $1,940,900,000, to remain available for obligation until September 30, 1984.

MISSILE PROCUREMENT, ARMY

For construction, procurement, production, modification, and modernization of missiles, equipment, including ordnance, ground handling equipment, spare parts, and accessories therefor; specialized equipment and training devices; expansion of public and private plants, including the land necessary therefor, without regard to section 4774, title 10, United States Code, for the foregoing purposes, and such lands and interests therein, may be acquired, and construction prosecuted thereon prior to approval of title as required by section 355, Revised Statutes, as amended; and procurement and installation of equipment, appliances, and machine tools in public and private plants; reserve plant and Government and contractor-owned equipment layaway; and other expenses necessary for the foregoing purposes; $2,177,200,000, to remain available for obligation until September 30, 1984.

PROCUREMENT OF WEAPONS AND TRACKED COMBAT VEHICLES, ARMY

For construction, procurement, production, and modification of weapons and tracked combat vehicles, equipment, including ordnance, spare parts, and accessories therefor; specialized equipment and training devices; expansion of public and private plants, including the land necessary therefor, without regard to section 4774, title 10, United States Code, for the foregoing purposes, and such lands and interests therein may be acquired, and construction prosecuted thereon prior to approval of title as required by section 355, Revised statutes, as amended; and procurement and installation of equipment, appliances, and machine tools in public and private plants; reserve plant and Government and contractor-owned equipment layaway; and other expenses necessary for the foregoing purposes; $3,987,600,000, to remain available for obligation until September 30, 1984.

PROCUREMENT OF AMMUNITION, ARMY

For construction, procurement, production, and modification of ammunition, and accessories therefor; specialized equipment and training devices; expansion of public and private plants, including ammunition facilities authorized in military construction authorization Acts or authorized by section 2673, title 10, United States Code, and the land necessary therefor, without regard to section 4774, title 10, United States Code, for the foregoing purposes, and such lands and interests therein, may be acquired, and construction prosecuted thereon prior to approval of title as required by section 355, Revised Statutes, as amended; and procurement and installation of equipment, appliances, and machine tools in public and private plants; reserve plant and Government and contractor-owned equipment layaway; and other expenses necessary for the foregoing purposes; $2,438,400,000, to remain available for obligation until September 30, 1984.

OTHER PROCUREMENT, ARMY

For construction, procurement, production, and modification of vehicles, including tactical, support (including not to exceed 14 vehicles required for physical security of personnel notwithstanding price limitations applicable to passenger carrying vehicles but not to exceed $100,000 per vehicle), and non-

tracked combat vehicles; the purchase of not to exceed two thousand seven hundred and fifteen passenger motor vehicles for replacement only; communications and electronic equipment; other support equipment; spare parts, ordnance and accessories therefor; specialized equipment and training devices; expansion of public and private plants, including the land necessary therefor, without regard to section 4774, title 10, United States Code, for the foregoing purposes, and such lands and interests therein, may be acquired, and construction prosecuted thereon prior to approval of title as required by section 355, Revised Statutes, as amended; and procurement and installation of equipment, appliances, and machine tools in public and private plants; reserve plant and Government and contractor-owned equipment layaway; and other expenses necessary for the foregoing purposes; $3,728,071,000, to remain available for obligation until September 30, 1984.

ARMY NATIONAL GUARD EQUIPMENT

For military equipment for Army National Guard units, $50,000,000, to remain available until September 30, 1984.

AIRCRAFT PROCUREMENT, NAVY

For construction, procurement, production, modification, and modernization of aircraft, equipment including ordnance, spare parts, and accessories therefor; specialized equipment; expansion of public and private plants, including the land necessary therefor, and such lands and interests therein, may be acquired, and construction prosecuted thereon prior to approval of title as required by section 355, Revised Statutes, as amended; and procurement and installation of equipment, appliances, and machine tools in public and private plants; reserve plant and Government and contractor-owned equipment layaway; $9,431,400,000, of which $37,000,000 shall be available only for purchase of C–2 aircraft under a multiyear contract, to remain available for obligation until September 30, 1984.

WEAPONS PROCUREMENT, NAVY

For construction, procurement, production, modification, and modernization of missiles, torpedoes, other weapons, and related support equipment including spare parts, and accessories therefor; expansion of public and private plants, including the land necessary therefor, and such lands and interests therein, may be acquired, and construction prosecuted thereon prior to approval of title as required by section 355, Revised Statutes, as amended; and procurement and installation of equipment, appliances, and machine tools in public and private plants; reserve plant and Government and contractor-owned equipment layaway; $3,327,100,000, to remain available for obligation until September 30, 1984.

SHIPBUILDING AND CONVERSION, NAVY

(Including transfer of funds)

For expenses necessary for the construction, acquisition, or conversion of vessels as authorized by law, including armor and armament thereof, plant equipment, appliances and machine tools and installation thereof in public and private plants; reserve plant and Government and contractor-owned equipment layaway; procurement of critical, long leadtime components and designs for vessels to be constructed or converted in the future; and expansion of public and private plants, including land necessary therefor, and such lands and interests therein, may be acquired, and construction prosecuted thereon prior to approval of title as required by section 355, Revised Statutes, as amended, as follows: for the Trident submarine program, $330,700,000; for the CVN aircraft carrier program, $658,000,000; for the SSN–688 nuclear attack submarine program, $1,869,000,000; for the reactivation of the U.S.S. *New Jersey*, $237,000,000; for the reactivation of the U.S.S. *Iowa*, $88,000,000; for the aircraft carrier service life extension program, $100,800,000; for the CG–47 AEGIS cruiser program, $2,946,300,000; for the LSD–41 landing ship dock program, $301,000,000; for the LHA/LHDX helicopter assault ship program, $45,000,000; for the FFG guided missile frigate program, $971,900,000; for the MCM mine countermeasures ship program, $99,700,000; for the T–AO fleet oiler ship program, $200,000,000; for the T–AGOS SURTASS ship program, $156,500,000; for the ARS salvage ship program, $160,500,000; for the T–AKRX fast logistics ship program, $323,000,000; for the T–AFS Lyness conversion program, $37,000,000; for craft, outfitting, post delivery, cost growth, and escalation on prior year programs, $808,500,000; for inflation adjustments to be distributed by the department as appropriate among the programs in this appropriation, $105,000,000; for acquisition, construction and improvement, Coast Guard, $300,000,000, to be transferred to the Coast Guard: "Acquisition, Construction and Improvements"; and in addition, $102,400,000 of which $58,000,000 shall be derived by transfer from the "maritime prepositioning ship programs" of "Shipbuilding and Conversion, Navy, 1981/1985", and $44,400,000 shall be derived by transfer from the "fast logistics ship (T–AKRX) program" of "Shipbuilding and Conversion, Navy, 1981/1985"; and reductions in the amounts, as follows: $7,000,000 for consultant, studies and analyses; in all: $9,331,900,000, and in addition, $102,400,000 to be derived by transfer, to remain available for obligation until September 30, 1988: *Provided*, That of the appropriation for "Shipbuilding and Conversion, Navy," that expired for obligation on September 30, 1981, $119,000,000 shall remain available for obligation until September 30, 1983: *Provided further*, That none of the funds herein provided for the construction or conversion of any naval vessel to be constructed in shipyards in the United States shall be expended in foreign shipyards for the construction of major components of the hull or superstructure of such vessel: *Provided further*, That none of the funds herein provided shall be used for the construction of any naval vessel in foreign shipyards.

OTHER PROCUREMENT, NAVY

For procurement, production, and modernization of support equipment and materials not otherwise provided for, Navy ordnance and ammunition (except ordnance for new aircraft, new ships, and ships authorized for conversion); the purchase of not to exceed three hundred and four passenger motor vehicles for replacement only; expansion of public and private plants, including the land necessary therefor, and such lands and interests therein, may be acquired, and construction prosecuted thereon prior to approval of title as required by section 355, Revised Statutes, as amended; and procurement and installation of equipment, appliances, and machine tools in public and private plants; reserve plant and Government and contractor-owned equipment layaway; $3,880,268,000, to remain available for obligation until September 30, 1984.

PROCUREMENT, MARINE CORPS

For expenses necessary for the procurement, manufacture, and modification of missiles, armament, ammunition, military equipment, spare parts, and accessories therefor; plant equipment, appliances, and machine tools, and installation thereof in public and private plants; reserve plant and Government and contractor-owned equipment layaway; and vehicles for the Marine Corps, including purchase of not to exceed one hundred and nine passenger motor vehicles for replacement only; $1,758,716,000, to remain available for obligation until September 30, 1984.

AIRCRAFT PROCUREMENT, AIR FORCE

For construction, procurement, and modification of aircraft and equipment, including armor and armament, specialized ground handling equipment, and training devices, spare parts, and accessories therefor; specialized equipment; expansion of public and private plants, Government-owned equipment and installation thereof in such plants, erection of structures, and acquisition of land without regard to section 9774 of title 10, United States Code, for the foregoing purposes, and such lands and interests therein, may be acquired, and construction prosecuted thereon prior to the approval of title as required by section 355, Revised Statutes, as amended; reserve plant and Government and contractor-owned equipment layaway; and other expenses necessary for the foregoing purposes including rents and transportation of things; $12,368,398,000, of which $1,817,600,000 shall be available only for purchase of F–16 aircraft under a multiyear contract, and $344,300,000 shall be available for contribution of the United States share of the cost of acquisition by the North Atlantic Treaty Organization of an Airborne Early Warning and Control System (AWACS) and, in addition, the Department of Defense may make a commitment to the North Atlantic Treaty Organization to assume the United States share of contingent liability in connection with the NATO E–3A Cooperative Programme, and $89,700,000 shall be derived by transfer from Aircraft Procurement, Air Force, 1981/1983, to remain available for obligation until September 30, 1984.

MISSILE PROCUREMENT, AIR FORCE

For construction, procurement, and modification of missiles, spacecraft, rockets, and related equipment, including spare parts and accessories therefor, ground handling equipment, and training devices; expansion of public and private plants, Government-owned equipment and installation thereof in such plants, erection of structures, and acquisition of land without regard to section 9774 of title 10, United States Code, for the foregoing purposes, and such lands and interests therein, may be acquired and construction prosecuted thereon prior to the approval of title as required by section 355, Revised Statutes, as amended; reserve plant and Government and contractor-owned equipment layaway; and other expenses necessary for the foregoing purposes including rents and transportation of things $4,567,746,000, to remain available for obligation until September 30, 1984.

OTHER PROCUREMENT, AIR FORCE

(Including transfer of funds)

For procurement and modification of equipment (including ground guidance and electronic control equipment, and ground electronic and communication equipment), and supplies, materials, and spare parts therefor, not otherwise provided for; the purchase of not to exceed nine hundred and sixty-one passenger motor vehicles for replacement only; and expansion of public and private plants, Government-owned equipment and installation thereof in such plants, erection of structures, and acquisition of land without regard to section 9774 of title 10, United States Code, for the foregoing purposes, and such lands and interests therein, may be acquired, and construction prosecuted thereon, prior to the approval of title as required by section 355, Revised Statutes, as amended; reserve plant and Government and contractor-owned equipment layaway; $5,357,589,000, and in addition, $800,000 which shall be derived by transfer from "Other procurement, Air Force, 1981/1983", of which $67,200,000 shall be available only for purchase of AN/TRC–170 radios under a multiyear contract and for related support, to remain available for obligation until September 30, 1984.

PROCUREMENT, DEFENSE AGENCIES

For expenses of activities and agencies of the Department of Defense (other than the military departments) necessary for procure-

ment, production, and modification of equipment, supplies, materials, and spare parts therefor, not otherwise provided for; the purchase of not to exceed three hundred and eighty-eight passenger motor vehicles of which two hundred and forty-three shall be for replacement only; expansion of public and private plants, equipment, and installation thereof in such plants, erection of structures, and acquisition of land for the foregoing purposes, and such lands and interests therein, may be acquired, and construction prosecuted thereon prior to the approval of title as required by section 355, Revised Statutes, as amended; reserve plant and Government and contractor-owned equipment layaway; $518,700,000, to remain available for obligation until September 30, 1984.

TITLE V

RESEARCH, DEVELOPMENT, TEST, AND EVALUATION, ARMY

For expenses necessary for basic and applied scientific research, development, test, and evaluation, including maintenance, rehabilitation, lease, and operation of facilities and equipment, as authorized by law; $3,759,409,000, to remain available for obligation until September 30, 1983.

RESEARCH, DEVELOPMENT, TEST, AND EVALUATION, NAVY

For expenses necessary for basic and applied scientific research, development, test, and evaluation, including maintenance, rehabilitation, lease, and operation of facilities and equipment, as authorized by law; $6,114,579,000, to remain available for obligation until September 30, 1983.

RESEARCH, DEVELOPMENT, TEST, AND EVALUATION, AIR FORCE

For expenses necessary for basic and applied scientific research, development, test, and evaluation, including maintenance, rehabilitation, lease, and operation of facilities and equipment, as authorized by law; $8,911,106,000, to remain available for obligation until September 30, 1983.

Mr. HOLLINGS. Mr. President, I yield to the distinguished minority leader.

Mr. STENNIS. Mr. President, may we have order in the Chamber?

The PRESIDING OFFICER. May we have order in the Chamber? Senators who are conversing will please retire to the cloakrooms. The Chair requests order in the Senate.

Mr. ROBERT C. BYRD. I thank the Chair.

Mr. President, there is still not order in the Chamber.

The PRESIDING OFFICER. The Senator is correct. Will Senators please take their seats? The Senate will be in order before we proceed.

The minority leader is recognized.

Mr. ROBERT C. BYRD. I thank the Chair.

Mr. President, I do not want to unduly prolong any discussion with reference to the problem which erupted just prior to the rollcall vote. I would hope that the tension in the atmosphere has subsided somewhat now and that we might now approach this matter with a little more calmness. I think it is a matter that ought not go unheeded and unprotested.

In lodging this protest, I do not intend to cast any reflection on the present occupant of the chair or upon the Parliamentarian. I believe that when Senators are vying with one another for recognition by the Chair, tensions will get aroused and the situation becomes overheated. In such a situation, the Chair may rule wrongly; the Parliamentarian may advise the Chair wrongly. So I do not want to ascribe any invidious intention on either the part of the Parliamentarian or the Chair.

As I recall, I heard Mr. GLENN very clearly seeking recognition. I thought he sought recognition first before Mr. TOWER.

The Chair can recognize any Senator in its own discretion, and the Chair's decision cannot be appealed. The prerogative of recognition is probably the most powerful weapon in the whole parliamentary arsenal. I would rather have that prerogative of recognition than any other single prerogative because that prerogative can pretty much control any situation which arises here, at least for a time.

I do not particularly find fault with the Chair's having recognized Mr. TOWER. Although Mr. GLENN did very loudly first seek recognition, the Chair recognized Senator TOWER.

I am among the foremost in protecting the right of prior recognition of the majority leader. I think my friends on the minority side will remember one occasion when I probably exceeded the reasonable bounds of protest and vehemently lectured the Vice President, who sat in the chair, over his not recognizing Mr. BAKER, the then minority leader. I was right in the position I took, although as I reflected on it afterward I should have asked unanimous consent for the Vice President to address the body because he had no opportunity to respond to me. So I think I was unfair to him on that occasion, although I had not intended to be, because I felt that I was right. I subsequently apologized to him.

So I will always be among the first to support recognition of the majority leader above anybody else in the Chamber. If I am seeking recognition at the time the majority leader is seeking recognition and the Chair recognizes the majority leader, I have no quarrel with that. Or if I am a split second ahead of the majority leader or 2 seconds ahead of the majority leader and the Chair recognizes the majority leader, I have no quarrel with that because I would be expected to be treated the same if my party controlled the chair.

However, I do not agree with the Chair that, once Mr. TOWER was recognized, the Chair could take the floor away from Mr. TOWER and recognize the majority leader.

Mr. TOWER was clearly recognized by the Chair. I heard the Chair recognize him. Mr. TOWER did not yield the floor. In that situation, I do not believe that the floor should have been taken from Mr. TOWER.

By the same token, once the Chair erred in recognizing Mr. GLENN following Mr. GLENN's request for the yeas and nays, I do not think the Chair had any authority by which the Chair could take the floor away from Mr. GLENN. That was an error on the part of the Chair. If the Chair recognized me in a situation and the Chair was in error and then turned the floor over to the majority leader or another Senator, I think that would be grossly wrong of the Chair. If I am recognized and have the floor, there is nothing that can take me off the floor as long as I want to hold the floor. I do not think there is any power on Earth that could rightly take the floor away from Mr. GLENN after he was once recognized.

I can offer a cloture motion without his yielding to me for the purpose, but I cannot take the floor away from him and hold it.

I am the minority leader and, next to the majority leader, I have the right of recognition in this Chamber over anybody else—next to the majority leader. I want to preserve those rights, but I also want to preserve the rights of other Senators. I do not want the Chair to become tyrannical.

Again I say this with all due respect for the present occupant of the chair.

Mr. TOWER. Will the Senator yield for clarification?

Mr. ROBERT C. BYRD. In just a moment, Mr. President.

With all due respect to the present occupant of the chair, we cannot let matters like this go by without raising a protest. I just have to insist that those who sit in the chair—we do not claim any right to sit in the chair, because when I became majority leader, I took the position that inasmuch as the Democrats controlled the Senate, they had the responsibility to preside. So I do not question that prerogative of the Republican majority. That is their prerogative, that is their responsibility, and I have no quarrel with that.

But I must insist on fairness by the Chair at all times, no matter who is in the chair, and by the Parliamentarian, because the minority does have some rights. We have to uphold those rights and it is in the interest of the majority to protect the rights of the minority.

I have been watching for a considerable length of time and there have been several instances when I have seen Members on this side of the aisle seek recognition clearly in advance of a Senator on the other side of the aisle—I am not talking about the majority leader or the majority whip—yet the Chair recognized a Senator on the other side of the aisle.

Mr. President, moreover this business of having lists as to what Senator will be recognized next to call up an amendment has no place in the rule book. There is no rule that will support that practice. The rule provides that the Chair shall recognize the first Senator who shall seek recognition.

Two or three Senators may seek recognition at the same time. If I were in the chair, I would likely recognize a Senator on this side. If Senator PETER DOMENICI were in the chair, I would suspect that if two Senators were simultaneously seeking recognition, he would probably recognize the Senator on his side.

But if Senator GLENN or Senator KENNEDY or Senator HOLLINGS or Senator NUNN stands up on this side of the aisle and speaks loudly and clearly and, 2 seconds later, a Senator on that side stands up and speaks, I think the Senator on this side is entitled to recognition.

Mr. President, I simply say that because I do not want us to have these ruckuses. They do not do anything but slow down the operation of the Senate. They cause blood pressures to rise, and they contribute to acerbity in debate, and hard feelings. Although I am certain that such hard feelings never last, nevertheless I have to take this time to urge the majority that it bend over backwards in according the right of the minority to be recognized.

I do not ask that the minority be given preference, I do not expect it to be. But I do hope that the rules will be followed and that the majority, which has the right to rule in this Chamber, will not use that power to curb the rights of the minority or to make the minority feel that we are being unfairly treated.

Mr. President, I yield the floor.

Mr. BAKER. Mr. President, will the Senator yield to me?

Mr. HOLLINGS. Mr. President, I am delighted to yield to the distinguished majority leader.

Mr. BAKER. I thank the Senator.

Mr. President, maybe I speak with more authority than some who have preceded me in this position; I do not speak for the Senator from West Virginia in this context when I say I know what it is like to be in the minority. Indeed, I was minority leader for 4 years. The statements just made by the present minority leader have a ring of familiarity that I cannot deny because, throughout those 4 years, on so many occasions that I cannot enumerate them, I imagined, or thought, or suspected, that the majority at that time was discriminating in favor of its side of the aisle in recognition. I must say that now that I am on the majority side, I have a more enlightened view of that. I must say that was probably not the case then and it is not the case now.

(Mr. GORTON assumed the chair.)

Mr. BAKER. In any event, Mr. President, I assure the minority leader that I will never countenance the recognition on a priority basis of any majority member over and above a member of the minority or over and above the rights of any minority Senator who seeks to be recognized. I have consulted with the occupant of the chair, not the present occupant but more than one, on that, I have consulted with the Parliamentarian on that, and have conversed with the minority leader.

I now reiterate: The occupant of the chair must recognize the first Senator seeking recognition under the rules and precedents of the Senate, and to the extent that I can do so, I urge and insist that that occur. That is not a criticism of the previous occupant of the chair or the present occupant of the chair but a simple statement of the rules of recognition in the Senate.

Mr. President, on the matter just dealt with, I came to the floor a moment ago and found that the place was in somewhat of a state of disarray. I frankly did not know who had the floor or what the amendment was or what the parliamentary situation was. The only tool I had at that time in my arsenal was to try to seek recognition to see if we could untangle this mess. Frankly, what I did was repeat to Members on both sides of the aisle as they walked through the well of the Senate, "I am making a tabling motion so we can cool this off and find out where we are going next." That is precisely what we did do. Indeed, the tabling motion prevailed, and I suspect there will be other amendments on this same subject.

But, Mr. President, throughout that entire procedure, I am sure the minority leader understands and I believe every Member of the Senate will understand that there was no effort by any Member on this side, certainly no effort by me, to intimidate, to discriminate against, or to treat badly with any Member of the minority or any Senator seeking recognition.

Just for the record, Mr. President. it is my view and I subscribe to the assessment made by the minority leader; that, in times of stress such as we have just witnessed, it is very difficult for the Chair to rule instantly on matters of great import or for the Parliamentarian to advise quickly on conflicting statements and claims that are being made to the floor. Let me simply say that, for the record, I am convinced that, under the rules and precedents, asking for the yeas and nays did indeed call for the Senate to act and when the Senate did act, the Senator from Ohio lost the floor and I was entitled to the right to seek the floor.

By the same token, I have some qualms about the fact that the Senator from Ohio, who appeared to have the floor, was ruled by Chair not to have the floor. I have not seen that procedure before and I would not encourage that in the future.

I am not privileged to say what the rules of the Senate should be in the future. Mr. President, it seems to me that, at least constructively, the Senator from Ohio had gained the floor. Whether he was recognized or not, he was speaking. He was proposing a po'nt to the Senate. So I urge that in the future, we consider that when a Senator has begun to speak and debate, for practical purposes, he has gained the floor under these circumstances.

I will be glad to consult with the minority leader. with the Parliamentarian, with the occupant of the chair, and others, to elaborate on that point of view.

However, Mr. President, I express my views now to the distinguished Senator from South Dakota: He has occupied the chair on many occasions. His service has been exemplary. It was in this case. He was acting on good advice, and he was acting properly in his role. I commend him for handling himself well in a difficult situation.

The Parliamentarian is a trusted officer of the Senate, and I have no criticism of him under the circumstances of what occurred.

All I can say, Mr. President, is that what is over is done, and we should get on with the business at hand.

Mr. ROBERT C. BYRD. Mr. President, will the Senator yield to me?

Mr. PRESSLER. Mr. President—

Mr. HOLLINGS. I yield first to the distinguished Senator from South Dakota, who was presiding.

Mr. PRESSLER. Mr. President, I shall not prolong this, except to say that in this situation, it was very difficult to get clear signals from the floor; and I had no purpose other than to try to follow the Parliamentarian and to follow my own best judgment. Sometimes, when several Senators are simultaneously seeking recognition of the Chair, it is very difficult to determine who spoke first. I just wanted to say that.

Mr. HOLLINGS. I yield to the distinguished Senator from West Virginia.

Mr. ROBERT C. BYRD. I thank the Senator for yielding.

Mr. President, I want to say that no majority leader could ever be more fair to the minority than Mr. BAKER has been with me and with my colleagues on the floor. What I said a moment ago is certainly not meant to be any reflection on him.

I simply thought we should take the floor at this time and, if possible, speak in such a way as might save us some problems later.

After the Senator completes his opening statement, I would appreciate it if he would yield again to me with respect to the pending amendment.

Mr. HOLLINGS. Yes, I will be delighted to yield to the Senator from West Virginia.

Mr. STEVENS. Mr. President, will the Senator yield?

Mr. HOLLINGS. I yield.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the motion to table UP amendment No. 742 was agreed to.

Mr. JEPSEN. I move to lay that motion on the table.

The PRESIDING OFFICER. Without objection, the motion is agreed to.

Mr. ROBERT C. BYRD. Mr. President, is there objection? Let us do this thing right.

The PRESIDING OFFICER. Is there objection to the motion?

Without objection, the motion is agreed to.

Is there a motion to table?

Mr. STEVENS. I do make a motion to table.

The PRESIDING OFFICER. Without objection, the motion is agreed to.

The Senator from South Carolina.

UP AMENDMENT NO. 744

Mr. HOLLINGS. Mr. President, we can move now from senatorial defense to national defense. [Laughter.]

The great tragedy this year was that we were going to be afforded the opportunity of treating our defense program comprehensively and setting out, for the first time in some time, the national defense policy for at least 5 years forward.

There is no question that, with the election of President Ronald Reagan, he was very strong on defense. I had run last year and was reelected. I had been propounding the same views. We knew that when all were elected, it was more or less a mandate from the people that we would increase our defense effort.

Now, the tragedies of economics have overtaken; and in the late summer and

early fall, we had the Stockman-Weinberger fiasco. As a result, the consensus in the coalition, in a bipartisan way, that had formulated to move forward together and comprehensively look forward for a period of 5 years, was decimated, fragmented, and split into different directions. So, in essence, we have not been able to debate this defense budget.

As the Senator from Georgia and the Senator from Maine pointed out yesterday concerning the MX, we were about to make a very long-range decision monetarily, putting the cart before the horse, before we actually had made the substantive decision with respect to deployment.

Similarly, with respect to the financing of the Nation's defense, we were never able to get a 5-year plan from the Department of Defense. They always issue, by late summer, what we call the green book or procurement annex. We can see projected there, over a period of 5 years, exactly what are the requirements.

To a point, if you took the Secretary of the Army and had him list the requirements for the Army and add it up and project it out for 5 years; took the Navy, with all its ships, and projected it for 5 years; took the Air Force, with all its planes, weaponry, and missiles—strategic, tactical, fighter, and otherwise—and projected it out for the Marine Corps in a similar fashion, you would find, as we found in the Appropriations Committee or, more specifically, in the Budget Committee, that there is just not that much money in the world. There is no way. You could make many, many, many legitimate requests for our defense needs, but there is just not that kind of money available.

So you posture yourself in trying to follow priorities and looking at the real problem. What is the real problem? The real problem, in a sentence, is catch up ball. We almost got into this a moment ago, and I want to get into it. I am willing to debate that at length.

You just threw a red flag in this old bull's face when you talked about Soviet restraint. I have not seen it. Where was the restraint in Angola or in Afghanistan? They are restraining themselves into Poland and restraining themselves into Latin America. Do not tell me about their using restraint. That is the problem: There has been no restraint.

We went into SALT I in good faith; we set an example. We not only made and confirmed the treaty, but also, we entered into détente, and anything that disturbed the all-important relationship between the United States and Russia was looked upon as destabilizing, provocative.

Remember, when the Senator from New Hampshire stood here and the Senator from Mississippi—when the Senator from Mississippi was chairman of our Armed Services Committee—if you bought a piece of weaponry, that was going to be stabilized. We are coming into detente. Well, we "detented." We delayed for 10 years. Now we have all the inflating costs of weaponry and personnel.

So put yourself mentally as the Commander in Chief. That is what a Senator has to do. Of course, too many of them think they are already the Commander in Chief. [Laughter.] There are various problems from time to time. It is probably a good way to approach it.

Put yourself mentally as Commander in Chief, and you say, "What can I do?"

It is like the old woman who lived in a shoe: "I have too many children and don't know what to do. I have to take care of the social safety net. I have to try to balance the budget. I have to show some leadership in the inner cities with enterprise zones. I have to try to fill out all kinds of commitments. I have to balance the budget and increase defense and try to really reestablish the national security of the United States of America, so that we can compete not just militarily but economically and in foreign policy and in freedom."

We find the interconnection, the linkage, if you please. If you have a strong defense, you can work for a strong economy. If you have a strong economy, you have a strong people. You have a strong stand for world freedom, and thereby we can have peace.

Unfortunately, the events are about to overtake us.

We have the same thing that John F. Kennedy wrote, as a Harvard student, back in 1940, 40 years ago, when he entitled his book, "While England Slept." The premise there was that everybody was asking for disarmament on the Continent; that arms cause war, rather than prevent war. Neville Chamberlain went to Munich, representing England, responding to the majority view of the people.

Heavens, let that not happen in this land at this time.

However, playing mentally as Commander in Chief, is there any opportunity to get a fair jump forward? Can we really play catchup ball, or are we just going to plug along?

There will be that sector that talks about waste, fraud, and abuse; another group lets you have something for personnel; another will want to volunteer, and another group will want to draft. There will be all angles to contend with.

Looking at it in that regard and having worked with the 050 function since the beginning, 6 years ago, when I chaired the Task Force on National Defense, on our Budget Committee, and later chaired the committee—and now as the ranking minority member—I saw more clearly than anything else an opportunity, if you please, to take 40 billion bucks now, December 1981, and play catchup ball, to get ahead.

We could start getting even and get that head start that is so necessary in operation, maintenance, readiness, preparedness, the capability of our fighting forces.

(Mr. QUAYLE assumed the chair.)

Mr. HOLLINGS. The tragedy is that this amendment will be defeated. It will be defeated because the administration says to defeat it.

I know many on the other side of the aisle are of similar mind.

I go only to my distinguished chairman, and he will have plenty of time to state his view on this, but only a month ago on October 29 in the Washington Post I quote:

> Chairman Ted Stevens revealed that the Central Intelligence Agency had told the Senate Appropriations Subcommittee on Defense in a secret session yesterday morning that the existing B–52 bomber would do just about as well as the proposed B–1 in penetrating the Soviet Union with cruise missiles.
>
> Later Stevens said the CIA assessment given to the subcommittee yesterday morning hardened his opinion that it might make more sense to put the B–1 money into Stealth. The CIA assessed how B–52 and B–1 bombers laden with cruise missiles would do with Soviet defenses for the rest of this decade "There would be practically no difference," Stevens said of the penetration capability.

So what has occurred? We find that in reality we did not get that B–1 when the Senator from South Carolina wanted it. As a little aside, I know how the Air Force feels. They were trying to replace necessarily in procurement, in weaponry and everything else, the long-range strategic bomber. They were trying back in the 1960's to replace the B–52. Of course, we have come along with D's and then B–52G's and B–52H's. But in 1964 they had the B–70 that was cancelled by then-Secretary of Defense McNamara. That was a blow to them.

They came around again in another decade and they thought they had it on line and, as I told then-Commander in Chief President Carter who had written the book "Why Not the Best," let us go with the B–1. Why not the best? Now is the time. We have spent enough money. The plant was open. It was operating. We had several B–1 bombers and now was the time to move forward with production.

President Carter saw it otherwise and cancelled it. I would love to have had 100 B–1's or 200 B–1's right today.

But the plant has been closed down. It is out of operation. It is used for something else. The program was stopped. We wasted 5 years and $5 billion.

And now the $109 million B–1 has become a $400 million monstrosity.

And the Air Force at the time said, "Heavens, we have another one going. We had President Kennedy, we thought, and than it was cancelled by Secretary McNamara. We thought we had maybe President Carter. He was a military naval Annapolis graduate, and he cancelled the B–1. Now we are going to have the B–1B come along and we have a President to go along and here comes Congress and they are going to cancel it. When will we ever get a replacement?"

So the full court press is taking place in the last 6 weeks on Capitol Hill and everyone is looking. There are those who called the B–1 a turkey. It is not. It is an excellent airplane that can do many, many things. It is not a turkey or it is not a buzzard. If we could get one for $100 million, we would have a bargain. We would move forward on it. But to buy it for its primary role and mission as a penetrating bomber when it will be obsoleted within 3 years because with this delay—we are into December, when we use 1986 as an IOC, it was an Octo-

ber 1986 date, so that brings us down really to the first part of 1987—makes no sense. It is obsoleted in 3 years, 1987, 1988, and 1989. To have that obsoleted instrumentality that costs some $400 million makes one as a reasonably sane and prudent legislator, stop, look and listen.
